Voice-Powered Wired Handset and Headsets

Handset

Over-Head Headset

Behind-Head Headset

Clip Adapter

Build a communication system that uses your voice as its power source. To create a basic system, you'll need two handsets or headsets and a cable.

Handset has a push-to-talk button and a 4½-ft. cord. Made of ABS plastic.

Headsets have a steel headband, a microphone, and a 2½-ft. cord. Ear cups are made of ABS plastic with vinyl-covered foam cushions. *Over-head* style has a noise reduction rating of 16 dB. *Behind-head* style can be worn under a hard hat. It has a noise reduction rating of 19 dB. For information about noise reduction ratings, see page 1823.

Optional amplifier for headsets boosts the volume level, so it's easier to hear in noisy areas. It operates on one 9-volt battery (included).

Cables have a ¼″ jack at each end. ***Extension cables*** have a ¼″ jack at one end and a ¼″ plug on the other.

Clip adapter lets you temporarily connect to two wires, so you don't have to install a wall plate jack. It has a ¼″ jack at one end and two PVC-insulated alligator clips at the other.

Use the ***wall plate jack*** and ***wall plate cable*** (sold separately) to create a fixed system between locations. Just plug a handset or headset into the wall plate jack and start talking.

Two-Way Radios

All of these two-way radios operate on FCC designated business frequencies and require an FCC license. They are compatible with most brands of two-way radios. Special circuitry eliminates interference so you can communicate clearly.

Radios have a black polycarbonate housing. They come with a belt clip, a rechargeable lithium ion battery, and a charger that has a 6-ft. cord with a two-prong plug.

Optional *six-unit desktop chargers* allow you to charge multiple radios at the same time. *Optional remote speaker/microphone* lets you use the radio without unclipping it from your belt.

	Flat Ground No Obstructions	Steel/Concrete Industrial Buildings	Multi-Level Buildings
UHF—*Offers greater coverage in steel/concrete structures*			
1 Watt	Up to 5 miles	Up to 200,000 sq. ft.	Up to 15 floors
2 Watt	Up to 6 miles	Up to 250,000 sq. ft.	Up to 20 floors
4 Watt	Up to 6 miles	Up to 350,000 sq. ft.	Up to 30 floors
VHF—*Works best in and around wood structures*			
2 Watt	Up to 6 miles	Up to 220,000 sq. ft.	Up to 13 floors
5 Watt	Up to 6 miles	Up to 300,000 sq. ft.	Up to 18 floors

Radios

One-watt radios have an LCD for programming frequencies and codes. They come with a 3-hour charger. Size is 4⅛″ Ht. × 2″ Wd. × 1⅛″ Dp.

Two-watt radios have a voice scramble mode for increased privacy. They come with a 7-hour charger. Size is 4½″ Ht. × 2⅛″ Wd. × 1⅜″ Dp. Meet MIL-STD 810 for resistance to shock, vibration, dust, and moisture. The *8-channel* model has an LCD for programming frequencies.

One-Watt Radio

FRS/GMRS Two-Way Radio

For easy, effective communication, use this FRS (Family Radio Service)/GMRS (General Mobile Radio Service) radio. It has 22 channels and a range of up to 16 miles. Special circuitry eliminates interference. *Note:* Radio requires an FCC license. It won't work on FCC designated business frequencies and is not intended for commercial business use. Do not use with other two-way radios.

Radio has a back-lit LCD, a battery life indicator, a polycarbonate housing, and a removable swivel belt clip. It measures 6½″ Ht. × 2¼″ Wd. × 1⅜″ Dp. Power is ½ watt for FRS; 1 watt for GMRS. It runs on three AA batteries (sold separately).

Optional *remote speaker/microphone* lets you use the radio without unclipping it from your belt. Optional *two-unit desktop charger* charges up to two radios and includes a charging adapter and two rechargeable NiMH batteries.

CB Radios

Standard CB Radio

High-Performance CB Radio

Magnetic Mount Antenna

Bar Clamp Mount Antennas

Transmit a loud, clear message using these four-watt 40-channel CB radios up to four miles away. CBs have an LED channel display, on/off volume knob, squelch control, and a microphone with a 2-ft. coiled cord (standard extends to 4½ ft.; high performance extends to 9 ft.). They operate on 12 VDC. CBs use a nonbusiness designated frequency, so an FCC license isn't required.

Standard radio has an ABS plastic housing. Size is 1⅞″ Ht. × 4½″ Wd. × 7⅛″ Dp.

High-performance radio has an illuminated signal strength display, an RF (radio frequency) knob to adjust signal and reception, and a microphone knob to control amplification and volume. It has an aluminum housing. Size is 2⅛″ Ht. × 6¼″ Wd. × 10¼″ Dp.

Antennas have a fiberglass rod and mount on the outside of your vehicle for better reception (mounting hardware included).

Voice Over Internet Protocol (VoIP) Telephones

Stand Alone

Computer-Connected Compact

Rather than racking up a bill, use these telephones to place calls over the Internet. Both are made of plastic and include a cord.

Stand-alone desk telephone plugs into your LAN (local area network) or WAN (wide area network) system—no need to connect to a computer. It works with most common VoIP systems and complies with Session Initiation Protocol (SIP). Program up to 10 speed-dial numbers and 50 phone-book entries. Phone records call history. It is gray and measures 7½″ Lg. × 9″ Wd. × 4¼″ Ht.

Computer-connected compact telephone plugs into a USB port on your computer and works with Skype, MSN Messenger, and Yahoo! Messenger. Phone is compatible with Windows 2000, XP, and Vista operating systems. It is black and measures 6″ Lg. × 1¾″ Wd. × 1″ Ht. Carrying case included.

		Each
Stand-Alone Desk Telephone	**1664T1**	$118.60
Computer-Connected Compact Telephone	**1664T2**	35.49

Cordless Telephones

You'll get portable convenience and reliable performance from these single-line cordless telephones. They're made of plastic and have volume control. Phones are powered by a rechargeable NiCad battery (included). Battery charger operates on 120 VAC, 60 Hz and has a 6-ft. cord with a two-prong plug.

1.9 GHz telephone is a DECT (Digital Enhanced Cordless Telecommunications) phone. It won't experience interference with any devices including wireless computer networks. Use up to 12 handsets with a single phone line. ***2.4 GHz telephone*** can be wall mounted using the included bracket and fasteners.

Frequency	Caller ID	Lg. × Wd. × Ht.	Color		Each
Telephones					
1.9 GHz	Yes	4¾″ × 3½″ × 2″	Silver/Black	**4077T4**	$34.51

Headset for 4077T17				**58575T42**	10.33

Conference Telephone

Other speakerphones echo and cut out, but this unit provides free-flowing conversation with off-site colleagues. It receives and transmits signals simultaneously so calls never sound choppy.

Phone features three built-in microphones for 360° room coverage, built-in noise reduction circuitry, and volume control. It also has a jack for an external recording device (not included). The dial pad includes redial, mute, transfer, and hold buttons. Connects to any standard phone line. Size is 14½″ Lg. × 12¼″ Wd. × 2½″ Ht. Housing is black plastic.

5034T11 ..... **Each** $543.34

Heavy Duty Plant Telephones

Indoor with Polyester Cord

Outdoor with Armored Cord

The glass-reinforced polyester surrounding these phones equips them to resist dirt, moisture, extreme temperatures, and corrosives. Phones have volume control, a sealed keypad, and a background noise-canceling device. All have four 0.28″ dia. mounting holes (mounting hardware not included).

Outdoor telephones are rated NEMA 3R for protection against falling liquids and light splashing.

Standard telephones are gray and UL listed. Choose from models with a 6-ft. retractable polyester cord and with a 15″ stainless steel armored cord. Armored cords have a pull strength three times greater than retractable polyester cords to deter vandalism.

Hazardous-location telephone is blue and meets UL and CSA specifications for Class I, Div. 2, Groups A, B, C, and D; Class II, Div. 2, Groups F and G; and Class III. It comes with a 6-ft. retractable polyester cord.

Call Boxes

Create a line of communication from a remote location such as a parking lot or security gate. Just press the button to automatically call a programmed number over a standard phone line. If the first programmed number is busy, the box calls a second number. Each box has its own phone number, so you can initiate calls to the call box using a regular touch-tone phone.

Boxes have an RJ-11 jack. They are made of stainless steel and have vandal-resistant screws to secure the faceplate to the box. Size is 9 15/16″ Ht. × 6 13/16″ Wd. × 2 7/8″ Dp. Mount indoors and out using four 1/4″ dia. mounting holes (screws not included). Temperature range is –4° to +149° F. Boxes have Braille and cast metal raised lettering to help comply with ADA requirements. CSA certified for outdoor use.

Emergency call box is marked with the word EMERGENCY in red lettering.

Emergency	56865T1	$634.27
To Call	56865T2	634.27

Background Noise-Canceling Devices

Even if you're calling from a noisy area, these devices ensure you'll be heard clearly. Just unscrew your current voice transmitter and replace it with one of these. Made of plastic.

Color		Each
Black	8400T3	$52.94
Ivory	8400T32	52.94
Beige	8400T34	52.94

Telephone Signal Relay

Connect this easy-to-use relay to your phone and a light (or other signaling device) and it flashes the light on and off when the phone rings. Relay plugs into a two-prong outlet and accepts a two-prong plug. It operates on 120 VAC, 50/60 Hz and draws 0.1 amps. It's made of ABS plastic and includes a 6-ft. phone cord. Color is white. UL listed.

Note: For use with single-line analog phones only.

58015T12 ..... **Each** $32.25

Handset Cord Tangle Preventers

Tangle Preventer

Tangle Preventer with Cord

Attach these tangle preventers to your handset and cord—they allow the handset to rotate freely so the cord won't get tangled. Made of PVC.

Color	Without Cord	Each	With 12-ft. Cord	Each	With 25-ft. Cord	Each

White	59085T78	6.16	59085T811	11.35	59085T821	12.63

Telephone Handset Holders

Leave your hands free while you talk. Made of PVC, these adhesive-backed holders adjust for use on either shoulder and provide nonslip support for the handset.

Color		Each
Black	1731T34	$10.44
Ivory	1731T32	10.44
White	1731T33	10.44

Telephone Volume Amplifier

Don't let background noise drown out your conversation. This device allows you to increase and adjust the volume of your telephone receiver. It plugs into your telephone and handset and is compatible with both single and multi-line telephones. Operates on one 9-volt battery (included). Made of plastic. Color is white.

59635T18 ..... **Each** $31.68

Telephone Surge Suppressor

Protect your telephone, answering machine, and other phone equipment from transient voltage surges. This easy-to-install surge suppressor plugs into a three-prong outlet, and comes with a 6-ft cord with an RJ-11 plug on the end to attach to the device you want to protect. Made of plastic. Color is ivory. UL listed.

1716T5 ..... **Each** $39.45

Telephone Signals

Mount these signals up to 25 ft. away from your phone and they'll alert you when it rings. All have RJ-11 jacks. Use a straight-line telephone cord (sold separately on page 1856) to connect the signal to your phone. If you have a single wall jack, add a duplex adapter (sold separately). No other connections necessary, unless noted.

Bell— Produces 95 dB at 3 ft., but has volume control so you can adjust loudness. Bell can be hardwired to your telephone ringer signal. It has two 1/2″ knockouts. Made of aluminum mounted on an aluminum electrical box. For indoor and outdoor use. UL listed.

120 VAC Bell— Decibel level is 98 dB at 10 ft. Bell has a 6-ft. cord with a three-prong plug for connection with a 120 VAC, 60 Hz outlet. It has two 1/4″ dia. mounting holes (screws not included). Made of steel mounted on a die cast aluminum electrical box. For indoor use. UL listed.

Strobe Light— Has a 15 candela strobe that flashes whenever someone calls. Signal has a 6-ft. cord with a two-prong plug for connection with a 115 VAC, 60 Hz outlet. It's made of plastic. For indoor use. Mounting screws included. UL listed.

Multitone Signals— Each offers four tones: bell, horn, vibrating chime, and single chime. Choose a tone and program your signal accordingly. Signals can be hardwired to your telephone ringer signal. Both models have two 1/2″ knockouts and include mounting screws. Made of plastic. For indoor and outdoor use. Not for use with digital phones. UL listed.

Standard Multitone—Decibel levels are 100 dB at 3 ft. for the bell tone, 108 dB for the horn tone, and 96 dB for the vibrating and single chime tones.

Multitone with Strobe Light—Provides a signal you can see and hear. Signal has a 15 candela strobe. It must also be hardwired to a 115 VAC, 60 Hz power supply. Decibel levels are 104 dB at 3 ft. for the bell tone, 109 dB for the horn tone, and 94 dB for the vibrating and single chime tones.

Weatherproof Telephone Enclosures

Protect your telephones from water, dust, corrosion, and extreme weather with these glass-reinforced polyester enclosures. They're rated NEMA 4X for washdown and corrosion protection.

Inside, enclosures have a mounting plate for a wall telephone (telephone not included). Inside dimensions are 11½″ Ht. × 7¾″ Wd. × 8″ Dp.; outside dimensions are 14⅝″ Ht. × 10⅞″ Wd. × 10½″ Dp. Enclosures have four 7/16″ dia. mounting holes (mounting hardware not included). Color is gray. For indoor and outdoor use.

Enclosure with locking door comes with a lock and key for added security.

Pole-mounting kit lets you mount the enclosure on 2½″ to 15″ dia. poles.

Telephone Privacy Booths

Particleboard

Steel

Have a private conversation, protected by these booths. For indoor use.

Particleboard booth can accommodate a pay phone or a handset phone. It has a dark oak woodgrain melamine surface, and directory storage slot. Mounting brackets included.

Steel booth accommodates a handset phone. Made of 16-ga. steel, it has a perforated interior backed with a sound-absorbing material. Booth has a gray enamel finish. Mounting hardware included.

Material	Ht. × Wd. × Dp.		Each
Particleboard	31¾″ × 23¾″ × 11¼″	**4877T2**	$194.06
Steel	30″ × 28″ × 26″	**4877T11**	611.11

Industrial Ethernet Switches

8653T2

8653T3

8653T7

8653T6

A rugged metal housing protects these switches, plus they work in a wide range of temperatures, so they're able to take on demanding industrial applications. Switches let you add new devices and connect existing PCs, printers, and servers for sharing and transferring files. They're unmanaged, so connected devices communicate without any switch programming. Profinet compatible. For use in fast Ethernet networks (100 Mbps), except 8653T2, which has a transmission speed up to 1000 Mbps.

DIN-rail mount switches conveniently mount on 35 mm DIN rail. They have screw clamp terminal block connections for power input and RJ-45 output ports. 8653T3 and T7 are UL listed.

Need to locally control your switch? Choose the *10-port* model—it can be programmed using its USB port to allow simple local management.

Washdown switch is IP67 rated, so it's great in washdown environments where switches can't be mounted inside a cabinet. Switch has single keyway four-pole ports with a 0.3″ face dia. and M12 × 1 threads. Power input port is male with external threads. See 6897K36 on page 775 for a compatible multipole connector with cable. Output ports are female with internal threads and are D-coded. For compatible cord, see 8346T on page 1862.

Ethernet Switches

5 Ports

Expand your network. These switches let you add new devices and connect existing PCs, printers, and servers for sharing and transferring files. Switches are unmanaged, so connected devices communicate without any switch programming. All have RJ-45 ports and a metal housing. CE approved.

Fast Ethernet switches are also UL and C-UL listed. The *5-* and *8-port switches* operate on 60 Hz and have a 5-ft. cord with a two-prong plug (unless noted). The *16-* and *24-port switches* operate on 50/60 Hz and have a 6-ft. cord with a three-prong plug.

Gigabit Ethernet switches operate on 60 Hz and have a 6-ft. cord with a two-prong plug.

8	100-240 VAC	1 5/16″ × 5½″ × 5½″	**3787T3**	120.37

★Has a 6-ft. cord.

Rack-Mount Ethernet Switches

16 Ports

If your business is growing, don't let your network hold you back. These switches let you add new devices and connect existing PCs, printers, and servers for sharing and transferring files. Plus, they segregate signals based on speed, which can speed up network access. Mount them on 19″ wide electronics racks using the included brackets and screws.

For use in fast Ethernet networks (100 Mbps). Switches are unmanaged, so connected devices communicate without any switch programming. They have RJ-45 ports and a metal housing. Both have a 6-ft. cord with a three-prong plug and operate on 50/60 Hz. CE approved.

No. of Ports	Volts	Ht. × Wd. × Dp.		Each
16	100-240 VAC	1¾″ × 17⅜″ × 4¾″	**8726T1**	$84.29
24	100-240 VAC	1¾″ × 17⅜″ × 4¾″	**8726T2**	112.86

Industrial Power Over Ethernet (PoE) Switches and Splitter

8634T1

8634T2

8634T4

Switches provide 48 VDC power over a fast Ethernet network (100 Mbps) to run your network components such as cameras, routers, and sensors. These switches also let you add new devices to your network just like our other Ethernet switches. They're unmanaged, so connected devices communicate without any switch programming. Both have a rugged metal housing and a wide operating temperature range, so they can handle demanding industrial applications. Mount on a wall or 35 mm DIN rail for added convenience. Switches have screw clamp terminal block connections for input power and an RJ-45 input port. They send power out through four RJ-45 ports for connections to PoE devices (15.4 watts per port). Switches also have one RJ-45 port without power. CE approved. 8634T2 is also UL and C-UL listed.

Splitter separates voltage from data. Instead of running another power cable, use the splitter to power a nearby 24 VDC device that has separate power and data inputs. For use with a Gigabit Ethernet network (1000 Mbps). Splitter receives data and power through an RJ-45 port; it sends data through an RJ-45 port and has a screw clamp terminal block for power output (output is 24 VDC and 13 watts). It has a metal housing. UL and C-UL listed, CE approved.

No. of Ports	Volts	Ht. × Wd. × Dp.	Temp. Range		Each
Switches					
5	48 VDC	4¼″ × 6½″ × 1⅜″	–4° F to +158° F	**8634T1**	$270.18
5	24/48 VDC	5½″ × 1⅝″ × 3¾″	14° F to 140° F	**8634T2**	400.00
Splitter					
—	48 VAC	5½″ × 1⅝″ × 3¾″	–40° F to +167° F	**8634T4**	145.16

Wireless Transmitters and Receivers for Sensors

Transmitters

Send data to a wireless receiver using one of our transmitters—just connect it to your sensor output. Transmitters operate at 418 MHz and have a transmission rate of 10 to 17 seconds at a range of up to 600 ft. They have screw clamp terminals for power input, plus a sealed encased battery that lasts up to five years. Up to 100 transmitters can send signals to a single receiver. All have a water-resistant coating and can be used in temperatures ranging from –40° to +185° F.

For Sensor Output		Each
Up to 5 VDC	1193T11	$165.00
Up to 10 VDC	1193T13	165.00
Up to 20 mA	1193T15	165.00

Repeater

Extend the transmission range of your wireless transmitter up to 1300 ft. indoors and up to seven miles outdoors. It receives 418 MHz from up to 600 ft. and transmits at 900 MHz. Works with 1194T16. Repeater operates on 120 VAC and includes a 6-ft. cord with a two-prong plug. Temperature range is 32° to 158° F.

1198T11 ..... Each $464.50

Receivers

Collect data sent by transmitters. These receivers connect to your PC so you can access, display, manipulate, analyze, and store information as you please. They receive at 418 MHz (unless noted) and accept signals from up to 100 transmitters. Receivers operate on 120 VAC, 60 Hz and have a 6-ft. cord with a two-prong plug, unless otherwise indicated. Temperature range is 32° to 158° F.

Standard receivers include computer software compatible with Windows 98, ME, NT, 2000, and XP. 1194T11 is powered by your serial port, so it doesn't come with a cord.

Data-logging/web-enabled receivers store the data and allow you to retrieve it over the Internet. They have internal memory for data storage.

Interface Type	Input Ports	Range		Each
Standard				
RS-232	DB-9	600 ft.	1194T11	$340.33
RS-232/RS-422	DB-9	600 ft.	1194T13	407.26
Data Logging/Web Enabled				
RS-232/Ethernet	DB-9/RJ-45	900 ft.	1194T15	520.00
RS-232/Ethernet	DB-9/RJ-45	3 miles	1194T16●	560.00

● Reception frequency is 900 MHz.

Wireless USB to VGA Transmitter/Receiver

Connect your computer to a display monitor up to 30 ft. away without a tangle of long cables. You'll get a transmitter and receiver that communicate wirelessly and are compatible with Windows XP and Mac OS. Plug the transmitter into your computer's USB port, then connect your display device into the VGA receiver's HD15 female port. Transmission frequency is 6.3-7.9 GHz. Supports video resolutions up to 1680×1050. Receiver operates on 120 VAC, 50/60 Hz and includes a 4-ft. cord with a two-prong plug. Both components have a plastic housing.

8532T4 ..... Each $159.80

USB Extender

Limited by the length of your USB cord? You can stay connected to a USB device up to 150 ft. away from your computer with help from this extender. Made of plastic, it consists of a transmitter and receiver.

To use, connect the transmitter to your computer's USB port. Insert a Category 5E or Category 6 cord (sold separately, see page 1862) into the transmitter and receiver's RJ-45 ports. Finally, plug your device into the receiver's USB Type A female port.

8560T1 ..... Each $48.57

Keyboard, Video, and Mouse (KVM) Switches and Extender

PS/2 Switch

Extender

USB Switch (Shown with Combination Cord—Four Included)

Switches—Control up to four computers with a single keyboard, mouse, and monitor by adding one of these switches to your network. Video ports are HD15 female.

8551T3 has PS/2 connections for a computer, keyboard, and mouse. Compatible with Windows ME, NT, 2000, 2003, and XP (no software required). Switch supports video resolutions up to 2048×1536. 8551T1 connects to your computer's USB port and includes four combination cords for all USB and HD15 connections. Compatible with Windows 98, 98SE, ME, 2000, XP, and Vista (software included). Switch supports video resolutions up to 2048×1536. It operates on 100-240 VAC, 50/60 Hz and comes with a 5-ft. cord with a two-prong plug.

Extender—Made up of a transmitter and receiver, this device lets you maintain control of your computer from as far as 230 ft. away. It supports video resolutions up to 1600×1200. Plug the transmitter into your computer's USB port and HD15 port. Then, connect the transmitter to the receiver using a Category 5E or Category 6 cord with RJ-45 plugs (sold separately, see page 1862). Finally, connect your keyboard, mouse, and monitor to the receiver. Receiver operates on 110-240 VAC, 50/60 Hz and has a 6-ft. cord with a two-prong plug.

Keyboard/Mouse Connections	Video Connections	Lg.×Wd.×Ht.		Each
Switches				
PS/2	HD15 Female	7⅛″×4¼″×⅞″	8551T3	$59.42
USB	HD15 Male	14¾″×9½″×3¼″	8551T4	138.94
Extender				
PS/2	HD15 Female	3½″×1¾″×⅞″	8551T2	282.01

Power Over Ethernet (PoE) Injector and Splitter

Injector

Splitter

Use our injector and splitter to transmit power and data over a fast Ethernet network (100 Mbps). Made of plastic. UL and C-UL listed; CE approved.

Injector sends data and power to a PoE device (such as a camera). It has RJ-45 ports, a 6-ft. cord with a three-prong plug, and operates on 100-240 VAC, 50/60 Hz.

Splitter separates power and data for devices (such as an IP telephone or a wireless access point) that have separate power and data inputs. It operates on 48 VDC, and has RJ-45 ports and an adjustable output of 5/7.5/9/12 VDC. Splitter includes two 5½-ft. power output cables. One has a 2 mm plug and the other has a 2.5 mm plug.

		Each
Injector	8595T2	$67.72
Splitter	8595T1	29.44

DIN-Rail Mount Ethernet Surge Suppressor

When voltage spikes, this surge suppressor protects your data network equipment from damage. It easily mounts to 35 mm DIN rail. It has RJ-45 ports. Made of ABS plastic. Temperature range is –40° to +185° F.

8619T1 ..... Each $104.03

Video Signal Splitters/Extenders

Video (8508T1)

Video and Audio

You can't be in two places at once, but your video can. These splitters/extenders distribute video to multiple monitors. Each monitor can be up to 210 ft. from the source of the signal using video monitor cords (sold separately, see page 1868). Splitters/extenders have HD15 female video output ports and work with any system that has an HD15 VGA video card. They operate on 120 VAC, 60 Hz and have a 6-ft. cord with a two-prong plug. Housing is metal.

Video models have an HD15 male video input. They support video resolutions up to 1920×1440.

Video and audio model has an HD15 female video input, and 3.5 mm mini-stereo jacks for audio input and output. It supports video resolutions up to 2048×1536.

No. of Output Ports Video	Audio	Lg.×Wd.×Ht.		Each
Video				
2	–	7¼″×3¼″×¾″	**8508T1**	$48.76
4	–	7¼″×3¼″×¾″	**8508T2**	73.04
Video and Audio				
2	2	5⅛″×3″×1⅝″	**8508T3**	69.71

Coaxial-to-Data Cable Adapters

Video (8447T1)

Video, Power, and Data

Now you can send video signals to a display without adding long coaxial cables. Also known as baluns, these adapters transmit the video signal over your existing data cable network.

You'll need two adapters—connect one to your device (such as a video camera) and the other to the display. Then connect the adapters to each other using the unshielded twisted pair cable (such as Category 5E) in your existing network. Adapters are made of plastic and have a spring clamp terminal for power input. UL listed and CE approved.

Video adapters transmit signals up to 750 ft. They have screw terminal connections for connecting to your data cable.

Video, power, and data adapter transmits signals up to 984 ft. Adapter has an RJ-45 port for connecting to your data cable, and has a 10″ coaxial cable for sending video. It has four spring clamp terminals—two for power and two for data. You can also connect the adapter to a 24-VAC/VDC power transformer to send power over the twisted pair cable to your device.

Coaxial Connector		Each
Video		
BNC Female	**8447T1**	$44.29
BNC Male	**8447T2**	44.29
Video, Power, and Data		
BNC Male	**8447T3**	54.29

HDMI Digital Video/Audio Hubs

If your monitor doesn't have enough input ports to accommodate all your HDMI devices, these hubs can help. Each hub has an HDMI output port that connects to your monitor, plus several HDMI input ports that connect to your devices. Hubs operate on 100-240 VAC, 50/60 Hz and have a 6-ft. cord with a two-prong plug. They support video resolutions up to 1920×1080. Both have a metal housing and come with a remote control.

No. of Input Ports	Lg.×Wd.×Ht.		Each
4	8¾″×2¾″×1¼″	**8497T1**	$93.55
6	8¾″×2¾″×1¼″	**8497T3**	95.34

HDMI Digital Video Signal Amplifier

Display your video on an HDMI screen far away from the video signal's source. This amplifier extends the signal up to 200 ft. It consists of a transmitter and receiver; both components have an HDMI female port to connect to the source and screen. Use two Category 5E unshielded patch cords with RJ-45 plugs (sold separately, see page 1862) to connect the transmitter to the receiver.

Amplifier supports video resolutions of 1280×720 and 1920×1080. Transmitter and receiver have a metal housing. Receiver operates on 100-240 VAC, 50/60 Hz and has a 6-ft. cord with a two-prong plug.

8504T1 ..... **Each** $161.57

Power, Telephone, and Data Service Poles

When you can't work near a wall, these poles bring overhead wiring lines down within reach. Poles are internally divided to accommodate power circuits and receptacles on one side, and telephone and data communication circuits on the other side.

Poles have a variety of knockouts and twistouts to allow easy access for wiring. Each has four NEMA 5-20 style receptacles rated 20 amps @ 120 VAC (see page 787 for information about NEMA receptacles). The center of the bottom duplex receptacle is 16⅞″ from the floor, and the center of the top duplex receptacle is 21⅛″ from the floor. Mount vertically in rooms with ceilings up to 10-ft. high—no floor drilling or carpet cutting necessary. Poles come with carpet/floor grippers, ceiling trim plates, feed fittings, and t-bar mounting hardware. Size is 2¼″ Wd.×2 5/16″ Dp. UL listed.

Steel pole is ivory. *Anodized aluminum* pole is silver.

		Each
Steel	**72135K42**	$171.00
Anodized Aluminum	**72135K44**	250.00

Wi-Fi Antennas

Transmit and receive signals for your 802.11 b/g Wi-Fi applications with these antennas. Impedance is 50 ohms. SMA connections have normal polarity, unless noted.

(A) Omnidirectional antennas work with a variety of wireless systems, including video surveillance applications. Surface mount using the included mounting bracket, which has four ¼″ dia. mounting holes (fasteners not included), or mount on poles up to 2″ OD using included mounting hardware.

(B) Omnidirectional portable device antennas can be bent as much as 90°.

(C) Directional antenna has a 6″ coaxial cord. Surface mount using the included tape with adhesive on both sides.

(D) Directional antenna has two ⅜″ dia. mounting holes for surface mounting (screws not included).

(E) Directional antennas include mounting hardware to mount on poles up to 2″ OD.

	Gain, dBi	Frequency Range	Max. Watts	O'all Size	Connection		Each

★ Reverse polarity.

Cellular Phone Antennas

Get better cell phone reception where you need it with these compact antennas. They transmit and receive common U.S. cell phone signals, and easily mount to vehicles, containers, and walls. Impedance is 50 ohms.

Multiband antennas can handle a wide range of frequencies. They work with all U.S. cell phone signals, including Nextel. *Surface-mount* model has a 1-ft. RG-58 coaxial cord. It requires a 5⁄8″ dia. mounting hole (mounting hardware included). *Magnetic-mount* model has a 10-ft. RG-58 coaxial cord.

Dual band/low profile antenna has a sleek design, so it stays out of sight. Surface mount using included clip and screws, or mount directly using included tape with adhesive on both sides. Does not work with Nextel cellular service. It has an 8-ft. RG-174 coaxial cord.

Surface Mount *Magnetic Mount*

Dual Band/ Low Profile

	Gain, dBi	Frequency Range	Max. Watts	O'all Size	Connection		Each
Multiband							
Surface Mount	3/5	750-1250 MHz/1650-2700 MHz	10	3″ Ht. × 1¾″ Dia.	SMA Male	8373K12	$67.92
Magnetic Mount	3/5	750-1250 MHz/1650-2700 MHz	10	3⅝″ Ht. × 2⅝″ Dia.	SMA Male	8373K13	94.34
Dual Band/Low Profile

Cellular Phone Signal Amplifier and Antennas

Improve cellular performance in small office environments. To boost signal, you'll need an amplifier, an outdoor antenna, and an indoor antenna. Amplifier works with your existing antennas as well as the ones sold here. Impedance is 50 ohms.

Amplifier brings you better reception wherever you are. It works with all cellular carriers in the U.S. except Nextel. To use, connect coaxial cords (sold separately) to the amplifier's N female connections, then connect the coaxial cords to your antennas. Amplifier operates on 100-240 VAC; 50/60 Hz and has a 6-ft. cord with a two-prong plug. Surface mount using four ⅜″ dia. mounting holes (hardware not included).

Antennas work with all cellular carriers in the U.S. and are omnidirectional. *Outdoor antenna* mounts to a pole or wall (bracket and hardware included). It has an FME female connection. FME male to N female coupling sold separately. *Indoor antennas* have an N female connection and mount to the ceiling (8367T3 can also be wall mounted). Mounting fasteners included.

	Gain	Frequency Range	Max. Watts	O'all Size		Each
Amplifier	55 dB/60 dB	824-894 MHz/1850-1990 MHz	3	4¼″ Ht. × 5¾″ Wd. × 1½″ Dp.	8367T1	$333.77
Outdoor Antenna	5.1 dBi/6.1 dBi	806-894 MHz/1850-1990 MHz	25	1″ Dia. × 18″ Ht.	8367T2	83.56
Indoor Antenna	2.5 dBi/2.5 dBi	800-910 MHz/1800-1990 MHz	50	8″ Dia. × 8″ Dp.	8367T4	63.40
Indoor Antenna	5.2 dBi	800-900 MHz	50	7¾″ Dia. × 8″ Dp.	8367T3	63.40
10-ft. N Male to N Male Coaxial Cord					8367T72	39.80
50-ft. N Male to N Male Coaxial Cord					8367T73	89.18
FME Male to N Female Coupling					8367T31	7.34

GPS Antennas

Compact and easy to mount, these antennas receive GPS signals. Impedance is 50 ohms.

Magnetic-mount antenna effortlessly sticks to the roof or trunk of your car. It has a 10-ft. RG-174 coaxial cord.

Surface-mount antenna requires a 5⁄8″ dia. hole for secure mounting (hardware included). It has a 15-ft. RG-174 coaxial cord.

Magnet Mount

Surface Mount

	Gain, dBi	Frequency	O'all Size	Connection	Black Each	White Each
Magnetic Mount	5	1575 MHz	9⁄16″ Ht. × 2″ Wd. × 1¾″ Dp.	SMA Male	8330K11 $51.51	8330K12 $46.51

HDTV Antennas

Antenna with 30 Mile Range and Mounting Kit (Sold Separately)

Antenna with 60 Mile Range (Mast Not Included)

Receive both VHF and UHF HDTV signals for channels 2-69 with these antennas. They operate on 54-806 MHz frequencies and have an impedance of 75 ohms. Connect them with RG-6 coaxial cable and F-type connectors (see page 1859). Antennas fit masts up to 2″ dia.

Antenna with 30 mile range mounts to a mast or a flat surface using the included bracket. Gain is 15.5 dBi. Size is 2¾″ Ht. × 6″ Wd. × 46″ Dp. Optional *mounting kit* includes a 22″ long aluminum pipe and mounting hardware for direct mounting on a roof or wall.

Antenna with 60 mile range mounts to a mast using the included hardware (mast not included). Gain is 9.2 dBi for channels 2-6, 13.4 dBi for channels 7-13, and 14.4 dBi for channels 14-69. Size is 2′2″ Ht. × 9′2″ Wd. × 10′11″ Dp. Use the optional *signal amplifier* to boost the signal when there are long runs of coaxial cable (greater than 100 ft.) or when connecting multiple televisions. Amplifier mounts to a mast using the included mounting hardware. Gain is 17 dB for VHF and 19 dB for UHF. Connect using F-type connectors.

		Each
Antenna with 30 Mile Range	7470K1	$63.69
Antenna with 60 Mile Range	7470K2	148.54
Mounting Kit for 30 Mile Range Antenna	7470K4	13.05
Signal Amplifier for 60 Mile Range Antenna	7470K3	52.83

Antenna Mounts

Tripod

Nonpenetrating Tripod with Mast

Wall-Mount Brackets

Use these mounts to hold your antennas in place.

Tripod is 3 ft. high and made of 18-ga., 1¼″ dia. steel tubing. It fits antenna masts up to 1¾″ dia. Legs adjust to fit angled or flat roofs. Each leg has three ⅜″ dia. mounting holes (mounting hardware not included).

Nonpenetrating tripod with mast mounts on a flat roof—no mounting holes required. Standard-sized concrete blocks fit into the frame to anchor it in place. Tripod is 3 ft. high with a 5-ft. metal mast. Tripod and mast are made of 18-ga., 1¼″ dia. steel tubing. Frame is 12-ga. steel.

Mast is 5 ft. high and made of 16-ga., 1¼″ dia. steel tubing.

Tar pads are used under tripod mounting feet to seal against moisture (mounting screws included).

Wall-mount brackets accept masts with diameters up to 1¾″. A mounted mast sits 4″ away from the surface. Mounting hardware is included. Brackets are made of 12-ga. galvanized steel.

		Each
Tripod	9601K1	$29.36
Nonpenetrating Tripod with Mast	9601K2	71.82
Mast	9601K3	11.91
Tar Pads (3/Pkg.)	9601K5	Per Pkg. $2.73
Wall-Mount Brackets (2/Pkg.)	9601K4	Per Pkg. $7.45

About Telecom Plugs and Jacks

RJ Number— Plugs and jacks usually have an RJ (Registered Jack) number that describes the connector and its wiring. RJ numbers represent a standard for connecting telecommunication equipment.

No. of Wires— When referenced with telecom plugs, this identifies how many wires are in the plug. When referenced with connectors, it identifies the number of wires in a plug that will fit into the connector.

Plug Wd.	RJ Number	No. of Wires	Main Application
3/8″	RJ-11	4	Single-line telephone
3/8″	RJ-12/RJ-25	6	Multi-line telephone
7/16″	RJ-45	8	Multi-line telephone; Category rated RJ-45 are used in high-speed data systems.
9/32″	_____	4	Telephone handsets

Telecom Cords

All are UL listed. **To Order:** Please specify color where necessary.

Coiled handset cords connect the handset to the telephone base. Cords are 32 ga. Length listed is the extended length. For indoor use.

Straight-line cords connect the telephone base to the wall jack. Cords are 28 ga. For indoor use.

Indoor/outdoor cords connect the terminal block to the wall jack. Both styles are 22-ga. solid round cord.

Telecom Jacks, Plugs, and Connectors

All styles are made of plastic and include mounting screws where needed. Color is ivory (unless noted). UL listed.

Jacks

Screw Terminals

110 Punch-Down Terminals

Styles G-L fit a standard electrical box. Style L connects a wall phone into a jack.

Styles M-P connect to the existing connecting block for installation.

Styles Q and ***R*** adapt a connecting block to a surface jack.

Jack Style	Electrical Connection	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.

Corrosion-Resistant Telecom Jacks

Surface Mount

Double Floor

Wall

Flush Mount

Reduce the effects humidity, chemicals, water, dirt, and other contaminants have on your plug and jack connections. These jacks have a gel that forms a tight, protective seal around the connection. Jacks are made of ABS plastic. Color is ivory. Mounting screws are included, except for surface-mount models, which have a self-adhesive back. UL and C-UL listed.

Jack Type	RJ No.	No. of Wires		Each
Surface Mount	RJ-11	4	1543T3	$4.57
Surface Mount	RJ-12/RJ-25	6	1543T5	5.14
Double Floor	RJ-11	4	1543T6	11.17
Wall	RJ-11	4	1543T8	5.64
Flush Mount	RJ-11	4	1543T9	5.74
Faceplate for Double Floor Jack			1543T12	.84

DSL Line Conditioners

Filter out interference in DSL service caused by telephone devices such as fax and answering machines. Color is ivory. UL and C-UL listed.

Wall-mount units mount over your existing phone jacks. They have one jack for a DSL connection and two jacks for telephone devices. ***Inline*** units have one jack for a telephone device.

Wall Mount

Inline

	For One-Line Phones	Each	For Two-Line Phones	Each
Wall Mount	1522T12	$6.11	1522T18	$6.96
Inline	1522T23	3.23	1522T26	5.67

Telephone Cable Stripper

Cut and strip flat telephone cable, as well as unshielded and shielded twisted pair (UTP/STP) cable. This stripper has a built-in cable cutter. Made of plastic. Overall length is 4⅜″.

56675T48 ..... **Each** $20.72

Telephone Cable Stripper/Crimper

Use this tool to cut and strip flat telephone cable, and to crimp RJ-11 and RJ-45 plugs. It has a built-in cable cutter. Made of steel. Overall length is 8¼″.

		Each
Stripper/Crimper	56675T29	$65.06
Replacement Blade	56675T3	14.24

Insulation Displacement Wire Connectors for Solid Wire

Skip wire stripping. Instead, use these connectors to quickly connect solid Category 5 cable (crimping pliers, sold separately, are recommended). Rated to 30 volts. Temperature range is −40° to +140° F. 7056K23-K26 are RUS (Rural Utility Service) listed.

Style W— Use for pigtail connections.

Style X— Also known as a bridge connector, use this for tap and run connections. Insert unstripped wires and drive the tap down.

Style Y— Similar to Style W, this connector works for pigtail connections. Use it to remove and replace a faulty connector without interrupting the existing system. Place a wire into each side of the connector, squeeze with fingers and position to desired location, then crimp. Built-in blade cuts out the old connection.

	Wire Size, AWG	No. of Wire Ports	Max. Insulation OD	Pkg. Qty.		Per Pkg.
W	26-22	2	0.060″	25	7056K21	$3.98

Crimping Pliers ..... 7056K31 **Each** $22.89

Easy-Install Insulation Displacement Connectors for Solid and Stranded Wire

For quick, easy wire connection, choose these connectors. Just insert wire into the connector's funnel-shaped entry and crimp—no stripping required. Crimper sold separately below.

Connectors are made of copper with PVC insulation. For use with Category 5, 5E, and 6 cable. Rated to 50 volts. Maximum temperature is 221° F. UL listed for telecommunications.

Connector

Crimper ..... 8414K9 **Each** $6.25

66 and 110 Wiring Blocks

Don't get tangled in a web of wires. These wiring blocks keep incoming and outgoing voice and data cables organized, plus they allow fast, easy termination of incoming cable pairs. Mounting hardware is not included, unless otherwise indicated.

Note: To terminate incoming cables, use a punch-down tool (sold separately on this page).

Wiring blocks with voltage surge suppression protect your telecommunication system from fluctuations in voltage. Blocks have a gas tube suppressor for each pair of wires. After a power surge, simply replace the suppressors as needed.

66 wiring blocks use older style 66 punch-down tools. All can be wall mounted. UL listed. 2304T15 and T16 require the *wall-mounting bracket* (sold separately). They are also C-UL listed.

Bridging clip (sold separately) fits 2304T15 to make a common connection (bridge) across four wires. Size is 1/4″ Ht. × 1/2″ Wd. × 1/8″ Dp.

110 wiring blocks use 110 punch-down tools. All mount to the wall. UL listed, unless noted. 2304T26 and T22 are also C-UL listed.

6599T1 can identify up to four incoming lines (12 locations for each line). It comes with tie down loops and 12 labels. Mounting screws included.

110 connecting blocks provide an electrically charged tight connection between cable wires terminated to a 110 wiring block.

	No. of Pairs	Ht. × Wd. × Dp.	Mount. Hole Dia. (Qty.)		Each

● Not UL listed.

Telephone Socket Wrench

Also known as a can socket wrench, this is a must for every telecommunications tool kit. It has two socket ends—one with a 3/8″ hex socket, and the other with a 7/16″ hex socket. Both sockets have thin walls, so they can work the locking devices on most telephone terminals and cabinets. Wrench has a plastic handle. Overall length is 7″.

36475T63 ..... **Each** $12.26

Punch-Down Tools

Terminate and cut wire on 66 and 110 wiring blocks. Choose high or low punch-down force by turning the dial on these easy-to-use tools. They have a reversible blade—one end cuts, the other punches down without cutting. Overall length is 7 1/4″.

For Wiring Block	*Tools*	Each	*Repl. Blades*	Each
66	**57205T51**	$62.80	**57205T52**	$21.07
110	**57205T41**	62.80	**57205T42**	21.07

Coaxial Cable

Designed for data transmission, broadcast, communication, and computer applications. Cable has copper-covered steel wire, unless noted.

RG-6/U and *RG-59/U* are popular choices for CATV and video applications.

RG-58/U and *RG-174/U* are used in antennas, radio frequency (RF) applications, and computer networks.

Standard Cable— Has a PVC jacket and polyethylene insulation. Meets MIL-C-17, unless noted. **To Order:** Please specify length (25, 50, 100, or 200 ft., or the maximum continuous length of 500 ft.).

Plenum Cable— For use in plenums (the spaces above a suspended ceiling used to circulate air back to the heating or cooling system). Cable has a PVDF (polyvinylidene fluoride) jacket and FEP (fluorinated ethylene propylene) insulation. Meets UL CMP/CL2P. **To Order:** Please specify length (10, 25, or 50 ft., or the maximum continuous length of 100 ft.).

Coaxial Cable Crimpers

Terminate coaxial cable with these crimpers. Select the appropriate tool by multiplying the outside diameter of your ferrule by 0.866. Then choose the tool with the closest matching cavity size.

Styles R, S, and ***U*** have a ratcheting action for a reliable, uniform crimp.

Styles T and ***V*** function like pliers.

Coaxial and Category 5E Cable Strippers

5669K38

4226T1

Two-Level Stripping

7141K1

Three-Level Stripping

Stripper for RG-59 and RG-6 coaxial cable comes with a replaceable two-blade snap-in cartridge. Use the storage cavity to keep a spare cartridge close at hand. Overall length is 5¼″.

Stripper for RG-59 and RG-6 coaxial and category 5E cable lets you complete two tasks with one tool. It includes a replaceable two-blade cartridge for two-level stripping of coaxial RG-59 and RG-6 cable, plus a replaceable single-blade cartridge for stripping Category 5E cable. Use the storage cavity to store a spare cartridge. Overall length is 5½″.

Stripper for RG-6 to RG-178 coaxial cable includes a replaceable three-blade cartridge for three-level stripping, four V-blocks, and a hex wrench. Overall size is 3½″.

F-Type Coaxial Cable Splitters

Split one coaxial cable and send the signal to multiple locations. Splitters work within a 5 to 1000 MHz bandwidth, except 8-way model works within a 5 to 2050 MHz bandwidth. All have screw-on F-type connections. Mounting screws included.

HDMI Digital Video Cords

HDMI Male to HDMI Male

HDMI Male to DVI Male

Connect high-definition video with these cords. They have 28 AWG stranded copper wires, except 8357T11-T14, which have 28 AWG solid copper wires. Cords also have a layer of shielding and a black PVC jacket. For connectors, see page 1867.

Cords 16 ft. and shorter are UL listed. Cords 33 ft. and longer have a built-in repeater to extend the signal.

Coaxial/Category 5E Cable

Get two types of cable conveniently bundled together. This RG-6/U quad shield cable has an additional layer of shielding that further reduces electromagnetic interference (EMI) to improve data transmission. Cable has a white PVC jacket and is 0.58″ Wd. × 0.29″ Thick. Impedance is 75 ohms. Temperature range is –4° to +140° F.

The coaxial cable has a solid copper-clad steel 18 AWG wire and a 3 GHz transmission speed. The category 5E cable has stranded copper 24 AWG wires in four twisted pairs and a 350 MHz transmission speed.

To Order: Please specify length (10, 25, 50, 100, 300 ft., or the maximum continuous length of 500 ft.).

	Per Ft. 1-99	Per Ft. 100-Up
6837T51	$0.57	$0.43

Category 3, 5E, and 6 Cable

Cable

Shielded Cable

Cable has four twisted-pair construction, solid copper wires (unless noted), and a PVC jacket. ***Shielded cable*** insulates your data from interference, providing high-quality transmission. ***Plenum-rated cable*** can be installed directly into air plenums without the need for conduit. Plenums are the spaces above a suspended ceiling used to circulate air back to the heating or cooling system in a building.

Category 3 cable is often used in place of telephone cable. It is a good choice when you don't need the high speed and cost of Category 5E or 6 cable. ETL listed.

Category 5E cable meets the ever-growing demand for faster transmission speeds. It is UL and C-UL listed and CE approved, except *shielded cable*, which is UL listed only.

Category 6 cable provides high transmission speeds while reducing interference in "noisy" environments such as areas where your data transmission cable is close to power cable or transformers. It is UL and C-UL listed, except shielded cable, which is UL listed and CSA certified.

To Order: Please specify length (10, 25, 50, 100, 300, 500 ft., or the maximum continuous length of 1000 ft.).

▲ Wires are stranded.

Heavy Duty Category 5E and 6 Cable

Cable

Shielded Cable

The oil-resistant jacket on this heavy duty cable withstands harsh industrial applications. Cable has copper wires in four twisted pairs, unless noted. ***Shielded*** cable insulates your data from interference for high-quality transmission.

Category 5E, ***shielded category 5E***, and ***category 6*** cable is UV resistant and has solid wires. UL and C-UL listed. Available in lengths of 10, 25, 50, 100, 300 ft., and the maximum continuous length of 500 ft.

Continuous-flex shielded category 5E cable is great for robotic applications. It is UV resistant and has stranded wires. UL recognized, CSA certified, and CE approved. Available in lengths of 10, 25, 50, 100 ft., and the maximum continuous length of 150 ft.

Cable-tray rated cable can be extended from a cable tray to your machine or control panel without the need for conduit. It has stranded wires and is UL recognized, CSA certified, and CE approved. Available in lengths of 10, 25, 50, 100 ft., and the maximum continuous length of 300 ft. *Category 5E* cable has four individual copper wires and meets Profinet Type B specifications for networking applications.

To Order: Please choose from available lengths.

■ Fluorinated ethylene polypropylene. ▲ Polyurethane.

Category 5E and 6 Cords

Quickly add new terminals to your network or replace old cords. These have eight stranded copper wires in four twisted pairs. Each cord has an RJ-45 plug at both ends. Jacket is PVC.

Category 5E and ***category 6*** cords are ETL listed. **To Order:** Please specify black, blue, gray, red, white, or yellow.

Shielded category 5E cords have a layer of foil to insulate your data from interference, providing high-quality transmission. They are UL and C-UL listed except white cords, which are UL listed only. **To Order:** Please specify blue, gray, or white except 7734T11 and T17, which are only available in white.

Category 5E and 6 Cable Stripper

Don't risk nicking Category 5E and 6 cable. Unlike regular electrical strippers, this tool has adjustable blades that safely strip cable with ODs from 0.19″ to 0.32″. Made of plastic. Overall length is 3⅜″.

Stripper ..... 4333K26 **Each** $25.11
Replacement Blades (4/Set) ..... 4333K27 **Per Set** $7.85

Category 5E and 6 Cable Stripper/Crimper

Crimp RJ-45 plugs onto Category 5E and 6 cable. It also cuts and strips cable up to 0.22″ OD and has a release lever to prevent faulty crimps. It's made of steel and has a cushion grip. Overall length is 8¼″.

Stripper/Crimper ..... 68995K69 **Each** $113.64

Jacks, Plugs, and Couplers for Category 3, 5E, and 6 Cable

All are type RJ-45 and made of plastic.

Jacks

The insulation displacement connections on these jacks require only a standard tool, such as a pair of pliers, to install. UL listed and CSA certified.

For Category	Color		Each 1-9	Each 10-Up

Washdown Jack and Plug for Shielded Category 5E Cable

These shielded RJ-45 components are enclosed in a gray metal connector that enables IP67-rated connections for washdown environments.

Jack includes a cover to maintain IP67 rating when plug is not connected. Requires a 7/8″ panel cutout.

Plug has an insulation displacement connection that allows easy installation. Use with 0.24″ to 0.31″ OD cable and 27 to 24 AWG wire.

Jack w/ RJ-45 Connection on Back	8296T2	$43.27
Plug	8296T1	29.13

Washdown Category 5E Jacks, Plugs, and Cords

Jacks and Plugs

Jacks have male threads that connect to female collared RJ-45 plugs to create an IP67-rated connection for washdown environments. They have a custom nut for panel installation and require a 1″ dia. cutout. Jacks are shielded and have a black plastic housing. When not connected to plug, use a ***jack cover*** (sold separately) to maintain the IP67 rating.

Add one of our ***collared plugs*** to terminate your custom-length cord. Use with 0.10″ to 0.26″ OD cable to make an IP67 connection. Plugs are black plastic.

		Each

Harsh Environment M12 Jacks and Plug for Category 5E Cable

G

H

J

Not only are these shielded, four-wire connectors IP67 rated for washdown environments, they resist temperatures up to 185° F and withstand vibration better than RJ-45 connectors. Their insulation displacement connections allow easy field installation without the need for tools. Compatible with other M12 connectors.

Styles G&H have an RJ-45 jack. They include a custom nut for panel installation and require a 21/32″ cutout. Connectors have a black plastic housing.

Style J is for 0.22″ to 0.28″ cable OD and 24 to 22 AWG wire. Connector has a metal housing and UL recognized components.

Washdown Through-Panel Jacks and Receptacles

A

B

C

D

E

Forget fumbling around in a control cabinet to plug in your computers and data collection devices—simply connect them to one of these interfaces. They mount through a cutout in your panel and have a clear plastic NEMA 4 cover to keep out water when not in use. All have a gasketed aluminum housing and four mounting holes (fasteners not included). UL recognized and CSA certified.

Styles A and *B* have 3/16″ dia. mounting holes; *Styles C,D,* and *E* have 1/4″ dia. holes.

Jacks are type RJ-45 and located in the front and back for connecting Category 5E cords.

Industrial Networking Cable and Connectors

Cable

This common networking cable is shielded and has twisted-pair construction and stranded copper wires, unless noted. CE approved. All cable is rated at 300 VAC, UL listed, and CSA certified except continuous-flex, which is rated at 30 VAC and UL and C-UL recognized. ***Continuous-flex*** cable is good for robotics, cable carriers, and CNC machines.

To Order: Please choose from the available lengths of 10, 25, 50, 100, 250 ft., and the maximum continuous length of 500 ft.

Shielded Data and Communication Cable

Multiconductor Foil Shielded

Multiconductor Foil and Braid

Twisted-Pair Foil and Braid

Plenum Multiconductor Foil Shielded

All of this cable is shielded and meets NEC Article 725-38(b)3.

To Order: Please choose from the available lengths of 10, 25, 50, 100 ft. or the maximum continuous length of 500 ft.

Standard— Protect your valuable data from errors and loss due to electromagnetic interference (EMI). This cable has stranded tinned-copper drain wire and a gray PVC jacket. Suitable for Cable Tray Use Class 2 and Class 3 circuits.

Multiconductor Foil Shielded—For data transmission, control circuits, and RS-232 interfaces. Cable is rated at 300 VAC. Capacitance is 30pF/ft. Temperature range is –4° to +176° F. UL recognized CL2/CM/CMG.

Multiconductor Low-Capacitance Foil and Braid—For high-speed computers, RS-422 interfaces, and other applications requiring low capacitance. Cable is rated at 30 VAC. Capacitance is 12.5 pF/ft. Temperature range is –4° to +167° F. UL recognized CL2/CM.

Twisted-Pair Low-Capacitance Foil and Braid—Provides better signal transmission than other computer cable because it reduces interference that can occur with multiple transmissions on the same line. For high-speed computers, data transmission, and RS-422 interfaces. Cable is rated at 30 VAC. Capacitance is 12.5 pF/ft. Temperature range is –4° to +176° F. UL recognized CL2/CM.

Plenum— You can install this cable directly into air plenums, so you won't need to buy and install conduit. Plenums are the spaces above a suspended ceiling used to circulate air back to the heating or cooling system in a building. Cable has a flame-retardant PVC jacket over a stranded copper wire and is rated at 300 VAC. It also has a stranded tinned-copper drain wire. Temperature range is –22° to +167° F. Jacket is off-white. Suitable for Cable Tray Use Class 2 circuits. UL listed CL3P/CMP.

Continuous-Flex Shielded Data Cable

Designed for rigorous flexing applications, this cable is great for use in robotics, CNC machines, and other automated equipment. Cable is shielded to prevent electromagnetic interference (EMI). It has stranded copper wire and a twisted-pair construction. Rated at 300 VAC.

To Order: Please choose from the available lengths of 10, 25, 50, 100, 300, 500 ft. or the maximum continuous length of 1000 ft.

Standard— Jacket is oil-resistant gray PVC. Temperature range is 23° to 158° F. UL recognized.

Heavy Duty— Jacket is oil- and UV-resistant blue TPE. Temperature range is –31° to +212° F.

HD15

Replace worn out connectors or convert existing cables for different uses.
Shielded connectors protect against electromagnetic interference (EMI) and radio frequency interference (RFI).

Crimp-On

Shielded

Crimper

Extraction Tool

Crimp-on connectors are faster to install than solter type. *Standard* connectors fit 30 to 20 AWG cable. *Shielded* connectors fit 26 to 22 AWG cable.
Crimper installs wires into the contact. *Extraction tool* lets you take out the contact or put it back once the wire is crimped.

Fiber Optic Cords

Run these duplex, multimode cords through risers (the vertical shafts between floors). They're rated OFNR (optical fiber nonconductive riser) for use in riser applications and have a 62.5 micron core dia. and a 125 micron cladding dia. Cords have a 0.16″ OD and an orange PVC jacket. Temperature range is –40° to +158° F. UL listed.

USB Adapters

Serial to USB

Parallel to USB

XGA Monitor to USB

Adapt an incompatible connector to plug into your computer's USB port.

Serial-to-USB adapter converts an RS-232 serial device that has a DB9 male connector. Compatible with all RS-232 devices.

Parallel-to-USB adapter converts a DB25 IEEE-1284 parallel printer that has a DB25 female connector.

XGA Monitor-to-USB adapter converts an XGA monitor that has an HD15 male plug. This is a convenient way to add a second monitor to your desktop or laptop. Supports resolutions up to 1440×900 including VGA and SVGA resolutions of 1024×768 and 800×600.

	Lg.		Each
Serial to USB	27″	8761K1	$20.73
Parallel to USB	6 ft.	8761K2	17.50
XGA Monitor to USB	20″	8761K3	83.55

Video Monitor Cords

The HD15 connectors on these shielded cords work with UXGA monitors up to 1600×1200 resolution. Cords are 0.33″ OD with 28 AWG solid copper wire and a black PVC jacket. Temperature range is –13° to +176° F.

Audio and video cords have a 16″ cord with a 3.5 mm stereo plug for sending sound.

Lg., ft.	VIDEO Male to Male	Each	VIDEO Male to Female	Each	AUDIO AND VIDEO Male to Male	Each
3	8041T11	$11.91	8041T21	$11.91	8041T51	$17.52

10	1154T5	18.30	1154T3	21.50

Repeater hub extends your connection length by up to 15 ft. and provides two extra ports. It includes a 3-ft. firewire cable and 6-ft. power cord with a two-prong plug. Operates on 120 VAC, 60 Hz.

1154T1 ..... **Each** $67.78

Low-Voltage Cable Identifier

Map up to 20 different low-voltage lines, such as speaker, security, alarm, and coaxial cables. Device has an F-type connector and includes a 24″ cord with an F-type jack on one end and alligator clips on the other, as well as 20 numbered alligator clips for the remote ends of your lines. An LED display shows the number of the line being traced. Operates on one 9-volt battery (not included). UL recognized and CE approved.

7879T1 ..... **Each** $170.42

Lineman's Butt Sets

Bed of Nails Clip

Piercing Clip

Alligator Clip

Standard Set

Deluxe Set

Phone-line testing is easy with these ergonomically designed sets. The LCD displays on-hook voltage, number dialed, battery life, and caller ID. Butt sets include a cordset with bed of nails clips and a headset for hands-free use. The included and accessory cordsets are 4 ft. long and work with both sets. Test units operate on one 9-volt battery (included).

Standard set comes with a quick-release belt clip.

Deluxe set is DSL compatible and has auto line identification. It senses over- and under-voltage conditions and has an amplified speaker that lets you talk while testing.

Note: With piercing clips and bed of nails clips it is not necessary to strip the wire. Alligator clips work with stripped wire only.

Tone Testers

Tone Generator with RJ-11 Plug

Tone Generator with RJ-45 Plug

Standard Amplifier

Noise-Filtering Amplifier

Multifunction Tester

Install or troubleshoot telephone lines with our durable testers. They require one 9-volt battery except the multifunction tester, which requires two (sold separately).

Tone Generators— In addition to generating an audio tone (detectable with an amplifier), tone generators also test continuity and polarity. Choose from testers with a four-wire RJ-11 plug and eight-wire RJ-45 plug. Both styles have red and black test leads with alligator clips.

Standard Amplifier— Even in congested bundles of cable, this amplifier lets you identify wire and cable without making direct contact with the conductor. It features volume control, an on/off button, and ports for connecting a butt set or headset.

Noise-Filtering Amplifier— The same features as the standard amplifier, plus a special filtration feature that blocks out annoying power-line hum.

Multifunction Tester— Identifies wires using an alternating tone signal (detectable with an amplifier) and tests polarity. It also indicates whether lines are dead, working, or off the hook and allows you to talk on a dead line. Tester has red and black test leads with alligator clips and a four-wire RJ-11 plug.

	Testers	Each	***Leather Cases***	Each
Tone Generator w/RJ-11 Plug	57175T1	$40.45	57175T15	$9.56

Multifunction Tester	57175T6	103.35	57175T71★	17.24

9-Volt Battery ..... 71455K56 **Each** $2.75

★ Made of woven polyester.

Pocket Size Telephone Line Tester

Trade bulky, expensive test instruments for this compact tool—it conveniently clips right into your pocket. Tester quickly and safely checks one- and two-line analog telephone installations. LED indicators show if sufficient loop current is available for proper operation. Tester also measures DC line voltages and precisely simulates an off-hook status. It has an RJ-11 jack and removable plug. No battery required.

2189T16 ..... **Each** $19.29

Inline Telephone Line Tester

Test your telephone line without interrupting service. Tester has LED indicators that display polarity. You can also use it to test new phone lines for power and to verify line numbers. It has two six-wire jacks for inline testing; both accept RJ-11 plugs. Tester includes a cord with an RJ-11 plug on each end for connecting to your telephone jack. It also includes a belt clip.

9240T3 ..... **Each** $40.35

Data Cable Testing Adapter

Attach a tone generator, butt set, or other testing device to data lines without interrupting service. Tester has two eight-wire RJ-45 Category 5 jacks. It includes a cord with an RJ-45 plug on each end.

9240T2 ..... **Each** $37.17

Data Cable Identifier

Trace data cables and a variety of unenergized wires with this transmitter and receiver. The transmitter sends a signal through your wire using the included RJ-11 plug, coaxial plug, alligator clips, or RJ-45 plug. Audible and visual signals from the handheld receiver help you identify the wire at any other location—its LED gets brighter as the signal gets stronger. The receiver does not pierce insulation. It stores in the transmitter when not in use. Two AAA and four button/coin cell batteries included.

1780T1 ..... **Each** $61.62

Data Cable Tester

This versatile unit tests for shorts, opens, miswires, reversals, and split pair errors for telephone, network, and coaxial cable. The tester has an LCD and an F-type connector, RJ-11 jack, and RJ-45 jack. It includes a 12″ cord with an RJ-45 plug on one end and alligator clips on the other, and a 7½″ cord with an RJ-12 plug on each end that's compatible with RJ-11, RJ-12, and RJ-45 jacks. Operates on one 9-volt battery (included). UL recognized and CE approved.

7931T1 ..... **Each** $87.35

Data Cable Tester with Length Meter

Test for shorts, opens, miswires, reversals, and split pair errors with this tester. It also measures cable length for coaxial, Category 5E, and Category 6 cable. Tester has a two-line, 32-character LCD screen that displays test results in a wiremap format. It comes with a built-in tone generator with selectable tones and pair capability. Unit includes two 1-ft. cords with an RJ-45 plug on each end, a 1-ft. cord with an RJ-45 plug on one end and alligator clips on the other, and a black nylon storage pouch. Operates on a 9-volt battery (sold separately).

		Each
Tester	7662T28	$193.95
9-Volt Battery	71455K56	2.75

Coaxial Cable Tester

Test for open and short circuit conditions and map coaxial lines with this easy-to-use tester. Device includes four F-type jack to BNC jack adapters, one F-type plug to BNC jack adapter, and four terminators for the remote ends of your lines. Operates on one 6-volt battery (included). UL recognized and CE approved.

7901T1 ..... **Each** $51.05

For information about NEMA enclosure ratings, see page 843.

Build-Your-Own Status-Indicating Lights

- Indoor use
- Enclosed (NEMA 1)
- UL listed; CSA certified
- 4″ light diameter
- 70 flashes per minute (where applicable)

Design a custom light stack up to five modules high with these snap-together components. Start with a base and light module, then add more light modules and a sound module to suit your needs. Just unsnap them for bulb replacement. Hardwire using the six included 24″ wire leads. Modules are 3¼″ high. *120 VAC* modules operate on 50/60 Hz.

Base is glass-filled polycarbonate and measures 3⅞″ Dia.×3¼″ Ht. It has holes for surface mounting (screws included) and a ¾″ NPT female connection for pipe mounting. It includes a cover for the top of your light stack.

Light modules have polycarbonate lenses and are available with incandescent or LED bulbs. LED bulb life is 100,000 hours. Each *120 VAC* light module can be individually set for flashing or continuous light. Incandescent bulb life is 7,000 hours. *24 VDC* light modules are for continuous light only (flasher sold separately). Incandescent bulb life is 5,000 hours.

Sound module allows you to select from 18 programmable tones to give an audible alert rated 69 dB @ 10 ft. Sound operates independently or can be synchronized with the light. Modules mount on the top of the stack.

To Order: For light modules, replacement lens, and replacement LED bulbs, please specify amber, blue, clear, green, or red.

Build-Your-Own Status-Indicating Lights with Horn

- Indoor/outdoor use
- UL and C-UL listed
- 3⁵⁄₁₆″ light diameter
- 65 flashes per minute (where applicable)

A horn alerts personnel who can't see the light modules. The horn is built into the aluminum base, so there's no need for a sound module. Horn is rated 85 dB @ 10 ft. and operates independently or can be synchronized with the light. Light modules connect with included screws for a customized light stack. Start with a base and add any combination of the continuous, flashing, and strobe light modules up to five lights high. Lenses are polycarbonate and are 3⅝″ high. *120 VAC* modules operate on 50/60 Hz.

Base is 6″ Dia.×3½″ Ht. and has a terminal block for electrical connections and a cover for the top of your light stack. It has two ⁷⁄₃₂″ dia. holes for surface mounting (screws not included) and a ½″ NPT female connection for pipe mounting.

All light modules have a gasket. ***120 VAC halogen light modules*** have a 25,000-hour bulb life; ***24 VDC*** have a 15,000-hour bulb life. ***120 VAC*** and ***24 VDC LED light modules*** have a 148,000-hour bulb life. ***Strobe light modules*** have a 3,000-hour bulb life.

To Order: For halogen and strobe light modules, please specify amber, blue, clear, green, or red. For LED light modules, please specify amber, blue, green, or red.

Build-Your-Own Slim Status-Indicating Lights

- Indoor/outdoor use (unless noted)
- For washdown environments (NEMA 4X and IP65, unless noted)
- UL and C-UL listed; CE approved
- 2⅝″ lens diameter
- 60 flashes per minute (where applicable)

Design your own slim, space-saving light stack. Start with a base and add up to six modules per stack, unless noted. The strobe light module takes up two positions. Modules plug into each other to eliminate the hassles of tools and wires. Lenses are polycarbonate. *120 VAC* modules operate on 50/60 Hz.

Bases are nylon and 2⅝″ Dia.×2⅜″ Ht. They have a terminal block for electrical connections, a polycarbonate cover for the top of your light stack, and a gasket. Surface mount horizontally or vertically using the two ³⁄₁₆″ dia. mounting holes (screws not included), or pipe mount using the included 6¼″ long aluminum extension pipe and die cast zinc flange with ¾″ NPT connections. The flange has four ³⁄₁₆″ dia. mounting holes (screws not included). Total height of base with pipe and flange is 7¼″. *Incandescent flashing base* allows each light module to be a continuous or flashing light.

Light modules are 2¾″ high and have a diffuser to maximize illumination and light dispersion. Choose from 7,000-hour incandescent bulbs for brightness or 60,000-hour LED bulbs for lower maintenance and energy costs. *Incandescent* modules are also rated for 120 VDC.

Strobe light modules are 5½″ high and can be used with a continuous or flashing light base. Bulb life is 20,000 hours. Module takes up two positions in the stack.

Sound modules are 2⅜″ high and have an intermittent tone that adjusts from 64 to 90 dB @ 10 ft. Modules operate independently or can be synchronized with the light. They lower the light stack rating to NEMA 1 (indoor use only) and IP20 and must be placed in the top position.

Optional ***30″ mounting extension pipe*** is aluminum and has ¾″ NPT male connections.

To Order: For light modules, replacement lens, and replacement LED bulbs, please specify amber, blue, clear, green, red, or yellow.

Incandescent and LED Status-Indicating Lights

- Indoor use
- For washdown environments (NEMA 4X)
- UL and C-UL listed
- 2¼″ light diameter

Three Light

You'll save time with these assembled lights and you'll still get the convenience of interchangeable lenses. All have a continuous light. The base and lenses are made of polycarbonate. Lenses are 2″ high and the base has a terminal block for electrical connections. Surface mount using the four ½″ dia. mounting holes (mounting hardware not included), or pipe mount using the ¾″ NPT female connection. *120 VAC* lights operate on 60 Hz.

Incandescent lights have a 7,000-hour bulb life. ***LED*** lights have a 100,000-hour bulb life.

Incandescent three-light models come with five lenses: amber, blue, clear, green, and red. *LED three-light* models come with amber, green and red lenses. All *five-light models* have amber, blue, clear, green, and red lenses.

Optional ***31½″ mounting extension pipe*** is aluminum with ¾″ NPT male connections. Optional ***pipe-mounting flange*** is for surface mounting with the optional mounting extension pipe. It is die cast zinc and has a ¾″ NPT female connection. Mounting hardware is included. Optional ***wall-mounting bracket*** is aluminum and has two 7/16″ dia. mounting holes (screws not included).

To Order: For one-light models and replacement lens and bulbs, please specify amber, blue, clear, green, or red.

LED Status-Indicating Lights and Lights with Alarm

- Indoor use
- For environments with splashing water (IP54)
- UL recognized
- 2⅜″ light diameter
- 60 flashes per minute (where applicable)

Three Light with Alarm

Assembled with LEDs that have a 100,000-hour life, these lights are ready to install. Lenses are acrylic and base is ABS plastic. Surface mount using the included wall-mount bracket (screws included). They also include an 11¾″ chrome-plated steel mounting pipe with an M22 male connection.

One-light models have a red lens. *Two-light* models have red and green lenses. *Three-light* models have red, yellow, and green lenses.

Lights without alarm have a continuous light. *120 VAC* lights have nine 37.4″ wire leads and operate on 50/60 Hz; *24 VAC/VDC* lights have six 37.4″ wire leads.

Lights with alarm warn personnel without a view of the equipment. They have a two-tone adjustable volume control in the base. Volume is rated 85 dB @ 1 meter. Alarm can operate independently or be synchronized with the light, and each light can be wired for either continuous or flashing light. *120 VAC* lights have twelve 37.4″ wire leads; *24 VAC/VDC* lights have ten 37.4″ wire leads.

Stainless Steel LED Status-Indicating Lights

- Indoor/outdoor use
- For washdown environments (IP65)
- CE approved
- 1¾″ light diameter

Two Light

A Type 304 stainless steel housing makes these great for environments with washdowns, corrosion, and food processing. Clear lenses and a continuous light give a clear indication when the light is activated, even in direct sunlight. Plus, you'll never need to replace any bulbs; LED technology provides 50,000 hours of maintenance-free operation.

Lenses are polycarbonate and 1¼″ Dia.×1⅛″ Ht. All have four 6½-ft. long wire leads and operate on 24 VDC. Surface mount into a ⅞″ dia. hole and secure with the included locknut.

Color	O'all Ht.	Amps @ 24 VDC		Each
Two Light, Green, Red	8¾″	0.08	**9661K1**	$450.34
Two Light, Red, Yellow	8¾″	0.08	**9661K2**	444.53

Ultra-Slim LED Status-Indicating Lights

- Indoor use
- For washdown environments (IP65)
- UL recognized and CE approved
- 1¼″ light diameter

Three-Light Short Stack

At just 1¼″ in diameter and with a 50,000-hour bulb life, these ABS plastic lights will save you space and time. All have a continuous light. Surface mount (mounting locknuts included) or pipe mount using the M22 male connection.

Short stacks have six 39″ wire leads; ***tall stacks*** have six 48″ wire leads.

Two-light models have green and red lenses. ***Three-light*** models have yellow, green, and red lenses. ***Four-light*** models have yellow, blue, green, and red lenses. ***Five-light*** models have blue, clear, green, red, and yellow lenses.

To Order: For one-light models, please specify blue, clear, green, red, or yellow.

Portable LED Status-Indicating Light

- Indoor use
- 2″ light diameter

A convenient control box with a power cord means you can easily move this light to another location. LEDs provide a 100,000-hour life.

Continuous lights are amber, green, and red. Housing is ABS plastic and lenses are clear acrylic. Overall height of light is 5½″. It draws 0.05 amps @ 120 VAC, 60 Hz.

The control box is ABS plastic and has three colored buttons. It mounts with two screws or tape with adhesive on both sides (included). There is a 4-ft. cable from the control box to the light and a UL listed 6-ft. long cord with two-prong plug from the control box.

Mount the light to a wall using the two ⅜″ dia. mounting holes (hardware not included) or mount onto a vertical or horizontal surface with a maximum thickness of 2¼″, such as an office partition or workstation, using the included mounting bracket. Also includes 3″ and 12″ chrome-plated steel mounting pipes.

3258T25 ..... **Each** $198.15

For information about NEMA and IP enclosure ratings, see page 843.

Wall-Mount LED Status-Indicating Lights

Three Light

- Indoor use
- For environments with splashing water (IP54)
- UL recognized; CE approved
- 2¾″ light diameter

If you don't have the space for a tower of lights, mount these horizontally or vertically. They have a continuous light and two 3/16″ dia. mounting holes (hardware not included). Lenses are polycarbonate and base is ABS plastic.

Hardwire using the 39″ wire leads provided. LEDs have a 100,000 hour life. *120 VAC* lights operate on 50/60 Hz.

To Order: For replacement module, please specify green, red, or yellow.

	Color	O'all Ht.	90-250 VAC No. of Wires	Amps★		Each	24 VAC/VDC No. of Wires	Amps		Each

Replacement Module (Red or Yellow) ..... 82995T71 .. Each $75.48
Replacement Module (Green) ..... 82995T721 Each $87.02

★ Amps are rated @ 120 VAC.

DIN-Rail Mount LED Status-Indicating Lights

- Indoor use
- For temporary submersion (IP67)
- 2″ light diameter

Mount these three-color lights at any angle on a DIN rail (mounting bracket sold separately) or surface mount using the included screws. They're great for washdown environments and have LEDs that last 100,000 hours.

Lights are continuous. Base is polycarbonate/ABS plastic and lens is polycarbonate. Overall size is 4 5/16″ Ht. × 3 3/16″ Wd. × 2⅝″ Dp. Lights have a 4-pin single-keyway male plug with a 0.3″ face dia. and external threads. Female plug with cable sold separately. For information about PNP and NPN output, see page 896.

DIN-rail mounting bracket is made of ABS plastic and includes hardware to mount light to bracket.

Colors	Output	Amps @ 18-30 VDC		Each
Green, Red, Yellow	PNP	0.04	9984K1	$101.88

3-in-1 Compact LED Status-Indicating Lights

- Indoor/outdoor use
- For washdown environments (NEMA 4X)
- UL and C-UL listed
- 3¼″ light diameter
- 65 flashes per minute

With an overall height of 3⅞″, these lights are great for providing status alert in areas with low overhead clearance. A single light can cycle between one, two, or three colors and functions as a continuous or flashing light. Plus, the LEDs have a 148,000-hour life, which means there are no bulbs to replace. Lens is polycarbonate and base is glass-filled nylon. *120 VAC* lights operate on 50/60 Hz.

Surface mount using included hardware or pipe mount using the ½″ NPT female connection or the ¾″ NPT male connection. Hardware using the four 18″ wire leads provided.

Replacement Lens ..... 1507T42 Each $28.96

About Revolving, Flashing, and Strobe Lights

The light intensity of revolving and flashing lights is measured in candlepower. The higher the candlepower, the greater the light intensity. Candlepower values are for clear lenses; colored lenses reduce the candlepower. We offer lights with incandescent and halogen bulbs, as well as LEDs. Revolving lights are typically brighter than flashing lights.

Strobe lights use Xenon-gas tubes and are typically brighter than revolving and flashing lights. Their brightness is measured in candela seconds. As with revolving and flashing lights, candela second values are for clear lenses; colored lenses reduce these values.

Incandescent Revolving Lights

Pipe Mount

12 VDC Magnetic Mount

- Indoor/outdoor use
- 90 flashes per minute (unless noted)
- 2500-6000 candlepower

Get dependable performance no matter how you need to mount a revolving light. Lenses are polycarbonate and bulb life is 100 hours. *115 VAC* lights operate on 60 Hz.

Pipe-mount light is 5¼″ Dia. × 6⅝″ Ht. Base is ABS plastic. Light has a ½″ trade size compression coupling connection and two 24″ wire leads.

Surface-mount lights are 6″ Dia. × 7⅝″ Ht. Base is aluminum. They include mounting hardware and two 10-ft. wire leads.

115 VAC magnetic-mount light is 5¼″ Dia. × 6⅝″ Ht. with an ABS plastic base. It has a 9-lb. pull magnet and a 6-ft. cord with two-prong plug. ***12 VDC magnetic-mount*** light is 6″ Dia. × 7⅝″ Ht. with an aluminum base. It has a 16-lb. pull magnet and a 10-ft. cord with a cigarette lighter plug.

To Order: For lights and replacement lens, please specify amber, blue, clear, green, or red.

Ultra-Bright Sealed-Beam Revolving Lights

Surface Mount

Magnetic Mount Plug

- Indoor/outdoor use
- For washdown environments (NEMA 4X)
- UL listed (120 VAC only)
- 90 flashes per minute
- 35,000 candlepower

Two powerful sealed-beam incandescent bulbs like those in car headlights make these the brightest revolving lights we offer. The motor is encased in a Type 304 stainless steel base that resists corrosion. Lens is acrylic. Overall size is 9″ Dia. × 9″ Ht. and bulb life is 250 hours. *120 VAC* lights operate on 60 Hz.

Pipe-mount light has a ¾″ NPT female connection and includes three 18″ wire leads. ***Surface-mount*** lights include mounting hardware. *120 VAC* light has three 18″ wire leads; *12 VDC* and *24 VDC* lights have one 7-ft. wire lead. ***Magnetic-mount*** light has three 110-lb. pull magnets in the base and includes a 15-ft. cord with a cigarette lighter plug.

To Order: For lights and replacement lens, please specify amber, blue, green, or red. For replacement motor, please specify voltage.

- 110 flashes per minute (unless noted)
- 3600 candlepower (unless noted)

Pipe Mount

Wall-Mounting Bracket

Magnetic Mount

Is your equipment subject to washdowns? These lights are ready. Is corrosion a concern? Not anymore—these lights are survivors. *120 VAC* lights operate on 50/60 Hz and have three 18″ wire leads. *12 VDC* and *24 VDC* lights have one 7-ft. wire lead, except the magnetic-mount light, which has a 15-ft. cord with a cigarette lighter plug.

Pipe-mount light is both quiet and durable, thanks to a gearless direct drive connection between the motor and reflector. Overall size is 5⅛″ Dia. × 6¼″ Ht. Lens is polycarbonate and base is zinc. Light has a ½″ NPT female connection. Bulb life is 2000 hours. Optional *wall-mounting bracket* is aluminum with a ½″ NPT male connection. Mounting hardware included. You furnish the pipe that goes from bracket to light.

Surface-mount and ***magnetic-mount*** lights have three lenses for three separate diffused beams of light that are easier on the eyes. Overall size is 5¾″ Dia. × 7¾″ Ht. Lens is acrylic and base is Type 304 stainless steel. Bulb life is 250 hours. *Surface-mount* lights include mounting hardware. *Magnetic-mount* light has a 50-lb. pull magnet.

To Order: For all lights and replacement lenses please specify amber, blue, clear, green, or red.

Twin-Beam Lights

Surface-Mount Revolving Light

Magnetic-Mount Strobe Light

- Indoor/outdoor use
- 270 flashes per minute (revolving lights); 160 quad flash (strobe lights)
- 110,000 candlepower (revolving lights)
- 500 candela seconds (strobe lights)

Get their attention with these dual-bulb lights. A popular choice for vehicles, they have an amber polycarbonate lens on a black powder-coated steel base. *Surface-mount* lights include mounting hardware. *Magnetic-mount* lights have four 75-lb. pull magnets and a 15-ft. cord with a cigarette lighter plug.

Revolving lights have halogen bulbs with 1000 hours life. They operate on 12 VDC. Overall size is 23″ Lg. × 8″ Wd. × 5¼″ Ht. *Surface-mount* light has one 7-ft. wire lead. ***Strobe lights*** have Xenon bulbs with 2000 hours life. They flash in a series of four per cycle (quad flash) and operate on 12/24 VDC. Overall size is 23″ Lg. × 9⅜″ Wd. × 5¼″ Ht. *Surface-mount* light has two 7-ft. wire leads.

Revolving Lights with Bell

- Indoor use and indoor/outdoor use
- UL listed
- 90 flashes per minute
- 750 candlepower (indoor); 1000 (indoor/outdoor)

Get the impact of both sight and sound with a revolving light and a bell that is rated 93 dB @ 10 ft. Bell can function independently or can be synchronized with light. Lights can be wired with or without bell. They operate on 120 VAC, 50/60 Hz. Bell is 6″ dia. and made of steel. Surface mount using the two ¼″ dia. mounting holes (screws not included). Bulb is incandescent and has a 200-hour life.

Indoor light has an acrylic lens and polycarbonate base. Size of light is 5½″ Dia. × 6½″ Ht. Overall size is 6″ Wd. × 15½″ Ht. Includes four 5″ wire leads.

Indoor/outdoor light has a polycarbonate lens and an aluminum base. Size of light is 5½″ Dia. × 7½″ Ht. Overall size is 6″ Wd. × 15⅜″ Ht. Includes five 5″ wire leads.

To Order: For lights and replacement lenses, please specify amber, blue, or red.

Halogen Revolving Lights

- Indoor/outdoor use
- For washdown environments (NEMA 4X)
- 135 flashes per minute
- 65,000 candlepower

Surface Mount

12 VDC Magnetic Mount

It's easy to spot these bright halogen lights. They're powerful, durable, and rated NEMA 4X for washdowns and corrosive environments. Lens is polycarbonate and base is neoprene rubber. Overall size is 5½″ Dia. × 5¼″ Ht. Bulb life is 1000 hours.

Surface-mount lights include mounting hardware and one 7-ft. wire lead.

Magnetic-mount lights have a 110-lb. pull magnet and a 15-ft. cord with a cigarette lighter plug.

To Order: For lights and replacement lens, please specify amber, blue, or red.

LED Revolving/Flashing Lights

- Indoor/outdoor use
- For washdown environments (IP65)
- CE approved
- 90 flashes per minute
- 3 candlepower

Wire Guard

Set these lights to simulate a continuous, revolving, or flashing light. They have LEDs that last up to 100,000 hours, so you may never need to replace bulbs.

Lights are 3 15/16″ Dia. × 5 7/16″ Ht. and have two 7/32″ dia. holes for surface mounting (screws not included). They have a polycarbonate lens, polycarbonate/ABS plastic base, and screw clamp terminal block connections. Both operate on 24 VDC.

Optional ***wire guard*** protects the lights when surface mounted. It is 5¾″ Dia. × 5⅝″ Ht., made of chrome-plated steel, and has three ¼″ dia. mounting holes (screws not included).

Optional ***wall-mounting bracket*** includes screws to attach the bracket to a light. Made of polycarbonate and ABS plastic, it has two 7/32″ dia. mounting holes (screws not included).

Optional ***pipe-mounting adapter*** is 1″ Dia. × 5¼″ Ht. It's made of aluminum and has four 7/32″ dia. mounting holes (screws not included).

To Order: Please specify color from those listed in the table.

Colors	Amps @ 24 VDC		Each
Red, Yellow	0.3	7224K1	$292.22
Blue, Green	0.3	7224K2	479.30
Wire Guard		7224K8	53.76
Wall-Mounting Bracket		7224K7	14.29
Pipe-Mounting Adapter		7224K9	42.11

For information about NEMA and IP ratings, see pg. 843. For information about lights on this page, see pg. 1872.

Incandescent Flashing Lights

Surface Mount w/Cushion Base

Magnetic Mount w/ Type 304 Stainless Steel Base

- Indoor/outdoor use
- For washdown environments (NEMA 4X)
- 60-80 flashes per minute
- 70 candlepower (120 VAC); 450 (12, 24, and 36 VDC)

Good for corrosive environments, these lights have a polycarbonate lens and a bulb life of 250 hours.

Lights ***with cushion base*** have a sponge-rubber pad below an ABS plastic base to absorb shock and vibration. Overall size is 4½″ Dia. × 7″ Ht. Mounting hardware included. *120 VAC* light operates on 50/60 Hz and has two 30″ wire leads. *12* and *24 VDC* lights have two 12″ wire leads.

Lights ***with Type 304 stainless steel base*** are durable and have a polished appearance. Overall size is 5¾″ Dia. × 7¾″ Ht. ***Surface-mount*** lights include hardware. *120 VAC* light operates on 60 Hz and has three 18″ wire leads. UL listed. *12 VDC* light has one 7-ft. wire lead. *24* and *36 VDC* lights have two 7-ft. wire leads. ***Magnetic-mount*** light has a 50-lb. pull magnet in the base and a 15-ft. cord with a cigarette lighter plug.

To Order: For all lights and replacement lens, please specify amber, blue, clear, green, or red.

Flashing Lights with Horn

- Indoor/outdoor use
- UL listed (120 VAC only)
- 65 flashes per minute
- 2370-5050 candlepower

A horn built into the base of these powerful flashing lights is rated 85 dB @ 10 ft. and synchronized with the flashing of the light. Lens is polycarbonate and base is aluminum. Overall size is 6″ Dia. × 7⅜″ Ht. Surface mount with the included screws or pipe mount using the ½″ NPT female connection. They have two 18″ wire leads.

All lights have incandescent bulbs. ***120 VAC*** light operates on 50/60 Hz and has a bulb with a 3900-hour life. ***12 VDC*** light has a bulb with a 700-hour life. ***24 VDC*** light has a bulb with a 3100-hour life.

To Order: Please specify amber, blue, clear, green, or red.

Strobe-Style LED Lights

Surface-Mount Round

Side-Mount Oval

- Indoor/outdoor use
- 50 flashes per minute

Lights flash 180° in a series of four per cycle to simulate a quad-flash strobe, but with the benefit of a 100,000-hour life. Each light has 21 LEDs, three of which burn steadily for maintaining visual contact even during the off period of the flash. Lights have a black powder-coated aluminum mounting bracket, a polycarbonate lens, and three 8″ wire leads. They operate on 12-24 VDC.

Side-mount lights have two 9/32″ dia. mounting holes; ***surface-mount*** lights have four 9/32″ dia. mounting holes. Screws not included.

To Order: Please specify amber or red.

Compact Halogen and LED Flashing Lights

- Indoor/outdoor use
- For washdown environments (NEMA 4X)
- UL and C-UL listed
- 65 flashes per minute
- 653 candlepower (Halogen); 2.2 (LED)

Ideal where corrosion and space may be an issue, these lights measure 3¼″ Dia. × 3⅞″ Ht. Lens is polycarbonate and base is glass-filled nylon. A mounting gasket and locknut let you surface mount these lights, or use the ¾″ NPT male connection for pipe mounting. Hardware using the two 18″ wire leads provided. *24* and *120 VAC* lights operate on 50/60 Hz.

Halogen lights are ideal where bright flashing lights are needed.

LED lights provide years of maintenance-free operation.

To Order: For halogen lights and replacement lens, please specify amber, blue, clear, green, or red. For LED lights, please specify amber, blue, green, or red.

Solar-Powered LED Flashing Light

- Outdoor use
- For water submersion (IP68)
- CE approved
- 15 flashes per minute
- 1.5 candlepower

There's no need for external power for this light. It charges itself during the day and flashes all night. Designed to mark buoys, barriers, and floating lights, an automatic switch turns it on at dusk and off at dawn.

LED is amber and may never need replacement. A sealed, encased battery provides maintenance-free operation for approximately five years and a 1 13/16″ built-in spike deters birds from landing on the light. Lens and base are polycarbonate. Overall size is 5⅜″ Wd. × 5 9/16″ Ht. Surface mount using the four 15/32″ dia. mounting holes (screws not included).

8470T1 ..... **Each** $219.30

Replacement Battery Pack ..... 8470T2 **Each** $72.73

Strobe Lights

Surface Mount

Magnetic Mount Plug

- Indoor/outdoor use
- For washdown environments (NEMA 4X)
- UL listed (120 and 240 VAC only)
- 60-70 flashes per minute
- 150-300 candela seconds

Xenon bulbs draw attention to these lights, which are good for corrosive environments. For quick and easy bulb replacement, just pop the top then snap back into place—no tools needed. Lens is polycarbonate and base is rubber. Overall size is 5¾″ Dia. × 4½″ Ht. Bulb life is 1000 hours.

Surface-mount lights include mounting hardware. *120 VAC* light has three 18″ wire leads and *240 VAC* light has two 18″ wire leads. *12-48 VDC* light has two 36″ wire leads. ***Double flash surface-mount*** light produces 60 double flashes per minute and has two 36″ wire leads. ***Magnetic-mount*** light has a 90-lb. pull magnet and a 15-ft. cord with a cigarette lighter plug. ***Pipe-mounting adapter for ½″ NPT male pipe*** converts surface-mount lights to pipe mount.

To Order: For lights and replacement lens, please specify amber, blue, clear, green, purple, or red.

Compact Strobe Lights

Surface Mount | *Pipe Mount* | *Magnetic Mount* | *Light-Socket Mount* | *Light Guard* | *Pipe-Mounting Bracket*

- Indoor/outdoor use
- For washdown environments (NEMA 4X)
- UL listed (120 VAC and all hazardous-location pipe-mount lights); UL recognized (12-80 VDC lights)
- 60 flashes per minute
- 50 candela seconds

Tight spaces and corrosive environments are where these 3″ Dia. × 5″ Ht. lights really shine. Lens and base are polycarbonate. Lens is thread-in style. Bulb life is 10,000 hours. *120 VAC* lights operate on 50/60 Hz and are UL listed. *12-80 VDC* lights have UL recognized components for type E, EE, and ES electric trucks, except the hazardous-location pipe-mount lights.

Surface-mount lights have two ¼″ dia. mounting holes (screws not included). Use the optional *pipe-mounting bracket* to mount these lights on pipe up to 3″ dia. Bracket is yellow and includes two U-bolts. *120 VAC* light has a 6-ft. cord with a two-prong plug. *12-80 VDC* light has two 13″ wire leads.

Pipe-mount lights have two 13″ wire leads. *Hazardous-location pipe-mount* lights are UL listed for Class I and II, Div. 2.

Magnetic-mount light has a 40-lb. pull rating and a 6-ft. cord with a cigarette lighter plug.

Light-socket mount light screws into a standard light socket.

To Order: For lights and replacement lens, please specify amber, blue, clear, green, or red.

Heavy Duty Strobe Lights

- Indoor/outdoor use
- For washdown environments (NEMA 4X)
- UL listed and CSA certified (die cast zinc base only)
- 70-90 flashes per minute
- 72-200 candela seconds

Die Cast Zinc Base

Type 304 Stainless Steel Base

Harsh conditions, including corrosion, won't stop these lights. All have a polycarbonate lens. *120 VAC* lights operate on 50/60 Hz.

The light with a ***die cast zinc base*** has a finned black base to dissipate heat, allowing it to last longer than most strobes—up to 10,000 hours. Overall size is 4″ Dia. × 5¼″ Ht. Surface mount with the included hardware or pipe mount with the ½″ NPT female connection. Hardwire with the three 18″ wire leads.

Lights with a ***Type 304 stainless steel base*** have a polished look and offer even better corrosion resistance. Overall size is 5¾″ Dia. × 7¾″ Ht. Bulb life is 2000 hours. Surface mount with the included hardware. *120 VAC* light has two 18″ wire leads. *12-24 VDC* light has two 3-ft. wire leads.

To Order: For lights and replacement lenses, please specify amber, blue, clear, green, or red.

- For washdown environments (NEMA 4X) (Type 304 stainless steel base only)
- UL listed (5848T71 only)
- 54-75 flashes per minute
- 900-1200 candela seconds

Aluminum Base

Type 304 Stainless Steel Base

Bright enough to flash through the foggiest conditions. Bulb life is 2000 hours.

Lights with ***aluminum base*** surface mount with included hardware or pipe mount using the 1″ NPT female connection. They have an overall size of 6¼″ Dia. × 7¾″ Ht. Light *with single flash* operates on 120 VAC, 60 Hz and has three 18″ wire leads. Light *with double flash* offers greater visibility. It operates on 12-24 VDC and has two 19″ wire leads.

Lights with ***Type 304 stainless steel base*** are good for corrosive environments and have an overall size of 9″ Dia. × 9″ Ht. An outer dome provides extra protection. Surface mount with included hardware. *120 VAC light* operates on 60 Hz and has three 18″ wire leads. *12-24 VDC* light has two 7-ft. wire leads.

To Order: For lights, replacement lenses (except 5947T965), and replacement outer dome, please specify amber, blue, clear, green, or red.

Low-Profile Strobe Lights and Strobe Lights with Horn

Light Only

With Horn

- Indoor/outdoor use
- 70 flashes per minute
- 50 candela seconds

You won't need much clearance space for these low-profile surface-mount lights. Mounting hardware is included and lens is polycarbonate. Bulb life is 2000 hours.

Lights only are 4″ Dia.×3″ Ht. Base is ABS plastic. All have two 10″ wire leads.

Lights with horn combine sight and sound for extra impact. Horn is rated 90 dB @ 10 ft. Size is 4″ Dia.×4¼″ Ht. and base is aluminum. Both have three 8½″ wire leads.

To Order: For lights and replacement lens, please specify amber, blue, clear, or red.

- UL recognized (for lift trucks)
- 60 flashes per minute

When you don't need an overpowering strobe and want to save a little space, this low intensity light is perfect. Lens and base are polycarbonate and overall size is 4¾″ Wd.×3⅞″ Ht. Base has two 3⁄16″ dia. mounting holes for surface mounting (screws not included). Hardwire using the two 6″ wire leads. Bulb life is 1000 hours. UL recognized component for lift trucks.

Optional ***light guard*** is 5⅝″ Ht.×8″ Wd.×4⅜″ Dp. It has two ¼″ dia. mounting holes (screws not included).

To Order: For light and replacement lens, please specify amber, blue, clear, or red.

	Amps		Each
12-80 VDC	0.65	5982T42	$85.25
Replacement Lens		5982T45	19.41

Mini Wall-Mount Strobe Lights

- Indoor/outdoor use
- For washdown environments (NEMA 4X, IP65)
- UL listed
- 80 flashes per minute
- 1 candela second

Small and rectangular, these strobe lights are ideal for mounting in tight spaces on walls or panels. A polypropylene gasket provides a water- and dust-tight seal. Lens and base are polycarbonate and overall size is 2⅝″ Ht.×5¹⁄₁₆″ Wd.×2⁵⁄₁₆″ Dp. Surface mount with the included screws. Base has a terminal block for wiring. Bulb life is 4000 hours.

To Order: For lights and replacement lens, please specify amber, blue, clear, green, or red.

	Amps		Each

Mini Wall-Mount Flashing/Continuous LED Light

- Indoor/outdoor use
- For washdown environments (NEMA 4)
- 360 flashes per minute
- 1200 candela seconds

Program this compact light to switch between flashing or continuous light. LED technology means it can operate for 100,000 hours, so you may never need to replace bulbs. Wall or panel mount.

Light has a polycarbonate base and a clear polycarbonate lens. Overall size is 2″ Ht.×5¾″ Wd.×1″ Dp. Draws 0.3 amps @ 9-28 VDC and has two 8″ wire leads. To install, remove light from base, mount the base to a panel or other flat surface, then secure the light back into the base using the included screws.

To Order: Please specify amber, blue, green, red, or white.

3072T1 ..... **Each** $108.19

Aircraft Warning Lights

Mount these continuous lights to the top of towers to warn low-flying aircraft. Lights have a 1″ NPT female connection and must be hardwired (wire leads not included). Lens is red. Base is orange aluminum. Lights operate on 120 VAC, 50/60 Hz and use 116-watt incandescent bulbs, sold separately below. Bulb life is 8000 hours. All meet FAA specification L810.

Heavy Duty Signal Lights

One Light with Optional Guard

Two Light Three Light

Install these tough lights in a rugged indoor environment. They have a cast aluminum body, glass lens, and a safety chain that keeps the lens attached to the light. Suitable for use up to 250 VAC/VDC, 60 Hz. They have a continuous light and use incandescent bulbs up to 100 watts (100-watt bulb sold separately below). Lights have screw terminals for electrical connections. Commonly used on cranes, they meet OSHA safety color code for marking physical hazards.

One-light model has three 3/4″ NPT female connections for pipe mounting. **To Order:** Please specify amber, green, or red.

Two-light model has a bracket for vertical or horizontal mounting (screws not included). There is a 3/4″ NPT female connection on each light. Light has one green and one red lens.

Three-light model has a bracket on each light for mounting (screws not included). There is a 3/4″ NPT female connection at the top of each light and on the exterior of the two outer lights. Light has an amber, a green, and a red lens.

Optional ***wire lens guard*** fits individual lights in all three styles.

To Order: For replacement lens, please specify amber, green, or red.

	O'all Size, Ht. × Wd. × Dp.		Each

Traffic Signals

One Light

Two Light Three Light

Safeguard dangerous intersections and travel routes indoors and out. Made of black 16-ga. steel, lights operate on 110 VAC, 60 Hz and include a 45-watt halogen bulb with a 2500-hour life. Lenses are glass and 6 3/8″ in dia. Use the two 1″ trade size (1 3/8″ dia.) knockouts on each end to connect conduit, or wall mount (holes are not drilled). Lights come with screw terminals for hardwiring and meet OSHA safety color code for marking physical hazards.

One-light model has either an amber or red lens. **To Order:** Please specify color.

Two-light model has a red top lens and blue-green (also known as railroad green) bottom lens.

Three-light model has a red top, amber middle, and blue-green bottom lens.

Optional ***light flasher*** allows lights to be wired as continuous or flashing in any combination.

	Amps @ 110 VAC	O'all Size, Ht. × Wd. × Dp.		Each

Forklift Tail Lights

Improve safety around forklifts with these multifunctional lights. They have an amber turn light, red stop light, and a clear backup light. Lens is polycarbonate and base is nylon. Overall size is 8 5/16″ Ht. × 2″ Wd. × 2 3/16″ Dp. Surface mount using the two 1/4″ dia. mounting holes (screws not included). UL recognized for lift trucks.

12 VDC light has a continuous red tail light in addition to the lights listed above. It has five 7 1/4″ wire leads. Bulb life is 1000 hours. ***36 VDC*** light has four 7 1/4″ wire leads. Bulb life is 300 hours.

Optional ***light guard*** provides extra protection against breakage.

Also Available: Replacement lenses and bulbs. Please ask for 58065T2 and specify part required.

	Amps		Each
12 VDC	5.6	58065T11	$52.06
36 VDC	1.3	58065T13	60.56
Light Guard		58065T15	33.50

Combination Exit and Emergency Lights

Illuminate the way to exits, even in the event of a power failure. Exit lights have a white housing and snap-out directional arrows. They operate on 120/277 VAC and have a maintenance-free 6-volt sealed lead-calcium battery for 1 1/2 hours of emergency lighting. All lights include mounting hardware and a bracket (also known as a canopy). Emergency lights are adjustable.

Lights with a ***plastic housing*** are impact, scratch, and corrosion resistant and feature snap-together construction. Viewable from one or both sides. End or back mount on wall or top mount on ceiling.

Style A has LEDs to illuminate the exit sign during normal and backup operation. One 5.4-watt krypton emergency light is mounted to each side. Housing is PVC. Meets UL 924. **To Order:** Please specify green or red PVC insert. ***Style B*** has two incandescent bulbs to illuminate the exit sign during normal operation and two 7-watt bulbs during backup operation. One 5.4-watt halogen emergency light is mounted to each side. Includes two green and two red ABS plastic inserts. Housing is ABS plastic. ETL listed.

Lights with a ***steel housing*** have a powder-coated finish for extra durability and are viewable from one side. Inserts are fiberglass. They meet UL 924. **To Order:** Please specify green or red fiberglass insert.

Style C has two incandescent bulbs to illuminate the exit sign during normal operation and two 6-watt bulbs during backup operation. Two 6-watt incandescent emergency lights are mounted to the top. End or back mount on wall or top mount on ceiling. ***Style D*** has two incandescent bulbs to illuminate the exit sign during normal operation and two 6-watt bulbs during backup operation. One 8-watt PAR36 sealed-beam emergency light is mounted to each side. Back mount on wall or top mount on ceiling.

Exit Lights

A

B

C

Exit locations should be as clear as day—even at night. Lights have a white housing and include mounting hardware and a bracket (also known as a canopy) for end and back mounting on a wall and top mounting on a ceiling. They also include a backplate. All are UL listed and meet UL 924. *Incandescent* and *fluorescent* lights include two bulbs for normal, non-backup operation. *LED* lights consume the least power and have the longest life, so you may never need to replace the bulbs.

A ***Plastic Housing—*** Lights have an impact-, scratch-, and corrosion-resistant housing. Viewable from one or both sides. All meet UL94V0 for flame resistance.

Incandescent lights have a polycarbonate housing and two green and two red acrylic inserts so you can illuminate "EXIT" in either color. Light *with emergency backup battery* has a 6-volt sealed lead-acid battery and two 5.4-watt backup bulbs.

LED lights have a thermoplastic housing and two polycarbonate inserts. **To Order:** Please specify green or red inserts. Light *with emergency backup battery* has a 1.2-volt nickel-cadmium battery.

B ***Steel Housing—*** Lights have a powder-coated finish for durability and protection against corrosion and flaking. They are viewable from one or both sides and have snap-out directional arrows. All have two fiberglass inserts. **To Order:** Please specify green or red inserts.

Incandescent and fluorescent lights with emergency backup battery have a 6-volt sealed lead-calcium battery and two 6-watt backup bulbs.

LED light with emergency backup battery has a 7.2-volt sealed nickel-cadmium battery.

C ***Steel Housing with Glass Panel (Chicago Approved)—*** Lights have a City of Chicago-approved glass panel with red silk-screened letters and arrows. Housing has a powder-coated finish for durability and protection against corrosion and flaking. They are viewable from one side. **To Order:** Please specify arrow direction: left, right, both, or none.

Light ***with emergency backup battery*** has a 6-volt sealed lead-calcium battery and two 6-watt backup bulbs.

Glow-in-the-Dark Exit Lights

Wall Mount

Multimount with Aluminum Frame

Multimount with Steel Frame

No electricity, batteries, or radioactive tritium. Just expose these photoluminescent lights to at least 54 lux (a measure of visible light—400 lux is typical in the occupied public areas of most buildings) during the day, and they will be clearly visible at night. They're suitable for hazardous locations and have a life expectancy of 25 years. UL 924 listed.

Wall-mount light is made of photoluminescent yellow PVC visible up to 50 ft. away. It includes two adhesive-backed directional arrows. Has four 5/32″ mounting holes (screws not included). **To Order:** Please specify green or red letters.

Multimount lights are ready for wall (flush) mounting and include a bracket for ceiling and end mounting (screws included).

Multimount lights with aluminum frame have a brushed finish and a photoluminescent PVC panel visible up to 75 ft. away. They include two adhesive-backed directional arrows. **To Order:** Please specify green or red letters.

Multimount lights with steel frame have a powder-coated finish for extra protection. They have green photoluminescent letters and two snap-out directional arrows visible up to 50 ft. away. **To Order:** Please specify black or red frame.

Everglow Exit Lights

ABS Plastic Frame with Optional Ceiling Mounting Bracket

Aluminum Frame with Optional End Mounting Bracket

No electricity needed for these hazardous-location, waterproof lights. They're self-illuminated by a radioactive tritium-filled, phosphor-coated, heat-resistant glass tube behind a protective translucent polycarbonate insert. All have a red stencil with 6″ high letters and snap-out directional arrows. Viewable from one side. Due to radioactive elements, the manufacturer will register the sign location with the Nuclear Regulatory Commission (NRC). Information will be sent to you about the regulations for their proper use and disposal. All meet UL 924.

Optional mounting brackets have two 3/16″ dia. holes (screws not included). *End-mount* bracket mounts one end of the sign to the wall. *Pendant ceiling-mount* bracket suspends exit light 12″ from ceiling.

Lights with an ***ABS plastic frame*** are 8½″ Ht. × 14″ Wd. × 1″ Dp. They have eight ¼″ dia. mounting holes and include a mounting bracket for end and ceiling (flush) mounting (screws not included). All have a black frame and vinyl stencil.

Lights with an ***aluminum frame*** are 8¼″ Ht. × 13″ Wd. × 1½″ Dp. and have four 3/16″ dia. mounting holes (screws not included). Frame has a brushed finish and stencil is aluminum.

Also Available: Black ABS plastic frame with green aluminum stencil. Please ask for 1668K3 and specify life span in years: 10, 15, or 20.

For information about NEMA enclosure ratings, see page 843.

Harsh Environment LED Exit Lights

Moisture, dust, and corrosion aren't a threat to these NEMA 4X and UL 50 Type 4X rated lights. LED bulbs provide long life and evenly illuminate the word EXIT. Housing is gray high-impact glass-filled polycarbonate and cover plate is clear polycarbonate. Lights are single-faced with 6″ high red letters and include snap-out directional arrows. Size is 12⅜″ Ht. × 15¾″ Wd. × 5¼″ Dp. Back mount to a wall using the four ¼″ dia. mounting holes (screws not included). They operate on 120/277 VAC and meet UL 924.

AC powered light is rated 2.7 watts.

AC powered light with emergency backup battery has a 4.8-volt nickel-cadmium battery that provides two hours of service. Rated 3.8 watts.

		Each
AC Powered Light	57425T6	$278.06
AC Powered Light w/Emergency Backup Battery	57425T3	367.18
Replacement 4.8-Volt Battery for 57425T3	57425T21	16.50

Exit Light Wire Guard

Protect your wall-mounted exit light from damage by enclosing it in this 0.114″ thick steel guard. It has a white polyester finish and fits exit lights up to 10¼″ Ht. × 13½″ Wd. × 2½″ Dp. Includes mounting hardware.

6358T17 ..... **Each** $42.67

Exit Light Testing Clamps

Now it's easy to test your exit lights for compliance with NFPA (National Fire Protection Agency), which requires you to annually test your emergency lighting system for a duration of 1½ hours.

Clamps secure to any exit sign that's 1⅛″ to 3″ deep. An adjustable point slides along the length of the clamp to keep the test button depressed when locked in position. Clamps are polycarbonate with nylon screws.

Optional extension arm gives you the extra reach you need for test buttons located on the face of the light.

		Each
For Ceiling-Mount Lights	9361K74	$8.85
For Wall-Mount Lights	9361K75	8.85
Extension Arm	9361K76	2.22

Exit Signs

The messages printed clearly on one side of these signs help you conform to OSHA 29 CFR 1910.37. All ***8″×8″*** signs also conform to NFPA 170.

Adhesive-backed vinyl are 0.004″ thick.

Glow-in-the-dark adhesive-backed polyester are 0.011″ thick. They meet ASTM E2072-00/ E2073-00 and DIN 67510-1 standards for photoluminescent safety markings. *8″×8″* signs also meet ASTM E2030-00.

Polyethylene are 0.055″ thick with four 3/16″ dia. mounting holes (screws not included).

Aluminum are 0.040″ thick with four 3/16″ dia. mounting holes (screws not included).

Keep your workplace safe—alert people to potential hazards with accident prevention signs and labels. Danger, Warning, Caution, and Notice headers meet ANSI Z535 specifications. Danger and Caution headers for signs also meet OSHA 29 CFR 1910.145.

DANGER Indicates imminently hazardous situations that, if not avoided, will result in serious injury or death. This signal word is to be limited to the most extreme situations. Danger headers have white letters surrounded by red with a black border.

WARNING Indicates potentially hazardous situations that, if not avoided, could result in serious injury or death. Warning headers have black letters surrounded by orange with a black border.

CAUTION Indicates potentially hazardous situations that, if not avoided, may result in minor or moderate injury. May also be used to alert against unsafe practices. Caution headers have yellow letters surrounded by black.

NOTICE Indicates statement of company policy directly or indirectly related to the safety of personnel or protection of property. Notice headers have white letters on a blue background.

Accident Prevention Signs

Signs are printed on one side. Message is black on a white background for Danger and Notice signs, black on yellow for Caution, and black on orange for Warning. Mounting screws are not included.

Adhesive-backed vinyl signs are 0.004″ thick. ***Polyethylene*** signs are 0.055″ thick and have four 3/16″ dia. mounting holes. ***Aluminum*** signs are 0.040″ thick and have four 3/16″ dia. mounting holes.

Accident prevention sign prices are listed at right. **To Order:** Please specify part number (listed beneath each sign) and material.

Heavy Duty Floor Signs

5874T17

5874T23

5874T19

Steel construction gives these signs strength and stability to endure harsh conditions. Made of 0.038″ thick steel with a baked-enamel finish, signs have the same message on both sides. Size is 14″ Wd.×20″ Ht. A handle at the top makes them easy to move. "Danger" headers have white letters surrounded by red. Messages and graphics are black on a white background.

Each $49.39

Extra Tall Easy-View Floor Signs

5967T1

5967T2

5967T3

With three 32″ high panels, it's hard to miss these signs. Each panel is 15″ Wd. and displays the same message. Made of 5⁄32″ thick polypropylene, signs fold flat for easy storage and have a built-in handle. They also have interlocking tabs that allow them to be joined and used as a barricade. "Caution" headers have yellow letters surrounded by black. Messages have black letters on a yellow background.

Each $33.33

Multilingual Safety Cones

Clearly communicate your warning with a multilingual message and an ANSI caution symbol. Cones are stackable and made of yellow polyethylene. Messages and illustrations are black.

Caution message is displayed in English, Spanish, and French. ***Caution/Wet Floor*** message is displayed in English and Spanish.

Hazardous Material Information Signs

NFPA Diamond

NFPA

Color Stripe

Provide appropriate code numbers for hazards. Post the ***NFPA (National Fire Protection Association) diamond*** and write in the numbers using permanent markers (see 1661T on page 1940) or use 2″ high adhesive-backed numbers for 14035T23, 4″ high for T25 and T22 (see pages 1934-1935). Post the ***NFPA*** and ***color stripe*** signs to explain the code numbers and colors. Color scheme is blue, red, white, and yellow.

Adhesive-backed vinyl signs are 0.005″ thick.

Fiberglass signs are 0.1″ thick and have four 7/32″ dia. mounting holes (screws not included).

Write-On Hazardous Material Labels and Pictograms

Get the message across about hazardous materials in your workplace. All are made of 0.005″ thick adhesive-backed vinyl.

Labels

NFPA

Color Stripe

Just write on these labels using permanent markers (see 1661T on page 1940) to post the appropriate code numbers. You can also use pictograms to convey information about personal protection, sold separately below. These labels have a blue, red, white, and yellow color scheme.

Small Labels—*NFPA* (National Fire Protection Association) style is 5″ Wd. × 3″ Ht.; *color stripe* style is 3″ Wd. × 5″ Ht. Package quantity is 10.

Large Labels—*NFPA* style is 10″ Wd. × 7″ Ht.; *color stripe* style is 7″ Wd. × 10″ Ht. Package quantity is 5.

Style	Small Labels	Per Pkg. 1-4	5-Up	Large Labels	Per Pkg. 1-4	5-Up
NFPA	5026T44	$9.16	$7.63	5026T42	$11.92	$9.93
Color Stripe	5026T46	9.16	7.63	5026T45	13.82	11.52

Pictograms

A picture is worth a thousand prevented injuries. These attach easily to the labels above.

Pictograms for small labels have 36 pictograms per card. Each pictogram is ¾″ × ¾″.

Pictograms for large labels have 9 pictograms per card. Each pictogram is 1½″ × 1½″.

To Order: Please specify pictogram and size, small or large.

Hazardous Chemical/Gas Specification Signs and Labels

Keep personnel informed about the effects and treatment of chemical exposure. Signs and labels are red and white.

Signs are 0.055″ thick polyethylene. Size is 10″ Wd. × 8″ Ht. For tape with adhesive on both sides, see pages 3451-3453.

Labels are 0.005″ thick adhesive-backed vinyl. A clear vinyl coating protects the printing from scratching off. Size is 4½″ Wd. × 3½″ Ht.

To Order: Please specify chemical/gas from list below.

Chemical/Gas	Chemical/Gas	Chemical/Gas
Acetone	Diesel Fuel Oil	Nitric Acid
Acetylene Gas	Gasoline	Nitrogen
Alcohol	Hydrochloric Acid	Oil
Anhydrous Ammonia	Isopropanol	Oxygen Gas
Argon Gas	Kerosene	Propane Gas
Carbon Dioxide	Lacquer Thinner	Sodium Hypochlorite
Caustic	Methanol	Sulfuric Acid
Caustic Soda	Methyl Ethyl Ketone	Trichloroethylene
Chlorine	Mineral Spirits	Xylene

Sign	5961T1	**Each**	$7.63
Labels (5/Pkg.)	1297T4	**Per Pkg.**	$13.18

Write-On Hazardous Material ID Tags with See-Through Covers

Front **Back**

NFPA

Front **Back**

Color Stripe

An adhesive-backed polyester cover protects the surface of these tags so they last longer. Tags are 0.015″ thick vinyl and have a blue, red, white, and yellow color scheme. They include a 7″ long cable tie and have a ⅜″ dia. grommet. Size is 3″ Wd. × 5¾″ Ht.

Write on these tags using permanent markers such as 1661T on page 1940. ***NFPA*** stands for National Fire Protection Association.

Style	Pkg. Qty.		Per Pkg. 1-4	5-Up
NFPA	5	1290T73	$8.12	$6.90
Color Stripe	5	1290T74	8.12	6.89

Hazardous Material Storage Labels

4″×4″ Hazardous Waste Label

6″×6″ Hazardous Waste Label

7½″×4″ Chemical Label

Before storing hazardous materials, attach one of these adhesive-backed labels and write in your information. For permanent markers, see 1661T series on page 1940.

4″×4″ and ***7½″×4″*** labels are 0.005″ thick chemical-resistant vinyl. An adhesive-backed laminate cover keeps labels free of dirt and dust. *4″×4″* label is white with a red background. *7½″×4″* label has colored tabs to indicate flammable (red), corrosive (yellow), irritant (blue), store (green), and process (orange).

6″×6″ label is 0.003″ thick vinyl. It is red on a yellow background.

Label, Wd.×Ht.	Pkg. Qty.		Per Pkg. 1-4	5-Up
4″ ×4″ Hazardous Waste	3	5858T42	$9.02	$6.70
6″ ×6″ Hazardous Waste	5	5858T56	4.86	3.09
7½″×4″ Chemical	2	5858T44	13.37	9.34

D.O.T. Vehicle Placards

Individual placards are vinyl and meet the Dept. of Transportation Hazardous Material (HM)-181 requirements (D.O.T. 49 CFR 172.519). Size is 10¾″×10¾″. *Adhesive-backed* placards are flexible. *Rigid* placards fit in a placard holder (sold separately).

Placard holder for rigid placards is 0.032″ thick anodized aluminum with one stainless steel clip. Holder has eight 3⁄16″ dia. mounting holes (screws not included).

Also Available: Placards not shown. Please ask for 59125T888 and specify material and message.

Right-to-Know Stations

English Station with Binder

English Station with Binder and Training Booklets

Give all employees access to information according to OSHA's Hazard Communication Standards.

Station with binder has a polystyrene board, binder rack, and Material Safety Data Sheet (MSDS) binder. Colors are red and yellow. Station is 20″ Ht.×14″ Wd.×4½″ Dp. and has four 3⁄16″ dia. mounting holes (screws included). MSDS binder is 10½″ Wd.×11½″ Lg. and has three 1½″ dia. rings. It holds approximately 275 MSDS sheets and stays attached to the station with the included 36″ chain. *English/Spanish* station has an English/Spanish binder, and station lettering is in Spanish.

Station with binder and training booklets comes with an MSDS binder plus 10 "Right-to-Know" booklets. Station is blue acrylic with red letters on a white background. It is 30″ Ht.×24″ Wd.×4½″ Dp. and has four 3⁄16″ dia. mounting holes (screws not included). *English/Spanish* station comes with five "Right-to-Know" booklets in English and five in Spanish. The binder and station lettering are in English/Spanish.

Take-a-Number Dispenser

6458T12

Show your commitment to efficient customer service. A sign prompts customers to take a number from the red number dispenser. The sign and dispenser are ABS plastic and mounted on a 1-foot high chrome-plated steel counter stand. You control the included LED display via three push buttons that allow you to increase or decrease the displayed number. The display is black and shows two red 4″ Wd.×5″ Ht. digits. It is powered by a 12-volt transformer with three-prong (NEMA 5-15) plug. Connect the transformer, display, and push buttons with the included 100 feet of wire. Screws are also included.

Optional floor stand is 51″ high and has a chrome pole and iron base. A ***roll of numbers*** is sold separately and has 3000 tickets. It is printed with two black digits on a white background.

						Each
Dispenser	6458T12					$346.85

Back of Danger Tags

Laminated Tags

Sealed in plastic, these tags stand up to the harshest environments. Write on them using permanent markers such as 1661T on page 1940. Tags are 3⅛″ Wd. × 5⅝″ Ht. with a ⅜″ dia. zinc grommet. Thickness is 0.025″. They help you conform to OSHA 29 CFR 1910.145(f) and ANSI Z535.2-1991. For blank cardstock tags, see page 1958.

Danger Tags—Headers have white letters surrounded by red with a black border. Messages have black letters on a white background (except 5775T72, which has white letters on a red background). *Lockout/tagout danger tags* also help you conform to OSHA 1910.147 for lockout/tagout applications.

Caution Tags—Headers have yellow letters on a black background. Messages have black letters on a yellow background.

Maintenance Tags—5862T11 is black on orange. 5862T12 is black on yellow. 5862T13 is black on white.

Fire Extinguisher Inspection Tag—Black and red on white.

Cylinder Tags—5862T14 is white on red. 5862T15 is white on green.

Nylon Cable Ties—11″ long.

Nickel-Plated Steel Bead Chains—12″ long.

Write-On Tags with See-Through Covers

Protect your message from wear—just peel back the clear plastic flap, write your message on the front of the tag, and then permanently cover it with the flap. Made of 0.015″ thick vinyl, these tags are 3⅛″ Wd.×5″ Ht. with a ⅜″ ID brass grommet and 6¾″ long nylon tie. Tags meet ANSI Z535.2-1991 and OSHA 29 CFR 1910.145(f).

For permanent markers, see 1661T on page 1940.

Danger tags have headers with white letters surrounded by red with a black border. Messages have black letters on a white background.

Valve No. tag has black letters on a blue, green, red, or yellow background. **To Order:** For valve tag, please specify background: blue, green, red, or yellow.

LOCKOUT : TAGOUT SYSTEM

LOCKOUT:TAGOUT CHECK LIST

Data Checklist Sheet

Manage your lockout/tagout procedures. Made of white cardstock, tags and sheets have blue lettering and provide space to write information. Hole ID is ⅜″.

Tags are 0.027″ thick and display lockout information for a particular machine. Size is 2⅞″ Wd.×5⅜″ Ht.

Data checklist sheets are 0.017″ thick and allow you to keep detailed lockout records. Size is 8½″ Wd.×11″ Ht.

Nylon cable ties are 11¼″ long.

	Pkg. Qty.		Per Pkg. 1-4	5-Up
Tags	10	8182T45	$3.69	$3.13
Data Checklist Sheets	5	8182T44	5.30	4.18

Lockout Stations

12″×9″

12″×19″

24″×19″

Give your lockout/tagout program the best chance of success with highly visible stations that organize locks, tags, and lockouts. Stations are made of PVC board and have yellow letters surrounded by a black border and a yellow background. Mounting holes are ⅜″ dia. (hardware not included). ***12″×9″*** and ***12″×19″*** stations have four mounting holes. ***24″×19″*** station has six mounting holes.

Wd.×Ht.	Capacity: Padlocks	Tags	Lockouts		Each
12″× 9″	4	25	–	8270T61	$21.40
12″×19″	10	25	3	8270T62	36.50
24″×19″	20	50	6	8270T63	53.00

Lockout Labels

5797T21

5797T23

Remind workers to use lockout devices with these self-adhesive vinyl labels. They're 0.004″ thick and have black letters on a yellow background. Size is 4½″ Wd.×2¼″ Ht.

Per Pkg. (10/Pkg.) 1-4 $7.62 5-Up $6.48

Shatter-Resistant Plastic Sign Holders

Your messages are too important to risk wear and tear. Made of clear acrylic with rubber for added flexibility, these sign holders are shatter resistant for long life. Insert materials from the sides. A mounting hanger is included.

Maximum Sign Size, Wd.×Ht.		Each
5″ × 7″	13325T41	$5.32
8½″×11″	13325T42	7.34

22″ ×28″	13325T45	43.32
24″ ×36″	13325T46	66.60

Glass-Mount Sign Holders

Put a sign where others won't miss it. Four transparent suction cups allow you to display documents and signs on glass and mirrored surfaces. Use indoors (even where it's sunny, thanks to UV stable clear acrylic construction). Insert materials from the top or sides.

Maximum Sign Size, Wd.×Ht.		Each
8½″×11″	4946T82	$20.14
11″ ×14″	4946T83	26.18

Frame-Style Sign Holders

Sign Not Included

Give your signs authority and distinction in these sturdy, durable holders. A clear plastic cover protects certificates, licenses, and other documents. Simply slide in materials on one of the short sides.

Mount with screws or tape with adhesive on both sides (neither are included). ***Aluminum*** sign holders have six 1/8″ dia. mounting holes.

Maximum Sign Size, Wd.×Ht.	Aluminum	Each	Oak	Each
9″× 6″	5710T5	$24.19	5710T21	$27.72

23″×17″	5710T3	40.75	5710T24	47.49

Table-Top Sign Holders

Slant Back

Straight Back

Personnel and visitors may be missing out on important information. These clear acrylic stands are a quick and easy way to prominently display documents and signs on a table or countertop.

Slant-back stands are for one-sided viewing. Insert materials from the sides or bottom.

Straight-back stands allow viewing from both sides. Insert materials from the top or sides.

Maximum Sign Size, Wd.×Ht.	Slant Back	Each	Straight Back	Each
5″ × 7″	13315T23	$3.96	13315T33	$4.90

11″ ×14″	13315T26	16.34	13315T36	19.57

Snap-Close Frame-Style Sign Holders

A seamless snap-lock closure makes these durable holders even more attractive. Just snap open any edge, slip in your poster or document, and snap shut for easy switching between signs.

Plastic sign holders are black with steel-reinforced corners. A mounting hanger is included.

Plastic covers are clear plastic sheets that can be used in the plastic sign holders (sold separately) to protect documents.

Aluminum sign holders have a silver finish and include a clear plastic cover to protect documents. There are four 1/4″ dia. mounting holes (screws not included). You can also mount these sign holders with tape with adhesive on both sides (not included).

C	8¾″ × 5¼″ × 1¾″	9¼″ × 9⅝″ × 3¾″	8145T23	9.83

Adhesive-Surface Bulletin Boards

Tired of hunting for tacks and tape? These boards have a long-lasting adhesive surface that securely holds papers in place. To remove papers, simply peel them off.

Boards have a blue surface and black plastic frame. They include tape with adhesive on both sides for wall mounting.

O'all Size, Wd. × Ht.		Each
22″ × 18″	6723T11	$30.27
36″ × 22″	6723T12	58.40

Vandal-Resistant Frame-Style Sign Holders

A durable black powder-coated steel frame locks and unlocks with an included Torx L-key to prevent tampering, and an 1/8″ thick acrylic display area protects your sign from the elements. Hinges are Type 304 stainless steel.

Mount holders to a wall or pole. For wall mounting, there are four 0.26″ dia. holes (screws included). For pole mounting, there are four 1″ long slots for worm-drive hose clamps or steel banding (not included).

Maximum Sign Size, Wd. × Ht.	O'all Size, Wd. × Ht. × Thick.		Each

Changeable-Letter Boards

Freestanding Board

Wall-Mount Single-Door Board

Wall-Mount Double-Door Board

Gothic Characters

Present messages legibly and professionally. Letter boards have an aluminum frame and a grooved surface for mounting characters. They include a set of 324 Gothic characters that are 3/4″ high.

Note: Helvetica letter sets as well as individual characters are sold separately on this page.

Freestanding boards have a chrome pedestal that adjusts from 49″ to 56″ high. The panel surface is grooved black plastic. *Covered* board has a shatter-resistant acrylic insert. Inside depth is 1/4″.

Wall-mount boards include mounting brackets (screws not included). The panel surface is grooved black felt. *Single-* and *double-door* boards have locking, shatter-resistant acrylic windows that all open with the same key (keyed alike) to safeguard messages from tampering. They include two keys. Inside depth is 15/16″.

Bulletin Boards

Post the latest info on these boards. All include mounting brackets.

Cork boards have a natural-tan cork surface. Wall-mounting fasteners are not included, unless noted. *Cork boards with deluxe oak frame* have a backing that is sealed to protect against moisture and warping.

Rubber boards have a black and tan speckled surface. They can be easily cleaned with any nontoxic cleaner, so they're great for dirty, harsh environments. Wall-mounting fasteners are also included.

Electronic Moving Message Displays

One-Line 24″ Display

Two-Line 24″ Display

Remote Keypad

Messages get noticed with our brightly lit dot matrix LED displays. Program messages up to 30 ft. away (15 ft. for 5779T28) using the included wireless remote keypad—it has the same characters as a computer keyboard. Program characters to display in uppercase or lowercase and slim or wide. Letters center automatically. Display modes let you manipulate text so it scrolls, flashes, remains constant, and more. Displays also offer built-in animations, complete editing functions, and auto time-of-day message scheduling. Housing is black.

Displays operate on 120 VAC, 50/60 Hz and have an RS-232 computer interface serial port. They're for indoor use only. Operating temperature range is 32° to 120° F. Mounting screws and instructions are included. All are UL listed except 5779T76, which is ETL listed.

5779T28 includes software and a 25-ft. cable so you can program through your PC.

Two-line display shows messages on one or two lines. ***Replacement keypads*** include four AAA batteries, except 5779T23, which requires two AA batteries (not included).

Portable Adjustable Dry Erase Board

Make sure everyone can see what you're writing—telescopic legs adjust the overall height of this board from 38″ to 69″. The board measures 27″ Wd.×36″ Ht. and has a white, nonmagnetic melamine writing surface. It includes a spring-loaded flip-chart holder (paper pads sold separately on this page) and a full-length marker tray. The frame and legs are made of aluminum.

5960T48 ..... **Each** $192.03

Tripod Easels and Paper Pads

Make effective communication an art with these easels. They have an adjustable board holder except for the plastic model, which has a permanently positioned board holder.

Plastic and ***aluminum*** easels can be adjusted for floor or tabletop use. *Aluminum* easels include a bar for holding flip charts.

Tripod Easels

Magnetic-Mount Dry Erase Sheets and Boards

Flexible Sheet

Framed Board with Marker

Mount these magnetic-backed boards vertically or horizontally to virtually any metal surface.

Flexible sheets have a white laminate surface that accepts both dry erase markers (clean with a dry eraser or cloth) as well as damp erase markers (clean with a damp cloth). Sheets have an entirely magnetic back.

Framed boards have a white, nonmagnetic melamine surface that accepts dry erase markers. The boards are rigid and have magnetic strips on the back. Frame is plastic. They include a black, fine-tip dry erase marker with a hook-and-loop strip that can be attached to the board for convenient access.

Invisible-Grid Dry Erase Boards

Draw neat and precise graphs and charts with the help of a grid that's invisible to the audience, but not to anyone standing beside the board. A 2″×2″ light-blue grid pattern is ingrained beneath these boards' magnetic, white painted steel surface. All boards have an aluminum frame and a marker tray. They include mounting brackets. Wall-mounting screws are not included.

O'all Size, Wd.×Ht.		Each

Rough-Duty Dry Erase Board

Provide announcements and instructions with a board designed to handle your rugged worksite. This board has a tough yellow plastic frame with shock-absorbing black rubber corners and a white, melamine-coated magnetic steel surface. Overall size is 24″ Wd.×18″ Ht. Marker holder, mounting brackets, and mounting screws are included.

6583T5 ..... **Each** $28.24

Dry Erase Wall and Board Covering

Transform walls, chalkboards, and other flat surfaces into a dry erase board. Simply apply vinyl adhesive (required; sold separately below) to this covering and smooth it into place. You can easily cut covering to size with a razor blade. Made of white laminate with a reinforced fabric backing. *Note:* For best results, make sure your mounting surface is sealed or painted before applying adhesive and covering.

Cut-to-length covering is 48″ wide. Maximum continuous length is 100 ft. **To Order:** Please specify length.

Wall and Board Covering

48″ Wd.×36″ Ht. ..... 52265T54 **Each** $91.54
Cut-to-Length ..... 52265T41 **Per Ft.** 1-4 $30.51 5-Up $25.43

Vinyl Adhesive

This adhesive is required for mounting both coverings shown above. It comes in a one-quart container and covers 70 square feet.

52265T43 ..... **Each** $10.78

Fluorescent Marker Boards

Messages glow on our black-surface boards with oak frame. Simply wipe clean with a damp cloth. They include a bullet-point fluorescent marker and mounting brackets. Wall-mounting screws are not included.

Marker set has one bullet-point fluorescent marker in each color: blue, green, pink, white, and yellow.

O'all Size, Wd.×Ht.			Each

Dry Erase Board Planning Kits

Keep an eye on production assignments, job schedules, time allocation, and inventory control. These white, porcelain-coated magnetic steel boards have blue grid lines that form 1″×2″ spaces. Write or type on the color-coded data cards (included in blue, green, orange, white, and yellow), slip them into the 1″×2″ magnetic card holders (included), and place them on the board. Magnetic month, date, and day headings are also included.

All boards have an aluminum frame. The frame has a self-hanging groove that slips over nails or screws for wall mounting. Wall-mounting hardware included.

O'all Size, Wd.×Ht.	No. of Lines Horizontal	No. of Lines Vertical	No. of Card Holders	No. of Data Cards		Each

United States Flags

Indoor/Outdoor Flag

Indoor Flag Set

Proudly made—and raised—in the United States of America.

Indoor/outdoor United States flags are double-stitched for added strength and have embroidered stars.

Sizes 6 ft.×10 ft. and smaller have brass grommets; sizes 8 ft.×12 ft. and larger have heavy duty chrome-plated D-rings (unless noted).

Two-ply polyester withstands the most demanding weather conditions, especially high winds. Made of highly durable materials that resist sunlight and water. *Nylon* has enhanced fade resistance and flies in the slightest of breezes. Made of highly durable materials that resist sunlight and water. *Two-ply cotton* is made of all-natural fibers.

Indoor United States flag set has a fringed nylon flag with embroidered stars, sewn stripes, and a pole sleeve. Size is 3 ft.×5 ft. Furnished with an 8-ft. long, 1¼″ dia. two-piece oak pole; a gold-tone 8-lb. stand; a 7″ high eagle ornament; and a gold cord with tassels.

Aluminum In-Ground Tapered Flagpoles

Raise your flag with confidence. Poles are tapered and are one-piece aluminum construction with a seamless satin finish, unless noted. They come with a gold anodized aluminum ball ornament, a pulley to raise and lower the flag, polypropylene rope, a 9″ cast aluminum rope cleat, an aluminum base collar, and a ground socket.

Standard flagpoles have a stationary pulley cap and two nickel-plated zinc snap hooks, unless noted. 7525T21 is a three-piece pole that can be shipped via UPS.

Heavy duty flagpoles have a revolving pulley with a 1¼″ NPT male connection and two nickel-plated zinc swivel snap hooks with covers. The revolving pulley allows the flag to move with the wind. 7170T7 is a two-piece pole.

Striped and Checkered Marking Tape

Striped

Checkered

Draw attention to areas with this PVC, adhesive-backed tape. Tape is supplied on a 3″ ID cardboard spool. Meets Fed. Spec. PPP-T-66. For indoor and outdoor use.

Striped— Tape is 8 mils thick. Stripe width is 2″.

Conformable Striped— Tape conforms to uneven surfaces for a secure hold. Tape is 6.8 mils thick. Stripe width is 1½″.

Checkered— Tape is 5 mils thick and has 1″ squares.

To Order: Please specify color from the following combinations:

Black/White— Marks traffic and housekeeping areas.

Green/White— Designates safety areas.

Red/White— Marks fire lanes and hazard areas.

Yellow/Black— Identifies physical hazards.

Yellow/Magenta— Signifies radiation hazards.

Aerosol Marking Paint

Use this paint on its own or with the dispensers sold on this page to mark buried utility lines, designate specific areas at construction sites, and for surveyor marking. Temperature range is 40° to 90° F. Paint is compliant under all state VOC rules in effect on October 1, 2010.

Water-Based Paint—Colors appear brighter than solvent-based paint. Paint will not harm grass or other plant life.

Solvent-Based Paint—Lasts longer than water-based paint.

To Order: Please specify blue, red, white, yellow, fluorescent green, fluorescent orange, fluorescent pink, or fluorescent red-orange.

	Net Wt.	Coverage		Each 1-11	Each 12-Up

Aerosol Paint Dispensers

With a pistol-grip handle and trigger-style spray control, these dispensers make it easy to apply the 16- and 20-oz. marking paint sold separately on this page.

Hand-held dispenser is lightweight and great for freehand marking.

Walk behind dispenser is 34″ high with a guidance wheel to make marking large areas easy.

Measuring wheel walk behind dispenser is 31½″ high and has a five-digit counter for measuring distance. The counter adds when moving forward and subtracts in reverse. Two-wheel design provides stability.

Hand Held	2″	5990T41	$23.53
Walk Behind	1½″	5990T31	24.46
Measuring Wheel Walk Behind	1½″	5990T51	89.00

Overhead Aerosol Marking Paint

Specially designed nozzle sprays paint in an upward direction for easy overhead marking without clogging. The paint is water-based and highly visible in darkness and from a distance. One 20-oz. (17-oz. net wt.) can will mark 330 feet with a 2″ wide stripe. Temperature range is 32° to 120°F. Paint is compliant under all state VOC rules in effect on October 1, 2010. **To Order:** Please specify fluorescent green, fluorescent orange, or fluorescent red.

6063T61 ..... **Each** 1-11 $4.62 12-Up $4.03

Vanishing Aerosol Markers

Temporarily mark areas with chalk, paint, and sealer. Marks disappear after exposure to the elements. Each comes in a 20-oz. (15-oz. net wt.) can. Temperature range is 60° to 80°F. Markers are compliant under all state VOC rules in effect on October 1, 2010.

Chalk—Disappears in 10 to 20 days when exposed to water, traffic, or abrasion. Can be immediately washed off with a pressure washer. One can will mark 350 feet with a 2″ wide stripe. **To Order:** Please specify blue, green, orange, red, white, or yellow.

Paint—Depending on exposure to sunlight and traffic, UV-sensitive paint fades to clear in 30 to 35 days. One can will mark 350 feet with a 2″ wide stripe. **To Order:** Please specify fluorescent orange, fluorescent pink, fluorescent red, or fluorescent yellow.

Sealer—Clear coating seals and protects chalk and paint for up to 60 days. One can will mark 500 sq. ft. with a 2″ wide stripe.

			1-11	12-Up
Chalk	**5956T41**	**Each**	$5.38	$4.84
Paint	**5956T42**	**Each**	$6.18	$5.56
Sealer	**5956T43**	**Each**	$4.91	$4.42

Traffic and Zone Marking Paint

Perfect for marking traffic lanes, parking lots, and factory floors. Latex paints are compliant under all state VOC rules in effect on October 1, 2009. Oil- and chlorinated rubber-based paints and water-based sealer are compliant under all state VOC rules in effect on June 1, 2011, except in California. Paint thinner is compliant under all state VOC rules in effect on January 1, 2011, except in California.

Latex Paint—Cleans up easily with water.
Oil-Based Paint—Better durability than latex paint on surfaces that are not cleaned prior to application.
Chlorinated Rubber-Based Paint—Lasts longer than latex and oil-based paints.
Water-Based Sealer—Clear coat increases marking paint life.

Aerosol Paint Dispenser and Stripers

For use with aerosol striping paint only. Dispenser and stripers have a pistol grip with trigger spray control.

Dispenser

Great for quick lines and smaller jobs. Overall height is 34″. Spray pattern is 2″ wide.

36495T5 ..... **Each** $30.50

Stripers

Made of heavy-gauge black painted steel, these stripers have 1½″ wide rubber-tread wheels. Stripers include a windscreen and hold 12 extra cans. An adjustable spray pattern lets you create 2″ to 4″ wide stripes. Stripers collapse for easy storage.

Flat model has 7″ dia. wheels for use on pavement or concrete. Overall height is 37¾″. *Turf* model has 10″ dia. wheels and is designed for use on turf and other uneven surfaces. Overall height is 36¾″.

		Each
Flat Model	**36495T81**	$88.78
Turf Model	**36495T82**	94.44

Hand-Pump Paint Striper

A few strokes of the self-contained hand pump in the tank lid builds pressure for even, efficient striping. Allows striping next to curbs and walls. It has a 4-gallon, Type 304 stainless steel tank; a brass shutoff valve; and 8″ Dia.×1¾″ Wd. solid rubber wheels. It works with all types of paint, paints a 4″ wide stripe, and will stripe 250 ft. per gallon of paint.

Optional spray-wand attachment lets you paint large arrows and numbers on flat surfaces. Includes 10 ft. of hose, two spray tips, and a 24″ brass extension wand. ***Repair kit*** includes a 2″ OD barrel gasket, rubber diaphragm, and plunger cup and washer.

		Each
Striper	**6030T22**	$597.74

● Does not meet SAE standards. ★ Fasteners not included.

Adhesive-Backed Assortment— Includes six Style A reflectors: one each of amber, blue, green, and white, plus two red.
5953T92 ..... **Each** $2.37

Standoff Reflectors and Markers

All are made of plastic and available in the colors listed in the table. **To Order:** Please specify color.

Bounce-back reflectors return to the upright position after contact.

Very high bond tape has adhesive on both sides. Comes in 1″ × 4″ rectangles. Temp. range is –40° to +200° F; apply at +60° to +100° F.

Two-part epoxy includes one gallon of each part. Color is gray. Begins to harden after 9 minutes. Reaches full strength after approximately 3½ hours. Epoxy is compliant under all state VOC rules in effect on October 1, 2010. Temperature range is –40° to +150° F.

Cone-Mounted Barricades

Mount these barricades to 28″ and 36″ high traffic cones. For cones, see 5901T on page 1908.

Panel barricades are 4″ high bright yellow PVC with a mounting ring on each end. *Reflective* panels have 3″ wide reflective orange and white stripes and "Caution" in black lettering on one side.

Adjustable bar barricades are retractable so you can adapt the size of your barrier to suit your needs. Bar is 1 1/2″ dia. ABS plastic with 6″ wide reflective stripes and a mounting ring on each end. **To Order:** Please specify black/yellow stripes or orange/white stripes.

Retractable-belt barricade requires one belt unit and one belt receiver unit (sold separately) to create a complete barrier. Both units slide over the tops of cones. The belt is polyester and comes in a polyethylene housing. The belt receiver is polyethylene. **To Order:** For belt, please specify color: orange with orange housing or black/yellow striped with yellow housing. For belt receiver, please specify color: orange or yellow.

Barricade Lights

Lights have an external on/off switch and come with and without a battery-saving photocell. All lights flash 65 times per minute and include two 6-volt batteries, mounting bolt, socket, and a bulb. Base is yellow polypropylene.

To Order: Please specify lens color: amber, blue, or red.

LED lights last longer than incandescent lights.

Repl. 6-Volt Battery	**7690K13**	Each $3.29

Reflective-Panel Barricades

The panels on both sides of these barricades have 4″ wide reflective orange and white stripes. All are made of white polyethylene.

Style A are small and fold flat so they are easier to transport and store.

Styles B&C fold flat, stack easily on top of one another, and have a nesting lug to prevent shifting during transport. Meet NCHRP-350 crash testing requirements.

Style B barricades have stripes on the top panel; *Style C* barricades have stripes on the top and bottom panels.

Incandescent light has a 7″ dia. amber lens, a yellow polypropylene base, and includes two 6-volt batteries. Lights flash 65 times per minute.

Replacement 6-Volt Battery ..... **7690K13** **Each** $3.29

Water-Fill Barricades

Standard Barricade (3783T49) Shown with Chain Link Fence Kit

Low-Profile Barricade Shown with LED Light

Fill these heavy duty polyethylene barricades with water for added stability; empty for easy transport. They have drainage plugs on both sides, fork pockets, and holes on top to insert accessories. The included coupler lets you connect barricades side by side.

Standard barricades are orange and meet NCHRP-350 crash testing requirements. ***Low-profile barricade*** is orange with 8½″ wide reflective orange and white stripes. Meets FAA specifications.

LED Light— Fits into the top of the barricades. Light has a 5″ Dia.× 4″ Ht. red polycarbonate lens, a polypropylene base, and two 6-volt batteries. Light flashes 65 times per minute.

Chain Link Fence Kit— Mounts to the top of a standard barricade. Kit includes one 60″ Ht.×72″ Lg., ⅛″ wire dia., hot-dipped galvanized steel fence panel, two posts with stabilizing grommets, and mounting hardware.

Reflective A-Frame Barricades

Pair of A-Frames with One Crossbar

Pair of A-Frames with Two Crossbars

Team a pair of A-frames with one or two crossbars (all sold separately) to create a barrier.

A-Frames— Are 41″ high and made of polypropylene. They are designed to accept one or two crossbars. For increased visibility, add a standard barricade light (sold separately on page 1909).

37855T11 ..... **Per Pair** $55.81

Crossbars— Are made of PVC and have 6″ wide reflective orange and white stripes on both sides.

Lg.×Ht.		Each
4′×10″	**37855T21**	$59.98
6′×10″	**37855T31**	74.10
8′×10″	**37855T41**	92.50
12′×10″	**37855T51**	133.99

Speed Bumps

All speed bumps are made of recycled materials except Style G.

Style D speed bump is made of yellow plastic. Hardware for installing on asphalt and concrete is included.

Styles E&F speed bumps are made of black rubber and have two 1″ channels on the bottom that accommodate ¾″ pipe. Hardware for installing on asphalt is included.

Style F has three reflective yellow bands for increased visibility. Bands are 8″ wide tapering to 2″ wide.

Also Available: Hardware for installing Styles E&F on concrete. Please ask for 2806T85.

Style G portable speed bump is made of yellow polypropylene with a textured rubber bottom that firmly grips the road surface. Comes with a canvas carrying bag.

	Lg.×Wd.×Ht.	Speed Bumps	Each	Repl. Hardware	Per Pkg.

Plastic Chain Barriers

You can use these lightweight, weather- and UV-resistant barriers indoors and outdoors. Just connect chain between posts to create a barrier that suits your needs. Posts and chain are made of polyethylene. Accessories are made of acetal.

Barrier Kits

Kits contain everything you need to create a barrier.

Standard Duty Starter Kit— Includes three 41″ Ht.×2″ Dia. black posts with white ball top and 14″ dia. base, three black hook connection adapters, and two 8′10″ lengths of yellow chain.

Heavy Duty Starter Kit— Includes three 41″ Ht.×3″ Dia. solid black posts with 16″ dia. base, three black hook connection adapters, and two 6′9″ lengths of yellow chain.

Add-On Kits— Include one of each component in the Starter Kit.

Standard Duty Starter Kit

	Standard Duty	Each	Heavy Duty	Each
Starter Kits	9197T62	$112.25	9197T12	$137.78
Add-On Kits	9197T63	42.41	9197T13	47.47

Barrier Posts

Fill the base with sand or pea gravel for added stability. Slots in the top of the post hold the chain in place.

(A&B) Standard duty round posts are 2″ dia. with a removable ball top.

Style A has a 14″ dia. base. *Style B* has an 8″ long stake end for driving into the ground.

(C) Heavy duty round posts are 3″ dia. with a removable ball top and a 16″ dia. base. Include a hook connection adapter for attaching chain without removing the ball top.

(D) Heavy duty square post is 5″ square with a removable square top and a 14″ dia. base with four 7/16″ dia. mounting holes (fasteners not included). A hole in the top lets chain pass through.

To Order: Solid-color posts are available in the colors listed in the table. Please specify color.

For striped posts, please specify color: black/yellow (B/Y), orange/reflective silver (O/S), or yellow/magenta (Y/M).

Accessories and Replacement Parts for Round Barrier Posts

Sign Holder

Hook Connection Adapter

Sign holders replace the ball top and provide a slot for a sign. Max. sign thickness is 1/16″.

Hook connection adapters have a hook at each end and fit into the slots of the post and ball top so chain can be attached without removing the ball top. Adapters accept all chain.

To Order: For accessories and replacement parts, please specify color: black, orange, red, white, or yellow.

	For Standard Duty Posts	Each	For Heavy Duty Posts	Each
Sign Holder	9197T7	$6.22	9197T23	$9.72
Hook Connection Adapter	9197T15	1.53	9197T18	2.73

Rope Barriers

The traditional favorite for indoor applications. To set up a barrier, simply hook ropes between posts or wall plates (all sold separately).

Barrier Posts

Made of chrome-plated steel, these posts are 2″ dia. with a concentric ring near the top for attaching the rope. Choose a domed or flat base.

Ht.	Base Dia.		Each
With Domed Base			
36 1/2″	11 1/2″	6060T14	$162.71
With Flat Base			
34 1/2″	13 1/2″	6060T15	116.95

Barrier Wall Plates

Save floor space. Wall plates are chrome-plated steel. Mounting screws are included.

Holds	Ht.×Wd.×Proj.		Each
One Rope	1 5/8″ × 1 1/4″ × 7/8″	6060T71	$13.22
Two Ropes	1 1/2″ × 2″ × 1 1/2″	6060T72	15.25

For One Rope *For Two Ropes*

Barrier Rope

Cotton rope with a bright red velour cover and 1 1/2″ dia. chrome-plated steel snap hook fittings at each end. Lengths listed include end fittings.

Length		Each
4′	6060T523	$67.12
5′	6060T111	72.71
6′	6060T673	82.37

Warning! Chain and rope are not load rated. Do not use for overhead lifting, towing, or similar applications.

Retractable Belt Barriers

Extend the belt when you need a barrier, retract it when you don't. A spring-loaded belt housing maintains proper tension when the belt is extended.

Standard Barriers—Weight is 22 lbs.

Ideal for a variety of applications, these sturdy barriers have a 2″ wide polyester belt, a 2″ Dia.×38″ Ht. steel post, and a 13½″ dia. cast iron base with a nonmarking black plastic cover. Choose from black powder-coated and chrome-plated post finishes. All barriers have three connection points for forming a four-way barrier.

Also Available: Replacement belts. Please ask for 60145T666 and specify McMaster-Carr barrier part number.

Rack-Mount Retractable Belt Barriers

Easily block off aisles. Attach these barriers to upright rack shelving that has holes on 1½″ centers. The spring-loaded belt housing maintains proper tension. When the belt is extended, a universal connecting clip on the end secures it to the shelving holes or you can wrap the belt around a post and hook the clip to the belt. All housings are aluminum with a black finish. All belts are 2″ wide polyester and extend 18 feet.

Quick-attach barriers have mounting hooks that fit into the holes on the rack uprights. Ideal for temporary installation. Overall size is 3½″ Ht.×5″ Wd.×3⅝″ Dp. ***Fixed-mount*** barriers secure to rack holes with the included bolt and nut for permanent installation. Overall size is 4½″ Ht.×3¾″ Wd.×3⅝″ Dp.

Folding Manhole Barrier

Safeguard open manholes. Barrier is 42″ high and covers a 33″ square area. When not in use, it folds for easy transport and compact storage.

It has a tubular steel frame with a yellow powder-coated finish. The frame accommodates signs and warning flags (not included) that have a shaft dia. up to ¾″.

5900T14 ..... **Each** $246.98

Expandable Barriers

Easy to use, easy to store. To join multiple barriers, slip the built-in handle of one barrier into the end post of another barrier. All are made of aluminum and steel with a high-gloss powder-coated finish.

To Order: Please specify color: black/yellow, black/fluorescent yellow, or black/orange.

Barriers with casters have 2″ dia. swivel casters with gray nonmarking wheels and a side brake.

Locking bar keeps barrier from being folded up so it stays extended.

Wall-mount bracket allows you to permanently attach barriers to a wall. Bracket has two ⅝″ dia. holes (fasteners not included).

Replacement casters **To Order:** Please specify frame color: yellow, fluorescent yellow, or orange.

Folding Panel Barrier

When not in use, the panels of this barrier fold for easy transport and storage. Panels are yellow polyethylene and have a caution symbol on one side. Barrier meets OSHA 1910.23(e)1 standards.

Add-on panel lets you create the length and configuration needed. Connecting hardware included.

No. of Panels	Each Panel, Ht.×Wd.×Thick.		Per Set
3	36″×38″×1¼″	5434T82	$233.33

Plastic Fencing

Opening size is approximate. Fencing is available in the colors listed in the table. **To Order:** Please specify color where shown: black, green, orange, white, or yellow.

Rigid polyethylene fencing is twice as thick as flexible polyethylene so it handles harsher environments.

Square mesh fencing has tight-knit bands at the top, middle, and bottom for extra strength.

Welded-Wire Fencing

1″×1″ Openings

1″×2″ Openings

2″×2″ Openings

Rigid construction and large openings make this fencing ideal for a wide variety of applications. The opening size is the distance between parallel wires. All fencing is zinc-plated before welding.

Zinc-plated steel fencing offers some corrosion resistance.

Black PVC-coated zinc-plated steel fencing has a smooth, snag-free surface. The coating provides excellent rust and corrosion resistance and blends into dark backgrounds.

Corrosion-Resistant Mesh Fencing

Made of very fine Type 304 stainless steel mesh with 60 openings per square inch, this fencing is a flexible alternative to chicken wire. Mesh has a two-ply construction but can also be cut open and used in single layers. Ideal for securing insulation blankets, covers, and jackets.

Ht.	Wire Dia.	Max. Continuous Length, ft.		Per Ft.

Fence Posts and Tools

Steel U-channel posts are 2″ wide with a green powder-coated finish, except for the post with an 8′ height, which has a galvanized finish. Use the hooks running from the top of the post to the anchor plate to secure fencing.

Steel T-posts are 1⅛″ wide with a green painted finish and studs along their entire height. Posts include 25 fasteners per bundle (use five per post) to secure fencing. *Optional caps* slip over the top of the post for a smooth top edge. Made of white vinyl.

PVC post is 1⁵⁄₁₆″ dia. hollow black PVC. It has three hooks to secure fencing. *Optional socket* lets you create a removable post. It's 12″ long and has a pointed tip for driving into the ground. Color is white.

Post driver is used with posts up to 2½″ dia.

Post puller is used with posts up to 12″ dia.

Spring-Close Safety Gates

A

No need to shut these gates behind you—springs automatically do it. Springs are Type 316 stainless steel (unless noted). All gates mount to the left or right on round railings up to 2″ dia. as well as square and angle iron railings up to 2″ wide. They can be adjusted to swing in either direction. You can also mount *Styles A, B,* and *D* to a wall. Gate arms adjust to fit the range of the opening. Meet OSHA 1910.23a requirements.

Hot-dipped galvanized steel gates provide very good corrosion resistance. ***Yellow powder-coated steel*** gates are easy to see and offer some corrosion resistance. ***Type 316L stainless steel*** gates provide maximum corrosion resistance.

Style A gates have two 4 11/16″ long, flat mounting brackets that are ideal for use where space is tight (fasteners included). The gate arm is made of 1 1/4″ Sq. × 1/8″ Thick tubing and has two slots with bolts for adjusting the arm to fit the opening.

Style B gates have a mounting bracket and plate (fasteners included). The mounting plate is 24″ long and fits railings spaced 10″ to 22″ apart center-to-center. The gate arm is made of 1 1/2″ Wd. × 1/4″ Thick bars and has a slot with bolt for adjusting the arm to fit the opening.

Style C gates have a 24″ long mounting bracket that fits railings spaced 10″ to 24″ apart, center-to-center (fasteners included). The gate arm is 1 1/4″ Dia. × 1/16″ Thick tubing. Removable pins let you adjust the arm in 2″ increments to fit the opening.

Style D gate has a 23 3/4″ long mounting bracket with two 7/16″ dia. mounting holes (fasteners not included). Mounting plate can also be welded in place. Spring tension is adjustable. The gate arm is 1 5/16″ Dia. × 1/8″ Thick tubing. The arm slides to adjust to fit the opening.

Hydraulic-Arm Safety Gate

Hydraulic pressure provides smooth closure of this gate—no springs to wear out. Closing tension is adjustable. The gate arm is 1/16″ thick steel with a red powder-coated finish. A set screw adjusts the arm to fit the opening.

Mount to the left only. Mounting plate is 6″ long and has two 3/8″ dia. mounting holes (fasteners not included). Mounting plate can also be welded into place. Meets OSHA 1910.23a requirements.

Fits Openings	Gate Ht.		Each

Pivoting Mezzanine Safety Gate

Pivoting from Loading to Unloading Position

Loading Position

Unloading Position

Lifting one side of this gate simultaneously closes the other side for safe loading and unloading of pallets. It accommodates pallets up to 48″ square. Gate is made of 1 1/2″ Sq. × 1/16″ Thick yellow powder-coated tubular steel. Handrails are 42″ high, midrails are 21″ high, and toeboards are 4″ high. Gate also has four 4″ square base plates with four 7/16″ dia. mounting holes (fasteners not included). Meets OSHA 1910.23 requirements.

Overall Ht. × Wd. × Dp.	Usable Loading Area, Ht. × Wd. × Dp.		Each
79 11/16″ × 69 3/4″ × 78 5/16″	66″ × 56″ × 74″	**8244T72**	$910.41

Gravity-Close Safety Gates

Left Mount Shown

Let gravity do the work. Two smooth-swinging, springless hinges automatically close these gates. Gates are corrosion-resistant, 1 1/2″ square yellow tubular fiberglass. Hinges are Type 304 stainless steel and have two 3/8″ dia. mounting holes each (fasteners not included). Meet OSHA 1910.23a requirements.

To Order: Please specify gate mount: left or right.

Gate, Ht. × Wd.		Each	Gate, Ht. × Wd.		Each

Parking Lot Gates

Slide these gates over steel bollards (sold separately) to control access to parking lots and dock doors. They fit 6 1/2″ dia. bollards that are a minimum of 42″ high. All are made of 1/8″ thick yellow powder-coated steel and swing in either direction for easy positioning.

O'all Ht. × Wd.		Each	O'all Ht. × Wd.		Each

84″ High In-Ground Steel Bollard	**57895T131**	Each	$205.77

Electric-Arm Parking Lot Gates

Control traffic in and out of parking lots with these motor-powered gates. They're wired to accept switches, card readers, buried detectors, and remote control stations (see pages 2911-2913). All components are sold separately.

Gate controllers have a 1/2 hp, single-phase motor housed in a weatherproof aluminum cabinet with a white powder-coated finish. ***Gate arms*** break cleanly upon impact at clamp point so they may be reused. Arms are made of plastic-covered wood with black and white stripes.

Reflective vehicle protectors increase visibility and reduce damage to vehicles. Made of nylon with 2″ wide reflective bands and a soft foam core. Attach to the arm with included hook and loop material. **To Order:** Please specify color: black with red bands, black with white bands, yellow with red bands, or yellow with white bands.

Build-Your-Own Railings

All railings have a 42″ high top rail and a 21″ high midrail.

Modular Post-and-Rail Components

These mix-and-match components allow flexible configurations. To create a complete section, order two posts and two rails.

Note: Sections added with support posts will be 2″ less than the assembled lengths listed.

Rails are 2″ Sq.×1/16″ Thick tubing that can be cut to length. *Steel* railings have a yellow powder-coated finish and include fasteners. *Type 304 stainless steel* railings provide excellent corrosion resistance. Rails have four 7/16″ dia. mounting holes (fasteners sold separately).

Posts are 2″ Sq.×1/16″ Thick tubing. *Steel* posts have 4″ Sq.×3/8″ Thick welded plates with 7/16″ dia. mounting holes (unless noted). Anchor bolts included. *Type 304 stainless steel* posts have 4″ Sq.×3/16″ Thick mounting plates with four 3/8″ dia. mounting holes. Anchor bolts sold separately.

Optional toeboards are 4″ Ht.×1/16″ Thick. *Steel* toeboards include fasteners. *Type 304 stainless steel* toeboards have four 7/16″ dia. mounting holes (fasteners sold separately).

Welded Railings and Add-On Components

Spend less time assembling. You can use welded railings individually or add on connecting rails to lengthen. All components are yellow powder-coated steel.

Welded railings consist of two rails and two posts made of 1 1/2″ Sq.×1/16″ Thick tubing. Posts have a 4″ Sq.×3/16″ Thick mounting plate (anchor bolts included).

Straight and ***corner connecting rails*** are 1 1/4″ Sq.×1/16″ Thick tubing and can be cut to length. To join two welded railings, insert these rails into the welded railing's ends, drill a 1/8″ dia. starter hole, and secure with the included self-tapping screws. *Note:* When connecting two welded railings with straight connecting rails, the total length is 4″ less than the combination of the overall length of each welded railing plus the connecting rail. When a corner is added to this, the length added to each welded railing is 3 7/8″.

Optional toeboards are 4″ Ht.×1/4″ Thick and have two 4″ Lg.×3/4″ Wd.×1/4″ Thick mounting plates. Each plate has two 7/16″ dia. mounting holes at each end (anchor bolts sold separately). ***Optional wire mesh filler*** is made of 3/16″ dia. hot-dipped galvanized steel. Attach to welded railing with the included hardware. ***Optional sliding gate*** slips onto the welded railing's rails and telescopes up to 5 ft. wide.

Railing Sets with Slip-On Fittings

These sets come unassembled so you can cut them to length as needed. Slip-on fittings with set screws allow for quick assembly. Use the straight and corner sets individually or create longer lengths with an add-on set. All are made of 1 7/8″ Dia.×1/8″ Thick steel pipe posts and rails with a yellow powder-coated finish. The posts have a 4 1/2″ dia. mounting plate with four 7/16″ dia. mounting holes (anchor bolts sold separately). All slip-on fittings and post base plates are black aluminum-magnesium alloy.

Quick-Install Railings

A *With Square Corners and Toeboard*

B *With Round Corners*

C *With Square Corners*

D *With Toeboard*

E

One-piece construction means no assembly required. Railings are available with or without a 4″ Ht.×¼″ Thick. toeboard.

Steel railings are made of 1½″ Dia.×⅛″ Thick. welded pipe. They have a 42″ high top rail and a 24″ high midrail. Posts have a 6″ Lg.×2½″ Wd.×⅜″ Thick. mounting plate with two 9/16″ dia. holes (anchor bolts sold separately). Railings have a plain finish and are available with square or round corners. **To Order:** Please specify square or round corners.

Aluminum railings offer corrosion resistance. Made of 1⅞″ Dia.×⅛″ Thick. welded pipe. They have a 42″ high top rail and a 21″ high midrail. Posts have a 5″ Lg.×3″ Wd.×⅜″ Thick. mounting plate. When installed properly, these railings meet OSHA requirements and help you comply with the Americans with Disabilities Act (ADA).

Mounting plate for railings *with two posts* have one 9/16″ dia. hole (anchor bolts sold separately). Mounting plate for railings *with three posts* have two 9/16″ dia. holes on the center post and one 9/16″ hole on the end posts (anchor bolts sold separately).

Freestanding Safety Railings

Railing Set with Two Add-On Railing Sets and Optional Toeboards

Weighted bases keep you from having to bolt these railings to the floor. Railings are made of 1⅝″ Dia.×1/16″ Thick. yellow powder-coated tubular steel. The top rail is 42″ high and the midrail is 21″ high.

The bases have a built-in carrying handle and two slots for inserting an optional toeboard. They hold up to two railings and allow you to create 90° and 180° angles. Use the included connecting pins to secure the railings to the bases.

Railing meets OSHA 1910.23 and 1926.500-03 requirements when making a U-shape as shown.

Railing sets include one railing, two bases, and two connecting pins.

Add-on sets include one railing, one base, and two connecting pins.

Optional toeboards are 3½″ Ht.×1½″ Thick. and telescope to fit between bases.

Optional gate is 5-ft. wide and can be mounted on the left or right. Mounting hardware is included.

Door-Track Protectors

Keep your overhead-door track from being damaged by forklifts. Protectors are made of ¼″ thick yellow powder-coated steel. The L-shaped mounting plate has holes for floor mounting (fasteners are included) as well as four (unless noted) mounting holes on the side with 7/16″ dia. holes for mounting to the wall (fasteners not included).

Height		Per Pair
24″	5780T2★	$155.41
36″	5780T3	170.94
48″	5780T4	196.84

★ Has three holes for mounting to the wall.

Steel Bollards

Standard duty bollards are made of 1/8″ thick powder-coated steel with a 3″ high black-striped band at the top and a removable plastic cap. The base plate is 8″ Sq.×1/4″ Thick with four 1 1/4″ Lg.×7/8″ Wd. mounting slots (anchor bolts sold separately). **To Order:** Please specify color: red or yellow.

Heavy duty bollards are 1/4″ thick powder-coated steel with a 3″ high black-striped band at the top. The base plate is 9″ Sq.×1/2″ Thick with four 3/4″ dia. holes (anchor bolts sold separately). Top is welded. *Heavy duty bollards with eyelet* are the same as the heavy duty bollards above but have a welded eye for attaching chain (not included). **To Order:** Please specify color: red or yellow.

Corrosion-resistant bollards are made of 3/16″ thick Type 304 stainless steel. The base plate is 8″ Sq.×1/2″ Thick with four 3/4″ dia. holes (anchor bolts sold separately). The top is welded.

In-ground bollards get buried 42″ in the ground. They are made of 3/16″ thick powder-coated steel with a 3″ high black-striped band at the top. Top is open. **To Order:** Please specify color: red or yellow.

Bollard Covers

Slip these covers over steel and concrete bollards. They can be cut to desired height. All are made of polyethylene and include installation materials.

Standard duty bollard covers are yellow.

Standard duty bollard covers with reflective bands have two 3/4″ high reflective bands for increased visibility. **To Order:** Please specify color: red with white bands, yellow with red bands, or yellow with white bands.

Heavy duty bollard covers are thicker for better wear. **To Order:** Please specify color: black, blue, gray, red, white, or yellow.

Maintenance-Free Plastic Bollard

Bollard is made of solid recycled plastic that resists moisture, sunlight, oil, road salt, and chemicals. It will not rot, rust, or crack. Bollard is 33″ Ht.×6″ Sq. and has an 8 1/2″ square base with four mounting holes (fasteners included). Color is yellow.

37845T11	Each	$90.33

Steel Guardrails

Combine rails and posts to create single-, double-, or triple-rail guardrails. All components are yellow powder-coated steel. ***Posts*** include mounting hardware. To extend guardrail, order one additional post and the appropriate number of rails.

Bolt-on rails attach directly to the posts.

Lift-out rails include a pair of brackets that attach to the posts. Rails slide in and out of brackets for easy accessibility.

Standard duty guardrails are the economical choice for general purpose use.

Rails are 9 3/4″ Ht.×2 1/2″ Dp.×1/8″ Thick. *Posts* are 3″ Sq.×1/4″ Thick tubing with an 8″ Sq.×5/8″ Thick base plate and snap-on zinc-plated steel cap. *Note:* Length of additional rail section will be 3″ less than the assembled length listed in the table.

Standard Duty Single-Rail Bolt On

Heavy Duty Double-Rail Lift Out

Heavy duty guardrails are larger for more demanding traffic applications. *Rails* are 14 1/2″ Ht.×2 1/2″ Dp.×1/8″ Thick. *Posts* are 4″ Sq.×1/4″ Thick tubing with a 10″ Sq.×5/8″ Thick base plate and snap-on zinc-plated steel cap. *Note:* Length of additional rail section will be 4″ less than the assembled length listed in the table.

Highway-Style Steel Guardrails

The same guardrails you see along roadways and in parking lots. Mount a center rail to the posts, and choose your end rails. All components are sold separately and include connecting hardware.

Rails are 1/8″ thick hot-dipped galvanized steel. *Corner rails* require two center rails for support.

Posts are I-beams made of 8.5 lbs./ft. hot-dipped galvanized steel. Mounting holes on the flanges let you connect a rail to the post.

Chip Guard Panels

Aluminum with Screen

Solid Clear Acrylic

Protect personnel and equipment from flying chips. These portable, adjustable panels consist of three 79 3/4″ Ht. × 29 1/4″ Wd. hinged sections.

Panels with screen and grille have a metal grille over the screen area for added protection.

Stackable Steel Guardrails

Start with two bases and then stack guardrails to the height you need. All components are sold separately and are made of yellow-painted steel.

Base has a 4″ Sq. × 8″ Ht. tube for inserting the guardrails and a 12″ Sq. × 1/2″ Thick plate with four 7/8″ dia. mounting holes (anchor bolts sold separately).

Guardrails are made of 4″ Sq. × 3/16″ Thick tubing. They consist of a crossbar welded to a pair of posts. Black plastic caps provide a finished look. Guardrail with bases is 20 1/2″ high. Each additional guardrail adds 12″ of height.

Chip Guards

Flex-Arm Magnetic Mount

Swing-Away Magnetic/Screw Mount

Swing-Away Screw Mount

Flex-Arm Clamp Mount

Flex-Arm Screw Mount

Position the arms on these guards to provide the best protection from chips. All guards have a 1/8″ thick impact-resistant clear polycarbonate shield.

Magnetic-mount guards are ideal for temporary installation. ***Clamp-mount*** guards mount to benches. ***Screw-mount*** guards include fasteners (unless noted) for permanent installation.

Flex-Arm Guards— Bend and twist in any direction. The arm is 5/8″ dia. coiled spring steel with a vinyl cover. *Clamp-mount* guards have a 2″ max. opening.

Swing-Away Guards— Swing in and out as needed. Guards lock in any vertical position and have winged side panels. *Magnetic/screw-mount* guard has an acetal arm. *Screw-mount* guards have a steel arm. *Clamp kit for screw-mount guards* has a 2 1/4″ max. opening.

★ Has two 1/4″ dia. mounting holes (fasteners not included).

Clamp Kit for Screw-Mount Guards ..... 4392A18 Each $17.32

Machine Guards

Guard panels are sold separately.

These protective panels are framed in lightweight yet strong aluminum T-slot extrusions. Mount them to machines and flat surfaces. All have four 9/32″ dia. mounting holes (fasteners not included). They can also be mounted to each other with the included connecting hardware. Can help meet OSHA requirements for machine guarding.

Wire mesh guard panels have 1/16″ dia. welded steel wire mesh with a PVC coating and 1/2″ square openings for visibility and ventilation. The frame is 1″ square. **To Order:** Specify PVC coating color: black or yellow.

Polycarbonate guard panels keep chips and splashes contained while providing a clear view of your machinery. Polycarbonate is clear and 3/16″ thick; frame is 1″ square.

Adjustable-pin guard panels allow for custom openings. Ideal for feeding and ejecting material. Pins are 1″ Wd.×1/4″ Dia. black-oxide steel. Max. adjustment is 1″ less than the pin length. The frame is 1″×2″.

Quick-Install Perimeter Guards

Reliable machine protection that's easy to install. The posts are already assembled on the guard panels as part of the frame. All guard panels are framed in lightweight yet strong 1 1/2″ square aluminum T-slot extrusions. The posts have a 1 1/2″ Sq.×3/8″ Thick. mounting plate with one 1/2″ dia. hole (fasteners not included). Floor clearance is 6″. Hinge doors mount to the right or left and include latch and handle. Can help meet OSHA requirements for machine guarding.

Wire mesh guard panels and ***hinge doors*** are 1/8″ dia. welded steel wire mesh with a PVC coating and 1″ square openings for visibility and ventilation. **To Order:** Specify PVC coating color: black or yellow.

Polycarbonate guard panels and ***hinge doors*** keep chips and splashes contained while providing a clear view of your machinery. Polycarbonate is clear and 1/4″ thick.

Bolt-Together Perimeter Guards

Create a barrier between traffic and machinery. Modular bolted design accommodates custom modifications. Simply unbolt, cut down to size, and bolt back together. You can also mix-and-match widths and materials. Components sold separately and include connecting hardware. Floor clearance is 6″. Can help meet OSHA requirements for machine guarding.

Guard panels and ***doors*** are framed in yellow powder-coated steel.

Wire mesh guard panels have welded black powder-coated steel mesh with 1 7/8″ openings for visibility and ventilation. *Polycarbonate guard panels* are 3/16″ thick clear polycarbonate for good visibility along with splash and chip protection. *Hinge doors* include a slide-bolt latch.

To Order: For all doors, please specify right- or left-hand mount.

Posts are 2″ Sq.×1/8″ Thick. yellow powder-coated steel tubing with a 5 3/4″ Sq.×1/4″ Thick. mounting plate with four 5/8″ dia. mounting holes (fasteners not included). *Door hinge post* and *door latch post* can be used as center posts as well as corner posts.

Removable-Panel Perimeter Guards

Safeguard your machinery and have quick access for maintenance. These guard panels lift on and off their posts in just seconds. They can also be permanently secured to the posts with the included self-tapping screws.

The guard panels have hook-style fasteners that slip into the slots on the posts. All components have a yellow polyurethane coating. They are sold separately and include connecting hardware. Floor clearance is 12″. Can help meet OSHA requirements for machine guarding.

Guard panels and ***hinge door*** have a steel frame and 1/8″ dia. woven steel wire mesh with 1 1/2″ openings for visibility and ventilation.

Hinge door mounts to the right or the left. It can be locked with a padlock (padlock not included; max. shackle dia. is 3/8″). The door plate size is 8 1/4″ Lg.×5 1/2″ Wd.

Post can be used as a corner or center post. It is 2 1/2″ Sq.×1/16″ Thick. tubular steel with a 7 1/2″ Lg.×2 1/2″ Wd.×3/8″ Thick. mounting plate (fasteners included). Plastic end caps are included.

Aluminum T-Slotted Framing

Machine Guard

Cart

If you can design it, you can build it with this versatile "create anything" framing. It's great for making machine guards and frames, carts, workstations, enclosures, and more.

T-slotted extrusions provide attachment points anywhere along the length making all of the components easy to assemble, disassemble, and reconfigure. No welding or painting required. The ultimate in flexibility.

Extrusions

Extrusions are the basic building blocks. Use fasteners to connect other components along the T-slots to create your structure. All are made of aluminum alloy with a clear anodized finish. **To Order:** Please specify 2-, 4-, 6-, or 8-ft. length.

Inch extrusions have a grooved surface which hides scratches. ***Metric extrusions*** have a smooth surface. ***Hollow extrusions*** are strong, yet lighter weight and more economical than solid extrusions. ***Two-slot single corner*** and ***two-slot single inline*** extrusions are ideal for applications where you want a finished look.

End Caps, T-Slot Covers, and Corner Connectors—Fit solid and hollow extrusions.

Single and ***double end caps*** are black plastic. ***Threaded end caps*** hold leveling feet and casters to double extrusions (fasteners included). Made of black powder-coated zinc. ***T-slot covers*** conceal wires and keep dust out of the T-slot. Made of polypropylene. They are approx. 6-ft. long; can be cut with scissors. *Black* covers can also be turned over to hold a panel. **To Order:** Please specify color: black, gray, or yellow.

Corner connectors provide a finished look. Made of aluminum and include hole covers and fasteners. Tapped holes are required.

Extrusion-to-Extrusion Connectors—Fit solid and hollow extrusions.

No additional fasteners required. These connectors fit inside T-slots, flush with the extrusion surface for a cleaner look. Tighten with a hex key (sold separately, see pages 2838-2842).

No-drill 90° connectors allow connection without any machining. Made of zinc-plated steel.

Concealed 90° connectors provide a completely hidden connection. One tapped hole to insert and one drilled access hole to tighten are required. Made of zinc-plated steel.

Adjustable 90° connectors allow positioning anywhere along the extrusion. One counterbored hole is required. Made of zinc.

End-to-end connectors require two counterbored holes. Made of zinc.

Recommended Machining Hardware—For end mills for counterboring, see pages 2493-2495. For drill bits for access holes, see pages 2438 and 2445. For taps, see pages 2537-2538.

Aluminum T-Slotted Framing *(Continued from previous page)*

End-Feed Fasteners—Fit solid and hollow extrusions.

Slide these fasteners into the end of the extrusion to secure components to the extrusion. Fasteners consist of a screw and nut. Tighten screw with a hex key (sold separately on pages 2838-2842). All fasteners are black, except stainless steel.

Compact-head fasteners are ideal when space does not allow for a flanged-head screw. Made of zinc-plated steel. ***Double*** fasteners have two fastening points for quicker assembly. Made of zinc-plated steel.

♦ Made of Type 302 stainless steel. ★ Hex size is 5/32″.

Drop-In Fasteners—Fit solid and hollow extrusions.

Place these fasteners directly into the extrusion to secure components to the extrusion—no need to disassemble your structure. Fasteners consist of a screw and nut. All fasteners are zinc-plated steel.

Fasteners ***with rubber handle*** simplify positioning along the T-slot. Tighten with a hex key (sold separately on pages 2838-2842). Color is black. Fasteners ***with spring-loaded ball*** hold nut in place. Tighten with a hex key (sold separately on pages 2838-2842). Fasteners ***with double-spring tab*** also align the nut flush with the T-slot opening. Tighten with a hex key (sold separately on pages 2838-2842). Fasteners ***with stud*** twist into place for quick attachment of inside braces and other accessories. Tighten with a socket wrench.

Aluminum Bolt-Together Framing

Perforated square tube means easy bolt-together assembly without drilling.

Tube

Standard

Single Flange

Double Flange

Tube is 1½″ square, 0.125″ thick anodized aluminum with 0.328″ dia. bolt holes on 1½″ centers on all four sides.

Single-flange and ***double-flange tube*** lets you mount accessories such as panels, bins, and conveyor stops. All flanges are ⅛″ Thick. × 1½″ Ht. and run the length of the tube. *Double-flange tube* holds a panel up to 1¼″ thick.

Lg.	Standard	Each	Single Flange	Each	Double Flange	Each
4′	8809T11	$24.44	8809T12	$29.82	8809T13	$33.75
6′	8809T21	33.47	8809T22	42.45	8809T23	49.19
8′	8809T31	43.83	8809T32	55.65	8809T33	64.63

Connectors, Plates, Brackets, and Accessories

(A-E) Connectors, plates, and ***brackets*** are made of aluminum and include fasteners. The plates and brackets are anodized.

Style A and *Style B hidden connectors* fit inside the tube for a cleaner look. Use Style A connector if you have not cut your tube. Use Style B extended hidden connector if you have cut your tube and no longer have the 0.75″ distance between the end of the tube and the center of the first hole. This allows you to connect at the second bolt hole from the end of the tube.

		Lg.		Each
A	Hidden Connector	1 7/16″	8809T51	$4.07
B	Extended Hidden Connector	2 15/16″	8809T52	7.98
C	End-to-End Connecting Plate	3″	8809T61	6.67
D	Tee Connecting Plate	4½″	8809T63	12.94
E	90° Corner Connecting Bracket	1½″	8809T62	5.19
F	Floor-Mounting Bracket	5″	8809T64	14.79

(F) Floor-mounting bracket has one 0.531″ dia. floor-mounting hole (fastener not included). Made of anodized aluminum.

(G) End cap is made of black polypropylene.

(H) Leveling foot is 1¼″ dia. and swivels 10°-15° in any direction. Thread size is 5/16″-18 × 2″ Lg. Made of nickel-plated steel.

(J) Swivel caster has a 2½″ dia. black rubber wheel and brake. Thread size is 5/16″-18 × 1″ Lg. Frame is nickel-plated steel.

		Cap., lbs.		Each
G	End Cap	—	8809T41	$1.16
H	Leveling Foot	2,500	6111K48★	5.79
J	Swivel Caster	90	2834T64	9.01

★ Requires a Style B extended hidden connector to mount to the end of the tube.

Heavy Duty Telescoping-Tube Framing

Slide one length of this square tube into the next larger size to create railings, support stands, and sign supports.

Tube

Two Solid Tubes

Two Perforated Tubes with Locking Pin

Tube is 0.105″ thick. Each tube is sold individually. Telescoping framing requires two or more tubes. Fasteners sold separately. Select tube fastener based on the size of the larger tube in the connection. **To Order:** Please specify 4-, 6-, 8-, or 12-ft. length.

Solid tube requires welding or drilling holes and using fasteners to connect. ***Perforated tube*** has 7/16″ dia. holes on 1″ centers on all four sides for connecting.

Steel tube is lightly oiled and can be painted or welded. ***Galvanized steel*** tube offers good corrosion resistance.

Locking pins are zinc-plated steel. Use for quick adjustments. ***Tube fasteners*** are zinc-plated steel. Each package includes 10 curved bolts, 10 nuts, and 10 washers.

Plates, Brackets, and Floor-Mounting Base

All are made of zinc-plated steel, unless noted.

(K-P) Plates and ***brackets*** fit all tube (tube being connected should be the same size). Fasteners sold separately. ***(Q) Floor-mounting base*** is made of galvanized steel and fits 1¾″ to 2½″ tube. It has four 5/8″ dia. holes for mounting to the floor. Anchor bolt sold separately.

Connecting fasteners connect plates, brackets, and signs to tube. Each package includes 10 bolts, 10 nuts, and 10 metal washers, and 10 plastic washers.

Solid Light Duty Telescoping-Tube Framing

Slide the smaller tube into the larger tube to create framing that easily adjusts as your needs change. Requires welding or drilling holes and using fasteners (not included) to connect. ***Inch*** tubing is 0.083″ thick; ***metric*** tubing is 2 mm thick.

To Order: Please specify 2-, 4-, 6-, or 8-ft. length.

Steel tube is lightly oiled and can be painted or welded.
Type 304 stainless steel tube provides excellent corrosion resistance.
Aluminum tube is lightweight yet strong and corrosion resistant.

Perforated Flat and Angle Framing

Utilize a variety of slots and holes to bolt this framing together to create guards and tables of any size and shape. All components can be reused. Hardware is sold separately.

Zinc-plated steel framing offers good corrosion resistance in most environments. ***Type 304 stainless steel*** framing offers excellent corrosion resistance. ***Hot-dipped galvanized steel*** framing has very good corrosion resistance. ***Green powder-coated steel*** framing offers strength and some corrosion resistance.

Flats and ***Angles***—**To Order:** Please specify 1-, 3-, 4-, 5-, 6-, or 8-ft. length where available.

Corner plate provides added strength and rigidity. Made of 6″×6″×6″, 0.080″ thick hot-dipped galvanized steel.

Single-stroke cutter makes it easy for one person to cut flats and angles. Overall length is 38″.

Hardware kits include 5/16″×¾″ bolts with nuts and washers to join components.

About Measuring Slip-On Fittings

Please Read Before Ordering: Pipe size is the accepted industry designation, not the actual measured size. Below are two ways to determine pipe size.

(1) Use a ruler to measure the outside diameter (OD) of the pipe. Round up to the closest actual OD listed in the chart below and select the corresponding pipe size.

For example, if the actual OD measures 1¾″, the next highest OD in the chart is 1⅞″, which makes the correct pipe size 1½″.

Actual OD	1″	1 5/16″	1⅝″	1⅞″	2⅜″
Pipe Size	¾″	1¼″	1¼″	1½″	2″

(2) To determine pipe size place the outside edge of the pipe on the line with the "0". The line that the opposite outside edge of the pipe touches indicates the pipe size.

For more information about applications for these fittings, go to mcmaster.com and search for **4698TAC**.

Galvanized Iron and Aluminum Slip-On Rail Fittings

CAD

Making custom railings, guard rails, storage racks, shelving, and framing couldn't be easier. Slip rail fittings (also known as structural fittings) over the appropriate size pipe and tighten the included set screws for a secure fit. All fittings can be easily removed and reused.

Pipe

Pipe is Schedule 40 and can be used with all of our fittings (sold separately).

To Order: Please specify 2-, 3-, 4-, 5-, 6-, 7-, 8-, 9-, or 10-ft. length.

Hot-dipped galvanized steel pipe has very good corrosion resistance. ***Aluminum*** pipe is lightweight with very good corrosion resistance. ***Yellow painted aluminum*** pipe is lightweight and offers high visibility.

Fittings

Fittings are strong and corrosion resistant. They come with recessed set screws that lock the pipe (sold separately) into the fitting. Tighten set screws with a hex key (not included, see page 2839).

Add-on tees and ***crosses*** can be added or removed from existing structures without having to disassemble the entire structure.

Hot-dipped galvanized iron fittings are malleable and conform to ASTM A47, Grade 32510. ***Aluminum*** fittings are a special alloy that can be used with any metal, including steel, without galvanic corrosion.

For information about measuring slip-on rail fittings, see page 1928.

For more information about applications for these fittings, go to mcmaster.com and search for **4698TAC.**

Galvanized Iron and Aluminum Slip-On Rail Fittings *(Continued from previous page)*

Fittings (Cont.)

Fittings are strong and corrosion resistant. They come with recessed set screws that lock the pipe (sold separately) into the fitting. Tighten set screws with a hex key (not included, see page 2839).

Hot-dipped galvanized iron fittings are malleable and conform to ASTM A47, Grade 32510.

Aluminum fittings are made of a special alloy that can be used with any metal, including steel, without galvanic corrosion.

Polished Type 316 Stainless Steel Slip-On Framing Fittings

Look no further if you need framing that provides maximum corrosion resistance with little to no maintenance. Ideal for marine environments or anywhere corrosion could be a problem. To assemble, simply slip fittings over the tube (both sold separately) and tighten the included 3/16″ set screws (hex key not included, see page 2839).

Polished-Brass Slip-On Framing Fittings

Highly polished brass tube and fittings are not only visually appealing, but also strong. To assemble, slip fittings over tube (both sold separately) and secure by brazing, welding, or using metal adhesive. You can also use the included self-tapping screws. To keep fittings and tube looking like new, we suggest an occasional polishing. See page 2041 for polish.

Aluminum Flush-Fit Framing Fittings

Flush, burr-free connections let you create railings that are easy on the hands as well as pleasing to the eyes. To assemble, slide tube over a fitting (both sold separately) and tighten the set screw with an M4 hex key (not included, see page 2839). By tightening the set screw, the fitting will automatically grip the tube from the inside for a secure hold.

Build lightweight yet strong and corrosion-resistant shelving, carts, furniture, and more with these white PVC fittings. To assemble, press the pipe and fittings (both sold separately) together with PVC cement (not included, see page 3421) for a strong and durable bond. Pipe can be heated with a heat gun (not included, see page 2733) and curved to suit your application. Temperature range is 0° to 150°F.

Fittings and Accessories

Caster insert cap fits 7/16″ stem size. ***Table cap*** has three 3/16″ dia. holes for mounting to the underside of a table so legs can be added (fasteners not included).

			Each

Steel Clamp-On Framing Fittings

Screw-together fittings allow additions and changes to an existing structure without having to disassemble it. To assemble, clamp fittings onto the tube (both sold separately) and tighten the included M6×25 mm cap screw and nut with a 5 mm hex key (not included, see page 2839). For permanent connections, each fitting has a 4 mm (5/32″) hole (fasteners not included).

Tube

Zinc-plated steel tube offers good corrosion resistance in most environments.

Plastic-coated steel tube increases durability and allows you to color code your structures. **To Order:** Please specify color: black, blue, white, or yellow.

		Zinc-Plated Steel			Plastic-Coated Steel		
Lg.	OD	Thick.		Each	Thick.		Each
4′	1.07″	0.065″	2534T11	$5.82	0.043″	2534T13	$7.10
8′	1.07″	0.065″	2534T12	11.65	0.043″	2534T14	13.52

Fittings and Accessories

(1-11) Fittings are made of steel. *Style 4 rotational tee* has plastic bushings that allow tube to rotate inside the fitting. Ideal for swing-door applications. *Style 11 panel connector* holds panel up to 1/2″ thick.

(12&13) Conveyor rail mounting brackets are zinc-plated steel. They have two 5/32″ dia. mounting holes for attaching to conveyor rail and tube. Use *Style 12 flow-through bracket* on the loading side of your application; *Style 13 recessed-stop bracket* on the picking side of your application.

(14) Conveyor rails are 1 9/16″ Wd.×1 9/16″ Ht. aluminum with 1 5/16″ Dia.×13/16″ Wd. black nylon wheels. They slide directly into the conveyor rail mounting brackets.

(15) End caps are black PVC.

(16) Leveling foot includes mounting hardware.

(17&18) Casters have a hard rubber wheel and a brake. Mounting hardware is included. *Stem caster* wheel is red; *plate caster* wheel is blue.

Heavy Duty Aluminum Clamp-On Framing Fittings

Offering excellent structural stability, this system has a secure clamping mechanism to hold heavy loads—no machining or welding required. To assemble, place tube inside fitting (both sold separately) and tighten with the included bolts to grip tube.

♦ Has two mounting holes. ★ Mounting hole diameter is 7/16″.

Friction-Grip Framing Fittings

No need for fasteners or special tools—friction holds this framing together. Simply press fittings and accessories into the square tube and hammer into place with a rubber mallet.

Tube

Tube is 1″ square and 0.05″ thick aluminum.

Single flange and ***double flange*** tube lets you use panels up to 1/4″ thick. Flanges run the full length of the tube. For acrylic and polycarbonate panels, see 8560K on page 3569 and 8707K on page 3567.

Tube with single flange requires screws or adhesive (not included) to mount panels. Flange is 0.1″ Thick. × 5/8″ Ht. *Tube with double flange* holds panels between two parallel flanges. Adhesive (not included) is recommended. Flanges are 0.05″ Thick. × 1/4″ Ht.

About Character Width

For most characters the width is approximately one-half the height. Narrower characters such as 1, A, or I will be less, and wider characters such as M or W will be more.

Peel-and-Stick Vinyl Characters

1″, 2″-8″ Characters — *1½″ Characters* — *10″ and 12″ Characters*

These durable vinyl characters last for years—indoors and out. They have a pressure-sensitive adhesive backing for easy application. All characters are uppercase with no background.

Standard Vinyl Characters—For 1″-6″ character height, choose from black, blue, orange, red, white, and yellow; 8″-12″ high characters come in black only.

Reflective Vinyl Characters—Call attention to hazardous areas. A special high-visibility material provides the same brilliance in daylight and in artificial light at night. Choose from black, blue, red, and white.

Complete sets include 100 characters (unless noted): six each of E; five each of A,R,S; four each of L,P,T; three each of F,G,H,I,M,N,O,U,W; two each of letters B,C,D,K,V,Y, numbers 0-9, $, and ¢; and one each of J,Q,X,Z.

Number sets include 100 characters: 10 each of 0-9.

Letter sets include 260 characters: 10 each of A-Z.

Individual characters are available in a specified character: 0-9, A-Z, $, ¢, period, comma, or dash.

Also Available: Custom signs designed with standard vinyl characters. Characters are spaced on liner paper. Please ask for 12345T999 and specify height, color, and message.

To Order: Please specify color where necessary. For individual characters, also specify character.

♣ The number one looks like this: 1.

★ 107 characters including the characters specified above plus two more of I, one more of O, three more of 1, and one more of 0.

Self-Aligning Peel-and-Stick Vinyl Characters

Notched applicator cards ensure accurate alignment and spacing of these characters. Pressure-sensitive adhesive backing makes them easy to apply. Can be used both indoors and outdoors. Characters are black uppercase with no background.

Complete sets include 650 characters: 20 each of letters A,E,I,L,N,O,R,S,T and numbers 0-9; 10 each of all other letters; 40 periods; 20 each of commas and dashes; five each of $, &, <, and >.

Individual characters are available in a specified character: 0-9, A-Z, $, &, and a punctuation set (period, comma, and dash, plus < and >). Numbers and letters are packaged 10 each of a single character; $ and & are packaged five each. Punctuation set has 40 periods, 20 each commas and dashes, and five each < and >. **To Order:** Please specify character.

Heavy Duty Laminated Peel-and-Stick Characters

Made of durable polyester-laminated vinyl, these characters hold up in harsh environments. Characters have a pressure-sensitive adhesive backing for easy application. They're black with your choice of a yellow or white background.

Number sets contain 0-9.
Letter sets contain A-Z.
Individual characters are packaged in multiples of a single character (0-9, A-Z).
To Order: Please specify background color: yellow or white. For individual characters, also specify character.

Peel-and-Stick Character Sets

Vinyl *Polyester*

Clearly mark buildings, machines, and trucks with these weather-resistant characters. They stand out on a contrasting background and are furnished on cards. Characters have a pressure-sensitive adhesive backing for easy application. ***Letter*** sets include A-Z; ***number*** sets include 0-9. ***Consecutive numbers*** set includes numbers 0-100.

Vinyl characters and ***reflective vinyl characters*** are black on a white background. ***Polyester characters*** are gold on a black background. ***Reflective characters*** are made of a special high-visibility material that provides the same brilliance in daylight and in artificial light at night.

Note: For sizes with a ●, the overall width of narrower characters such as I and 1 is less than shown in the table.

Stencil Board Sets

The wide borders on these stencil boards prevent overspray.

Heavy duty oilboard stencils are more durable than cardstock, plus they're reusable. *Complete sets* include 45 characters (unless noted): two each of letters A,E,O,R,S and one each of remaining letters, 0-9, $, ¢, &, period, comma, and dash. Stencils are 0.015″ thick. The 9″ and 12″ sets include an extra N. *Note:* The stencil width varies depending on the character width.

Cardstock stencils are a more economical way to create messages. *Complete sets* include 47 characters: two each of letters A,E,O,R,S, and one each of remaining letters, 0-9, $, ¢, &, period, comma, and dash. Stencils are 0.011″ thick. *Number sets* include 14 characters: one each of 0-9, $, and ¢, and two spacers. Stencils are 0.015″ thick. *Letter sets* include 30 characters: one each of A-Z, period, and comma, plus two spacers. Stencils are 0.015″ thick.

Quick-Align Slide-Together Brass Stencil Sets

Beginner

Plain Ender

Slide these durable brass stencils together for neatly aligned lettering on almost any surface or stagger for diagonal spacing. Stencils are reusable and 0.007″ thick. *Spacers* are extra-narrow blank stencils used between words in a message. *Beginners* and *plain enders* are extra-wide blank stencils for holding the message in place while you apply paint or ink. *Period enders* serve the same purpose but contain a period.

Sets—Please see stencil set chart below for characters.

Individual Characters—**To Order:** Please specify character: 0-9, A-Z, &, period, comma, dash, spacer, beginner, period ender, or plain ender.

Stencil Cutters

Create stencils for product identification, shipping, inventory control, coding, and more. These manual-feed machines cut consistent, high-quality stencils from 0.015″ thick stencil board. Quick-read dials help you find and cut the following characters: 0-9, A-Z, &, period, comma, dash, apostrophe, and slash. Cutters are aluminum with a cast iron base and are furnished with ink applicator, black ink cartridge, and 25 stencil board sheets, which are 6½″×20″ and 0.015″ thick. Meet Fed. Spec. GG-S-747.

Also Available: Replacement punch and die sets. Please specify 1993T21, character, and height.

¼″-1″ Character Height

Blank Stencil Board

Feed these boards into your cutting machine to make sharp, reusable stencils. Boards are treated with special oils to resist ink absorption and increase machine's life by lubricating punches and dies. They're 0.015″ thick and flexible to accommodate curved surfaces. Boards are sold by the package and by the carton (quantity per carton is approximate).

Board Size	Boards/ Pkg.		Per Pkg.	Boards/ Carton		Per Ctn.

Stencil Ink Roller Kit

The absorbent neoprene-pad sponge roller can roll several stencils in one inking. Kit includes roller with polyethylene handle and 3½″×7″ tray with sponge ink pad. Use on nonporous surfaces. Use with porous and nonporous surface ink (sold separately, see 1639T on this page).

	1½″ Roller	Each	3″ Roller	Each
Kit	1636T6	$27.69	1636T7	$27.69
Replacement Roller w/ Handle	1636T85	19.14	1636T97	19.14
Replacement Roller Only	1636T8	11.02	1636T9	11.02
Replacement Ink Pad and Tray	1636T55	Each $12.03		

All-in-One Refillable Stencil Ink Roller

Mark porous surfaces in one stroke with this refillable roller. The nylon handle holds 4 oz. of ink, so you don't need a separate pad or tray. Roller assembly is aluminum; roller wheel is neoprene and 3″ wide. Use with porous stencil ink (sold separately on this page).

		Each
Roller	8630T32	$54.61
Replacement Roller Wheel	8630T34	10.30

All-in-One Stencil Ink Roller Kit

The press of a button releases ink from the disposable ink cartridge handle. Ink flows smoothly to the foam roller without the mess of re-inking on a separate pad or tray. Ink is permanent and dries in approx. 15 seconds. Use on porous and nonporous surfaces. Black and white ink meet Fed. Spec. TT-I-1795A and CID A-A-208, Type 4 alcohol-based permanent.

Kit includes a roller assembly and a black-ink cartridge handle. ***Replacement roller assembly*** includes roller, roller cover, and bracket that connects to the cartridge. ***Replacement Ink Cartridges—*** **To Order:** Please specify color: black, green, red, or white.

	1½″ Roller	Each	3″ Roller	Each
Kit	15305T21	$63.07	15305T11	$54.38
Repl. Roller Assembly	15305T22	41.53	15305T12	43.76
Replacement Roller	15305T23	11.73	15305T13	12.73
Replacement Ink Cartridges (4 oz.)	15305T68	Each $5.28		

Corrugated Carton Color-Matching Aerosol Spray

Spray color matches corrugated shipping cartons so you can cover old markings and reuse the cartons. Ink is tan, resists water and weather, and dries to the touch in approximately 1-3 minutes.

		Each
12-oz. (net wt.) Can	1996T14	$6.48

Stencil Ink Brushes

Hog-hair bristles provide a smooth, uniform ink application. Brushes have a hardwood handle and seamless steel ferrule. Use with any stencil ink.

Dia.	Bristle Lg.		Each
1″	1⅜″	7817T3	$7.12
1¼″	1½″	7817T4	8.09
1½″	1⅝″	7817T5	8.68

All-in-One Refillable Stencil Ink Brush

Release ink onto this stencil brush with the push of a button. There's no need for separate pads or trays—the aluminum handle stores 2.5 oz. of ink. Hog-bristle brush tip is tough enough for use with solvent-based inks and on rough, porous surfaces. Brush is 1⅜″ dia.; bristles are 1½″ long.

		Each
Brush	1635T5	$52.32
Replacement Brush Tip	1635T6	15.82

Stencil Inks and Stencil Ink Removers

Porous Surface Ink— Use with a brush or roller to permanently mark boxes, wooden crates, burlap, and paper. Ink dries instantly and can be used with stamp pads.

Porous and Nonporous Surface Ink— Use a roller to apply this permanent ink into porous surfaces as well as metal, plastic, and glass. Ink dries in approximately 15 seconds and can be used with stamp pads. Black and white ink meet Fed. Spec. TT-I-1795A and CID A-A-208, Type 4 alcohol-based permanent.

Color	Quart	Each	Gallon	Each
Porous Surface Ink				
Black	1638T11	$22.29	1638T12	$84.08
Porous and Nonporous Surface Ink				
Black	1639T31	23.50	1639T35	86.28
Blue	1639T71 ♦	27.65	1639T75 ♦	98.72
Green	1639T61 ♦	24.92	1639T65 ♦	95.01
Red	1639T84	27.65	1639T87	98.72
White	1639T33	26.08	1639T37	98.72
Yellow	1639T34 ♦	26.47	1639T38 ♦	98.72

♦ Can also be applied with a brush.

Porous and Nonporous Aerosol Stencil Ink— Apply this permanent stencil ink quickly and easily without a brush or roller. Ink comes in a 12 oz. (net wt.) aerosol can and dries to the touch in approximately 1-3 minutes. Meets MIL-A-A-208B.

Color		Each
Black	1641T11	$6.48
Blue	1641T15	6.48
Green	1641T16	6.48
Orange	1641T18	6.48
Red	1641T12	6.48
White	1641T13	6.48
Yellow	1641T14	6.48

Stencil Ink Removers— Removes all the stencil inks listed above. They can also be used to clean various stencil ink applicators and type. ***Aerosol*** conveniently removes residue from any surface and dries to the touch in approximately 30 seconds. ***1-qt. can*** is good for cleaning brushes and rollers.

		Each
13-oz. (net wt.) Aerosol Can	8626T21	$18.78
1-qt. Can	8626T12	20.00

For information about paint, see page 2126.

About Paint and Ink Markers

Paint markers work well even on dirty, rusty, wet, and oily surfaces. They leave textured marks you can feel with your hand.
Ink markers work best on a clean, dry surface. Marks dry faster than paint (45-60 seconds) and are smooth instead of raised.

Extra Fine (<0.9 mm) — *Fine (0.9-1.2 mm)* — *Medium (1.3-2.4 mm)* — *Bold (2.5-4.5 mm)* — *Broad (>4.5 mm)*

Paint Markers

Use these markers on metal, plastic, rubber, wood, and paperboard. Paint is oil-based and permanent; tip is felt.

Fine Tip— Marking temperature range is –20° to +350° F. Paint dries in 25-35 seconds.

Bold Tip— Marking temperature range is –50° to +150° F. Paint dries in 30 seconds. ***Marker set*** includes five markers: black, red, silver, white, and yellow.

Reversible Tip— One end of the tip is bold, the other broad chisel. Simply remove and reinsert to change tips. Marking temperature range is –30° to +150° F. Paint dries in 1.5 minutes.

To Order: For fine tip, please specify color: black, blue, gold, green, orange, red, silver, white, or yellow. For bold tip, you also can specify brown, light blue, or purple. For reversible tip, specify color: black, blue, green, red, white, or yellow.

Tip	Stroke Width	Markers	Each	Marker Set	Per Set	Repl. Felt Tips Pkg. Qty.	Repl. Felt Tips Per Pkg.

Reversible	3.2 mm/4.8 mm	16625T41	3.55	—	—	12	16625T42 6.56

Any-Angle Paint Markers

Bold Tip

Pumping the rubber bulb at the end of these permanent markers creates pressure that allows you to mark at any angle—even upside down. Paint is oil-based; ball tip is stainless steel. Use on metal, plastic, rubber, concrete, wood, and glass. Marking temperature range is –20° to +150° F. Paint dries in 25-35 minutes.

Large-capacity markers last twice as long as standard.

To Order: Please specify color: black, blue, green, orange, red, white, or yellow.

Tip	Stroke Width	Standard	Each	Large Capacity	Each
Fine	1.2 mm	16105T18	$4.51	—	—
Medium	2.4 mm	16105T29	4.51	16105T58	$5.73
Bold	3.2 mm	16105T3	4.51	16105T6	5.73

Nuclear-Grade Paint Markers

Medium Tip

Low in chlorides and halogens, the oil-based paint in these markers won't degrade and contaminate marking surfaces. Paint is permanent and resists mild abrasion and harsh weather conditions. Pumping the rubber bulb at the end of these markers creates pressure that allows you to mark at any angle—even upside down. Ball tip is made of stainless steel. Use on nonporous surfaces such as metal and glass. Marking temperature range is –20° to +150° F. Paint dries in 25-35 minutes.

To Order: Please specify color: black, white, or yellow (unless noted).

Tip	Stroke Width		Each
Fine	1.2 mm	2802T2★	$6.85
Medium	2.4 mm	2802T5	6.85

★ Not available in black.

Dykem Brite-Mark Paint Markers

Style 916

The permanent oil-based paint in these markers won't fade or chip. Tip is medium-size felt. Use on metal, rubber, plastic, glass, concrete, leather, wood, paperboard, and vinyl. Marking temperature range is –20° to +350° F. Paint dries in 25-35 seconds. **To Order:** Please specify color: black, blue, gold, green, orange, purple, red, silver, white, or yellow. For style 916, you can also specify light blue or pink.

Style 40 has a heavy duty barrel and screw-on cap with clip.

Style	Stroke Width	Markers	Each 1-11	Each 12-Up	Repl. Felt Tips Pkg. Qty.	Per Pkg.
916	1.9 mm	1597T2	$4.14	$3.48	10 1597T6	$4.17
40	1.9 mm	1597T7	4.21	3.61	10 1468T47	4.08

High-Temperature Paint Markers

Medium Tip

Produce permanent marks that resist extreme temperatures. These markers release oil-based paint that becomes fused when heated. After application, black marks resist temperatures to 2000° F and white and yellow marks resist temperatures to 800° F. Pumping the rubber bulb at the end of these markers creates pressure that allows you to mark at any angle—even upside down. Ball tip is stainless steel. Use on nonporous surfaces such as metal, ceramic, and glass. Marking temperature range is –20° to +150° F. Paint dries in 25-35 min.

To Order: Please specify color: black, white, or yellow.

Tip	Stroke Width		Each
Fine	1.2 mm	2862T51	$6.11
Medium	2.4 mm	2862T61	6.11

Laundry Paint Markers

Medium Tip

Permanently mark cotton, wool, and synthetic blends with these markers. The pigment-based paint withstands scouring, laundering, and dry cleaning. Pumping the rubber bulb at the end of these markers creates pressure that allows you to mark at any angle—even upside down. Ball tip is made of stainless steel. Marking temperature range is –20° to +150° F. Paint dries in 2 minutes. Large-capacity marker lasts twice as long as standard. **To Order:** Please specify color: black, orange, red, white, or yellow.

Tip	Stroke Width	Standard	Each	Large Capacity	Each
Fine	1.2 mm	2792T6	$4.26	—	—
Medium	2.4 mm	2792T7	4.26	2792T2	$5.40

Metallic Color Paint Markers

Bold Tip

Distinctive metallic colors stand out, especially on dark surfaces. These permanent markers have a felt tip and the oil-based paint can be used on metal, glass, plastic, and paperboard. Not rated for temperature. Paint dries in 10 seconds.

Tip	Stroke Width	Gold	Each	Silver	Each
Fine	1.2 mm	8667T25	$3.14	8667T26	$3.14
Bold	2.8 mm	—	------	8667T16	3.70

Easy-Clean Paint Markers

Broad Tip

Remove marks from these felt-tip markers with just soap and water. Paint is acrylic-based and dries to a hard finish. Use on glass, metal, plastic, wood, and paperboard. Marking temperature range is –50° to +150° F.

Note: Marks can only be removed while paint is still wet. Once dry, marks are permanent.

Bold Tip— Paint dries in 1 minute. **To Order:** Please specify color: black, red, white, or yellow.

Broad Tip— Extra-wide chisel tip. Paint dries in 3 minutes. **To Order:** Please specify color: black, blue, orange, red, white, or yellow.

Tip	Stroke Width		Each	Tip	Stroke Width		Each
Bold	4.0 mm	15375T5	$5.25	Broad	12.7 mm	15375T4	$7.24

Fast-Drying Paint Markers

It only takes a minute for this permanent oil-based paint to dry. Use on metal, plastic, rubber, glass, wood, paperboard, ceramic, and leather. Marking temperature range is –50° to +150° F.

Metal-Tip Marker— Squeeze the barrel to release paint. Tip is electroplated brass for long life. Grip is nonslip rubber. **To Order:** Please specify color: black, blue, gold, green, red, silver, white, yellow, neon orange, neon red, or neon yellow. ***Felt-Tip Marker—*** Apply pressure to tip to release paint. **To Order:** Please specify color: black, blue, gold, green, red, silver, white, or yellow.

Squeeze-On Paint Markers

You don't need to shake these paint markers prior to use—just squeeze and apply. Ball tip is made of stainless steel. Paint is oil-based, permanent, and comes in a 2-oz. plastic bottle. Use on metal, rubber, glass, and wood. Marking temperature range is 40° to 180° F. Paint dries in 5-10 minutes.

To Order: Please specify color: black, blue, green, orange, red, white, or yellow.

Marker set includes seven markers: black, blue, green, orange, red, white, and yellow.

Tip	Stroke Width	Marker	Each	Marker Set	Per Set
Bold	3.2 mm	8611T6	$5.43	8611T75	$29.72

Abrasion-Resistant Squeeze-On Paint Markers

Just squeeze these markers to apply permanent polyurethane-based paint that resists abrasion and chipping better than oil-based paint. The 2-oz. metal tube has a stainless steel ball tip. Use on metal, rubber, glass, and wood. Marking temp. range is 40° to 180° F. Paint dries in 24 hours. **To Order:** Please specify color: black, blue, green, orange, red, white, or yellow.

Marker sets include seven markers: black, blue, green, orange, red, white, and yellow.

Tip	Stroke Width	Markers	Each	Marker Sets	Per Set
Medium	2 mm	1671T5	$4.98	1671T18	$31.30
Bold	3.2 mm	1671T6	4.98	1671T28	31.30
Broad	4.8 mm	1671T7	4.98	1671T38	31.30

No-Drip Paint Markers

Solid and durable, these permanent markers won't drip or spill. All are wrapped in paper except for the hot-metal markers, which are bare. Max. stroke width is 17.5 mm. Paint dries in 24 hours, unless noted.

General Marking (Types B, F, and FD)— Use on metal, glass, plastic, rubber, and paperboard. *Type B* is weather and fade resistant and marks wet, oily, rusty, and dirty surfaces. *Type F* is fluorescent for high visibility and marks wet and oily surfaces. *Type FD* dries in 5 minutes.

Rough Surface (Type BE)— Weather and fade resistant. Use on concrete, forgings, and castings.

Primer Resistant (Type BL)— Shows through oil- and solvent-based primer coatings. Use on metal.

Hot Metal (Types H and HT)— Dry immediately when applied to hot metal and won't smear, char, discolor, or peel.

Heat Treating and Annealing (Types M and M-10)— For heat-treated and annealed metal, they're able to withstand cooling processes. Use on welds, ingots, castings, and forgings.

Markers—To Order: Please specify color.

No-Drip Twist-Feed Paint Marker

Keep your hands clean—just twist the end of the plastic barrel to advance this solid permanent marker. It has a stroke width of 13 mm and won't drip or spill. Paint is alcohol-based and can be used on metal, plastic, rubber, wood, and paperboard. Marking temperature range is 14° to 212° F. Paint dries in 5 minutes. **To Order:** Please specify color: black, blue, green, orange, purple, red, white, yellow, fluorescent orange, or fluorescent yellow.

1762T26 ..... **Each** $4.69

Fill-In Lacquer Paint Marker

Fill in and brighten stamped and engraved lettering. To apply, rub this marker over surface and wipe off the excess before paint dries. Stroke width is 9.5 mm. The oil- and wax-based lacquer paint is permanent and meets Fed. Spec. TT-F-325a. Marking temperature range is –50° to +150° F. Paint dries in 24 hours. Marker is individually wrapped in paper. **To Order:** Please specify color: black, red, white, or yellow.

Marker (6/Pkg.) ..... **2018T2** **Per Pkg.** $9.69

Ink Markers

Fine Tip

Medium Tip

Use these long-life permanent markers on metal, glass, wood, paper, and most plastics. Ink is dye-based; tip is felt. Marking temperature range is –20° to +120° F.

To Order: Please specify color: black, blue, green, or red.

Tip	Stroke Width	Markers	Each	Repl. Felt Tips	Pkg. Qty.	Per Pkg.

Broad-Tip Ink Markers

All Surface

Water Based

Large Capacity

The wide, chisel-shaped felt tip produces bold marks. These permanent-ink markers are not rated for temperature, unless noted.

All Surface— Ideal for use on metal and concrete.

Water Based— Marks on paper, plastic, metal, leather, and wood without bleeding. Marking temperature range is 40° to 167° F.

Large Capacity— The oversized barrel and tip provide maximum ink capacity and a large stroke width. They're perfect for use on rough surfaces.

To Order: Please specify color: black, blue, green, or red, unless noted.

Marker Style	Stroke Width	Pkg. Qty.	Per Pkg.
All Surface	7 mm	1	1662T4● $1.56
Water Based	7 mm	12	16335T63 9.14
Large Capacity	18 mm	1	1662T6● 4.04

● Not available in green.

Firm-Tip Ink Markers

The firm plastic tip on these permanent markers provides sharp marks. Ink is fade and water resistant. Use on metal, glass, plastic, wood, and paperboard, plus wet and oily surfaces. **To Order:** Please specify color.

Marker sets include one each of available colors, unless noted.

Medium tip marker has a large barrel with extra ink capacity.

Retractable marker clicks open and closed with one hand, plus there's no cap to misplace. Valve design prevents drying out.

Heavy duty broad tip marker has a durable chisel tip that lasts twice as long as other marker tips. Rubber grip and textured cap make it easier to use when wearing gloves. The oval-shaped barrel won't roll off work surfaces and is reinforced to prevent dents.

High-temperature ink markers hold up in harsh environments. Ink withstands temperatures to 500° F, steam, and most chemical washes.

Laundry fine tip marker is also known as an indelible marker. Ink withstands washing and dry cleaning. Use on natural and synthetic fabrics.

Metallic ink fine tip marker really stands out, especially on dark surfaces.

Self-Advancing Self-Inking Numbering Stamps

No need to adjust bands for consecutive numbering—just press plunger to advance. If you want multiple same-number imprints, you can adjust stamp to advance after 2nd, 3rd, 4th, 6th, or 12th impression. Stamps have a removable ink pad built in and include black oil-based ink for use on porous surfaces such as paper and paperboard. Each band has 0-9. Bands, typeface, and frame are chrome-plated steel, and handle is black plastic.

Self-Inking Rubber Date Stamp with Message

One stamp prints both the date and a selected message. You don't need a separate stamp pad—a removable two-color ink pad is built in. The date imprint is red and the message is blue; character height for both is 5/32″. Stamp is furnished with eight messages: ATTENTION, FAXED, INSPECTED, POSTED, RECEIVED, SHIPPED, TESTED, and BY _ _ _ _ _.

Ink is water-based and for use on porous surfaces such as paper and paperboard. Stamp has rubber bands, a chrome-plated steel frame, black plastic handle, and black rubber feet.

O'all Size, Wd. × Ht.	Imprint Area, Wd. × Ht.	Stamp		Repl. Ink Pad	
3 1/8″ × 6 3/16″	1 7/8″ × 1 1/8″	8590T15	$57.08	8590T17	$6.00

Self-Inking Changeable Message Rubber Stamp

Place type on the stamp face to customize each message. You don't need a separate stamp pad—a dry removable ink pad is built in. The cloth-covered pad accepts both porous and nonporous inks (sold separately; see page 1944). The stamp face is made of rubber. Stamp has a chrome-plated steel frame and a wood handle with a black finish. It can accommodate more than one character height.

Type sets (sold separately) include: six each of E; 5 each of A, C, I, L, N, O, R, S, and T; four each of B, D, F, G, H, P, period, and comma; three each M, U, W, Y, 0, 1, and hyphen; two each J, K, Q, V, X, Z, 2-9, and apostrophe; and one each $ and &.

Self-Inking Miniature Inspection Rubber Stamps

Compact size lets you stamp hard-to-reach surfaces. Stamps have a built-in ink pad and make up to 2,000 imprints before reinking. Ink is alcohol-based and permanent on porous and nonporous surfaces. Stamps have a polypropylene body and rubber face. **To Order:** Please specify ink color: black or white.

Also Available: Other imprints and ink colors. Please ask for 1119T76 and specify diameter and imprint required. For ink, specify color: blue, green, red, and ultraviolet.

Build-a-Message Rubber Stamp Sets

1/8" Actual Size

Snap these stamps together to create your own horizontal, vertical, and multi-line messages. Their compact size lets you stamp small surfaces and in tight spaces. Stamps have a rubber face and a plastic shank. Sets are furnished in a plastic compartmented box.

Number sets include two zeros, one each of 1-9, period, comma, dollar sign, and pound sign (#); and two hyphens.

Letter sets include one each of uppercase A-Z, comma, period, colon, apostrophe, hyphen, parentheses, forward slash (/), ampersand (&), and an arrow.

Make-Your-Own Rubber Stamp Kit

Just insert characters into the holders to create your own messages.

Kit contains 1/8" and 3/16" high uppercase and 1/8" high lowercase letters A-Z; 1/8" and 3/16" high numbers 0-9; tweezers; stamp pad with water-based, porous-surface black ink; one- through five-line rectangular holders that are 2 7/8" Wd. × 1/2" Ht.; a 1 3/4" Dia. × 1/2" Ht. round holder; and a 2 1/4" Lg. × 1 1/2" Wd. × 1/2" Ht. oval holder. Characters are rubber and come in plastic storage trays. Holders have a handle and are made of plastic.

ⓘ For a complete listing of kit characters, go to mcmaster.com and search for **8604TAC**.

No Ink	13335T41	2.60	13335T51	3.87

Uninked Felt Stamp Pads

These felt pads have a longer life than foam pads and can handle solvent-based inks. They're suitable for use with any of the inks offered here. Pads lock air-tight to prevent drying out. Case is plastic and solvent resistant.

Overall Size

2 1/2" × 3 3/4"	13335T28	$21.70
2 7/8" × 4 1/2"	13335T38	25.17

Ultraviolet Nonporous Inked Felt Stamp Pads

These reinkable felt pads have a plastic case. Ink is alcohol-based, permanent, and glows blue under UV light. Use with rubber stamps and felt or cloth stamp pads on nonporous surfaces such as metal and plastic.

2 1/2" × 3 3/4" Inked Pad	13335T29	$28.05
Ink Refill (2-oz. Bottle)	13335T39	$10.28

Food-Grade Porous/Nonporous Inked Felt Stamp Pads

These reinkable felt pads are 2 1/2" × 3 3/4" with a plastic case. Ink is solvent-based and for use with rubber stamps and felt or cloth stamp pads. Permanently marks surfaces such as paper, paperboard, cloth, metal, glass, and plastic. USDA approved.

Custom Rubber Stamps

Don't limit yourself to preformatted messages—create your own.

Standard stamps have a rubber stamp face on a wood-grain plastic block with wood handle.

Self-inking stamps don't require a separate stamp pad—there's one built in. A replacement ink pad is also built in. Ink is water-based and permanent on porous surfaces. Stamps are steel with a rubber face.

To Order: Please specify wording (characters can be upper or lowercase) and line breaks. Character height is based on available space. For self-inking stamps, also specify ink color: black, blue, or red.

Also Available: Other imprint area sizes. Please ask for 15365T999 and specify standard or self-inking stamp and imprint area size as well as the requirements above.

Solvent-Resistant Epoxy Stamp Ink

Specially formulated to stand up to solvents and abrasion. Use with rubber stamps on nonporous surfaces. Not for use with stamp pads. Measured packs eliminate guesswork—just mix the contents. Packs contain 10 grams ink and 5 grams catalyst. Dries in approximately 6-8 hours. Meets CID A-A-56032D Type 1, 2, and 3 (formerly MIL-I-43553b).

Use ***thinner*** to obtain your desired ink consistency. Use ***ink cleaner*** to remove fresh and partially cured epoxy ink from stamps, printing machinery, and other substrates. *Note:* Once it cures, epoxy ink is permanent.

Black Ink	85985T51	$15.61
White Ink	85985T52	15.61
Thinner (2-oz. Bottle)	85985T53	15.09
Ink Cleaner (16-oz. Bottle)	85985T54	20.00

Roll-On Self-Inking Rubber Stamp

Just press the type into the stamp wheel and you're ready to roll. This easy-to-use portable stamp is excellent for marking shipping cartons, kraft bags, and other porous surfaces. Stamp, ink roll cartridge, and type sets are sold separately.

Stamp is steel with a plastic and rubber wheel and a comfortable foam-grip handle. It can accommodate more than one character height. Overall size is 11″ Lg. × 4½″ Ht. × 5″ Dp.; stamp wheel is 2⅞″ dia. *Note:* Maximum length of each imprint line is 9″.

Ink roll cartridges (sold separately) contain oil-based, permanent ink and will make thousands of well-defined impressions on porous surfaces.

Type Sets—*Number sets* contain 92 characters: eight each of 0-9 and two each of period, comma, dash, forward slash (/), cent sign, and dollar sign. *Letter sets* contain 114 characters: four each of uppercase A-Z and two each of period, comma, dash, forward slash (/), and ampersand (&).

Conveyor-Mount Self-Inking Stamps

Horizontal Mount

Mount these stamps to your conveyor equipment to make thousands of trouble-free imprints. They can be mounted vertically or horizontally and have four 9/32″ dia. mounting holes (fasteners not included). Stamps and type sets are sold separately.

Stamps are made of aluminum. Choose left- or right-side feed: Face the carton as it moves away from you and select the side you want printed (see illustration).

To create an imprint, insert and lock the rubber characters (stamps can accommodate one or more character heights) into the stamp wheel. *Note:* Maximum length of each imprint line is 17″.

One ink cartridge is included with each stamp. Ink cartridges contain alcohol-based black ink that's suitable for porous surfaces such as paper and paperboard.

Type Sets—*Complete sets* contain 131 characters (letters are uppercase): six each of E; five each of A, C, I, L, N, O, R, S, and T; four each of B, D, F, G, H, P, and period; three each of M, U, W, Y, 0, 1; two each of J, K, Q, V, X, Z, 2, 3, 4, 5, 6, 7, 8, 9, comma, and space; and one each of ampersand (&) and dollar sign. *Number sets* contain 40 characters: four each of 0-9.

Self-Aligning Stamping Presses

Easily create evenly spaced character impressions on nameplates, tags, keys, and other metal and plastic parts. Spin dial to select character and then press lever to make impression. Material advances automatically. Presses stamp one uppercase character at a time.

Sharp-faced characters are engraved with a sharp edge where the tool comes in contact with the plate. They penetrate materials more easily than flat-faced characters.

Flat-faced characters are engraved with a flat edge that produces a wider impression. Good for aluminum and other soft metals.

For blank plates and tags, see page 1954.

Standard Duty Stamping Presses

Mark plates up to 8″ Wd. × 4″ Dp., 0.012″ to 0.093″ thick, and with a maximum Rockwell hardness of C59. Dial has 40 characters: 0-9, A-Z, period, dash, forward slash (/), and ampersand (&).

Presses are cast iron with steel dials. Imprint area is 8″ Wd. × 3¾″ Dp. The carriage table is 9¾″ × 7¾″.

Also Available: Replacement parts. Please ask for 1596T98 and specify part required.

Character Ht.	Presses		Extra Dial

Rotating Wheel Steel Stamps

Single Digit

Multiple Digit

One of these stamps takes the place of a number set. To change character, simply rotate the wheel. Stamps are made of tool steel.

Single Digit—Use on materials with a maximum Rockwell hardness of C30. Wheel has 0-9, dash, and uppercase X. 1567T151 comes in a plastic pouch; 1567T161 comes in a leather pouch.

Multiple Digit—Use on materials with a maximum Rockwell hardness of C40. Each wheel has 0-9 and a space. Stamp frame has a black-oxide finish and the shank is chrome plated.

Hand-Saver Steel Stamp Holders and Hammer

Keep your hands out of the striking area and away from stray blows with these stamp holders. They have an adjustable ball lock attached to a plastic handle to secure stamps (not included) and prevent them from slipping.

Hammer has a 24-oz. steel head and a rubber handle that's reinforced with steel rods to absorb shock and reduce fatigue. Face dia. is 1 1/4″. Overall length is 14″.

Hammer			5518A12	41.67

For actual height of characters, see page 1946.

Standard Duty Steel Stamps

For intermittent use on materials with a maximum Rockwell hardness of C50, these stamps are an economical alternative to the steel stamps on page 1946. They're made of tool steel and one side of each stamp (except period) is notched for easy alignment. Characters are uppercase. All sets are furnished in a compartmented box.

***Individual Characters*—To Order:** Please specify number (0-9), letter (A-Z), or period.

***Individual Fractions*—To Order:** Please specify individual fraction: 1/8", 3/16", 1/4", 3/8", 1/2", 5/8", 3/4", or 7/8".

***Number Sets*—**Contain nine stamps, 0-9 (the 6 doubles as the 9).

***Letter Sets*—**Contain 27 stamps: A-Z and a period.

***Complete Sets*—**Contain 36 stamps: 0-9 (the 6 doubles as the 9); A-Z; and a period.

Gentle-Mark Steel Stamps

The rounded faces on these stamps minimize surface stress fractures that can occur with sharp-faced stamps. They're made of tool steel and one side of each stamp is marked with the size and character for easy identification. Characters are uppercase. All sets are furnished in a compartmented box.

Solid-face stamps meet ANSI specification IN45, 2.2A39 for low-stress impressions. They're for continuous use on materials with a maximum Rockwell hardness of C40.

Dotted-face stamps produce even lower stress impressions than the solid-face stamps. Nuclear grade, they meet Nuclear American Society of Mechanical Engineers Code Section 3, Div. 1, Paragraph NA-3766.6 (2). 1/8" and 1/2" character heights are for continuous use on materials with a maximum Rockwell hardness of C35. 3/16"-3/8" character heights are for continuous use on materials with a maximum Rockwell hardness of C50.

***Individual Characters*—To Order:** Please specify number (0-9), letter (A-Z), or ampersand (&).

***Number Sets*—**Contain nine stamps, 0-9 (the 6 doubles as the 9).

***Letter Sets*—**Contain 27 stamps: A-Z and an ampersand (&).

***Complete Sets*—**Contain 36 stamps: 0-9 (the 6 doubles as the 9); A-Z; and an ampersand (&).

Custom Steel Stamps

Design stamps to suit your application. Made of tool steel, each stamp has a 3 1/2" long shank and can be used on materials with a maximum Rockwell hardness of C30. Characters are uppercase.

To Order: Please ask for 1560T1 and specify number of lines, characters, and character height. Spaces do not count as characters.

Also Available: Stamps with more than two lines of characters, reverse-face stamps for embossing, and stamps with your own logo design. Please ask for 1560T999 and specify characters, character height, number of lines, and stamp style (regular or reverse face). If ordering a logo design, please provide an illustration.

Two-Digit Steel Stamps

When 0-9 just isn't enough, select one of these stamps. All are made of tool steel and can be used on materials with a maximum Rockwell hardness of C50.

***Number Stamps*—To Order:** Please specify number (00-99).

***Number Sets*—**Include 10 stamps. **To Order:** Please specify series of numbers: 00-09, 10-19, 20-29, 30-39, 40-49, 50-59, 60-69, 70-79, 80-89, or 90-99. Furnished in a compartmented box.

Do Not Duplicate	2	1786T13	30.24
Master	1	1786T14	30.24

Reverse Face Embossing Steel Stamps

When you stamp the backside of thin metals with reverse-face stamps...

...You get embossed characters on the front of the finished product.

Reverse face characters allow you to stamp the backside of thin metals and create an embossed character on the front, similar to a license plate. Excellent for use on casting molds to raise letters and numbers on molded products.

Stamps are made of tool steel and are for continuous use on materials with a maximum Rockwell hardness of C30. For easy identification, the side of each stamp is marked with the size and character. Characters are uppercase. All sets are furnished in a compartmented box.

***Individual Characters*—To Order:** Please specify number (0-9), letter (A-Z), or ampersand (&).

***Number Sets*—**Contain nine stamps, 0-9 (the 6 doubles as the 9).

***Letter Sets*—**Contain 27 stamps: A-Z and an ampersand (&).

***Complete Sets*—**Contain 36 stamps: 0-9 (the 6 doubles as the 9); A-Z; and an ampersand (&).

Security and Inspection Steel Stamps

Symbol C3

Mark confidential or inspection coding on materials with a maximum Rockwell hardness of C35. Stamps are made of tool steel and are for continuous use.

To Order: Please specify the letter and number that corresponds to the symbol you require (see chart).

Also Available: Other symbols and sizes. Please ask for 1574T999 and specify symbol and character height.

Character Ht.	Shank Size, sq.	Shank Lg.		
1/8″	5/16″	2 1/2″	1574T11	$9.76

High-Visibility Steel Stamps

1/4″ Size Circle *3/8″ Size Triangle*

A circle- or triangle-shape border makes these characters stand out. Stamps are made of tool steel and are for continuous use on materials with a maximum Rockwell hardness of C35. Characters are uppercase.

To Order: Please specify individual character: number (0-99), letter (A-Z), and circle or triangle border.

Also Available: Number sets (0-10, 11-20, 21-30, 31-40, 41-50, 51-60, 61-70, 71-80, 81-90, 91-99) and letter sets (A-Z). Letter sets are furnished in a compartmented box. Please ask for 1612T95 and specify letters or numbers, 1/4″ or 3/8″ border size, and circle or triangle border.

Also Available: Other border styles and sizes. Please ask for 1612T888 and specify border style, size, and character.

Steel Stock Marking Stamps

Stamp

Optional Storage Box

Identify your steel stock with AISI (American Iron and Steel Institute) classifications. Stamps are made of chrome-plated steel and can be used on materials with a maximum Rockwell hardness of C45. They're 1/2″ Wd. × 1/4″ Ht. with a 2 1/2″ long shank. Character height is 1/8″.

Optional storage box holds nine stamps.

Also Available: Other AISI classification symbols. Please ask for 8640T999 and specify symbol.

Character Punches

Punch holes, letters, and numbers into material such as 20-lb. copier paper (up to 8-10 sheets), laminated cardstock, and business card cardstock up to 1/32″ thick. Punches are made of polished nickel-plated malleable iron. **To Order:** Please specify hole dia. (1/8″, 3/16″, or 1/4″) or character(s) (0-9, A-Z).

Also Available: Three-character and four-character punches with a 1 1/8″ reach. Please ask for 8645T999 and specify characters and character height (1/8″ or 3/16″).

Steel Type Holders

Make multiple-character marks on nameplates and other metal parts. Holders and characters (sold separately) are made of steel. Use on materials with a maximum Rockwell hardness of C28.

Type has a notched shank with uppercase characters.

Note: To correctly order type, C and D dimensions must match that of the type you already have.

Individual Characters—To Order: Please specify number (0-9) or letter (A-Z). For *standard holder type*, you can also specify a period, forward slash (/), or dash.

Number Sets— Contain 10 characters, 0-9.

Letter Sets— Contain 26 characters, A-Z.

Blanks— For holders to work properly, unused spaces must be filled with a blank.

Standard Holders

These durable holders are 5⅜″ long and have a spring pin that securely locks the characters in place for proper alignment. Furnished with an Allen wrench for tightening characters in the holder.

Steel Type Sets with Holder

We've combined the holder and type in one convenient set that's furnished in a compartmented box for quick selection.

Sets with Standard Duty Holder

Use on materials with a maximum Rockwell hardness of C40. *Note:* For holders to work properly, unused spaces must be filled with a blank.

Individual Characters—To Order: Please specify number (0-9), letter (A-Z), ampersand (&), period, forward slash (/), dash, or blank.

Complete Sets— Contain a nickel-plated steel holder and characters: 0-9, A-Z, ampersand (&), period, forward slash (/), dash, and blanks. Also include an Allen wrench for tightening characters in the holder and tweezers (unless noted).

● Tweezers not included.

Sets with Heavy Duty Holder

These sets include a larger holder that can absorb more hammer force, providing sharper character images. Use on materials with a maximum Rockwell hardness of C30. *Note:* For holders to work properly, unused spaces must be filled with a blank.

Individual Characters—To Order: Please specify number (0-9), letter (A-Z), ampersand (&), period, forward slash (/), dash, comma, or blank.

Complete Sets— Contain a steel holder and characters: 0-9, A-Z, ampersand (&), period, forward slash (/), dash, comma, and blanks. Also include an Allen wrench for tightening characters in the holder.

Miniature Steel Stamps

Shown with Optional Brass Hammer

Complete Set

There's a whole set in these tiny stamps—simply reposition handle to select character. Ideal for identification and quality control, they mark small surfaces and in tight spaces. Use on wood, plastic, and soft metals such as gold, silver, aluminum, brass, and cold-rolled steel. Mark by applying pressure to handle or use the ***optional brass hammer*** (sold separately), which is 5½″ long and has a ¾″ face dia.

Stamps have an aluminum hub with tool steel spokes. Handle is aluminum with a plastic knob. Characters are uppercase. Sets are furnished in a plastic case.

Number sets have one wheel with 0-9.

Complete sets have four wheels with 10 characters each: 0-9; A-J; K-T; and U-Z, period, ampersand (&), forward slash (/), and plus sign (+).

Character Ht.	O'all Size, Wd. × Ht.	Number Sets		Complete Sets	
1/64″	2″ × 3⅝″	2837T1	$150.00	2837T2	$491.67
3/64″	2″ × 3⅝″	2837T3	150.00	2837T4	491.67

Optional Brass Hammer 6024A4 $10.66

Hammerless Steel Stamps

Circle Triangle Diamond Moon Star

No hammer required—simply apply pressure to the stamp to release the striking mechanism. These steel stamps are for use on materials with a maximum Rockwell hardness of C32. They can accommodate both 3/32″ and 1/8″ character heights. Characters are uppercase.

Stamps with Character—To Order: Please specify number (0-9), letter (A-Z), or symbol (circle, triangle, diamond, moon, or star).

Extra Characters— For use with the stamps sold here, they're interchangeable with the furnished characters. ***To Order:*** Please specify number (0-9), letter (A-Z), or symbol (circle, triangle, diamond, moon, or star).

Also Available: Other symbols. Please ask for 1566T888 and specify character height and symbol.

Character Ht.	O'all Size, Dia. × Lg.	Stamps with Character		Extra Characters	
3/32″	11/16″ × 5¼″	1566T2	$114.08	1566T3	$40.20

Metal Etching Pen

You don't need electricity for this etching pen. An acid solution flows like ink for smudgeproof black marks on heavy metals including copper, nickel, stainless steel, brass, iron, tin, and lead.

1683T6 ..... 1-4 $16.79 5-Up $14.46

All-in-One Electrochemical Etcher Kits

Deluxe Kit

Make permanent marks on conductive metal in seconds. Just write, type, or draw a design or logo onto the stencil, add electrolyte fluid, and insert the stencil into the pad in the hand marker. Stencils allow you to finalize and align your message before marking, eliminating errors. The grid holds the stencil and pad in place.

Etchers have AC (for dark marks) and DC (for clear and frosted marks) capabilities. Etch impressions from 0.0001″ to 0.003″ deep. *Note:* Not for use on anodized aluminum.

All kits operate on 115 VAC, 50/60 Hz and include a grounding plate and 6-ft. power cord with two-prong plug.

Starter Kit— Includes a hand marker rated 10 volts, 2 amps; DC adapter clip; 10 regular stencils; 2-oz. bottle of general purpose electrolyte; and one pack of neutralizing cleaning powder mix. Furnished in a cardboard box.

8597T14 ..... $73.80

Deluxe Kit— Includes the same hand marker and adapter as the starter kit; 200 regular stencils; 25 medium stencils; 25 large stencils; a regular and medium grid; 10 regular pads; five medium pads; and five large pads. It also has three 8-oz. bottles of electrolyte, one each for general purpose, stainless steel, and brass/copper/bronze; one 4-oz. bottle of electrolyte for aluminum; one 8-oz. bottle of neutralizing cleaner; and one pack of neutralizing cleaning powder mix. Furnished in a plastic carrying case.

8597T11 ..... $186.84

Deluxe Kit with Two Hand Markers— Includes two hand markers (one rated 10 volts, 2 amps; the other rated 15 volts, 10 amps); two DC adapter clips; 200 regular stencils; a regular grid and two pads; 25 large stencils; and a large grid and five pads. It also has two 8-oz. bottles of electrolyte, one each for general purpose and stainless steel; three 4-oz. bottles of electrolyte, one each for aluminum, black oxide, and brass/copper/bronze; an 8-oz. bottle of neutralizing cleaner; and two packs of neutralizing cleaning powder mix. Furnished in a plastic carrying case.

8597T43 ..... $324.54

Neutralizing Cleaner, Powder Mix (to make 16 oz.) .... 8597T39 .... 6.83

Computer-Generated Stencil Kit

Don't limit yourself to handwriting or typing your stencil messages. Create copy or artwork in your PC's word processing software, print on a sheet of transfer paper, and place it in the UV exposure unit with a stencil to transfer the message. Stencils are made of durable vinyl. They're reusable and ideal for use when etching metal, glass, or ceramic. UV exposure unit has a 120 watt/365 Nm UV bulb; operates on 115 VAC, 50/60 Hz; and includes a 6-ft. power cord with two-prong plug. It's 12″ Ht. × 6″ Wd. × 5″ Dp. and made of aluminum.

Kit also includes an aluminum exposure tray; two steel clips; 16-oz. bottle of stencil developer; plastic developing tray; four developer sponges; a digital timer (includes one AA battery); 10 medium stencils; and six printer transfer sheets: three for inkjet printers and three for laser printers. Furnished in a cardboard box.

2807T17 ..... $167.16

Replacement Materials

Note: Stencil size listed is the maximum etching area.

	Size	Pkg. Qty.		Pkg.

Stencil Developer (16-oz. bottle)			2807T61 Each	$9.79

Adjustable-Mark Electric Etchers

Fine tune your etching widths and depths by simply turning the control knob. These etchers use a low-voltage arc to produce permanent markings on conductive metal. They include a 120 VAC, 60 Hz transformer with 6-ft. power cord and three-prong plug; grounding cord with clips; and a pen cord. More heat levels allow more etching control. For heavy-duty jobs, welding goggles with a minimum shade number of 4 are recommended (see page 1819).

Styles A and ***B***—Include a regular tungsten, heavy duty tungsten, and copper tip.

Style C—Powerful enough to etch heavy scale and rust, it includes one regular tungsten tip, one heavy duty tungsten tip, one heavy duty copper tip, and one copper tip.

Tungsten tips have better wear resistance than copper. *Heavy duty tungsten tips* are heavier and have a larger diameter for etching large marks. *Copper tips* are good for fine etching. *Heavy duty copper tips* can be used for fine etching and have better wear resistance than copper.

	Watts	Max. Output, volts	Heat Levels	O'all Size, Ht.×Wd.×Dp.	Pen Cord Lg.

Accu-Align Tracing Engravers

Also known as pantographs, these engravers enable you to create perfectly aligned messages on plastic and metal. Use one end of the engraving arm to trace a character while at the other end a motor-driven router engraves a smaller character on the material.

The ***carbide cutters*** rout plastic engraving plates, revealing the core color. Use a ***diamond drag cutter*** to engrave metal plates.

Standard Engravers

Engrave material up to 1/8″ thick. Engraver is furnished with carbide cutters, a diamond drag cutter (0.003″-0.005″ tip size), 20° and 34° tracing styluses, two type holder bars, at least two letter locks, arrowhead template, slide rule, and sample material. You'll also receive plastic character sets in a selection of different character type heights (listed below).

1/8″, 3/16″, and ***5/16″ character heights*** contain a selection of 152 characters, including 0-9, A-Z, 18 spacers, and the following punctuation: period, comma, apostrophe, question mark, quotation marks, dash, forward slash (/), cent sign (¢), dollar sign ($), ampersand (&), and pound sign (#). ***9/16″*** and ***1″ character heights*** contain a selection of 147 characters, including 0-9, A-Z, nine spacers, and the following punctuation: period, comma, apostrophe, question mark, quotation marks, dash, forward slash (/), cent sign (¢), dollar sign ($), ampersand (&), exclamation point, colon, semicolon, and parentheses.

Style 1 *Style 2*

Engravers have an electric motor on an aluminum-frame copy platform with cutting depth control and cutter gauge. All have a 6-ft. cord and two-prong plug. Operate on 115 VAC, 60 Hz and draw a maximum 1.5 amps.

Fixed-height engravers reduce the characters to the engraved heights listed in table. ***Adjustable-height engravers*** reduce the characters from the engraved heights listed in table to half the sizes listed.

Deluxe Adjustable Engraver

In addition to plates, this engraver can cut objects up to 5½″ high, 1¾″ thick, and any length. It has a cutter spindle with bottom micrometer assembly and depth settings. Furnished with two carbide cutters, a diamond drag cutter (0.02″ tip), jigs, wrench, and sample material.

You'll also receive a brass character set that contains a selection of 160 characters, including 0-9, A-Z, 30 spacers, and the following punctuation: period, comma, colon, semicolon, dash, apostrophe, quotation marks, and ampersand (&).

You can select 25 engraved heights from 1/7″ to 1/2″. Engraver has an electric motor that operates on 115 VAC, 60 Hz, draws 1.2 amps, and includes a 4-ft. cord with three-prong plug. It's mounted on a 16″×22″ cast iron-frame base with graduated copy platform.

Max. Plate Size	Max. Thick.	Carbide Cutter Tip Sizes

Electric Engravers

Economy

Thumb-Wheel Control

Multi-Tip

Use these adjustable-speed engravers on metal, glass, plastic, wood, hard rubber, stone, and ceramic. They have a durable plastic barrel, provide up to 7,200 strokes per minute, and operate on 115 VAC, 60 Hz. *Economy* and *multi-tip* engravers have a two-prong plug. *Thumb-wheel control* engravers have a three-prong plug. Engravers with ***carbide tip*** include one tip. Engravers with ***carbide and diamond tips*** include one of each tip. *Carbide tips* are for general purpose etching; *diamond tips* are for etching extra-hard materials such as stone and ceramic.

Economy— Engravers have a comfort-grip handle and side knob adjustment. UL listed.

Multi-Tip— Resembles a pen and has top screw adjustment. In addition to one carbide and one diamond tip, engraver includes four sharp steel tips and a steel tip for engraving plastic. *Replacement tip set* includes one carbide tip, one diamond tip, and five steel tips (four sharp tips and one tip for plastic).

Thumb-Wheel Control— Wheel on the side of the engraver allows one-hand operation.

Air-Powered Engravers

Just hook up to a compressed air line and turn the sleeve valve on the barrel to turn the unit on/off as well as regulate air flow. Engravers have a steel barrel and include a hose and carbide tip (for general purpose etching) that's suitable for engraving metal, glass, stone, ceramic, plastic, wood, and hard rubber.

Engravers

Style A is faster while ***Style B*** consumes less air, conserving your supply. Style B also includes an air filter assembly.

	Strokes/ Minute	Air Press., psi	Air Consump., cfm	Hose Inlet, NPT	Hose ID	Hose Lg.	Wt., lbs.	Engravers		Replacement Carbide Tip

▲ Requires anvil holder 1564T64 for operation.

Electric Branding Irons

Single Line

Two Line

All you need is an AC outlet for power and you can burn crisp markings on wood, leather, and rubber. To use, heat the iron for about 15 minutes, then hold down on the surface you're branding for 2 to 6 seconds.

Irons have a hardwood handle, stainless steel housing and shaft, a heating element with ceramic fiber insulation liner, and a rest stand. They operate on 115 VAC, 60 Hz, 400 watts, 3.3 amps and come with a 4½-ft. cord and three-prong plug. *Optional temperature regulator* allows you to adjust the branding temperature between brandings. Required when working with rubber.

Irons include a character holder with a capacity of eighteen 3/16″, twelve ¼″, nine ⅜″, six ½″, four ¾″, or three 1″ characters per line. Holders have one or two slots to insert characters and two movable end locks for each line to hold characters in place, allowing you to vary the number of characters in your message.

All characters are uppercase. ***Individual characters*** are available in a specified character: 0-9, A-Z, period, comma, dash, and ampersand (&). **To Order:** Please specify character. ***Spacers*** are required to fill unused spaces in your message. ***Number sets*** include one each of 0-9. ***Letter sets*** include one each of A-Z and a spacer.

Also Available: One-piece custom branding irons. Please ask for 1581T999 and specify character height, characters, and/or logo design.

Portable Propane Gas Branding Iron

When electricity is not available, just connect this branding iron to a propane gas tank. Lightweight for portability, iron marks wood and rubber and includes a 10-ft. hose for connection to a minimum 20-lb. tank. It has a POL connection (the same kind you use to connect your gas grill to the propane tank). To use, heat iron for about 10 minutes, then hold down on the surface you're branding for 5 to 10 seconds. Iron has a brass housing and rubberized plastic handle. Characters, holders, and spacers sold separately.

Branding Iron 3822T21 $266.91

Individual characters are stainless steel. **To Order:** Please specify individual character: A-Z or 0-9. ***Spacers*** are required to fill unused spaces in your message. ***Character holders*** are brass and hold up to five characters. They have two movable brass end locks that hold characters in place, allowing you to vary the number of characters in your message.

Blank Engraving Plates

The micro-thin surface on these plates allows clear fine-line engraving. They have a matte finish, beveled edges (unless noted), and are 1/16" thick. ***Self-adhesive*** plates have a pressure-sensitive adhesive backing for easy peel-and-stick application.

Indoor plates are made of ABS plastic.
Indoor/outdoor plates are made of UV-resistant acrylic.
Aluminum plates are durable, nonconductive, and have an anodized finish.
To Order: Please specify color from list at right.

For tag holders, see pages 1960-1961.

Consecutively Numbered Metal Plate and Tag Sets

Consecutively numbered plates and tags let you assign numbers to completed work, storage areas, and lockers. Black enamel-filled numbers are stamped onto the surface. Plates and 1½″ tags have three digits, including preceding zeros (such as 002). Aluminum and brass are 18-ga./0.040″ thick; stainless steel are 20-ga./0.038″ thick.

Custom-Embossed Metal Plates

Rounded Rectangle

Rectangle

Customize these plates for your needs. Embossing produces raised characters similar to a license plate. These plates are good for painting and washing applications where engraved or stamped characters can get filled in or washed away. Each plate allows up to six characters in heights of either ¼″ or ½″ (largest height possible will be used).

Rounded rectangle plates are offered in ¾″×2½″ (holes are 2⅛″ center-to-center) and 1″×3″ (holes are 2⅝″ center-to-center) plate sizes. ***Rectangle plates*** are 1½″×3″ (holes are 2⅝″ center-to-center).

To Order: Please specify style, plate size, characters, and where necessary, number sequence. Minimum order is 50 plates.

Also Available: Other sizes and shapes. Please ask for 1569T999 and specify characters, plate size, shape, material (aluminum or brass), and hole locations.

Style	Hole Dia.	Aluminum, 24-ga./0.020″ Thick Each 50-199	200-Up	Brass, 24-ga./0.020″ Thick Each 50-199	200-Up

Consecutively Numbered with Heading	⅛″	1569T6 3.71	2.40	1569T3 4.69	3.06

Choose-a-Color Blank Steel Tags

Easy to identify, these steel tags have a color-coated matte finish. Write on them with a marker, or emboss to produce raised characters. Tags are 32-ga./0.008″ thick. The 4½″ long tags have a hole at both ends (holes are 3¾″ center-to-center); all other tags have one hole.

To Order: Please specify blue, red, white, or yellow.

Three-Colored Tear-Off Cardstock Tag

Each tag is perforated between the colors, which visually indicate the status of your project from start to finish. Assign each color to a project status and as the job progresses, tear off a color.

Tags are 5¾″×2⅞″ and made of 0.013″ thick cardstock. The green part has a 3/16″ dia. metal-reinforced eyelet, yellow is the middle part, and red is the stub end. Package quantity is 50.

1626T7 ..... **Per Pkg.** $15.81

Heat-Resistant Blank Nomex Tags

For applications involving high temperatures and flame exposure, choose these Nomex tags. They also resist mild acids, alkalies, solvents, and mold. Temperature range is –320° to +572°F. They're 0.007″ thick with a ¼″ aluminum eyelet. Color is natural.

Tag Size	Standard Industry No.	Pkg. Qty.		Per Pkg.

For tag holders, see pages 1960-1961.

Numbered Tear-Off Tags

Tear off the lower stub and later match it to the tag for easy identification. Reverse side is blank.

Manila Cardstock Tags—RETAIN THIS CHECK is printed on the lower stub in black ink. Both halves are numbered in red ink. Tags are 0.011″ thick manila cardstock with a 7/32″ dia. fiber-reinforced eyelet and a 6″ string tie. Size is 5¼″×2⅝″.

Polypropylene Tags—Great for harsh conditions and outdoor applications, these tags are weather resistant. Both halves are numbered in black ink. Tags are 0.010″ thick with a ⅜″ dia. metal-reinforced eyelet and 6″ wire tie. Size is 3¼″×1⅝″.

Manila Cardstock

Numbered Carbonless Three-Part Cardstock Tags

Write your message on the top white bond sheet and you'll create two paper copies, one on the middle pink bond sheet and one on the cardstock back sheet. All copies are numbered for easy matching; a red number is printed on the original tag and black numbers appear on both copies. The back of the tag is blank. Tags are 6¼″×3⅛″, 0.010″ thick, and have a 3/16″ dia. fiber-reinforced eyelet.

To Order: When ordering a package of 100 tags, specify the starting number (0, 100, 200, 300, 400, or 500). For a package of 500 tags, specify the starting number (0; 500; 1,000; etc., up to 4,500).

Pkg. Qty.		Per Pkg.
100	1103T222	$18.06
500	1103T777	78.43

Inventory Cardstock Tags

Numbered inventory tags allow you to match the original with the cardstock stub to keep an accurate record of your inventory. All tags have black printing and are made of 0.010″ thick manila cardstock, except for carbonless tags, which are made of 0.0075″ thick manila cardstock. Tags are 6¼″×3⅛″ with a 7/32″ dia. fiber-reinforced eyelet.

Tear-Off Tags—Easily tear off the perforated portion to keep with your records. **To Order:** When ordering a package of 250 tags, specify the starting number (0, 250, 500, or 750). For a package of 1,000 tags, specify the starting number (0; 1,000; 2,000; etc., up to 9,000). **Also Available:** Green or orange tear-off tags in a package of 1,000. For green, order 8659T881 and specify number sequence. For orange, order 8659T882 and specify number sequence.

Carbonless Tags—Create two or three copies without the mess of carbons. *Duplicate* tags have a white bond topsheet and a manila cardstock tag. *Triplicate* tags have a pink bond sheet between the white topsheet and manila cardstock. ***Tags with Carbon***—Carbon paper between the white bond topsheet and the manila cardstock creates the duplicate copy. **To Order:** When ordering a package of 100 tags, specify the starting number (0, 100, 200, 300, or 400). For a package of 500 tags, specify the starting number (0; 500; 1,000; etc., up to 14,500 for carbonless and 9,500 for tags with carbon).

Weather-Resistant Inspection Tags

Aluminum-laminated cardstock tags are economical and allow you to record up to 15 dates and initials. Use a ball point pen to permanently mark impressions. The front of the tags have black printing; the back is blank. Tags are 4″×2″, 0.020″ thick, and have a 3/16″ dia. hole.

Plastic-laminated cardstock tags permit recording of up to 14 dates and initials. They resist moisture, oil, mild acids, and chemicals. Use a pencil to write on the matte surface—marks are erasable. Both the front and back have the same spaces for equipment ID, date, status, and signature. 15455T21 has green printing; 15455T22 has black printing. Background is white. Tags are 5⅝″×3⅛″, 0.025″ thick, and have a ⅜″ dia. zinc grommet-reinforced eyelet.

Key Tags

Organize and identify your keys with these tags. They're 1/16″ thick and have a snap hook that holds up to four keys.

Shamrock tags are made of white plastic with a 1/4″ dia. hole. Numbered tags have black lettering. ***Square slotted tags*** are designed for cabinets and panels that have slotted tag holders. Made of white plastic with 3/16″ Wd. × 3/4″ Lg. slot. Numbered tags have black lettering. ***Oval tags*** are made of red plastic with a 1/4″ dia. hole. Numbered tags have white lettering.

Also Available: Individual numbered shamrock tags and oval tags. Please ask for 1333A888 and specify shape and number. Square slotted number sequence tags in multiples of 20 (largest number cannot exceed 999). Please ask for 1333A35 and specify number sequence.

Tag-Fastener Gun

Fasten tags to woven material with this lightweight gun. It's made of high-impact polycarbonate with steel and brass moving parts and a needle guard. Needles are hardened steel. Fasteners and hooks are made of polypropylene. Color is natural.

Heavy duty needle is well-suited for heavier materials such as canvas, leather, and paperboard. Made of nickel-plated hardened steel.

Also Available: Guns, fasteners, and needles for fine fabrics. Please ask for 86005T888 and for fasteners, specify length.

Easy-Peel Label Holders

Relabel racks and containers as often as you want without the scraping and sticky residue. First, apply the self-adhesive holders to surfaces such as metal, cardboard, and plastic. Any self-adhesive labels you apply to the holder will easily peel away when you want to remove them.

Economy holders are for indoor use. They're translucent white and 0.003″ thick.

All-purpose holders are for indoor and outdoor use. They're opaque white and 0.004″ thick.

Label Size	Economy	Each 1-9	10-Up	All Purpose	Each 1-9	10-Up

Material Management Labels

Polypropylene

Polypropylene with Cover

Tyvek

Printed messages let you quickly mark and identify items, plus there's space for you to add more information. You can write on these labels with a pen or pencil, then peel and stick to any clean, dry surface. Size is 5/8″×1½″.

Polypropylene labels are 0.004″ thick and are furnished on pocket-size cards.

Polypropylene labels with cover have a clear laminate polyester cover to protect your information from weather and tampering. Labels are 0.006″ thick and are furnished on pocket-size cards.

Tyvek labels are water, chemical, and tear resistant. They are 0.008″ thick and are furnished in pocket-size books.

Label Dispensers

Make the task of labeling quick and easy with these steel paper-label dispensers.

Manual label dispensers are suitable for infrequent labeling or labeling in small quantities. Color is gray except for Style C, which is black. *Style A* has four 3/8″ dia. mounting holes; *Style B* has two. Mounting hardware not included.

Electric label dispensers automatically advance, peel, and release labels from the backing paper. They operate on 115 VAC, 60 Hz, draw 0.6 amps (except Style F, which draws 0.5 amps), and have a 5-ft. cord with three-prong plug. *Styles D* and *E* hold both roll and fan-fold labels. Color is black.

Adapter set for Styles A and B can change a 1″ core dia. into a 3″ core dia.

Style		Max. Label Wd.	Roll Cap.	Max. Roll Dia.	Max. Core Dia.	O'all Size, Ht. × Wd. × Dp.		Each

★ Can vary; the total width can't exceed the max. label width shown.

Bar Code Scanners

Input data into your computer quickly and accurately. These bar code scanners come ready-to-use—just plug in and scan. Data can be scanned directly into any Windows, DOS, or NT application without additional software. Built-in decoders eliminate the need for a separate wedge decoder. They can read the most common bar codes: Code 39, 93, and 128; UPC-A and E; UCC-128 (unless noted); interleaved 2 of 5; Codabar; MSI Plessey; and EAN/JAN-8 and -13. Wired scanners include a 6-ft. cable and connections for USB ports. To adapt to PS/2, use the *optional USB to PS/2 adapter* (sold separately). These scanners can also be connected to laptops with USB capability.

Pen Wand Scanner— This contact scanner is the most economical choice. Simply swipe this scanner across bar codes to scan information.

CCD (Charge Coupled Device) Scanner— Scans bar codes faster than the pen wand. Capable of reading codes up to 1½″ away.

CCD Long-Range Scanner— Reads bar codes up to 12″ away.

Laser Scanner— Offers the longest range at 29″ and includes a USB cable. It also has connections for AT/XT ports.

Wireless CCD Scanner— In addition to codes listed above, this also reads Pharma Code, Industrial 2 of 5, Matrix 2 of 5, and Telepen. Comes with a 30-hour lithium-ion rechargeable battery, Bluetooth radio/recharger base, and a 6-ft. keyboard cable for the base. Scans up to 10″ away and transmits data to the base up to 160 ft. away.

		Each
Pen Wand Scanner	**1735T2**	$199.74
CCD Scanner	**1735T4**♣	243.24
CCD Long-Range Scanner	**1735T6**♣	333.33
Laser Scanner	**1735T7**	433.33
Wireless CCD Scanner	**1735T9**	793.33
Optional USB to PS/2 Adapter	**13555T14**	5.05

♣ Does not read UCC-128 bar codes.

Corrosion-Resistant Pipe and Cable Tags

Long after other tags deteriorate, these tags will still be holding strong.

ID tags are made of Type 304 stainless steel and can be engraved using steel stamps (see pages 1946-1948) or stamping press (see 1595T and 1596T on page 1945).

Lock ties are Type 304 stainless steel and used to permanently attach the tags. Maximum dia. is 2″ for ¼″ × 10″ tie and 4″ dia. for ¼″ × 16½″ tie.

Lock-tie tool is required to fasten lock ties.

Tag Size	Thick.	Pkg. Qty.	Per Pkg.

Self-Adhesive Duct Markers

6137T11 *6137T12* *6137T13* *6137T14*

With large, easily visible 1″ letters printed in two directions, you can read these duct markers from any vantage point. They are made of 0.004″ thick vinyl and overall size is 4″ × 10″. Printing is black on a white background. Temperature range is –40° to +176° F. Package quantity is 5.

Per Pkg. $13.49

About Pipe Markers

ANSI/ASME A13.1-1996 pipe identification standard recommends that for a given pipe OD, markers have a minimum letter height, length of color field, color scheme, and flow-direction arrow. The color designations are:

Black on Yellow—Hazardous materials. *White on Blue*—Low-hazard gas.
White on Green—Low-hazard liquid. *White on Red*—Fire-quenching materials.

Our pipe markers with printed message meet or exceed the standard (except 5774T adhesive-backed, which require the addition of a flow-direction arrow). Blank markers as supplied meet the standard for length of color field. Use guidelines listed here to fully comply with the standard.

Pipe OD	Minimum Length of Color Field	Minimum Character Ht.
3/4″-1 1/4″	8″	1/2″
1 1/2″-2″	8″	3/4″
2 1/2″-6″	12″	1 1/4″
8″-10″	24″	2 1/2″
Over 10″	32″	3 1/2″

Wrap-Around Pipe Markers

For Pipe OD 3/4″ to 5 7/8″

For Pipe OD 6″ and Larger

Easy to apply, even over dirty, rusty, or greasy surfaces. Just wrap markers completely around the pipe. Message is printed multiple times so it's visible from all angles and includes a flow-direction arrow. Write on *blank* markers with a permanent marker. For pipe sizes 6″ and larger, markers come with nylon ties for securing.

Standard markers are made of vinyl. Temperature range is –40° to +140° F. ***High-temperature*** markers are made of polyester laminate and withstand temperatures of –40° to +248° F. They also resist abrasion, humidity, UV exposure, and most chemicals.

To Order: For markers with message, specify message from those listed above. For standard blank markers with arrows, ask for 5774T992 and for high-temperature blank markers with arrows, ask for 6750T777. For both, specify color: blue, green, red, or yellow.

Also Available: Other messages and messages in other languages. Please ask for 5774T996 for standard markers with arrows or 6750T888 for high-temperature markers with arrows, and specify pipe size, message color, background color, and message.

Adhesive-Backed Pipe Markers

With Arrow

Just peel off paper backing and stick these markers to your clean, dry pipe. They're made of vinyl and message is printed once.

Without Arrow—To comply with ANSI/ASME standards, add a flow-direction arrow (sold separately on the following page). Temperature range is –40° to +170° F. **Also Available:** Other messages without arrow and messages in other languages. Please ask for 5774T998 and specify pipe size, message color, background color, and message.

With Arrow—Furnished in an economical roll, these markers come with a detachable arrow you can position at either end. Roll contains 10 identical messages. Temperature range is –65° to +200° F.

To Order: For markers with message, please specify message. For blank markers without arrow, ask for 5774T994 and for blank markers with arrow, ask for 16855T777. For both, specify color: blue, green, red, or yellow.

Mini Adhesive-Backed Pipe and Tubing Markers

Small size makes these markers easy to apply—even to instrumentation pipes. They're made of vinyl and include a flow-direction arrow. Message is printed multiple times so it's visible from all angles. Temperature range is –40° to +180° F. *Note:* Because of their small size, these markers do not meet pipe marker identification standards.

To Order: For markers with message, specify message. For blank markers with arrows, ask for 6694T777 and specify color: blue, green, red, or yellow.

Also Available: Other messages and messages in other languages. Please ask for 6694T888 and specify message color, background color, and message.

Electrical Equipment Markers

Promote safety by placing these voltage-indicating self-adhesive vinyl markers on power lines, conduit, fuse boxes, switches, and electrical equipment.

Standard markers have an eye-catching orange background with black printing. They're 0.004″ thick.

Reflective markers are highly visible with black printing on a yellow background. They're 0.005″ thick.

To Order: Please specify message from those listed below.

Also Available: Other messages. For standard markers, please ask for 5894T999 and for reflective markers, ask for 4740T999. Specify marker size and message for both.

Messages			
110 Volts	460 Volts	Power	+30 Volts

Pocket-Size Voltage Marker Books

A convenient book keeps your markers handy. Made of 0.004″ thick vinyl, they have black printing on an orange background.

Message	Marker Size	Markers/ Book		Each
120 Volts	1 1/2″×3 1/4″	15	6115T13	$10.00
208 Volts	1 1/2″×3 1/4″	15	6115T16	10.00
220 Volts	1 1/2″×3 1/4″	15	6115T19	10.00
120, 208, & 220 Volts	1 1/2″×3 1/4″	15●	6115T22	10.00

● Contains six 120 Volt, six 208 Volt, and three 220 Volt markers.

Pocket-Size Safety Switch Marker Book

Provide an additional level of safety by sticking these warning markers across breakers or switches to warn users of potential danger. Each marker is printed with the international symbol for "Do not throw switch." They're made of 0.007″ thick vinyl-coated cloth with red and black printing on a white background.

Book contains 10 pages with six 1/2″×4 7/8″ markers per page for a total of 60 markers. It can be conveniently carried in your pocket. Great for use in conjunction with a lockout program.

5921T2 ..... **Each** $21.87

Wrap-On Electrical Wire Marker Dispensers

Access 10 rolls of commonly used markers with these convenient dispensers. They're made of blue plastic and are furnished with oil- and water-resistant marker tape.

Hand-held dispensers are 5 3/32″ Lg.×1 1/2″ Wd.×1 11/32″ Ht. (length includes handle), and include 10 rolls. Each roll has 76 already cut 1/4″×1 1/4″ markers. Markers are self-adhesive Tyvek and 0.006″ thick. Choose from white or NEMA color markers.

Bench-top dispenser has a steel cutoff blade and an overall size of 8 1/2″ Lg.×3″ Wd.×1 5/8″ Ht. Each roll is 1/4″×96″. Markers are white with black numbers, self-adhesive vinyl-coated cloth, and 0.012″ thick.

White markers have black characters. They repeat the same characters six or seven times on each marker. *Set* includes 0-9.

NEMA color markers are blank and meet NEMA color-coding standards. Set includes one roll each of the following colors: black, blue, brown, gray, green, orange, purple, red, white, and yellow.

Refill tape comes in either assortment sets or as individual characters. **To Order:** For white individual characters, please specify character (0-9, A-Z). For NEMA, specify color.

Slip-On Wire Markers

Dispenser

Individual Character Strip

Slide marker off the holder and onto wiring.

Simply slide a marker off the holder and slip it onto a wire before terminating it. Made of durable PVC, they won't peel or fade like adhesive-backed markers can. Range listed below in parentheses is wire OD.

NEMA color markers include the following colors: black, blue, brown, gray, green, orange, purple, red, white, and yellow.

To Order: For white or yellow marker sets, please specify color.

Dispensers with Character Set

Conveniently store 20 holders, each with 25 identical characters. Dispensers have a belt-loop hook for easy access and portability, and are furnished with 20 holders (two sets of 0-9).

Characters	Qty. Each Character	Marker Qty.	*For 22-16 AWG (0.051″-0.118″)*	Each	*For 16-10 AWG (0.059″-0.197″)*	Each

Manual Label Printers and Tape

Printers

Manual operation means you never have to hunt for batteries or an electrical outlet. Printers emboss 3/16″ high uppercase characters horizontally.

Printer for 3/8″ Wide Vinyl Tape— Made of high-impact ABS plastic with plastic wheels. Use with 3/8″ wide vinyl tape. Includes one roll of 3/8″ Wd. × 0.013″ Thick. × 9′8″ long adhesive-backed black tape. Characters include A-Z, 0-9, period, $, and £ (British currency).

Printer for 1/2″ Wide Metal Tape— Made of cast aluminum with plastic wheels, it has a built-in 3/32″ hole punch. Use with 1/2″ wide metal tape. Includes two rolls of tape: one roll of 1/2″ Wd. × 0.007″ Thick. × 21-ft. long stainless steel tape and one roll of 1/2″ Wd. × 0.007″ Thick. × 16-ft. long aluminum tape. Furnished in a plastic carrying case. Characters include A-Z, 2-9 (letters O and I double as 0 and 1), period, and dash.

For Vinyl Tape

For Vinyl and Metal Tape

		Each
For 3/8″ Wide Vinyl Tape	1617T5	$28.40
For 1/2″ Wide Metal Tape	1598T53	188.14

Tape

Vinyl tape is 0.013″ thick and resists most chemicals and acids. Temp. range is 0° to 248° F. Compatible with 1617T5. Embossed characters are white. **To Order:** Please specify color: black, blue, or red.

Metal tape is 0.007″ thick and has superior resistance to chemicals, moisture, and abrasion. Compatible with 1598T53. *Aluminum* resists temperatures up to 482° F; *stainless steel* resists temperatures up to 2372° F.

	Lg.		Each
Vinyl

Manual Label Printer/Applicator Guns

Print and apply labels in one swift motion. Just like the printer guns used by grocery store clerks, these guns can print multiple characters at once on adhesive-backed paper labels. Characters are black. Printer guns are plastic and come with one roll of white labels.

Single-line printer prints up to six characters across. Characters include: 0-9 (one band has 10 and 12), period, / (forward slash), $, ¢, +, FOR, TAX, and EA.

Double-line printer prints up to eight characters on each line. Characters include: 0-9 (one band has 10, 11, and 12), period, / (forward slash), $, ¢ , +, FOR, +TX, TX, and EA.

Double-line alphanumeric printer prints up to 10 characters on each line. Top line has A-Z, 0-9, £, dash, and period; bottom line has 0-9, period, / (forward slash), $, ¢, and FOR.

Labels are sold separately and include an ink roller. *Permanent labels* are 0.005″ thick and have a temperature range of –50° to +200° F, unless noted. **To Order:** Please specify color: white or red. *Removable labels* are white, 0.006″ thick, and have a temperature range of –65° to +160° F, unless noted.

Battery-Operated Label Printers

Create labels more quickly and easily than with manual printers. These battery-operated printers have an LCD and print upper- and lowercase characters horizontally and vertically on multiple lines. Housing is plastic. All include one starter tape, unless noted. Additional tape is sold separately.

(A) Label Printer for 1/4″-1/2″ Wide Labels and (B) Label Printer for 1/4″-3/4″ Wide Labels

Operate on a rechargeable battery (charging adapter included).

(A) Label Printer for 1/4″-1/2″ Wide Labels— Prints one line of text on 1/4″ and 3/8″ tape widths and two lines on 1/2″ tape width. Maximum character height is 5/16″. Machine has a two-line viewable display, stores up to nine labels, and includes 1/2″ wide standard tape that prints black characters on a white background.

(B) Label Printer for 1/4″-3/4″ Wide Labels— Prints one line of text on 1/4″ tape width and two lines on 3/8″, 1/2″, and 3/4″ tape widths. Maximum character height is 1/2″. Printer has a two-line viewable display and print preview. It stores up to 9 labels in the memory and recalls the last 10 labels printed. Furnished with one 3/4″ wide standard tape cartridge that prints black characters on a white background.

	Overall Size, Lg. × Wd. × Ht.		Each
A	8 1/2″ × 7 1/2″ × 4″	86085T38	$87.06
B	11 1/2″ × 7 1/2″ × 4″	15385T67	105.50

Standard tape is made of polyester-coated nylon and has a temperature range of 0° to 248° F. **To Order:** For 1/4″ wide tape, specify black characters on a clear or white background; for 3/8″ wide tape, specify black characters on a clear or white background, blue characters on a white background, or red characters on a white background; and for 1/2″ and 3/4″ wide tape, specify black characters on a clear, green, red, white, or yellow background, black characters on a blue background (1/2″ wide tape only), blue or red characters on a white background, red characters on a clear background (1/2″ wide tape only), blue characters on a clear background (1/2″ wide tape only), or white characters on a clear or black background.

High-temperature tape is made of polyester and has a range of 0° to 338° F. It prints black characters on a white background.

For Printer	Tape Size, Wd. × Thick. × Lg.		Each

(C) Label and Bar Code Printer for 1/4″-1″ Wide Labels

Print in five languages and six bar code formats. Unit accommodates five tape widths (1/4″, 3/8″, 1/2″, 3/4″, 1″) and has a four-line viewable display and built-in tape trimmer. It prints and automatically cuts labels, bar codes, and up to eight lines of text on 1″ wide tape; maximum character height is 1/2″. Includes 1″ wide tape that prints black characters on a white background. Operates on six AA batteries (included) and can be used with the optional 110 VAC adapter (sold separately).

	Overall Size, Lg. × Wd. × Ht.		Each
C	8″ × 8″ × 2 1/2″	16225T58	$342.16
Optional 110 VAC Adapter		16225T54	54.21
Plastic Carrying Case		16225T56	54.21
Replacement AA Batteries (4/Pkg.)		71455K53	Per Pkg. $2.94

Tape is made of polyester and has a temperature range of –80° to +302° F. **To Order:** Please specify black characters on blue, clear, green, red, white, or yellow background or white lettering on a black background. 1/2″ to 1″ wide tape is also offered with white characters on a blue, green, or red background.

Tape Size, Wd. × Thick. × Lg.		Each
1/4″ × 0.003″ × 26 ft.	16225T71	$22.67
3/8″ × 0.003″ × 26 ft.	16225T72	22.67
1/2″ × 0.003″ × 26 ft.	16225T73	22.67
3/4″ × 0.003″ × 26 ft.	16225T74	27.02
1″ × 0.003″ × 26 ft.	16225T75	27.02

(D) Label and Bar Code Printer for 1/2″-2″ Wide Labels

Print on three tape widths (1/2″, 1″, 2″) and in three languages. Unit has a full-color viewable display that shows text and graphics. Prints 39 and 128 bar code formats and includes a program for designing and printing custom labels. Comes with a roll of 250 1 1/2″ Wd. × 1″ Ht. white polyester labels, 150 feet of black ribbon, and a plastic carrying case. Starter tape not included (sold separately). Unit also includes a rechargeable battery and 120 VAC adapter. Adapter can also be used to recharge the battery.

	Overall Size, Lg. × Wd. × Ht.		Each
D	13″ × 9 1/2″ × 4 1/2″	5942K14	$1,021.06
Replacement 120 VAC Adapter/Battery Charger		5942K19	65.47
Replacement Rechargeable Battery		5942K13	88.27

Tape is vinyl and has a temperature range of –40° to +180° F. **To Order:** Please specify black, blue, clear, green, orange, red, white, or yellow.

Ribbon can't be the same color as the tape you are using. **To Order:** Please specify black, blue, red, or white.

Tape Size, Wd. × Thick. × Lg.		Per Roll
1/2″ × 0.005″ × 50 ft.	5942K61	$24.24

Ribbon (150 ft. long)	5942K51	66.59

(E) Label Printer for 1/4″-1″ Wide Labels and 1/8″-1/2″ Wide Heat-Shrink Tubing

Produce two types of labels with one machine. Print labels on five tape widths (1/4″, 3/8″, 1/2″, 3/4″, 1″) as well as create messages on five widths of heat-shrink tubing (1/8″, 3/16″, 1/4″, 3/8″, 1/2″) for wire marking. Maximum character height is 1/2″; you can fit eight lines of text on 1″ wide tape. Unit can print in five languages and six bar code formats, plus it automatically cuts labels. It has a four-line viewable display that offers prompts in English and Spanish.

Printer is supplied with one 8-ft. length of 3/16″ wide heat-shrink tubing that prints black characters on a white background and one 26-ft. length of 1″ wide tape that prints black characters on a white background. It has a built-in tape trimmer, operates on six AA batteries (included), and can be used with the included 110 VAC adapter. Comes in a plastic carrying case.

	Overall Size, Lg. × Wd. × Ht.		Each
E	8″ × 8″ × 2 1/2″	4512T6	$380.73
Replacement 110 VAC Adapter		16225T54	54.21
Replacement AA Batteries (4/Pkg.)		71455K53	Per Pkg. $2.94

Tape is made of polyester and has a temperature range of –80° to +302° F. **To Order:** Please specify black characters on blue, clear, green, red, white, or yellow background or white lettering on a black background. 1/2″ to 1″ wide tape is also offered with white characters on a blue, green, or red background.

Heat-shrink tubing is made of polyolefin and has a shrink temperature of 194° F. 3/8″ wide heat-shrink tubing has black characters on a white background. **To Order:** Please specify black characters on a white or yellow background for 1/8″ and 1/4″ wide heat-shrink tubing; or black characters on a white, red, or yellow background for 3/16″ and 1/2″ wide heat-shrink tubing.

PC-Driven Label and Heat-Shrink Tubing Printer

Use with your PC for greater printing versatility than standard label printers. Print on five widths of polyester tape (1/4″, 3/8″, 1/2″, 3/4″, and 1″) for labels and on four widths of heat-shrink tubing (1/8″, 3/16″, 1/4″, and 1/2″) for wire marking.

Create messages with uppercase and lowercase characters in any font on your PC. Printer comes with software that includes 150 templates, 1,000 characters and symbols, and eight bar code formats. Print horizontally and vertically. Maximum character height is 8″ on multiple pieces of tape (for example, an 8″ character would print on eight pieces of 1″ wide tape). Printer automatically cuts labels for you.

Printer includes 3-ft. USB cord, one label cartridge (1″ wide tape with black characters on a white background), and 120 VAC adapter. Size is 7″ Wd. × 2″ Ht. × 5″ Dp. Housing is plastic.

System requirements: Windows 2000, XP, or Vista, 500 MHz, 192 MB of RAM, 30 MB hard drive space, CD-ROM drive, and USB port.

For heat-shrink tubing and tape, see 16225T and 4512T on pg. 1972.

Replacement 120 VAC Adapter	6687T6	42.12

Light Duty Pouch Laminator

For quick, intermittent laminating applications, choose this economical machine. It laminates items up to 9″ wide.

Laminator has an ABS plastic housing and an indicating light that shows when the machine is ready for operation. It includes a 6-ft. cord with a two-prong plug, operates on 120 VAC, 60 Hz, and draws a maximum of 2.5 amps. UL and C-UL listed.

Pouches are made of polyethylene and ethylene vinyl acetate.

Heavy Duty Pouch Laminators

A

B

C

Slot Punch

Made of steel and aluminum, these machines handle your most demanding laminating jobs. Silicone rollers resist heat and provide better adhesive release. An adjustable thermostat controls heat output for best results. Include an 8-ft. cord with three-prong plug and operate on 115 VAC, 60 Hz. UL listed. *Style A* draws 3 amps, *Style B* 5 amps, and *Style C* 7 amps.

Kit for Style A laminator comes with 220 2 7/8″ × 5 3/8″ tags with 20 each of blank and 10 different safety messages (Caution, Check Out, Danger, Danger—Do Not Operate, Lockout, Lubrication Instructions, Right-to-Know, Start-Up Instructions, Valve No., and Warning), 100 tag pouches, and two small laminating carriers.

Kits for Style B and C laminators include all of the above, plus ten 8 1/2″ × 14″ signs with messages (Caution, Certificate of Inspection, Danger, Emergency Telephone Numbers, and Reserved Parking For), five sign laminating pouches with four 1/8″ dia. holes, five lockout/tagout forms, one large laminating carrier, and five each of the 5868T26, 5868T31, and 5868T63 pouches.

Pouches are made of acid-free photo-safe polyester with a clear finish except 5868T78, which has a matte finish for scanning. All pouches come with a cardboard carrier that protects the laminator roller from excess pouch adhesive and adds pressure to create a more professional result.

Slot punch can punch one laminated card or tag. Punched slot is 9/64″ × 1/2″.

Manual Laminator

No electricity or warm-up time necessary—just turn the handle and guide your document through. Laminator has a plastic housing and comes with a 15-ft. two-sided lamination cartridge that applies a 9″ wide clear laminate. All laminates are 0.003″ thick per side and made of polypropylene. A cutting blade trims the laminate to the length you need.

Additional 9″ wide ***laminate*** rolls are sold separately.

Roll Laminator

Take on large laminating jobs and wider items than pouch laminators. This machine has a working speed of 5 ft./min. and can laminate items up to 27″ wide. It can hold two supply rolls to laminate the top and bottom at the same time for a finished thickness of 0.003″. Laminator is made of aluminum and plastic and includes a 6-ft. cord with three-prong plug. Operates on 120 VAC, 60 Hz and draws a maximum of 15 amps. UL listed.

Laminate is made of 0.0015″ thick clear polyester and polyethylene and comes on a 3 3/4″ dia. roll with a 1″ dia. core.

Photo Identification Software and Camera

Create custom ID cards quickly and efficiently with your PC. Simply choose a template, import a digital photo, then print on your inkjet or laser printer.

ID software offers 50 templates and supports 13 bar code formats to produce single- and double-sided cards. Background and clip art software with 40 backgrounds and 100 illustrations is included to add detail to your ID cards. Minimum requirements are Windows 98, 64 MB of RAM, 120 MB free hard-drive space, a 400 MHz processor, and a 32-bit display monitor.

Digital camera has an auto focus feature and 2 megapixel resolution. Camera can be placed on any flat surface or raised using the included 9″ high removable stand. Furnished with a 6-ft. USB cable and installation software on CD-ROM.

Blank ID cards are 1⅞″×3⅛″ (furnished on an 8½″×11″ sheet for feeding through a printer) and 0.008″ thick. Each package contains five sheets with eight cards per sheet.

For laminator and laminating pouches, see 5868T79 and 5868T61 on page 1973.

Badges, Badge Holders, and Accessories

Badges—*Adhesive-backed visitor name badge* has a "visitor" header with white characters on a blue background. It's 2¼″ Ht.×3½″ Wd. and made of 0.003″ thick paper. *Adhesive-backed time-sensitive visitor expiration badge* reveals a red "void" message 24 hours after application that can be seen up to 50 ft. away. It's 2″ Ht.×3″ Wd. and made of 0.004″ thick white paper. Header reads "visitor" in blue lettering. *Blank badge insert* can be used with badge holders. It's 1⅞″ Ht.×3⅛″ Wd. and made of 0.006″ thick white paper. Comes on six perforated sheets with 8 badges per sheet. Use with laser and inkjet printers.

Badge Holders—Conveniently carry and display your identification card with these holders. All are vinyl and come in both a horizontal and vertical badge style, unless noted. **To Order:** Please specify horizontal or vertical.

(3) Sealable holder with strap/chain holes has a zip-press closure to protect your badge.

(4) Magnetic holder has a clear plastic pocket on the front. *(5) Magnetic holder with thumb notch* makes it easy to remove your badge or ID card. It has a clear plastic pocket on the front. *(6) Arm band* is elastic with a hook-and-loop closure.

(7) Badge holder with pouch and 34″ neck cord has a clear plastic pocket on the front and a full-sized pouch on the back. The pouch has a zipper to secure your personal items. The cord is made of nylon and adjusts to fit with the locking slider. Available in horizontal style only.

Cords and Clips—*(9) 30″ elastic neck cord* has metal barbs at each end that quickly attach to badge holders with strap holes. **To Order:** For (9), please specify color: black or white. *(12) 36″ polyester neck cord* is ¾″ wide and lies flat when worn. End fitting is nickel-plated steel. **To Order:** For (12), please specify color: black, blue, green, or red. *(13) Permanent vinyl strap metal clip* cannot be opened once it's snapped. *(15) Metal clip with card clamp* grips badge, eliminating the need to punch holes. *(16) Two-piece magnetic clip* holds badges in place through clothing. Just attach adhesive-backed steel plate to badge.

Retractable straps have a spring-loaded nylon cord that feeds from a plastic case. *(19) No-twist retractable swivel strap clip-on with card clamp* holds swipe cards and cards without slots. **To Order:** For (17&19), please specify color: black or blue. For (18), please specify color: black, blue, or white.

Tear-Resistant Tyvek Wrist Bands

An adhesive closure ensures visitors keep their wrist bands on—they must be cut to be removed. Made of tough, waterproof Tyvek, they're lightweight and adjust to any size. You can also write on them with a pencil, ball-point pen, or permanent marker. Bands are 10″ Lg.×¾″ Wd. and 0.005″ thick.

To Order: Please specify color: blue, green, orange, pink, purple, red, or yellow.

Wrist Bands (25/Pkg.)	2693T5	Per Pkg.	$8.25

Clocks

All have a white dial with numerals, minute marks, hour and minute hands, and a second hand (unless noted).

Standard clocks 8418T15, 13165T301, and 1339T601 are for outdoor as well as indoor use.

Traceable clocks come with a certificate traceable to NIST (National Institute of Standards and Technology).

With Thermometer—Temperature range is –4° to +104° F.

With Thermometer and Humidity Indicator—Temperature range is –34° to +116° F. Humidity range is 8% to 92%.

Indoor/Outdoor with Thermometer and Humidity Indicator—Temperature range is –30° to +130° F. Humidity range is 0% to 100%.

Atomic clocks synchronize with the NIST atomic clock and automatically adjust for daylight-saving time. When synchronized, they are accurate to the second.

With Thermometer and Humidity Indicator—Temperature range is –10° to +130° F. Humidity range is 1% to 99%.

To Order: Please specify case color where necessary.

Digital Clocks

A

B

C

The large display on these clocks is easy to read, even from a distance. Choose to display 12-hour or 24-hour military time.

Style A has an LCD and a plastic case and is battery operated. It simultaneously displays time, date (month, day), day of the week, and temperature (selectable for °F or °C). Runs on four AAA batteries (not included).

Styles B and ***C*** run on 115 VAC, 60 Hz (0.12 amp draw) and have a 6-ft. cord with three-prong plug. UL listed. ***Style B*** have a red LED display and 9-volt battery backup (battery not included). Case is plastic. ***Style C*** have a red LED display, aluminum case, and a 7-year lithium battery backup. You can choose time or alternating time/date displays as well as program to update for daylight saving time. Connect multiple clocks using RS-232 cable (sold separately) to create a synchronized system.

Desktop Digital Clocks

D

E

F

Keep an eye on the time without leaving your desk. Clocks have a black plastic case, unless noted.

Standard clocks have an alarm, snooze function, and pm indicator. *Style D* runs on two AAA batteries (included). It has an LCD with a backlight button and displays 12-hour or 24-hour military time. *Style E* runs on 120 VAC, 60 Hz and draws 0.15 amps. It has a 5-ft. cord with two-prong plug and 3-volt battery backup (included). Display is a red LED and case is silver.

Traceable atomic clock synchronizes with the NIST (National Institute of Standards and Technology) atomic clock for an accuracy up to 1/10,000 of a second. It has an alarm and displays time to the second as well as the month, date, and day of the week. The LCD has a glow-in-the-dark background. Operates on two AAA batteries (included).

Multi-Event Digital Timers

Time several events together or separately. Set timers to count down to an alarm, count up, and display time of day. Case is plastic.

All ***pocket timers*** have an LCD and built-in stand. Operate on included batteries.

Styles L and *M* have a pocket clip and magnet on the back, hole for a lanyard (not included), and run on one 1.5-volt battery.

Traceable pocket timers include a certificate traceable to NIST (National Institute of Standards and Technology). *Style N* has an extra-loud (100 dB) alarm, a magnet on the back, and runs on one 1.5-volt battery and two AAA batteries. *Styles P* and *Q* run on one AAA battery. *Style P* has a pocket clip and magnet on the back. *Style Q* has two 19/64″ mounting slots on the back (fasteners not included).

Benchtop timers have an adjustable alarm volume and rubber feet.

Traceable benchtop timer has an easy-to-read LCD that displays three events simultaneously as well as the date (day, month, year). It includes a certificate traceable to NIST (National Institute of Standards and Technology). Runs on one AAA battery (included).

AC-operated benchtop timer can perform three countdowns; two repeat countdowns (triggers alarm at set intervals); one count up; and one countdown/count up (counts down to alarm and then begins to count up). It also displays 12-hour or 24-hour military time. Operates on 115 VAC, 60 Hz (0.4 amp draw) and has a 5-ft. long cord with two-prong plug. Display is a red LED. The decimal point floats to show seconds when less than 1 hour remains.

Bells and Horn

Bell

Horn

	Size	Color		Each
Bell	6″ dia.	Gray	9579T32	$52.89
Bell	6″ dia.	Red	49565T23	52.89
Horn	4″ sq.	Gray	9579T34	39.93

Program these timers to trigger an audible signal. Use the keypad to select a 12- or 24-hour clock display and program a schedule for each day of the week. You can also adjust signal duration from one to 99 seconds. Both timers can be wall mounted or set on a benchtop. Operate on 115 VAC, 60 Hz (9.0 amp draw). UL listed. CSA certified.

Timer can be hardwired to a maximum of five signal devices such as bells and horns (sold separately). Display is an easy-to-read LCD. A user-defined security code restricts access to the keypad. Timer must be hardwired and has a 10-amp dry contact relay and 6-volt battery backup (battery included). Housing is 5¼″ Ht. × 9½″ Wd. × 3¼″ Dp., made of black plastic, and has a brushed aluminum face.

Timer with built-in horn has a red LED display. The keypad is located behind a locked cover (two keys included) to restrict access. Horn sounds 90 dB @ 10 ft. Timer has a 6-ft. long cord with three-prong plug and a 9-volt battery backup (battery included). Housing is 5¾″ Ht. × 7″ Wd. × 5¼″ Dp. and made of gray steel.

Bells and ***horn*** are made of aluminum and can be used indoors and outdoors. Mounting hardware included.

Bells sound 86 dB @ 10 ft. and operate on 115 VAC, 60 Hz (0.085 amp draw).

Horn sounds 95 dB @ 10 ft. and operates on 115 VAC, 60 Hz (0.16 amp draw).

About Stopwatch Timing Functions

Single-event timing records one event.

Lap timing displays the elapsed time, from start to finish, of several separate events.

Split timing records the combined time of events. Press button once to display the elapsed time for the first event. Press again to display the combined elapsed time of the first and second events.

Timeout mode freezes the timing function when a button is pressed. Press button again to resume time.

Stopwatches

For precise spring-wound movement, choose these shock-resistant stopwatches. Dial is 1 13/16″ dia. Color is white. Numerals, markings, and hands are black. Case is 2⅛″ dia. and made of chrome-plated alloy (unless noted); lens is acrylic. Stopwatches also have a 9/16″ dia. inset dial (unless noted) that measures total time.

Style A—Start, stop, and reset with the push of a button.

Style B—Push green button to start, red button to stop, and black button to reset.

Styles C-E—Push the top button to start, stop (for timeout), and continue time. To reset, push the side button after stopping watch. *Styles D* and *E* also include a certificate traceable to NIST (National Institute of Standards and Technology).

Digital Stopwatches *(Continued from previous page)*

J

K

L

M

N

P

Style J has a 10-hour countdown timer.

Style K have an octagonal shape that fits comfortably in your hand. They can be used with the *optional aluminum clipboard*, which has a clamp to hold the stopwatch and a low-profile clip to hold paper.

Style L has a 20-hour decimal countdown timer (1/1,000 min. and 1/100,000 hr. resolution).

Style M meets ISO 17025 standards. It has a detachable pocket clip. Case is gray.

Style N meets ISO 17025 standards. Case is yellow.

Style P has a 10,000-minute decimal countdown timer (1/100 min. resolution). Case is gray.

Stopwatches ***with NIST certificate*** come with a certificate traceable to NIST (National Institute of Standards and Technology).

Combination Wristwatch/Weather Monitor

In addition to time and date, this water-resistant wristwatch displays temperature (+14° to +140° F/–10° to +60° C), barometric pressure, and altitude. Other functions include a stopwatch with a 99-hour maximum time; countdown timer that can be set to 3, 5, 10, 15, or 45 minutes; and a digital compass. Watch has a large LCD, glass lens, and 2″ dia. gray plastic case. Band is black rubber with a Type 304 stainless steel buckle closure. Watch operates on included 3-volt lithium battery.

Push-to-Punch Time Clocks

For easy time recording, just insert card into front of clock and push lever to print. Housing locks to prevent tampering. (Dial clocks include two keys; digital include one.) Clocks print in blue and red ink and can be wall or benchtop mounted using the included hardware. Time cards are sold separately.

AM/PM clocks print 12 hour time. The PM hour is underlined.

Military clocks print 24 hour time.

AC-operated clocks run on 115 VAC, 60 Hz and have a 6-ft. long cord with three-prong plug. UL listed. CSA certified.

Battery-operated clock runs for six months on four D batteries (not included) and has an audible low-battery indicator. Prints format A (see table below).

Dial clocks have a 4″ Ht. × 6 1/2″ Wd. dial and green plastic housing. Time wheels are rustproof acetal. AC-operated draw 1.5 amps.

Digital clocks have a red LED display with four 9/16″ high digits. Housing is dark gray steel. Time wheels are steel. Draw 3.4 amps.

Auto-Punch Time Clocks

Dial

Digital

Insert a card into the front of these clocks and they print automatically.

All include hardware for wall or benchtop mounting and lock (two keys included) to prevent tampering. Operate on 115 VAC, 60 Hz and have a 6-ft. long cord with three-prong plug. UL listed. CSA certified. Time cards are sold separately (see page 1979 for photos).

AM/PM clocks print 12-hour time. The PM hour is underlined.

Military clocks print 24-hour time.

Dial clocks have a 4″ Ht.×6½″ Wd. dial and draw 1.5 amps. Housing is green plastic. Time wheels are rustproof acetal.

Digital clocks have a red LED display with four 9/16″ high digits. They draw 3 to 4 amps. Housing is dark gray steel. Time wheels are steel.

Digital with auto signal clocks are the same as digital with the added capability of programming up to 32 audible signals per day on a weekly schedule. Use with 110/120 VAC signals sold separately on pages 1842-1845. Program using the internal keypad. In case of power failure, clock can run for up to 15 days on the 9-volt battery backup (battery not included).

Auto-Punch Time Clocks with Message Stamp

Standard

Programmable

Clocks print combinations of year, month, date, time (12- or 24-hour time), and minutes (10ths or 100ths of an hour). Insert paper into the front and clocks print automatically. The 6-digit LCD shows the time and date. Clocks self-adjust for daylight-saving time. Housing is plastic and has a lock (one key included) to prevent tampering. UL listed. CSA certified. Job cards are sold separately.

Standard clock also prints 10 different notations (RCV'D, SENT, FAX'D, VOID, PAID, CFM'D, APR'D, CMPL'D, ORIGN, and FILE). Operates on 120 VAC, 60 Hz (0.6 amp draw) and has a 6-ft. long cord with three-prong plug. The lithium battery backup (battery included) retains memory in case of a power failure. LCD digits are ¼″ high. Housing color is black.

Both ***programmable*** clocks let you create your own notation and 3- or 6-digit sequential numbering. Display includes day of the week. Operate on 120 VAC, 60 Hz (0.2 amp draw) and have a 6-ft. long cord with three-prong plug. NiCad battery backup (battery included) lasts up to 72 hours or 400 imprints. Housing color is blue and gray. *Scheduling* clock lets you program up to twenty 110/120 VAC audible signals (sold separately on pages 1842-1845).

	Overall Size, Ht.×Wd.×Dp.		Each

Job Cards	9″×3½″	250	12735T9	$10.21

Badge-Swipe Time Clock

Swipe the magnetically encoded badges and this clock calculates and records time. It can handle up to 120 employees and is programmable for 12 independent shifts, overtime, and weekly, biweekly, semimonthly, and monthly pay periods. Display is selectable for 12- or 24-hour time and minutes or 100ths of an hour.

Clock automatically adjusts for daylight-saving time. It comes with 50 employee badges (encoded 1-50) and two supervisor badges. Display is a 12-digit, 11/16″ high LCD. Housing is 6⅛″ Ht.×8 11/16″ Wd.×2 5/16″ Dp. and made of gray plastic. Clock runs on 120 VAC, 50/60 Hz (0.15 amps). It has a 6-ft. long cord with two-prong plug and a lithium battery backup. UL listed. Includes hardware for wall or benchtop mounting.

Use the included software and 50-ft. serial cable with 9-pin female adapter to upload data to your PC. Minimum requirements: Windows 95, 4 MB of RAM, 1 MB free hard-drive space, and a Pentium processor.

Time Clock	8425T66	Each	$528.57
Additional Badges Encoded 51-100	8425T83	Per Set	$99.74
Additional Badges Encoded 101-150	8425T84	Per Set	$99.74

Total-the-Hours Auto-Punch Time Clock

No calculations necessary—this time clock does it for you. Clock calculates the time between punches and totals the time in hours and minutes on the card. You can also print a summary of the active time cards with totals for each card in regular and overtime hours. Time cards are sold separately.

Clock is top loading and handles up to 100 employees on a weekly, biweekly, semimonthly, or monthly pay schedule. Select English, Spanish, or French for print language. The LCD is 1 7/16″ Ht.×3½″ Wd.; displays time, date, and day of the week. Clock automatically adjusts for daylight-saving time. Housing is blue plastic with a silver plastic face. Operates on 120 VAC, 50/60 Hz (0.4 amp draw) and has a 6-ft. long cord with three-prong plug. UL listed. Wall mounting hardware is included.

	O'all Size, Ht.×Wd.×Dp.		Each
Time Clock	9½″×7 3/16″×5½″	6838T41	$515.52
Replacement Ink Ribbon		6838T43	20.00
Replacement Keys		6838T44	Per Pair $13.33
Time Cards, 7¼″Ht.×3⅜″Wd. (100/Pkg.)		6838T42	Per Pkg. $17.16

Finger-Scan Time Clock

Scan employee fingerprints to register attendance, eliminating time cards and one employee punching in for another. Time clock is programmable for weekly, biweekly, semimonthly, and monthly pay periods as well as overtime for up to 50 employees.

The 3″ Wd.×1″ Ht. backlit LCD displays 12-hour time and date (month, day, year) when idle and employee name, in/out status, and total pay period hours after each successful scan. Housing is 3 13/16″ Ht.×5⅞″ Wd.×7⅝″ Dp. and made of gray plastic. UL listed.

Use the included software and 5-ft. USB cable (which also powers the clock) to upload data to your PC. Minimum requirements are Windows 2000, 120 MB of RAM, 200 MB free hard-drive space, a 300 MHz Pentium processor, and an 800×600 resolution display.

8008T2 ..... Each $344.26

Auto-Punch Time and Date Stamp

Clearly record times and dates on freight bills, mail, legal papers, and other time-sensitive documents. The aluminum alloy wheels print year, month, date, AM/PM, hour, and minute. Imprint area is 3/16″ Ht.×1⅛″ Wd. A dial on the bottom lets you adjust the stamping impact, allowing you to print on one- to five-part forms.

Stamp has a green LED clock with ⅜″ high digits. Housing is 11″ Lg.×5¼″ Wd.×7″ Ht., made of gray plastic, and has a key lock to prevent tampering. Operates on 115 VAC, 60 Hz (3-4 amp draw) and has a 6-ft. long cord with three-prong plug. UL listed. CSA certified.

Time Card and Badge Holders

Display time cards and badges for quick identification. Select the holder with pocket dimensions that fit your time cards. All are made of steel except 12705T571, which is molded plastic.

Time Card Holders—6062T7 and 6062T9 hold five cards per pocket; 6062T5 holds 10 per pocket; and 1252T3 and 1252T4 hold 25 per pocket. Two- and three-column holders have a removable divider rod for side-by-side pockets.

Adjustable time card holders have pockets that adjust to accommodate time cards of various sizes. Each pocket holds eight cards.

Time badge holder stores one credit card-sized badge per pocket.

Wall Hooks, Clips, and File Holders for Fabric Panels

Maximize space on your fabric panel walls. Hooks and clips are needle-backed to easily slide in and out of fabric without damage.

(A) Wall hooks let you hang keys, pictures, and calendars.

(B) Wall clips hold notes, messages, and memos. *Small* clip holds up to 40 pages. *Jumbo* clip holds up to 50 pages.

(C) Three-pocket file holders accommodate three letter-size file folders (not included) and hang from two included wall hooks.

Heavy Duty Document Holders

Mounting Frame with Sheet Protectors

Desk Stand with Mounting Frame and Sheet Protectors

Extension Arm with Mounting Frame and Sheet Protectors

Build durable steel holders to keep your documents clean and organized for easy viewing. Start with a mounting frame and sheet protectors. Add accessories as needed. *Note:* All components are sold separately.

Both ***frames*** are made of gray steel and can also be used with desk stands or arms. *Mounting frame* can be secured to wall (hardware included). *Magnetic mounting frame* mounts to most metal surfaces.

All ***sheet protectors*** have a top opening and accommodate documents up to 8½″×11″. They're made of clear plastic with colored steel edges. Simply snap into mounting frame for free-turning pages.

Sheet Protector and *Sheet Protectors with Index Tabs*—Overall size is 9⅜″ Wd.×11¾″ Lg. **To Order:** Please specify edge color: black, blue, brown, green, red, or yellow. For protectors with index tabs you can also specify assorted edge colors.

High-Capacity Sheet Protector—Holds five times as many sheets as an individual protector. Edge color is blue. Overall size is 9″ Wd.×11⅝″ Lg.

Desk stands secure mounting frames at a 45° angle and are made of gray steel.

Both ***arms*** connect to mounting frames and have a 3″ clamp for securing to a desk or shelf. They're made of gray steel and include hardware for mounting up to two frames. *Telescoping arm* adjusts from 17″ to 27″ above your work surface. *Extension arm* has a 24″ reach.

Index tabs are made of clear plastic and clip onto sheet protectors.

Mounting Frames and Sheet Protectors

	Capacity		Each
Mounting Frame	10 sheet protectors	8396T45	$25.57

Extension Arm	2 frames/20 sheet protectors	8396T92	144.40

Index Tabs (10/Pkg.) ..... 8396T2 **Per Pkg.** $4.10

Machine-Mount Document Holder

Access your documents right where you're working. This holder mounts to machines, equipment, and walls. It has a 2″ dia. three-ring binder that secures up to 10 sheet protectors. Holder is 15½″ Ht.×24¼″ Wd.×2″ Dp. and made of black ABS plastic. It has six mounting holes (fasteners included).

Sheet protectors (holder includes two) are made of clear nonglare vinyl with a white background. Each can hold two documents up to 8½″×11″.

		Each
Holder	8387T5	$49.07

Additional Sheet Protector .... 8387T7 **Each** 1-9 $3.84 10-Up $3.41

Expandable Document Stands

45° Desktop Base

Floor Stand Base

Organize and display literature such as reference books and catalogs in these convenient stands. Start with a base and select the type of binding needed. *Note:* All components are sold separately.

Desktop base is gray steel.

Floor stand base has a 43¾″ high steel support that holds two panels: the lower panel supports your materials and the upper panel has two clips for holding paper. Panels are 13″ Lg.×26″ Wd. and made of yellow polystyrene. Legs are black-painted steel.

Bindings connect to the base with an included slide hook. They're made of gray steel and are for use with three-hole punched sheets. Three-post bindings lock into place when snapped together.

Divider set contains 8¾″×11″ high-density black polyethylene dividers with five holes. Tabs are white with aluminum edges.

● Does not include a padded wrist rest.

Precise Fit See-Through Plastic Keyboard Protectors

Protect your keyboard from dust and spills without hindering your typing. These protectors conform to the key layout and have adhesive-backed edges to seal out contaminants.

Also Available: Keyboard protectors to fit other manufacturers' keyboards. Please ask for 1733T55 and specify manufacturer's name and model number.

Computer Mice, Mouse Pads, and Wrist Rest

Computer Mice

Laser

NEMA 4X

Ports

All are PC compatible for Windows and include a PS/2 adapter and cable cord.

Laser mouse is made of plastic with two buttons, a scroll wheel, and USB connector.

NEMA 4X mouse is corrosion-resistant and waterproof. It has an impact-resistant Type 304 stainless steel housing, rubber backplate, and serial port connector. Also meets NEMA 6P, 12, and 13 to resist dust and oil and coolant splashes.

Advanced-Function Calculators

All have memory, except 8471T59. Battery-powered calculators include batteries.

(A) Business—*Profit manager* calculator solves cost-sell-margin equations. Simply enter any two variables to get the third.

(B) Trades—*Metric converter* calculator performs English to metric conversions (and vice versa), including length, area, and volume. *Metric converter with fractions* and *metric converter plus with fractions* convert linear, square, and cubic figures from English to metric (and vice versa). The *metric converter plus with fractions* also provides an additional 400 conversion combinations. *Construction* performs functions for rafters, stairs, material estimation, and more. It also converts fractions. *HVAC* converts pressure to temperature (and vice versa) for many refrigerants. It also converts Fahrenheit to Celsius (and vice versa). *Electrical code* contains the NEC (National Electrical Code) tables and formulas to perform electrical functions.

(C) Scientific—*Statistics* calculators perform trigonometric functions, logarithms, roots, powers, reciprocals, and standard deviations. *Statistics with linear regression* includes the Statistics features above plus two variable statistics for linear regression and trend-line analysis. *Graphing statistics* combines advanced graphing and data analysis with calculus as well as statistical and financial functions. It has an 8-line, 16-character display and is software-upgradable.

Specialty Drafting Templates

	Lg. × Wd.		Each
Flow—For pipe and plumbing layout: gas, oil, water, and chemical.	10 1/8″ × 2 3/4″	1218T11	$10.23
Pipe Fitting—Symbols for pipe OD, end bell, flange, and fittings.	8″ × 5″	1218T12	12.21
Sheet-Metal Conduit—Cross sections for heating and air conditioning.	9 3/4″ × 5 1/16″	1218T13	17.07
Heating and Air Conditioning—Symbols conform to ASA Z32.2.3 and 32.2.4.	7″ × 5″	1218T14	12.79
Electrical/Electronic—Symbols, contacts, switches, terminals, etc. Conform to ANSI Y32.2 (Set of 3).	★	1218T15	36.96
Flowcharting—Computer flow symbols conform to ANSI X3.5 and ISO 1028.	10″ × 4″	1218T17	9.61
Arrowheads—Fraction and metric sizes for directional use.	4 5/8″ × 4 3/8″	1218T18	8.05
House and Plumbing—House plan and plumbing fixtures.	5″ × 7″	1218T21	8.00

★ 8″ × 5″, 8″ × 4 3/8″, and 8″ × 3 3/4″.

Compasses

All are made of nickel-plated brass.

Push-button compasses allow quick setting and instant locking of compass legs with the push of a button. 1210T1 and 1210T2 include an extension bar to increase the maximum circle diameter. They also come with a universal adapter that accommodates pens and pencils with a 1/2″ dia.

	Max. Circle Dia.		Each	Max. Circle Dia.		Each
Standard	10 3/8″	1210T4	$18.10	19 5/8″	1210T1	$30.38
Push Button	13 3/4″	1210T6	29.20	23″	1210T2	39.51
Replacement Lead (4/Pkg.)		1210T82				Per Pkg. $2.27
6″ Divider		1210T84				Each $6.13

Light Boxes

Illuminate your drafting work as well as view transparencies, slides, and X-rays.

Battery-operated light box has a plastic work surface, frame, and removable grid. Fluorescent bulb included. Operates on four AA batteries (not included). For AC power, use the optional *adapter* (sold separately).

AC-operated light boxes have a plastic work surface, stainless steel frame, and nonslip rubber feet. Fluorescent bulbs included. Operate on 115 VAC, 60 Hz and have a 6-ft. long cord with three-prong plug. UL listed. All except 1203T12 and 1203T13 have a carrying handle. 1203T12-1203T14 have a built-in tilt stand.

Drafting Accessories

	Lg. × Wd.		Each
Dusting Brush	14″ × 3/8″	12195T65	$5.83
Dry Cleaning Pad	3 5/8″ × 2 3/8″	13295T66	7.55
Erasing Shield	3 5/8″ × 2 3/8″	13295T69	2.00

Pantograph

Trace or dot on inclined and horizontal boards. This tool has 30 different settings and a table clamp for stability. Length is 24″.

6101T14 ..... Each $32.34

Portable Drafting Boards

These boards have a warp-free, white laminate surface and include a permanently mounted sliding parallel rule.

Lg. × Wd.		Each
24″ × 18″	1204T9	$92.77
36″ × 24″	1204T2	120.83
42″ × 30″	1204T3	145.83

Drafting-Board Covers

Protect new and restore old board surfaces with these vinyl covers. Just cut to size and attach to your drafting board with double-sided tape (not included). Color is green on one side; cream on the other.

Lg. × Wd.		Each	Lg. × Wd.		Each
42″ × 31″	1384T5	$41.70	60″ × 37 1/2″	1384T8	$66.38
48″ × 36″	1384T6	53.62	72″ × 37 1/2″	1384T9	75.74

Drafting Machines

Clamp one of these machines to your drafting board for superior accuracy. They have precision protractor heads and operate on a continuous loop, steel band and pulley system. The disc brakes steady the machine arm. For use on boards inclined up to 15°; 25° for 60″ Lg. × 36″ Wd. size. Each machine requires two ***scales*** (sold separately).

Drafting Machines

For Board Size		Each
36″ Lg. × 24″ Wd.	1220T21	$508.75
60″ Lg. × 36″ Wd.	1220T24	661.25

Scales—To Order: Please specify scale style.

About Privacy Partitions

Materials

***Steel*—**These economical partitions are the industry standard. They have a honeycomb core that's covered by steel with a painted finish.

***Type 304 Stainless Steel*—**Offering good resistance to corrosion and moisture, these partitions have a honeycomb core that's covered by satin-finished Type 304 stainless steel.

***Plastic Laminate*—**Resistant to stains and grease, these partitions are not recommended for wet environments. They have a particleboard core covered with plastic laminate.

***Solid Plastic*—**The choice for harsh environments and wash down areas, these partitions offer the most corrosion and moisture resistance. Made from a solid piece of high-density polyethylene, they are also the most durable—won't easily chip or dent and never need painting.

Customizing

You can custom order complete partitions and components. Please send a drawing that includes dimensions and the direction you want doors to open (show both top and front views). Please specify partition material and color choice.

Color Information

Unsure of the color you want? *Color sample packs* include samples of all the available colors by material type.

		Each
Steel Color Samples	3621K92	$5.86
Plastic-Laminate Color Samples	3769K98	4.96
Solid-Plastic Color Samples	1648K6	4.26

To see available privacy partition colors, go to mcmaster.com and search for **3621KAC**.

Urinal Privacy Partitions

Wall Hung

Floor Braced

Easy to install, these partitions include all of the components and hardware (brackets and fasteners) you'll need for assembly. The hardware is chrome-plated, cast zinc alloy (unless noted). A Torx T25 screwdriver (sold separately) is required for installation.

Note: Actual panel width is slightly smaller than width listed to account for the space that's required for the hardware.

Wall-hung partitions offer easy access to floors for cleaning.

Floor-braced partitions are connected to the floor for added strength and stability. Furnished with a 7″ Wd.×70″ Ht. column.

To Order: For steel and plastic-laminate partitions, please specify color: almond (lighter than beige), beige, blue, gray, or white. For solid-plastic partitions, please specify color: blue, gray, tan, or white. If you're not sure which color to select, see the color information at the top of the page.

Replacement hardware packages include all replacement brackets and fasteners used on the urinal partitions.

Toilet Privacy Partitions

Free-Standing Partition (3) with two Add-On Compartments (4)

Top View of Partitions

We've eliminated all the guesswork—simply order a partition or partition with add-on compartment(s) to create the toilet partition(s) you need. You'll get all the components and hardware (brackets and fasteners) necessary for assembly.

Note: The number of add-ons you can use is only limited by the amount of space you have.

ADA-compliant corner partition helps you comply with the Americans with Disabilities Act and ANSI 117.1 when properly installed.

To Order: For steel and plastic-laminate partitions, please specify color: almond (lighter than beige), beige, blue, gray, or white. For solid-plastic partitions, specify color: blue, gray, tan, or white. If you're not sure which color to select, see the color information at the top of the page.

For information about privacy partitions, see page 1996.

Toilet Privacy Partition Components and Hardware

Toilet Partition Components—*Installation hardware not included, except for doors and columns. See hardware packages below.*

Whether you need to create your own custom partition, add on to your existing partition, or just replace some damaged components, we've got all the parts you'll need. *Note:* All components (except doors and columns) require hardware for installation. Hardware packages are sold separately below.

To Order: For steel and plastic-laminate components, specify color: almond (lighter than beige), beige, blue, gray, or white. For solid-plastic components, specify color: blue, gray, tan, or white. If you're not sure which color to select, see the color information at the top of the previous page.

Doors and ***panels*** are slightly smaller than the width listed to account for the space that's required for the hardware.

Doors include all hardware required for installation, a heavy duty latch, and coat hook.

ADA doors, when properly installed, help you comply with the Americans with Disabilities Act and ANSI 117.1. They come furnished with an ADA-style latch.

Columns come with Type 304 stainless steel trim shoes and an anchor kit that attaches the column to the floor.

Headrails are anodized aluminum (not available in colors) and have a satin finish. They can be cut to size with a hacksaw.

Hardware Packages to Install Toilet Partition Panels, Columns, and Headrails

Each package comes with the brackets and fasteners needed to assemble toilet partition components. Hardware package ❶, for example, contains all the brackets that have a ❶ next to them in the photo at the top of the page. All hardware is chrome-plated cast zinc alloy (unless noted). Fasteners are Torx head screws and require a Torx T25 screwdriver (sold separately).

Pkg. No.		For Steel & Stainless Steel Per Pkg.	For Plastic Laminate Per Pkg.	For Solid Plastic Per Pkg.
❶	To Attach Panel to Wall and Column, plus Headrail to Wall (Includes Headrail End Cap)	3621K73 $17.06	3769K63 $27.31	1648K73 ♦ $56.26
❷	To Attach Panel to Wall and Column	3621K2 15.63	3769K2 14.34	1648K72 ♦ 58.78
❸	To Attach Column to Wall and Headrail to Wall	3621K71 12.02	3769K61 13.64	1648K71 ♦ 39.52
—	To Attach Panel to Column (When Installing in a Straight Line; Not Shown)	3621K991 4.22	3769K994 5.18	1648K84 ■ 52.68

Torx T25 Screwdriver ..... 5756A17 **Each** $7.77

♦ Hardware is aluminum. Packages are not exactly as shown above—brackets are longer. ■ Made of Type 304 stainless steel.

Replacement Components

All components are chrome-plated cast zinc alloy (unless noted). Fasteners are included.

	For Steel & Stainless Steel Per Pkg.	For Plastic Laminate Per Pkg.	For Solid Plastic Per Pkg.
Door Hardware (Includes 1 Latch, 2 Hinges, and 1 Coat Hook)	3621K5 $32.19	3769K5 $35.34	1648K82 $47.00
ADA Door Hardware (Includes 1 Latch, 2 Hinges, 1 Coat Hook, and 1 Door Pull Handle)	3621K78 39.61	3769K78 42.70	1648K81 52.34
Door Pull Handle	3621K85 3.70	3621K79★ 6.63	3621K79★ 6.63
Brackets to Attach Headrail to Wall (Includes Headrail End Cap)	3621K74 14.41	3769K64 13.35	1648K74★ 12.82

★ Made of aluminum.

Replacement Type 304 Stainless Steel Trim Shoes

To Order: For steel and stainless steel columns, ask for 3621K82; for plastic-laminate columns, ask for 3769K85; for solid-plastic columns, ask for 1648K86 and please specify column width (see above) in inches.

Privacy Partition Hardware

For toilet partition hinges, see page 2988.

Panel Hanging Brackets

1

2

All of these brackets come furnished with mounting screws as well as one-way tamper-resistant screws.

	Max. Panel Thick. ♦	Overall Bracket Size (A)	(B)	(C)	Chrome-Plated Die Cast Zinc	Each	Dull-Finish Type 304 Stainless Steel	Each

Door Latches

5

6

7

Designed to fit 1″ thick partition doors, these concealed latches require no mounting hardware. To install, simply snap them together through a 1 1/4″ dia. hole in your door. All are made of chrome-plated die cast zinc and are for right- and left-hand mounting. ***ADA latches***, when properly installed, help you comply with the Americans with Disabilities Act (ADA) and meet ANSI A117.1. *Paddle style latch* is 3 11/16″ long.

	Latch Style	For Steel and Stainless Steel Doors	Each	For Plastic Laminate and Solid Plastic Doors	Each
5	Standard Round	3478A11	$7.02	3478A12	$7.02
6	ADA Round	3478A13	9.42	3478A14	7.40
7	ADA Paddle	3478A15	18.27	3478A16	13.15

Toilet Mounting Flanges

Steel

PVC White Plastic

Securely mount your toilet to the floor.

Steel Flange Ring— Use this ring if you have a damaged or corroded flange. It's 1/8″ thick with six screw-hole tabs that accept 5/16″ dia. screws (not included) for securing ring to wood or concrete subfloors. It also has slots for 1/4″ or 5/16″ toilet bolts (sold separately on this page).

Plastic Flanges with Extension— Need to replace your entire flange? These flanges fit inside 4″ cast iron pipe and Schedule 40 plastic pipe. Install with 3″ stainless steel bolts (included) and tighten from the finished floor. Tightening the bolts expands the compression joint, which allows up to 3″ of adjustment to the riser for a secure fit.

		Each
Steel Flange Ring	29045K59	$6.43
PVC White Plastic Flange with Extension	29045K62	24.20
ABS Black Plastic Flange with Extension	29045K64	34.87

Toilet Mounting Bolts

Connect your toilet bowl to the floor or to the tank. Bolts, washers (unless noted), and hex nuts are brass.

Bowl-to-floor bolts come furnished with a washer and a hex nut.

Bowl-to-tank bolt comes furnished with four washers (two of which are rubber) and two hex nuts.

Connection	Size		Each 1-9	10-Up
Bowl to Floor	1/4″-20 × 2 1/4″	2765K1	$1.32	$1.12
Bowl to Floor	5/16″-18 × 2 1/4″	2765K2	1.60	1.36
Bowl to Tank	5/16″-18 × 3″	2765K5	2.31	1.96

Wall-Mount Urinals

With Bottom Drain

With Back Drain

Consuming just 1 gallon of water per flush, these low-flow urinals conserve water. All are made of white porcelain and, when properly installed, help you comply with the Americans with Disabilities Act (ADA). They have a 3/4″ top inlet connection and 2″ NPT female outlet connection with integral trap (except for model with bottom drain, which requires a 1 1/2″ P-trap that's not included).

Urinals include a wall hanger and have two 5/16″ dia. holes for wall mounting (mounting hardware not included). For model with ***siphon-wash flushing***, water comes from the rim; for ***siphon-jet flushing***, water comes from the rim and a jet at the bottom of the urinal.

Overall Size, Ht. × Wd. × Dp.	Drain Location	Flushing/ Cleaning Method		Each
18 1/2″ × 13 1/2″ × 13 1/4″	Bottom	Siphon Wash	2642K95	$165.45
21 3/4″ × 14″ × 14 3/8″	Back	Siphon Jet	2642K93	222.73
26″ × 18″ × 14 1/4″	Back	Siphon Jet	2642K94	313.18

Toilets

Tankless Wall Mount

Tankless Floor Mount

Gravity Tank Floor Mount

Pressurized Tank Floor Mount

Conserve water with these high quality toilets that only consume 1.6 gallons of water per flush. All are made of white porcelain with elongated bowls and use siphon-jet flushing to clean. With siphon-jet flushing, water comes from the rim and a jet at the bottom of the bowl.

Wall-mount toilet has four 1″ dia. mounting holes, while the *floor-mount toilets* have two 1/2″ × 1″ mounting slots. Bolts not included. *ADA toilets* help you comply with the Americans with Disabilities Act when properly installed.

Tankless Toilets— Have a 1 1/2″ top inlet connection (connector included). Valves are sold separately on page 2000.

Gravity-Tank Floor-Mount Toilets— Have a fill valve, float, and flapper.

Pressurized-Tank Floor-Mount Toilets— Have a pressure tank within the toilet tank that increases the water pressure for a more powerful flush.

■ Also known as rough-in. ● Measured from floor to center line of waste pipe in the wall. ★ Measured from center line of waste pipe in the floor to the wall.

Toilet Seats

All seats are made of polypropylene. Mounting hardware is included.

Elongated and Round Seats—These seats have Type 430 stainless steel hinges that hold seats at any angle for easy cleaning (unless noted). They also have bumpers underneath to protect your toilet bowl. Seats mount on 5½″ centers. **To Order:** Please specify color: black or white.

Antimicrobial models are treated with an additive that prevents bacteria growth. *White antimicrobial models* also meet UL 94V0 for flame retardancy.

ADA Compliant Seat—Turn a standard-height elongated toilet seat (14″ to 16″ high) into one that's ADA compliant (17″ to 19″ high). Simply install this seat under your new or existing elongated toilet seat. Seat can be used with any elongated toilet seat that has removable bolts, including 2733K5 and 3033K4 (sold separately below). Color is white.

Elongated Seat with Open Front

Round Seat with Closed Front and Cover

▲ Hinges do not hold seat at any angle.

Toilet Tank Repair Parts

The parts you need to keep your toilet operating at its best.

Flappers

All flappers stop costly leaks.

A Rubber Flapper—Fits in most conventional flush valves.

2360K11 ..... **Each** $3.85

B PVC Flapper with Frame—Fits most plastic flush valves. The rigid plastic frame ensures perfect alignment with every flush.

2769K14 ..... **Each** $3.92

C PVC Flapper with Frame and Drain Seat—Fits most brass and plastic flush valves. You'll get a PVC flapper, rigid polyester frame and drain seat, chain, and sealing ring. Simply mount frame on top of your old flush valve with the included sealing ring.

2795K51 ..... **Each** $7.10

Float-Style Antisiphon Fill Valves

Also known as ball cocks, these fill valves install easily in most gravity tanks and are designed to prevent water backflow. Made of plastic, both valves include a refill tube and locknut.

D Economy—Valve is 10″ high. Includes a brass float rod.

2740K5 ..... **Each** $8.07

E Adjustable—This valve adjusts from 9″ to 14″ high. Furnished with a built-in float assembly.

2740K13 ..... **Each** $10.47

Lever Arm

This single-action lever has a chrome-plated zinc handle. Fits most toilet tanks with a front-mounted handle.

2752K1 ..... **Each** $4.37

Flush-Valve Assembly

Flush valve is plastic and includes a PVC flapper, kink-resistant lift chain, and a locknut.

2739K18 ..... **Each** $5.37

Floats

Plastic Float

Plastic Float—Has a self-tapping connection. Size is 4″ Dia. × 5½″ Lg. Color is black.

2753K4 ..... **Each** $0.90

Copper Float—Has ¼″-20 threads. Size is 4″ Dia. × 5″ Lg.

2753K2 ..... **Each** $7.38

Brass Float Rods

All rods have ¼″-20 threads on each end to connect a float and a float-style fill valve (ball cock).

Length		Each
8″	2754K1	$1.84
10″	2754K3	2.36
12″	2754K4	2.83

Pressurized-Tank Repair Parts

Keep a pressurized toilet running efficiently with these repair parts. *Note:* ***G-J*** fit most pressurized tanks.

F Complete Tank Kit—You'll get everything you need to replace a pressurized tank. **To Order:** Please specify toilet manufacturer and tank series.

2621K21 ..... **Each** $118.25

G Flush Valve Cartridge—Activates flushing mechanism.

2621K81 ..... **Each** $27.71

H Upper Supply Kit—Connects the main line to the lower supply kit. Furnished with air inducer, vacuum breaker, and clamp.

2621K82 ..... **Each** $8.02

J Lower Supply Kit—Feeds water into the tank. Furnished with hose supply shank, pressure regulator, and relief valve.

2621K83 ..... **Each** $35.10

Toilet Bowl-to-Outlet Sealing Rings

Wax

Wax with Flange

PVC

These rings provide a water- and gas-tight seal.

Wax rings are for floor-mount toilets. They're available with and without a PVC flange, which prevents the wax ring from moving.

Sponge rubber rings are for floor- and wall-mount toilets.

PVC rings are for floor- and wall-mount toilets and are reusable.

	For Outlet Pipe Size	Thick.		Each
Wax	3″ and 4″	3/4″	2793K31	$2.67
Wax with Flange	3″ and 4″	3/4″	2793K51	3.51
Wax with Flange	3″ and 4″	1″	2793K63	4.17
Sponge Rubber	3″ and 4″	3/4″	2793K81	5.92
PVC	3″	1″	2793K11	5.85
PVC	4″	1″	2793K12	6.43

Urinal-to-Wall Sealing Ring

This wax ring provides a water- and gas-tight seal for wall-mount urinals. It's for use on 2″ outlet pipe sizes and measures 15/16″ thick.

2793K75 ..... Each $1.91

Toilet Tank-to-Bowl Gaskets

Use these sponge-rubber gaskets as a seal between your toilet tank and toilet bowl.

1 1/2″	1 1/2″	2787K11	5.78

Stainless Steel Grab Bars

Provide safety and added support for all users, especially those with limited mobility. When properly installed, these bars help you comply with the Americans with Disabilities Act (ADA) and meet ANSI A117.1. All bars are 18-ga. Type 304 stainless steel, while textured-finish bars provide an improved grip. Mounting flanges are 3″ in dia. and wall clearance is 1 1/2″. Mounting hardware is included.

Toilet partition grab bars mount to the toilet partition and back wall. The flanges and mounting holes are exposed. Bars are reversible for right- and left-side mounting.

Straight grab bars can be mounted horizontally and vertically. The flanges and mounting holes are exposed. Bars are reversible for right- and left-side mounting.

Floor-to-wall grab bars have a stabilizer bar that mounts to the floor for extra stability. Furnished with trim plates that conceal the flanges and mounting hardware.

Sloan Toilet and Urinal Flush Valves

Manual Top Connection

Manual Back Connection

Automatic Top Connection

An integral vacuum breaker stops water from backing up into the main line (back siphoning), while a control stop allows complete shut-off during repairs without turning off the water supply. Installation hardware is included. Valves meet MIL V-29193, ANSI/ASME 112.19.6, and American Society of Sanitary Engineers (ASSE) 1037. They also help you comply with the Americans with Disabilities Act (ADA) and ANSI 117.1 when properly installed. CSA certified.

Automatic valves are activated by an infrared sensor for hands-free operation. They also have a manual override button. Valves are powered by four AA batteries (included) and have a low battery LED indicator. After 24 hours of non-use, they flush automatically to keep toilets fresh. UL listed.

Top Connection—Valve pipe and flange connect to the top of the toilet of urinal.
Back Connection—Valve pipe and flange connect behind the toilet.
Note: Select a valve with the same consumption rate or gpf (gallons per flush) as your toilet or urinal.

Sloan Manual-to-Automatic Flush-Valve Converters

Turn your existing hand-operated Sloan Royal or Regal flush valve into one that's hands-free. You'll get an electronic control module with infrared sensor and manual override button, diaphragm assembly, handle cap, gasket, installation strap wrench, screwdriver, and four AA batteries. These valves, when properly installed, help you comply with the Americans with Disabilities Act (ADA) and ANSI 117.1. UL listed and CSA certified.

Note: Select a valve with the same consumption rate or gpf (gallons per flush) as your toilet or urinal.

gpf	Sloan No.		Each
For Toilet Flush Valves			
1.6, 3.5, 4.5	RESS-C	**2834K51**	$325.41
For Urinal Flush Valves			
1.0, 1.5	RESS-U	**2834K52**	325.41
3.5	RESS-C	**2834K51**	325.41

Quick-Change Manual-to-Automatic Flush-Valve Converters

Quickly go from manual to hands-free flushing. When properly installed, they help you comply with the Americans with Disabilities Act (ADA).

Tankless Toilet and Urinal Converters

Convert your Sloan and Zurn flush valves to automatic operation. Both styles include a sensor, push-button for manual operation, and four C batteries.

Style A—Replace your existing flush-valve handle with this converter. Furnished with a wrench and Allen key. The ***mounting adapter kit*** lets you position your sensor to detect users in a seated position to prevent unintended flushes. Includes a gasket washer, chrome adapter, plastic push rod, and two sleeves.

Style B—Simply slip this converter over your existing flush-valve handle. Sensor is adjustable. Includes Allen key and wrench.

	Size, Wd. × Ht. × Dp.		Each
A .... Replaces Flush Valve	4¾″ × 2 13/16″ × 3 5/16″	**3747K21**	$226.81
B .... Fits Over Flush Valve	5 5/16″ × 3⅝″ × 3 9/16″	**3747K31**	198.06
Mounting Adapter Kit for Converter 3747K21		**3747K23**	20.68

Toilet Tank Converter

To install, slide the converter onto the overflow pipe inside your toilet tank and attach the chain to the flapper. Then, install the wireless remote sensor and remote flapper lifter to the wall behind your toilet (mounting hardware included). For manual flushing, use your existing flush handle. Includes four AA batteries for the remote sensor and four D batteries for the flapper lifter.

Remote Flapper Lifter Size, Wd. × Ht. × Dp.	Remote Sensor Size, Wd. × Ht. × Dp.		Each
3¼″ × 6¼″ × 1½″	3⅜″ × 4½″ × ¾″	**8306A41**	$168.55

Cartridge-Operated Urinal Flush Valves

With a metering cartridge to control water flow, remove the valve cap and adjust cartridge flow nut to set amount of water you want to use up to 3.5 gpf. When properly installed, valves help you comply with the Americans with Disabilities Act (ADA). Furnished with flange, washer, and nut. All parts are chrome-plated brass. Inlet size is ½″ NPT female.

Urinal Connection	Installation Distance■ (A)		Each
¾″ Side	8½″	**3016K14**	$153.27
¾″ Top	10¼″	**3016K12**	146.83

■ Also known as rough-in. Measured from center of water inlet to the top of urinal.

Sloan Water-Saving Flush Handle

Lift handle up for liquid waste and paper; push handle down for solid waste and paper.

Dual flushing power makes it easy to conserve water. Lift the handle up to eliminate liquid waste and paper with 1.1 gallons of water per flush; push the handle down to eliminate solid waste and paper with 1.6 gallons of water per flush. Handle is brass with a green antimicrobial coating to guard against germs. Use it to modify most existing flush valves. When properly installed, it helps you comply with the Americans with Disabilities Act (ADA). Includes two instructional, adhesive-backed metal plates for attaching to your wall.

9736T1 ..... **Each** $46.50

Lavatory Fixtures

Put these fixtures in your lavatory for function and convenience. All are corrosion resistant and mount to the wall with #10 screws. Mounting hardware not included, unless noted.

Toilet Partition Folding Storage Shelf

Simply pull down this shelf whenever it's needed—it will automatically fold up when it's not in use. Shelf is made of chrome-plated zinc alloy with a satin finish. Shelf size is 14⅞″ Lg. × 5½″ Wd. Overall height is 17½″. Mounting hardware is included.

2770K12 ..... **Each** $54.50

Toilet Paper Dispensers

A Standard Dispensers—These single-roll dispensers have plastic spindles and mount with #10 screws (not included).

Chrome-plated zinc dispenser holds rolls up to 5″ in diameter and requires two mounting screws.

Stainless steel dispenser is made of Type 304 stainless steel and holds rolls up to 5½″ in diameter. Requires four mounting screws.

	Ht. × Wd. × Dp.		Each
Chrome-Plated Zinc	7/16″ × 7 15/16″ × 3⅛″	2863K12	$9.41
Stainless Steel	2″ × 7¾″ × 3⅞″	2863K41	18.88
Replacement Spindle		2863K42	2.47

B Theft-Resistant Dispensers—To stop people from stealing your rolls, these dispensers have a plastic spindle that can only be removed with a key (included). Both dispensers are made of heavy duty aluminum and hold rolls up to 6″ in diameter. They have ¾″ Lg. × ⅛″ Wd. mounting slots (mounting hardware not included).

	Ht. × Wd. × Dp.	Mounting Slots		Each
Single Roll	1½″ × 6½″ × 4⅞″	2	2880K52	$21.98
Double Roll	1½″ × 12½″ × 4⅞″	4	2880K51	31.49
Replacement Spindle			2880K57	7.34

C Flow-Control Dispenser—The spindle has a tamper-resistant spring lock and rocking action that limits how much toilet paper is dispensed to prevent waste. Dispenser is aluminum, while the spindle is ABS thermoplastic. Dispenser holds rolls up to 6″ in diameter. It has two ¾″ Lg. × ¼″ Wd. mounting slots (mounting hardware not included).

	Ht. × Wd. × Dp.		Each
Dispenser	1¾″ × 6 9/16″ × 4¾″	2761K84	$15.79
Replacement Spindle		2761K88	6.40

D Easy-to-View Theft-Resistant Dispenser—The transparent housing makes it easy to see when rolls need replacing, while the key-lock cover prevents unwanted entry (key included). Dispenser is made of polycarbonate and holds three rolls up to 4½″ in diameter. Mounting hardware is included. *Note:* Does not use a spindle.

	Ht. × Wd. × Dp.		Each
Dispenser	16 13/16″ × 5⅛″ × 5 9/16″	30825K33	$66.29

E Heavy Duty Theft-Resistant Stainless Steel Dispensers—With Type 304 stainless steel construction for superior corrosion resistance and a key-lock cover to prevent unwanted entry (key included), these dispensers stand up to tough environments. Both hold rolls up to 4½″ in diameter and have four 3/16″ dia. mounting holes (mounting hardware not included).

	Ht. × Wd. × Dp.		Each
Double-Roll Satin Finish	10⅜″ × 5⅝″ × 5¼″	2826K52	$84.92
Triple-Roll Satin Finish	16⅛″ × 5⅝″ × 5¼″	2862K22	139.40
Replacement Spindle		2826K2	6.13

Fold-Up Baby Changing Stations

Changing baby away from home can be a nightmare—that's why we offer these convenient changing stations. They easily open with one hand and have a 35″ long, concave changing surface with safety strap. Both are cream-colored plastic and have a built-in liner dispenser (liners sold below). When properly installed, stations help you comply with the Americans with Disabilities Act. They also meet ASTM standards for antifungal protection. Mounting hardware included.

Vertical-mount station opens out 35″ from the wall and holds up to 100 lbs. ***Horizontal-mount station*** opens out 22″ from the wall and holds up to 200 lbs. ***Disposable liners*** are made of 3-ply white paper and guard against germs.

Vertical Mount

Mount	Ht. × Wd. × Dp.			Each
Vertical	35½″ × 22″ × 5½″	2756K21		$278.35
Horizontal	22″ × 35″ × 4″	2756K31		278.35
Disposable Liners—*500/Pkg.*		2756K22	Per Pkg.	$41.86

Toilet Paper Rolls

12″ × 3 9/16″	4,000 ft.	1	3¼″	6	2809K25	78.00

Theft-Resistant Toilet Paper Spindle

Keep toilet paper rolls from "walking away" by replacing your old spindle with this theft-resistant model. It's made of plastic and can only be removed with a key (included). Fits standard toilet tissue dispensers.

Overall Length		Each 1-9	10-Up
6″	3095K11	$7.87	$6.64

Large-Capacity Theft-Resistant Toilet Paper Dispensers

Multiroll Dispenser

Jumbo Single-Roll Dispenser

Save valuable time by replacing your rolls less often. Both dispensers have a transparent housing that allows you to quickly and easily see when it's time to replace the roll(s).

Dispensers are made of durable plastic and have a key-lock cover to limit entry (key included). Mounting hardware is included.

Multiroll Dispenser

Capable of holding two 1,000-ft. rolls, this dispenser has a transparent blue housing.

Toilet Paper Roll—This 2-ply roll lasts as long as five standard rolls. It has a 9″ diameter, a 3¼″ dia. core, and is 3 9/16″ Wd. × 1,000 ft. Lg.

	Ht. × Wd. × Dp.			Each
Dispenser	11¾″ × 20½″ × 5⅜″	29035K71		$32.58
Toilet Paper Roll—*4-Roll Case*		29035K69	Per Case	$33.28

Jumbo Single-Roll Dispenser

Designed to hold one 4,000-ft. jumbo roll, this dispenser has a transparent gray housing.

Jumbo Toilet Paper Roll—This 1-ply roll lasts as long as 10 standard rolls. It measures 12″ in diameter, has a 3¼″ core, and is 3 9/16″ Wd. × 4,000 ft. Lg.

	Ht. × Wd. × Dp.			Each
Dispenser	14 5/16″ × 16½″ × 4⅞″	2809K21		$31.73
Jumbo Toilet Paper Roll—*6-Roll Case*		2809K25	Per Case	$78.00

Toilet Seat Covers and Dispensers

Easy-Pull Dispenser

Made of Type 304 stainless steel with a satin finish, this dispenser holds 250 single-fold covers. It's 11″ Ht. × 15¾″ Wd. × 2″ Dp. and has two 3/16″ dia. mounting holes. Mounting fasteners not included.

		Each
Dispenser	2825K51	$42.88

Seat covers for Easy-Pull Dispenser only. Packed 1,000 per carton (four inner packages of 250 covers).

		Per Carton 1-4	5-Up
Seat Covers	2825K71	$16.63	$14.42

Push-Tab Dispensers

These dispensers hold 250 unfolded covers. They're 12¼″ Ht. × 16⅝″ Wd. × 1¾″ Dp. and come furnished with mounting fasteners.

		Each
Steel with White Finish	2736K14	$40.00
Type 304 Stainless Steel	2736K18	57.78

Seat covers for Push-Tab Dispensers only. Packed 1,000 per carton (eight inner packages of 125 covers).

		Per Carton 1-4	5-Up
Seat Covers	2736K11	$16.25	$13.00

Sanitary Napkin and Tampon Dispensers

Steel

Stainless Steel

Dispensers

Add these dispensers to your facility for the convenience of your female employees and customers. Both dispensers have separate keys for the cabinet and coin compartments. Coin release amount is one quarter. Coins are rejected when dispensers are empty.

Steel Dispenser— When properly installed, this dispenser helps you comply with the Americans with Disabilities Act. It's made of steel with a white finish and has four 1/4″ dia. slotted mounting holes (fasteners not included).

Stainless Steel Dispenser— Made of Type 304 stainless steel with a satin finish, this dispenser offers excellent corrosion resistance. Furnished with four 1/4″ dia. (two of which are slotted) mounting holes (fasteners not included).

Sanitary Napkin Receptacles and Bag Dispensers

A

B

C

D

E

A Steel Wall-Mount Napkin Receptacle— Container has a hinged top and bottom; contents are emptied through the bottom. Furnished with four 1/8″ dia. slotted mounting holes (fasteners not included). Color is white.

B Polypropylene Wall-Mount Napkin Receptacle— All-plastic construction (including a removable rigid liner) makes this receptacle easy to clean. Wall-mounting fasteners are included. Color is white.

C Stainless Steel Wall-Mount Napkin Receptacle— Offering excellent corrosion resistance, this Type 304 stainless steel receptacle has a hinged top. Furnished with two 1/4″ dia. slotted mounting holes (fasteners not included).

D Freestanding Napkin Receptacles— These convenient receptacles don't require mounting—just place them on the floor wherever they're needed. They have two independently operating, self-closing push doors so you can even place them between two stalls. Furnished with a rigid polyethylene liner for easy cleaning.

Steel receptacle is white. *Stainless steel receptacle* is made of corrosion-resistant, Type 430 stainless steel.

E Wall-Mount Bag Dispensers— These push-loading dispensers release one bag at a time for convenient napkin disposal. They mount on the wall or attach to most sanitary napkin receptacles. Furnished with double-sided adhesive strips for mounting.

Steel dispenser is white. *Stainless steel dispenser* is made of corrosion-resistant, Type 430 stainless steel.

Shower Stalls

Steel Stall

Install these freestanding shower stalls anywhere you have a water connection. All have a 2″ center quick-connect drain with strainer, two-handle (hot/cold) valve, shower arm and head, plastic curtain with hooks, and built-in soap dish, unless noted. Flow rate is 2.5 gpm (@ 40 psi for polypropylene and steel stalls; @ 80 psi for stainless steel stall). Shipped unassembled.

Leak-resistant polypropylene stall has a one-piece wall for maximum leak resistance. It's furnished with an aluminum handrail for support. Color is white.

Heavy duty steel stall has reversible 20-ga. galvanized steel walls with a white finish. The floor is reinforced plastic for durability.

Corrosion-resistant stainless steel stall offers the most corrosion resistance. It's made of Type 304 stainless steel with a polished satin finish. It has 18-ga. walls, a 14-ga. floor, a 2″ NPT slip-nut drain connection, and a single-handle valve.

Stall Material	Floor/Drain Material	Overall Size, Ht. × Wd. × Dp.		Each
Leak-Resistant Polypropylene	Plastic	73″ × 32″ × 32″	2791K51	$405.00
Heavy Duty Steel	Reinforced Plastic	74 1/8″ × 32″ × 32″	2703K4	658.40
Corrosion-Resistant Stainless Steel	Stainless Steel/Brass	78″ × 32″ × 32″	3203K11	2,397.74

Shower Drains

These drains are easy to install and don't require caulking, thanks to a ribbed rubber gasket. Just attach a drain to your shower basin with the included nut. Then, push the drain over your 2″ Schedule 40 PVC or cast iron pipe. The strainer is Type 304 stainless steel.

Material	Dia.	O'all Ht.		Each
PVC	4 1/4″	2″	2160K6	$11.61
Brass	4 1/4″	2″	2160K8	39.38

Shower Curtains and Accessories

Shower Curtains

For durability, these curtains have lock-stitched seams, nickel-plated brass grommets, and a 3-ply thick top hem. All are white (except for the translucent vinyl curtains) and measure 72″ long.

Standard— The *nylon curtains* have weights in the bottom hems for added support.

Heavy Duty— These curtains stand up to heavy use. *Cotton duck* and *polyester-coated cotton curtains* are made of bleached fabric that has been treated to minimize shrinkage. *Polyurethane-coated polyester curtains* have weights in the bottom hems for added support. *Vinyl-laminated fiberglass curtains* are flame resistant.

Shower Heads

All shower heads have a swivel ball joint, which allows flexible movement.

A On/Off Spray— Turn flow on or off with the push of a button.

B&C Adjustable Spray— Quickly change spray from a solid stream to a wide fan spray pattern.

D Concentrated Spray— For maximum impact, these heads produce a focused spray pattern. The *5.0 gpm model* has a higher-than-average flow rate and is used primarily for decontamination.

Shower Head Pipes

All pipes are constructed of chrome-plated brass. Inlet and outlet connections are ½″ NPT male.

Optional trim plate is chrome-plated zinc and measures 2¼″ in diameter.

With Optional Trim Plate

Overall Length		Each
6″	2706K41	$7.06
8″	2706K11	9.48
10″	2706K81	11.06
Optional Trim Plate	2706K91	.85

Utility Shower

Add a water supply, drain, and soap and this shower is ready for use. It includes a 13⁄16″ dia. galvanized steel gooseneck riser, chrome-plated polypropylene shower head with swivel ball joint, cast brass shower valve, and soap dish. Hot and cold-water connections are ½″ NPT female and mount on 3″ centers. Flow rate is 2.6 gpm @ 80 psi.

2696K23 ..... **Each** $57.86

Antiscald Shower Valves

Pressure-Balancing Valves

With Optional Trim Plate

Prevent scalding or cold shock by balancing water pressure from your hot/cold water supply pipes. Valves are made of brass, bronze, and stainless steel with an ABS handle. They measure 5½″ in dia. Inlet connection is ½″ ID unthreaded pipe.

Valve with service stop allows you to repair the valve without shutting off your water supply.

Optional trim plate covers holes in walls from existing three-handle valves. It's made of Type 304 stainless steel and measures 7⅜″ Ht. ×13″ Wd. Mounting fasteners are included.

		Each
Valve without Service Stop	27065K41	$139.69
Valve with Service Stop	27065K42	161.52
Optional Trim Plate	27065K43	32.58

Precision Thermostatic Valve

An advanced thermal regulator maintains precise water temperature by automatically adjusting both temperature and pressure fluctuations. Just set the dial from 90° to 110°F and the temperature will remain constant. If the cold water supply fails, hot water flow automatically shuts off. Valve is brass with a chrome-plated brass handle and trim plate. It has two ½″ NPT female inlets (one on each side), one ½″ NPT female outlet on top, and one ½″ NPT male outlet on the bottom. Includes a 3⅛″ Ht.×6 1/16″ Wd. trim plate (fasteners included). Valve has an integral service stop which allows you to repair the valve without shutting off your water supply. Connection is ½″ NPT female. Valve helps you comply with the Americans with Disabilities Act (ADA) when properly installed. It also complies with ASSE 1016 T/P and is CSA certified.

		Each
Valve	4683K61	$457.65

Mirrors

Frameless

Framed

Framed with Shelf

Tapered Tilt Mirror

Adjustable Tilt Mirror

Mirror Holder

All mirrors come furnished with mounting brackets and fasteners for installation in drywall or wood, unless noted.

Damage-Resistant Frameless Plastic Mirrors

You can cut and drill these mirrors without cracking them. All are plastic and weigh half as much as glass. Mounting hardware is not included, see Clear Plastic Mirror Holders at bottom of page.

Acrylic mirrors are economical. ***Polycarbonate mirrors*** are virtually unbreakable—even hitting them with a hammer won't break them.

Adhesive-Backed and Scratch-Resistant Acrylic Mirrors

These mirrors are similar to the acrylic mirrors shown above.

Frameless adhesive-backed mirrors have a pressure-sensitive adhesive backing—just peel off the backing and stick them in place.

Framed scratch-resistant mirrors have a polished, ¼″ thick zinc-plated steel frame and scratch-resistant coating. The coating prolongs mirror life and allows you to use glass cleaners. Mirrors have hooks on the back for wall mounting.

O'all Size, Wd.×Ht.	Thick.	Frameless Adhesive Backed	Each	Framed Scratch Resistant	Each

Nonrefrigerated Drinking Fountains

No need for electrical connections, these fountains only require a water source to satisfy your thirst. All provide nonrefrigerated water, but can be connected to a remote water chiller if cool water is desired. These products are NSF 61 certified for use with drinking (potable) water in all states as of January 1, 2010.

1&2 Made of 18 ga. Type 300 stainless steel with a chrome-plated brass drinking nozzle; automatic flow-regulator valve; and 3″ Ht.×10″ Wd.×6″ Dp. basin with smooth, rolled edges. At the base of the basin, there's a mounting bracket for attaching fountains to your drain. For indoor and outdoor use.

Style 1 includes a 1¼″ Dia.×4″ Lg. tailpiece.

3 This wall-mount fountain has an 18-8 stainless steel basin with flexible polyester drinking nozzle to guard against mouth injuries. It also has a light-gray, vinyl-clad steel cabinet. The front panel can be removed for easy installation. A mounting bracket with five ⅜″ dia. mounting holes is included (mounting fasteners are not included). Overall size is 15″ Ht.×15¾″ Wd.×13″ Dp. For indoor use.

	Water Flow Operation	Connections Inlet	Connections Outlet		
1	Lever Handle	⅜″ NPT Female	1¼″ OD	**2789K74**	$339.34

3	Push Button	⅜″ OD	1¼″ OD	**2789K76**	340.98

Self-Closing Water Supply Valve

To help conserve water, you operate this valve with a pull chain. Pull the chain to start the flow of water. Release the chain and the flow of water automatically shuts off. NSF 61 certified for use with drinking (potable) water in all states as of July 1, 2010.

The valve is chrome-plated brass. Pull chain is 12¼″ long and has a 1⅛″ ID ring. Inlet and outlet connections are ½″ NPT female.

2854K28 ..... $59.88

Paper Cups and Dispensers

Keep cups conveniently located next to your water supply. Dispensers are Type 430 stainless steel with a cutout "window" that allows you to see when refills are needed. Mounting bracket and screws are included.

Nozzles for Water Coolers and Drinking Fountains

These nozzles are also known as bubblers. They are NSF 61 certified for use with drinking (potable) water in all states as of January 1, 2010.

4&5 ***Nozzles with Safety Mouth Guard—*** To prevent mouth injuries, both styles have a beige, flexible polyester guard.

Style 4—Equipped with a push-button valve with flow regulator, this chrome-plated brass nozzle has a 2″ long connection shank. It helps you comply with ADA regulations.

Style 5—Nozzle is chrome-colored plastic. It comes furnished with a ¼″ copper tube for connection to your water supply.

	Size	(A)

Glass Fillers

Easily fill your glass or cup without having to angle it around a drinking nozzle. Only for use with cold water. These products are NSF 61 certified for use with drinking (potable) water in all states as of January 1, 2010.

Lever-Activated Filler— Made of lead-free brass with a chrome finish and a black nylon lever, this filler has a self-closing stop and ⅜″ NPS female inlet connection. It requires two hands to operate (one to hold your glass and one to push the lever).

Push-Activated Filler— Made of nickel-plated brass with a blue polycarbonate push arm, this filler has a flow regulator and provides instant shut-off when the arm is released. It only requires one hand to operate. Inlet connection is ½″ NPT male. Connection shank is 2″ long.

Lever Activated ***Push Activated***

Push	2″	8″	9⁵⁄₁₆″	**2853K4**	145.66

Water Chillers

Turn nonrefrigerated drinking fountains into water coolers by attaching them to these water chillers. You can even attach glass fillers to dispense cool, refreshing water. All chillers are air cooled and provide cool water (factory set at 50° F and adjustable).

Chillers are made of galvanized steel. They have a silent, heavy duty, lifetime-lubricated motor and fan. They also have a thermal overload-protected, permanently lubricated, and hermetically sealed compressor. The 1.5 gph capacity model has stainless steel waterways; all others have copper waterways.

All chillers operate on 115 VAC, 60 Hz and have connections for hardwiring. For proper ventilation, 6″ of clearance is required in the front and 3″ of clearance is required in the back (unless noted). UL listed, CSA certified, and rated in accordance with the ARI (Air Conditioning and Refrigeration Institute). These products are also NSF 61 certified for use with drinking (potable) water in all states as of January 1, 2010.

Uses per Hour	Recommended Cold Water Capacity, gph
Less than 50	2 to 4
50 to 90	5 to 9
90 to 150	10 to 15
120 to 150	16 and Up

Quench your thirst with one of our high-quality water coolers. All have an 18-8 stainless steel basin and a removable front panel that allows easy installation and water temperature adjustments (factory set at 50°F). *Styles A* and *B* also have a back panel with cutouts for the condenser. Water inlet connection is an unthreaded 3/8″ OD copper tube that can be connected to a shut-off valve (not included). Drain outlet connection is 1 1/4″ OD.

Water coolers have a 1/4 hp or smaller compressor; operate on 115 VAC, 60 Hz; and include a 4-ft. power cord with three-prong plug. They're UL listed, C-UL listed (unless noted), CSA certified (unless noted), and rated in accordance with the ARI (Air Conditioning and Refrigeration Institute). These products are also NSF 61 certified for use with drinking (potable) water in all states as of January 1, 2010.

A-E ***Compact and Hands-Free Water Coolers—*** All have a flexible polyester drinking nozzle to guard against mouth injuries, a push-button control to regulate water flow, and a vinyl-clad steel cabinet. They're fan cooled.

(A) Compact Water Coolers— These coolers have a compact footprint that only requires one sq. ft. of space for installation.

(B) Ultra-Pure Compact Water Coolers with Filter— Just like coolers (A) above, but with an internal filter to reduce lead and chlorine as well as unpleasant tastes and odors from your drinking water. The filter removes 98% of all particles 10 microns and larger. Change filter cartridge every 1,500 gallons.

(C) Hands-Free Water Coolers— In addition to the push-button control, these coolers boast a foot pedal that allows hands-free operation.

(D) Hands-Free Water Cooler with Cold-Water Glass Filler— Just like coolers (C) above, with the added benefit of an 8 1/8″ high glass filler.

(E) Hands-Free Water Cooler with Hot-Water Glass Filler— Some like it hot, that's why we offer this water cooler that produces up to 40 six-ounce cups of hot water per hour. Cold water is dispensed through the drinking nozzle, while hot water (factory set at 180°F and adjustable) is dispensed through the 6 1/4″ high glass filler. A foot pedal allows hands-free operation.

F ***Extreme Duty Water Cooler—*** Looking to supply cool water in corrosive and/or higher temperature environments? With its Type 316 stainless steel cabinet and acrylic-coated internal components, this is the cooler to choose. It has a chrome-plated brass drinking nozzle, push-button control to regulate water flow, and is water cooled.

Water Dispensers

Inline Dispenser

Get your fill of cool, refreshing water. Made of polycarbonate with a polypropylene drip tray and a removable polyethylene reservoir, all dispensers have a 1/20 hp compressor; operate on 115 VAC, 60 Hz; and include a 6-ft. power cord with three-prong plug. They do not have a back panel so they require a minimum clearance of 4″ on the sides and rear for ventilation. UL listed, C-UL listed, and NSF certified, unless otherwise noted. Dispensers are also ANSI certified for use with drinking (potable) water in all states as of January 1, 2010.

Room temperature/cold water dispensers have a white spout lever for room-temperature water; blue spout lever for cold water. ***Hot/cold water dispensers*** supply up to 45 six-ounce cups of hot water per hour. Spout lever is red for hot water; blue for cold water.

Bottled-Water Dispensers— Provide fresh water without a plumbing hookup. Cabinet color is off-white.

Empty water bottles (sold separately) are translucent polyethylene. *Water bottle caps* (sold separately) are for use with 3- and 5-gallon water bottles. Made of durable polyethylene, caps snap on to bottle necks with minimal force and have a peel-away tab for easy removal.

F

Uses per Hour	Recommended Cold Water Capacity, gph
Less than 50	2 to 4
50 to 90	5 to 9
90 to 150	10 to 15
120 to 250	16 and up

If floor space is at a premium, choose one of our wall-mount coolers. All have an 18-8 stainless steel basin, a flexible polyester drinking nozzle (unless noted) to guard against mouth injuries, a push-button or bar control to regulate water flow, and a vinyl-clad steel cabinet (unless noted). The front panel is removable for easy installation and water temperature adjustments (factory set at 50° F). Water inlet connection is an unthreaded 3/8″ OD copper tube that can be connected to a shut-off valve (not included). Drain outlet connection is 1 1/4″ OD.

Water coolers are fan cooled; have a 1/4 hp or smaller compressor; operate on 115 VAC, 60 Hz; and include a 1 1/2-ft. (unless noted) power cord with three-prong plug. All come furnished with mounting brackets (see table for number and size of mounting holes; mounting fasteners not included). UL listed, CSA certified (unless noted) and rated in accordance with the ARI (Air-Conditioning and Refrigeration Institute). These products are also NSF 61 certified for use with drinking (potable) water in all states as of January 1, 2010.

(B) Ultra-Pure Water Coolers with Filter— To reduce lead and chlorine as well as unpleasant tastes and odors from your drinking water, these coolers come furnished with an internal filter. The filter removes 98% of all particles 10 microns and larger. Change filter cartridge every 1,500 gallons.

(C) Low-Profile Water Cooler— Measuring just 9 1/2″ deep, this cooler is perfect for narrow hallways and corridors. It's surface mounted, but appears recessed. It also includes a 16 3/4″ high backsplash. Cabinet and backsplash are 18-8 stainless steel.

(D&E) ADA-Compliant Water Coolers— When properly installed, these coolers will help you comply with the Americans with Disabilities Act (ADA). Choose from models with a vinyl-clad steel cabinet and a corrosion-resistant 18-8 stainless steel cabinet.

Style D have a 3′2″ power cord. For installation at adult or child height.

Style E have a 16 3/4″ high, 18-8 stainless steel backsplash. For installation at adult height.

(F) Heavy Duty ADA-Compliant Water Cooler— Similar to the Style D stainless steel model above, except this cooler boasts a vandal-resistant construction and can be used outdoors. The drinking nozzle is chrome-plated steel.

■ Includes an adapter for ¼″ NPT male connection.

Hands-Free Lavatory Faucets

J

K

L

No handles to turn or push—an adjustable sensor starts water flow when it detects hands (2″ to 7″ away for battery-operated faucets; 1″ to 8″ away for electronic faucet) and then shuts off when hands are removed. All have aerators and a nonswivel spout. When properly installed, they help you comply with the Americans with Disabilities Act (ADA). UL listed. These products are ANSI certified for use with drinking (potable) water in all states as of October 1, 2010.

Battery-Operated Faucets— These faucets are powered by four AA batteries (included) that last two years based on 8,000 uses per month. *Standard-base model (J)* requires three holes to mount. *Narrow-base model (K)* requires one hole to mount, but can be mounted on a sink with three holes (a 6 3/16″ oval trim plate to cover holes is included). *Replacement control modules* extend the life of your faucet.

Electronic Faucet— This faucet includes and requires you to use the 120 VAC/24 VAC, 50/60 Hz transformer with 10-ft. long cord and two-prong plug. Installation hardware is included. Faucet requires one hole to mount. *Replacement solenoid valve assembly* extends the life of your faucet.

E 2961K32

F 2346K28

G

B

D

H With Optional Faucet Block

Tough service-sink applications are not a problem for these faucets. All are chrome-plated brass with a polished finish (unless noted). They require two holes to mount. ***Styles A, C, F,*** and ***G*** faucets and ***Styles C*** and ***E-G*** replacement cartridges are NSF 61 certified for use with drinking (potable) water in all states as of January 1, 2010.

ADA faucets (A, B, D, F, G, and ***H)*** help you comply with the Americans with Disabilities Act (ADA) when properly installed.

Vacuum breakers prevent water from backing into your water supply.

Style A— Furnished with an integral soap dish.

Style B— These jointed faucets make it possible to reach across double- and triple-compartment sinks. Furnished with aerators.

Style C— Quickly fill a bucket or the sink with these high-volume faucets.

Style D— Have an integral pail hook. They also have a rough finish.

Style E— Excellent for use with a mop sink, these faucets have an integral pail hook. *Model* 2961K32 extends 8⅞″ from the wall and includes a wall bracket that provides added support to the spout. *Model* 2961K21 extends only 4 5/16″ from the wall, making it perfect for applications with space constraints. It also has a rough finish.

Style F— With their gooseneck spout, you'll get extra clearance with these faucets. Distance from the base of the faucet to the top of the spout is 11″ high, making it easy to fill a bucket inside your sink.

Model 2346K29 comes furnished with a water supply valve that lets you shut off your water supply at the faucet. Handles are on the side.

Style H— Perfect for laundry sinks, the connections are at the top of this faucet. The faucet has a rough finish. Faucet and replacement cartridges are ANSI certified for use with drinking (potable) water as of January 1, 2010.

The ***optional faucet block*** is made of polypropylene and is designed to support an overhead water supply.

Single-Hole Service-Sink Faucets

Faucets made of chrome-plated brass and all replacement cartridges are NSF 61 certified for use with drinking (potable) water in all states as of July 1, 2010.

Manual-close faucets stay on until you shut them off. They are not marked for hot or cold water. ***Self-close faucets*** conserve water by shutting off when handle is released. Faucets are marked for hot or cold water.

Gooseneck Faucets with Oversized Handles

Oversized lever handles allow you to use your wrists or forearms to turn these faucets on and off. All faucets come furnished with aerators. During installation, you get to decide if you want a swivel or nonswivel spout. When properly installed, these faucets help you comply with the American with Disabilities Act (ADA). These products are also ANSI certified for use with drinking (potable) water in all states as of January 1, 2010.

Deck-mount faucet requires two holes for mounting.

Concealed-mount faucet requires three holes for mounting.

F With Barbed Nozzle

G With Barbed Nozzle and Vacuum Breaker

H With Aerator

J

K Without Vacuum Breaker

L

With their gooseneck spout, you'll get extra clearance with these faucets. All are manual close, for deck mounting, and are chrome-plated brass with a polished finish (unless noted).

Vacuum breakers prevent water from backing into your water supply.

Barbed nozzles (where applicable) accept hose and are removable.

Style E are for cold-water dispensing only. ***Style G*** mount on 7 3/4″ to 8 1/4″ centers. ***Style H*** have a hot water supply on top. They are for wall mounting on 2 3/4″ to 3 1/4″ centers. These faucets are NSF 61 certified for use with drinking (potable) water in all states as of January 1, 2010. ***Style J*** have tin-lined internals. *Model* 2842K61 is self closing (water shuts off when handle is released). ***Style K*** are made entirely of Type 316 stainless steel with a satin finish and offer the most corrosion resistance. ***Style L*** are made of PVC. Color is gray. *Model* 2859K13 has a lever handle and allows you to choose manual or self close.

Washdown Sprayers

Clean everything from plates to parts with these chrome-plated sprayers that provide a concentrated spray. ***Washdown sprayers, add-on faucets, replacement spray head/hose,*** and ***replacement spray head*** are NSF 61 certified for use with drinking (potable) water in all states as of January 1, 2010.

(A-C) Washdown Sprayers— All include a brass mixing faucet with riser; a flexible, spring-action, rubber hose with reinforced polyurethane liner and Type 302 stainless steel cover; and a 1.42 gpm @ 60 psi brass spray head. Sprayers overhang 15″ from the center of the faucet.

Style A requires a single hole to mount. It allows hot and cold water connections. *Styles B* and *C* require two holes to mount.

Add-On Faucets— Made of chrome-plated brass with 3/8″ NPT female connections on top and 3/8″ NPT male connections on the bottom.

Wall Bracket— Secures the riser to your wall to stabilize the sprayers. Made of chrome-plated brass, it extends 6″ from the wall. Mounting fasteners are included.

Replacement Spray Head/Hose— Has a 1.42 gpm brass spray head and 44″ stainless steel hose. Inlet connection is 1/2″ NPT male. Overall length is 48″.

Spray Head Maintenance Kit— Includes everything you need to repair the 1.42 gpm spray head.

Hot Water Dispensers

Get steaming-hot tap water instantly and be able to serve up to 60 to 100 (see below) cups of hot water an hour. Dispensers have a chrome-finish plastic spout and a 300-series stainless steel tank. The spout mounts on your sink and stays cool to the touch, while the tank mounts below the sink. Heating element is thermostatically controlled. Inlet water tube is 1/4″ copper tube. A thermal fuse prevents tank damage if it becomes dry. UL listed. These products are also ANSI certified for use with drinking (potable) water in all states as of January 1, 2010.

60 8-oz. Cups per Hour— Comes set at 190° F, but can be adjusted down to 140° F. Requires one 1 1/4″-1 3/8″ hole to mount and includes a 37 1/2″ power cord with three-prong plug.

100 8-oz. Cups per Hour— Comes set at 200° F, but can be adjusted down to 160° F. Requires one 1 1/4″ hole to mount and includes a 32 1/2″ power cord with three-prong plug.

ADA	Chrome-Plated Metal	2910K5 25.44

♦ Faucet handles are not labeled.

Faucet Handle Puller

Puller removes all lever and cross handles, as well as most canopy handles. Made of steel.

2818K31 ..... Each $10.17

Faucet Sprayer

Pull sprayer down for a shower of water; push up for a stream of water. Sprayer is made of plastic and swivels 360°. It has a 55/64"-27 female connection with an adapter for a 15/16"-27 male connection. Flow rate is 2.2 gpm @ 60 psi. This product is NSF 61 certified for use with drinking (potable) water in all states as of January 1, 2010.

2755K11 ..... Each $6.37

Faucet Aerators

All are chrome-plated brass with a polished finish. These products are NSF 61 certified for use with drinking (potable) water in all states as of September 1, 2011.

	Connection		Each
2.2 gpm @ 60 psi Flow Rate

■ Has three different size rubber sleeves that expand to fit faucet.

Faucet-Mount Water Filter

Just unscrew your existing aerator and replace it with this water filter. It filters down to .5 microns to remove rust, sediment, chlorine, and other suspended particles that can give your water unpleasant tastes and odors. These products are NSF 61 certified for use with drinking (potable) water in all states as of January 1, 2010.

Filter cartridge (included) lasts approximately two months or for 200 gallons of water. Filter has 55/64"-27 female threads and includes two adapters (one with 13/16"-27 male threads; the other with 15/16"-27 male threads) and two washers. *Note:* Filtered operation not recommended for hot water.

Water Filter	2518K12	Each	$25.60
Replacement Filter Cartridge	2518K21	Each	$15.54

Quick and Easy Faucet Controls

Simply push the rod to turn water on; release the rod and the water automatically shuts off. Designed to fit most North American faucets, both controls have a Type 302 stainless steel rod with a polished finish. Just thread them on to your existing faucet. When properly installed, controls help you comply with the Americans with Disabilities Act (ADA). These products are also ANSI certified for use with drinking (potable) water in all states as of January 1, 2010.

Rod Length	For Faucet Style	Each
3"	Standard	2252K2 $31.63
5"	Tall/Gooseneck	2252K3 33.16

Faucet Spouts

Deck Mount Wall Mount

Made of chrome-plated brass with a polished finish, these spouts are perfect for use with the Hands-Free Flow Control Foot Valves shown on this page. They require one hole to mount.

Deck-mount spout has an aerator. Spout is 5¼″ long and is adjustable for both swivel and nonswivel operation. This product is ANSI certified for use with drinking (potable) water in all states as of January 1, 2010.

Wall-mount spout is 5 11/16″ long and swivels. This product is NSF 61 certified for use with drinking (potable) water in all states as of January 1, 2010.

	gpm @ 60 psi	Connection	Height		Each
Deck Mount	2.2	½″ NPT Male	10¾″	3046K26	$75.24
Wall Mount	10.7	⅜″ NPT Female	9 1/16″	3046K37	63.21

Hands-Free Flow Control Foot Valves

Single Pedal Wall Mount

Double Pedal Floor Mount

Just press down with your foot to start water flow and lift up to stop, leaving your hands free for other work. All valves are chrome-plated brass with polished finish. Distance from floor or wall to center of inlet is 1″. Mounting hardware is included. When properly installed, valves will help you comply with the Americans with Disabilities Act (ADA). These products are NSF 61 certified for use with drinking (potable) water in all states as of January 1, 2010.

Single-pedal valves control either hot or cold water. Connections are ½″ NPT female. ***Double-pedal valves*** have closely set hot and cold pedals to operate separately or together to mix hot and cold water. Connections are ½″ NPT female on 2 7/16″ centers. ***Repair kit*** includes all parts needed to rebuild valves including valve stems, springs, washers, and packing stems.

	Pedal Length	Single Pedal	Each	Double Pedal	Each
Floor Mount	3¼″	2683K3	$125.30	2683K1	$186.43
Wall Mount	11⅛″	2685K1	179.16	2685K3	248.06
Repair Kit for All Valves Above				2683K9	15.83
Replacement Cartridge				2683K7	29.13

Four-Way Valve Stem Key

No need for four separate stem keys—this one fits ¼″, 9/32″, 5/16″, and 11/32″ stems. Use it to open and close stopcocks, sillcocks, and valves when the handles have been removed. Key is made of nickel-plated steel.

2661K51 ..... **Each** $7.47

Combination Sink Drain/Toilet Inlet Connector Wrench

Adjustable from 1″ to 4″ in diameter, this unique wrench installs and removes sink strainers, pop-up plugs, overflows, and toilet inlet connectors (spuds). It's made of hardened steel with a black-oxide finish.

2811K14 ..... **Each** $27.92

Sink Drain Wrench

Install and repair various drain fittings including P-traps and sink strainers with this one tool. Made of nickel-plated steel, it works on 6-, 8-, and 12-sided drain nuts. Overall length is 8¾″.

2377K4 ..... **Each** $11.89

Basin Wrenches

Standard

Adjustable

Quickly tighten and loosen faucet shank nuts in tight areas to install and remove faucets, drains, water supply stops, and faucet connectors. Both wrenches have a spring-tension jaw. The tension spring holds the head in any position (both left and right) up to a 90° angle.

Standard wrench is made of cadmium-plated steel.

Adjustable wrench has a telescoping handle and a swivel jaw. It's made of steel with a black-oxide finish on the jaw teeth.

	Nut Capacity	Length		Each
Standard	⅜″ to 1¼″	11″	2813K12	$11.26
Adjustable	⅜″ to 1¼″	9″ to 16″	3064K11	34.73

Extendable Faucet Sprayer

Complete Sprayer

Convenient sprayer gets water right where you need it. These products are ANSI certified for use with drinking (potable) water in all states as of January 1, 2010.

Complete sprayer has a black plastic spray head with chrome-plated nosepiece and 48″ long reinforced, translucent gray vinyl hose. Connection is ⅛″ NPT male and includes a ¼″ NPT female adapter.

Spray head is black plastic with chrome-plated nosepiece.

		Each
Complete Sprayer	2895K12	$12.22
Spray Head	2895K14	10.18

Floor, Wall, and Ceiling Plates

Polypropylene

Steel

Also known as escutcheons, these plates add a finishing touch to the area around protruding pipe.

Polypropylene plates are rust-proof. Twist them open and then fit them around your pipe.

Steel plates have a concealed catch plus a spring to close tightly around your pipe.

Water Overflow Alarm

Sensor

To alert you of a leak or overflow hazard, a loud (103 dB) pulsating alarm sounds when water contacts the two stainless steel probes on this alarm's sensor. The sensor is connected to the alarm by a 5-ft. long flexible lead wire and can be mounted in any location.

Great for monitoring sinks, pipe lines, tubs, and sump pumps, the alarm is 3¼″ Ht.×2¼″ Wd.×¾″ Dp. It's powered by three AAA batteries (sold separately) and includes hook-and-loop tape for mounting to walls.

		Each
Alarm	1377T63	$31.95
AAA Battery (3 required)	65605T71	.79

Water Supply Hose with Fittings

PVC-Reinforced Toilet Tank Hose

Hose is flexible and includes fittings with female connections, unless noted.

Note: Comp. = Compression Fitting.

PVC-reinforced hose has a max. temp. of 140° F. These products are NSF 61 certified for use with drinking (potable) water in all states as of January 1, 2010.

Braided Type 304 stainless steel hose has an inner, nontoxic polymer tube. Max. temp. is 180° F. *Faucet, ice-maker,* and *water heater hose* are NSF 61 certified for use with drinking (potable) water in all states as of March 1, 2010.

Vandal-Resistant Valves with Removable Handle

Also known as water supply stops, these valves make it easy to shut off water to your faucets, toilets, and more. All have a chrome-plated brass body, unless noted.

Standard Valves—*Styles A & B* have a plastic stem and chrome-plated polycarbonate handle, unless noted. *Style C* has a brass stem and chrome-plated polycarbonate handle, unless noted.

¼-Turn Standard Valves— Quickly turn off water with a ¼ turn—great for tight spots. All have a nickel-chrome-plated brass body and stem and a chrome-plated zinc handle.

Vandal-Resistant Valves— To prevent unauthorized use, you can remove the key handle. Valves and handles are sold separately. Valves are brass and key handles are chrome-plated zinc.

■ This product can be used with drinking (potable) water in all states except California, Maryland, and Vermont as of January 1, 2012.

♣ This product is NSF 61 certified for use with drinking (potable) water in all states as of January 1, 2010.

♥ Has a nickel-chrome-plated brass body and stem and a nickel-chrome-plated ABS plastic handle. ♦ Has a chrome-plated zinc handle.

Drop-In Sinks

Type 304 Stainless Steel Single Bowl w/out Faucet Ledge

Type 304 Stainless Steel Single Bowl with Faucet

Type 304 Stainless Steel Double Bowl with Faucet Ledge

High-Impact Fiberglass

Chemical-Resistant Polyethylene

Sinks are seamless with rounded inside corners, which makes cleaning easy as well. Installation hardware is included, unless noted.

Type 304 Stainless Steel Sinks— Made of 18-gauge stainless steel (unless noted), these sinks offer corrosion, acid, and chemical resistance. The exposed surfaces have a satin finish (unless noted), while the undersides are coated to reduce noise and condensation.

ADA-compliant models have the smallest bowl depths and help you comply with the Americans with Disabilities Act when properly installed.

Models with faucet come furnished with a chrome-plated brass faucet with aerator and 1/2″ NPT male connections. Flow rate is 2.2 gpm @ 60 psi. All except model 3080K11 have a 3 9/16″ high (unless noted) swivel faucet with lever handles. Model 3080K11 has a 4 3/4″ high gooseneck faucet with basket strainer and knob handles. This product is also NSF 61 certified for use with drinking (potable) water in all states as of January 1, 2010.

High-Impact Fiberglass Sinks— These one-piece molded sinks are made of high-impact fiberglass for strength and durability. They're 5/32″ thick and have a stain-resistant surface. Color is white.

Model 2716K51 has an ABS drain, a self-draining soap tray, and a ribbed underbody for added strength. It also has 1″ dia. knockouts for faucet holes on 4″ or 8″ centers.

Chemical-Resistant Polyethylene Sinks— One-piece molded polyethylene construction gives you an economical sink with excellent resistance to chemicals. To install, apply sealant (not included) to rim and drop sink into the countertop. All sinks are 3/16″ thick. They have a waste drain in the corner that has a 3″ long molded tailpiece with a 1 1/2″ NPT male connection, a removable strainer, and a stopper. Color is black.

■ 20-gauge stainless steel. Exposed surfaces have a bright finish. ★ Faucet is 4 1/4″ high. Furnished with spray hose.

Storage Cabinets with Sink

Perfect for kitchens and breakrooms. The sinks are 300 series, 22- to 20-gauge stainless steel. Each sink includes a ledge-mounted, chrome-plated brass swivel faucet with lever handles, an aerator, and 1/2″ NPT male connections. Flow rate is 2.2 gpm at 60 psi. The drain opening is 3 1/2″ dia. with a P-trap, strainer, and 8 7/16″ long chrome-plated brass tailpipe. The counter and backsplash (which measures 3″ high) are plastic laminate with a neutral limestone finish. The cabinet is 23-gauge welded steel with a 4″ high recessed toe kick and white finish. Cabinet doors have semiconcealed hinges and plastic pulls. Shipped unassembled.

Single-Bowl Sinks— Have a 25″ Lg.x22″ Wd.x6″ Dp. inner bowl size. ***Double-Bowl Sink—*** Has two bowls with a 16″ Lg.x14″ Wd.x6″ Dp. inner bowl size.

Sinks with spray hose do not include a hole for the spray hose. To drill a hole in the counter, use a 1″ dia. hole saw (see 4066A18 on page 2404) with an arbor (see 4066A76 on page 2405).

Type 304 Stainless Steel Deep-Bowl Service Sinks

1 With Optional Set of Legs

2 Double Bowl

3 NSF Single Bowl

3 NSF Triple Bowl with Faucet and Shelf

4 With Removable Legs Attached

5

Count on deep-bowl sinks to hold more water and splash less than standard sinks. All are made of corrosion-resistant Type 304 stainless steel.

1 *Economy Stainless Steel*— These 22-gauge stainless steel sinks narrow at the top for added splash protection. All are welded with a bright finish. They can be mounted to the wall with optional wall-mount brackets (mounting hardware included) or mounted on the optional legs (mounting hardware included).

Optional angle iron wall-mount brackets and *angle iron legs* are furnished with a blue plastic coating.

2 *Standard Stainless Steel*— These welded sinks are made of 14-gauge stainless steel. The front, bottom, and back of the sinks are formed from a single sheet with a 1½″ rolled rim on the front and the sides. All have a screw-in soap dish, squared corners, and detachable legs. Exposed surfaces have a satin finish.

Optional drain boards are 14-gauge Type 304 stainless steel and mount on either side of the sink.

3 *NSF Certified Stainless Steel*— Manufactured in accordance with National Sanitation Foundation standards, these sinks meet the highest standards for food safety. All sink bowls have rounded corners to resist grime and bacteria buildup. Sinks have a satin finish.

Single-bowl models are made of 14-gauge stainless steel. The *optional drain board* is 14-gauge Type 304 stainless steel and mounts on either side of the single-bowl sink. The drain board is not NSF certified.

Double-bowl model is made of 16-gauge stainless steel. It has a built-in 26¼″ Lg. × 18″ Wd. drain board on each side of the double bowl. The sink bowls and drain boards are undercoated to reduce noise and to prevent condensation buildup.

Triple-bowl models have three sink bowls with strainers for extra flexibility, yet are still small enough to fit into tight spaces. Sinks are made of 16-gauge stainless steel. They include a 4½″ high, chrome-plated brass swivel faucet with lever handles, ½″ NPS male connections, and a flow rate of 2.2 gpm at 45 psi. Choose a sink with or without a stainless steel shelf underneath.

4 *Mobile Stainless Steel*— Moving this sink where it's needed is easy—its removable legs have swivel casters with 3″ dia. rubber wheels (two with brakes). Sink is made of welded, 20-gauge stainless steel with a bright finish. It has a 1½″ NPT male threaded drain in the bottom at one end and a 1″ NPT female threaded opening with a removable plug in the side wall at the opposite end.

5 *Wall-Mount Stainless Steel with Faucet and P-Trap*— Designed for heavy duty use, these wall-mount sinks are made of 14-gauge stainless steel. They have a 1½″ rolled rim, rounded corners, and a satin finish. Sinks include two chrome-plated brass faucets with cross handles, ½″ NPT female connections, and a flow rate of 2.2 gpm @ 60 psi. They also include a cast-iron P-trap with strainer and a cleanout plug. Furnished with a wall hanger that has four ¼″ × 1″ mounting slots and a wall bracket that has four 7/16″ dia. mounting holes (mounting hardware not included).

Thermoplastic and Concrete Deep-Bowl Service Sinks

With their deep bowls, these sinks hold more water and splash less than standard sinks.

1&2 ***Thermoplastic*** and ***Wall-Mount Thermoplastic—*** Don't let their light weight fool you, these sinks stand up to heavy use. Each bowl has a molded-in, self-draining soap dish. *Single-bowl sinks* are 5/32″ thick, while *double-bowl sinks* are 3/32″ thick.

Sinks with faucet have a 2¼″ high, chrome-plated brass swivel faucet with lever handles and ½″ NPT male connections. Flow rate is 2.2 gpm @ 60 psi. ***Optional polypropylene faucet block*** supports overhead water supplies.

Style 1 include four 20-gauge steel legs that are easy to attach (no fasteners required). Legs come furnished with leveling feet that can be adjusted up to 1″. If the feet are not used, you can secure these sinks to the floor using the ¼″ dia. hole in the bottom of each leg (fasteners not included).

Style 2 include brackets (one for single-bowl sinks; two for double-bowl sinks) and all the mounting fasteners required for wall mounting.

3 ***Rough Duty Concrete—*** Our tough sink is built to handle your rough service. The sink is 1⅛″ thick concrete and has a galvanized metal rim with rounded edges. The stand is 1″×1″ steel for strength with an enameled finish for rust resistance. Includes a brass strainer and threaded, 1½″ plastic coupling for tailpiece connection.

Extreme Duty Stainless Steel Processing Sinks

Most highly corrosive chemicals won't eat away these sinks. All sinks are made from one piece of 18-gauge (except for 2836K72, which is 20-gauge) low-carbon Type 316 stainless steel. They have a 1½″ rounded top ledge, corner drain, and are undercoated to reduce noise as well as prevent condensation buildup. The stand is black vinyl-clad steel. The legs have leveling feet that can be adjusted up to 1″.

Floor Service Sinks

Also known as mop sinks, these sinks are the perfect choice for maintenance rooms. Mounted on the floor, their low-profile design means you won't have to lift heavy, bulky items too far for emptying and cleaning.

Fiberglass

Fiberglass— Tough yet economical, these solid one-piece sinks have an integral, unthreaded drain connection and 16-gauge Type 302 stainless steel strainer. Sinks are ¼″ thick with a 1″ thick rim.

Terrazzo— Long lasting and repairable, these sinks are made of compressed black and white marble chips and cement that's polished and sealed. Each has a 1″ wide, 22-gauge Type 304 stainless steel edge cap on one side; an integral cast-brass drain; and a 22-gauge Type 316 stainless steel strainer.

Lavatory Sinks

China

Stainless Steel (3059K21)

China Sink— This sink helps you comply with the Americans with Disabilities Act (ADA) and ANSI 117.1 when properly installed. It has three faucet holes, a front overflow hole, two self-draining soap dishes, and a bracket for wall mounting (bracket has six 5/16″ dia. mounting holes, fasteners not included). Color is white.

Type 304 Stainless Steel Sinks— Both have three faucet holes and include a chrome-plated bronze strainer.

Model 3059K21 is made of 16-gauge stainless steel. It has an integral bar-soap holder, 1¼″ Dia.×4″ Lg. tailpiece, and a mounting bracket with three ¼″×¾″ mounting slots (fasteners not included).

Model 3059K22 helps you comply with the Americans with Disabilities Act (ADA) when properly installed. Made of 18-gauge stainless steel, it has sound deadeners, an offset 8⅞″ long tailpiece, integral angle braces, and a wall hanger with four ¼″×1″ mounting slots (fasteners not included). It also has four ⅜″ dia. mounting holes on the sink (fasteners not included).

Stainless Steel Wash Sinks with Faucet

NSF Certified Wash Sinks

An integral, 8⅛″ high backsplash that's sloped 45° at the top for water runoff keeps splashing messes to a minimum. Sinks are 20-gauge Type 304 stainless steel with a one-piece bowl. They include a chrome-plated brass gooseneck faucet with aerator, two handles, and ½″ NPS male connections. Flow rate is 2 gpm @ 60 psi. Sinks also include a strainer, 3″ long chrome-plated brass tailpiece, P-trap, and wall-mount bracket (bracket has four ⅜″ dia. mounting holes). Mounting fasteners are included.

Overall Size (A)	(B)	(C)	Inner Bowl Size	Bowl Depth	Drain Opening Dia.	Handle Style		Each

22″	24¾″	14 7/16″	16″×20″	6¼″	3½″	Lever	2719K13	572.80

NSF Certified Hands-Free Wash Sinks

1

Control water flow without touching a faucet. Sinks are 18-gauge Type 304 stainless steel with an electro-polished finish. They have a 9½″ high backsplash and (where noted) side splash guards. All include a chrome-plated brass gooseneck faucet with aerator and ⅜″ NPT female connections. Flow rate is 2 gpm @ 60 psi. They also include a 16-oz., pump-style liquid-soap dispenser. USDA approved.

1 ***Foot-Operated Pedestal Sinks—*** These sinks run as long as you press the foot pedals, which are Type 304 stainless steel. For indoor and outdoor use.

Retrofit Sensor Kit— You'll get everything you need to convert a foot- or knee-operated sink into a sensor-operated sink with an adjustable sensor range of 6″ to 24″. Sensors have a transformer and 9-ft. power cord with two-prong plug. Input is 120 VAC, 60 Hz; output is 12 VDC, 0.8 amps.

28645K51 ..... **Each** $457.14

Multistation Sinks

Three-Station Sink

Depending on the model you choose, two or three people can use these sinks at the same time. Both are made of welded, 14-gauge, Type 304 stainless steel with a 10″ high backsplash; support brackets; and concealed wall hanger with ¼″×1″ mounting slots (six for two-station sink and seven for three-station sink; fasteners not included). Sinks include chrome-plated brass gooseneck faucets (two for two-station sink; three for three-station sink) with aerator, wrist-blade handles, and ½″ NPT female connections. Flow rate is 2.2 gpm @ 60 psi. They also include a stainless steel strainer and 4″ long stainless steel tailpiece.

Easy Hook-Up Wash Fountains

Compact Foot Operated

Corner Foot Operated

Semicircular Foot Operated

Circular Sensor Operated (Water Inlet/Drain Style B)

ADA Compliant Semicircular

Shipped assembled and ready for water hook-up, these rugged fountains have vandal-resistant spray heads. Bowl is made of 14-gauge Type 304 stainless steel with a satin finish. Pedestals are black, vinyl-clad galvanized steel with Type 304 stainless steel bases. All operate on 30-100 psi. They have 1/2″ NPS female flexible hose inlets, a 1 1/2″ unthreaded drain outlet, and a liquid soap dispenser (except for the compact models, which have a self-draining bar soap holder).

Foot-operated models have spray heads that run as long as you hold down the push-button. ***Sensor-operated models*** have spray heads that run as long as hands are detected. Sensors operate at 24 VAC and include a step-down transformer with 120 VAC, 3 amp input and 24 VAC output. Sensor and transformer are UL listed.

Standard Fountains— Have 9/16″ dia. holes (three on compact and corner models; four on semicircular and circular models) for floor mounting. Compact, corner, and semicircular models also have four 9/32″ × 3/4″ slots for wall mounting. Fasteners not included.

ADA-Compliant Fountains— Help you comply with the Americans with Disabilities Act (ADA) when properly installed. They have four 1/2″ dia. holes and two 9/32″ × 3/4″ slots for wall mounting. Fasteners not included.

● **To Order:** Please specify water inlet/drain style B or C. *Style C* also includes a trap. ■ From bottom of housing to top of spray head.

Heavy Duty Deep-Bowl Wash Fountains

Resistant to diluted chemicals, abrasion, and corrosion, these fountains stand up to harsh environments. All have deep bowls to allow multiple users to wash their hands and arms without making a mess. Foot operated on 20-80 psi, they have spray heads that run as long as you hold down the foot rail. They also have 1/2″ NPT female inlets, 2″ NPT male drain outlet, and a liquid soap dispenser. Shipped unassembled.

Semicircular models have six 1/2″ dia. holes and two 5/16″ dia. holes for floor mounting. They also have a bracket with two 1/4″ dia. holes for wall mounting the spray head. Fasteners not included.

Circular models have eight 1/2″ dia. holes for floor mounting. Fasteners not included. *Water inlet/drain style C* also includes a trap.

Thermoset Polyester— Lightweight and durable, these fountains have a thermoset polyester bowl with ABS plastic side panels and base. They won't chip, flake, or peel and are an economical alternative to metal bowls. Color is beige.

Stainless Steel— Fountains have a 14-gauge, 300 series stainless steel bowl and base with polished finish.

Stainless Steel Sink Drains with Strainers

Drains with Basket Strainers

All of these drains include a lift-out basket strainer, die cast zinc slip-joint nut, and rubber washer.

Style A— Made of Type 430 stainless steel.

Style B— Made of Type 430 stainless steel with a 1½″ Dia. × 4″ Lg. chrome-plated brass tailpiece.

Style C— Great for use on thick sinks, this drain has a longer threaded length under the sink cup than Styles A and B. It's made of Type 304 stainless steel with a 1½″ Dia. × 4″ Lg. chrome-plated brass tailpiece.

	Fits Sink Drain Opening Dia.	Drain Top Dia.	Drain O'all Ht.	Drains	Each	Replacement Strainers	Each

Sink Drain Traps and Outlets

Sink Drain P-Traps and S-Traps

All of these traps swivel and adjust vertically for easy connections. Use *P-traps* for wall connections and *S-traps* for floor connections.

Chrome-plated tubular brass traps have a 17-gauge construction, unless noted. They include die cast nuts and washers. *Models with clean-out plug* provide easier access.

White tubular polypropylene traps fit both 1¼″ and 1½″ dia. drains. They include polypropylene nuts and polyethylene washers.

Dia.	P-Trap with Outlet Elbow	Each	P-Trap with Wall Pipe	Each	S-Trap with Floor Pipe	Each

Adjustable-Neck Sink Drain Trap

The neck on this P-trap is adjustable so you can easily connect drains that are up to 1″ out of line. Made of white polypropylene, this trap includes washers and slip joint nuts for both 1¼″ and 1½″ diameter drains.

3097K5 ..... Each $7.21

Polypropylene Sink Drain with Recessed Strainer and Plug

Furnished with an integral strainer and plug, these drains are made of black polypropylene.

Fits Sink Drain Opening Dia.	Drain Top Dia.	O'all Ht.		Each
1½″	3⅜″	3¾″	2701K61	$56.95
Replacement Plug			2701K65	6.07

Easy-to-Access Sink Drain Trap

Simply loosen the two T-knobs to clean out this P-trap without removing it from your pipe system. Trap is clear ABS plastic with a large removable screen. The screen allows a continuous flow of water while stopping foreign objects from entering your pipe system. Trap has 1½″ NPT male connections and includes a reducer for 1¼″ NPT male connections.

2972K53 ..... **Each** $9.55

Adjustable-Riser Sink Drain Trap

The riser adjusts 5¼″ up or down so you can use this P-trap on a variety of sink thicknesses from 16-ga. metal to 2¼″ thick ceramic. Trap is made of white polypropylene with a black polypropylene tailpiece. It has a drain for 1½″ dia. openings and a drain strainer with a 3⅜″ dia. flange. Inlet is 1½″ NPS female, outlet is 1½″ NPT male, and tailpiece is 1½″ NPS male. Meets ASTM F1412-92 for chemical resistance.

2978K14 ..... **Each** $107.72

Sink Drain Collection Traps

A

Removable containers collect solids before they create unwanted clogs and stoppages. All fit standard 1½″ dia. sink openings and have a drain strainer with a 3⅜″ dia. flange.

A ***ABS Plastic P-Trap—*** Withstands frost, boiling water, detergents, and chemicals. Inlet and outlet are 1½″ NPS male. Includes plug, waste fitting, backnut, waste body, sealing cup, and compression ring for copper tubing. Color is white.

Adapter allows trap to be used with PVC tubing.

ADA-Compliant Under-the-Sink Lavatory Pipe Insulation

To reduce the risk of burns from touching hot pipes under your sink, simply install this pipe insulation. It's made of molded, flexible, ⅛″ thick antimicrobial vinyl and is so easy to install that you won't need any tools.

Insulation complies with Americans with Disabilities Act regulations when properly installed. It's adaptable to any 1¼″ or 1½″ P-trap/tailpiece assembly, as well as any ⅜″ or ½″ angle stop valve assembly. Color is white.

For Standard Pipe— Includes insulation for P-trap, hot- and cold-water angle stop valves, and water supply.

For Offset Pipe Only— Fits 5″ offset strainer for wheelchair accessible sink.

		Each
For Standard Pipe	**23685K72**	$49.84
For Offset Pipe Only	**23685K73**	13.35

Tailpieces

Use these flanged tailpieces with sink strainers. ***Polypropylene tailpieces*** are white.

Paper Towel Dispensers

Dispensers for Perforated Paper-Towel Rolls

Standard

Bench Top

Standard Holder—This holder accommodates 11″ wide paper-towel rolls (our Household rolls on this page) and has spring-action ends to hold the rolls in place. Made of steel with a white enamel finish, it has 1/4″ × 3/4″ mounting slots (fasteners not included).

Bench-Top Holder—Able to accommodate paper-towel rolls up to 11″ wide (our Household and Heavy Duty rolls on this page), this portable holder can be placed on any flat surface. It's made of 400 series stainless steel with a nonskid weighted base and center spring to keep rolls in place.

Size		Each
Standard	2 7/8″ Ht. × 13 1/4″ Wd. × 4 5/8″ Dp.	4501T2 ... $16.20
Bench Top	7 7/16″ Dia. × 13 3/4″ Ht.	4501T4 ... 20.00

Dispensers for Nonperforated Paper-Towel Rolls

Crank Handle

Push Bar

Hands Free

The backs of these dispensers are steel for more secure mounting, unless noted. All have a key-lockable cover and come furnished with one key (keyed alike). They accommodate 8″ wide paper-towel rolls (except where noted) up to 8″ in dia. Mounting hardware included.

Crank Handle—Turn the handle to dispense as much paper as you need. Adjusts to hold 8″, 8 1/2″, 9″, or 9 1/2″ wide paper-towel rolls. Cover and back are 22-ga. steel.

Push Bar—Just push the bar to dispense paper. Load the next roll of paper before the dispenser is empty—it will automatically use the next roll. When installed properly, this dispenser helps you comply with the Americans with Disabilities Act (ADA). Covers are translucent; backs are 22-ga. steel.

Hands Free—No handles to turn or bars to push—dispenser automatically provides one 8″ wide towel when hands are detected. Sheet length is adjustable. When installed properly, it helps you comply with the Americans with Disabilities Act (ADA). Cover is translucent; back is ABS plastic. Four D batteries (not included) are required.

Ht. × Wd. × Dp.	Cover Material	Each

Dispensers for Center-Pull Paper-Towel Rolls

Standard

Jumbo

Simply pull the exposed towel—dispensers provide one towel at a time. When installed properly, they help you comply with the Americans with Disabilities Act (ADA). Dispensers are made of ABS plastic. Both have a locking, opaque cover and are furnished with one key (keyed alike). Mounting equipment is included.

	Ht. × Wd. × Dp.	Color	Each
Standard	14 3/8″ × 9 7/16″ × 8 15/16″	Black	2278K19 ... $28.02
Jumbo	17 5/8″ × 12 29/32″ × 11 7/8″	Black/Red	2278K21 ... 30.00

Dispensers for Folded Paper Towels

Single Fold

Multifold/C-Fold

Distributing one towel at a time means less waste. Dispensers are 20-ga. steel (except stainless steel models, which are 22-ga. steel). All have a lock and come furnished with one key (keyed alike). Mounting fasteners are included, unless noted.

Single-Fold Dispensers—Capacity is 400 single-fold towels. ***Multifold/C-Fold Dispensers***—Capacity is 500 multifold towels or 400 C-fold towels.

	Single-Fold Dispensers Ht. × Wd. × Dp.	Each	*Multifold/C-Fold Dispensers* Ht. × Wd. × Dp.	Each

■ Requires six #8 × 1 1/4″ screws for mounting (screws not included).
★ Requires four #10 × 1 1/4″ screws for mounting (screws not included).

Combo Waste Receptacle/Dispensers for Multifold Paper Towels

All-in-one units place the waste receptacle where it's most useful—right under the towel dispenser. Both styles are 22-ga. Type 304 stainless steel with a satin finish. The dispenser holds 800 multifold paper towels, while the receptacle has a 12-gallon capacity and is removable. The dispenser and receptacle each have a lock and come furnished with one key (keyed alike). There are six 7/32″ dia. mounting holes (fasteners not included). When installed properly, these units help you comply with the Americans with Disabilities Act (ADA) and meet ANSI 117.1. ***Recessed model*** requires a 54 3/4″ Ht. × 16″ Wd. × 4″ Dp. wall opening to mount.

Electric Hand Dryers

Tired of wasting paper? Dry your hands with hot air. These wall-mount dryers have a maintenance-free motor as well as a circuit breaker that offers overload protection and resets automatically. They also have a nozzle that swivels 360° (except for the ABS and Fast-Dry models, which have a molded-in, nonswivel nozzle). All dryers are designed to be hardwired. They have four 5/16″ mounting holes (fasteners not included). When installed properly, these dryers help you comply with the Americans with Disabilities Act (ADA) and meet ANSI 117.1. They are UL and C-UL listed.

Hands-Free Dryers—Activated when hands are detected and shut off when hands are removed.
Manual Dryers—Push-button activated and have a 30-second drying cycle.
Fast-Dry Dryer—Up to three times faster than standard dryers, it dries hands completely in 10-15 seconds.
ABS are economical, lightweight, and have a one-piece, flame retardant cover. Color is white.
Steel have a white finish.
Stainless steel are excellent for most sanitary environments.

Electric Hair Dryers

These wall-mount dryers operate on 120 VAC, 60 Hz, 10 amps and have two speeds. Both dryers have a white polycarbonate housing and include a flexible hose that delivers warm air to the nozzle. They also have a built-in appliance leakage circuit interrupter (ALCI) and a 6-foot coiled cord that stretches to 8 feet. Mounting hardware is included. When installed properly, these dryers help you comply with the Americans with Disabilities Act. UL listed and CSA certified.

Plug-in dryer has a tamper-resistant lever to prevent removal from the wall. It also has a 36″ long power cord with two-prong plug.

Liquid and Granular Drain Openers

Drain Openers—Using sodium hydroxide, these odorless openers cut through grease and organic matter.

Liquid opener can be poured through standing water. *Granular openers* are activated by hot water.

Organic Waste Digesters—Highly concentrated digesters eat through organic waste to keep drains open and eliminate odors. For use in drains, grease traps, and sewage systems.

Liquid digesters contain bacteria. *Granular digesters* contain enzymes and bacteria.

Plunger Kit	27405K27	$40.91
Refill Canister	27405K28	22.73

Water-Powered Drain Cleaners

Just hook these drain cleaners up to your garden hose, insert them into your drain, and let water power (instead of harsh chemicals) eliminate your clogs. Once water is on, the cleaners expand to form a seal, while the water flushes your drain. All have 3/4″ female garden hose threads.

Semirigid Drain Cleaners—A rubber cylinder grips the inside of your pipe.

Crossbar drain adapter for 2425K71 and 2425K72 *drain cleaners* allow you to use these cleaners with drains that have crossbars.

Semirigid drain cleaner kit includes drain cleaners 2425K71, 2425K72, and 2425K73; a crossbar drain adapter; a 10-ft. hose with 3/4″ brass GHT male and female connectors; a chrome-plated brass faucet adapter that allows your faucet to accept a 3/4″ GHT female connector; and a carrying case.

Flexible Drain Cleaners—These bag-style cleaners flex around pipe bends and elbows. All have a backflow preventer, except 2623K5 has a 3/8″ NPT threaded nipple on the jet nozzle. The nipple accepts a cap (not included), so the cleaner can be used as a stopper.

Hose—Has 3/4″ brass GHT male and female connectors and a chrome-plated brass faucet adapter.

Faucet Adapter—This plastic adapter allows your faucet to accept a 3/4″ GHT female connector.

Hand-Pump-Powered Drain Cleaners

Simply pump to pressurize the cleaner, insert it into your drain, and then pull the trigger to blast away blockages in your pipes up to 200 ft. away. The sudden impact creates a shock wave to dislodge blockages without using high pressure that can damage pipes. A tire valve that requires a ¼″ NPT female air inlet chuck is included so you can also use an air compressor to fill these cleaners.

Standard Cleaners—Have a 4″ dia. rubber cone, 11″ rubber hose, and a set of five drain adapters that range from 1¼″ to 4″ in diameter.

Deluxe Cleaner—Has a 6″ dia. rubber cone; 4-ft. rubber hose; 22″ rubber extension hose; check valve, which prevents water from backing up into the hose; universal and threaded adapters for water connection; four drain-opening plugs that range from 1½″ to 4″ in diameter; five drain adapters that range from 1¼″ to 4″ in diameter; and a carrying case.

Drain-Opening Plug Set—Includes 1½″, 2″, 3″, and 4″ dia. plugs.

Maintenance Kit—Contains 13 frequently requested parts for making minor repairs including O-rings, washers, springs, and a bottle of oil.

Also Available: Individual repair parts. Please ask for 2624K888 and specify part.

Hand-Powered Drain Cleaners

A

B

Crank the handle to move these cleaners through your drains. All have an enclosed drum to keep the cable organized.

A Economy Drain Cleaners—The molded-plastic, pistol-style handle ensures a secure grip. Drum and knob are plastic. Both cleaners have a steel wire cable with corkscrew head and thumbscrew to lock the cable in place. *Note:* Not for use with toilets.

B Standard Drain Cleaners—The offset handle provides balance. Drum is high-impact plastic to resist rust and heat and prevents damage to sinks. All have a steel wire cable with bulb head.

Drill-Powered Drain Cleaners

E

Shown with Hand Crank

F

For 1¼″-2″ ID Pipes

E Add-a-Drill Drain Cleaners—We'll provide the drain cleaner, you provide the drill. Operate with any ⅜″ or ½″ drill at variable speeds up to 1,300 rpm. Drum is polyethylene; cable is steel wire. Hand crank is included for use when a power source is not available.

F Included-Drill Drain Cleaners—No need to add a drill, it's included for you. The drill operates on 115 VAC, 50/60 Hz and has a maximum rpm of 500. Drum is aluminum; cable is steel wire. A 12-ft. power cord with two-prong plug is included. UL listed.

Model for 1¼″-2″ ID pipes is an economical cleaner with a variable-speed motor.

Model for 1¼″-3″ ID pipes is heavy duty with a reversible variable-speed motor. Includes flexible and standard arrow heads, 1¼″ side cutter blade, ⅜″ drop head fitting, standard bulb auger, and carrying case.

Heavy Duty Drum-Style Drain Cleaners

No need to piece individual lengths of cable together—these cleaners have a drum that not only stores one continuous piece of cable, but also has inner guides to prevent the cable from tangling. Cleaners have an air-actuated foot switch to control torque, a ground fault circuit interrupter, and a forward/off/reverse switch. Motor operates on 115 VAC, 60 Hz. Protective leather gloves and a power cord (10 ft. long on manual-feed models; 20 ft. long on rolling automatic-feed models) with three-prong plug are included.

Manual Feed—These are the smallest, lightest drum-style cleaners we offer. All have a removable drum, which makes it easy to load the cable. Furnished with a cutter set that includes a 2″ side cutter, a 1½″ U-cutter, an arrow head, and a bulb auger.

Rolling Automatic Feed—These cleaners automatically feed cable to cut and grind through stoppages. Both have two rubber wheels (see listing for size) with a locking brake for easy maneuvering. They also have a 6″ dia. rubber loading wheel on the frame.

For 3″-4″ ID Pipes—Furnished with a cutter set that includes a 13″ flexible leader; an arrow head; a 1½″ U-cutter; 2″, 3″, and 4″ side cutters; a 3″ rotary saw blade; and a retrieving tool. Cleaner also includes a folding handle.

For 2″-10″ ID Pipes—Versatile cleaner includes two sizes of cable and a stair climber that makes it easier to move it up and down stairs. Furnished with a cutter set that includes 13″ and 33″ flexible leaders; an arrow head; a spear head; 2″, 3″, and 4″ two-piece side cutters; 1½″ and 2″ U-cutters; a 3″ saw blade; a 4″ rotary saw blade; and two retrieving tools. Cleaner also includes a removable handle and tool box.

High-Powered Sectional-Cable Drain Cleaners

High rpm motors provide the power, while sectional cables allow you to add just the right amount of cable you need to tackle difficult drain blockages. Motors come furnished with a ground fault circuit interrupter.

Cleaner for 1¼″ to 4″ ID Pipes

This cleaner has a 400-rpm, ⅙-hp motor that operates on 115 VAC, 50/60 Hz. It also has an on/off switch and 15-ft. long power cord with three-prong plug. Furnished with a straight auger, bulb auger, 1⅜″ U-cutter, spade cutter, cable carrier, and protective leather glove.

Rolling Cleaner for 3″ to 10″ ID Pipes

Mounted to a cart with a folding handle, two 10″ dia. rubber wheels, and a front swivel caster with a 6″ dia. rubber wheel, you can roll this cleaner right to your job site. It has a 500-rpm, ¾-hp motor that operates on 115 VAC, 60 Hz. It also has an adjustable safety clutch to prevent torque buildup, a forward/off/reverse switch, and a 20-ft. long power cord with three-prong plug. Furnished with parts listed in replacement cutter set below.

Replacement cutter set includes a spear head, hook auger, 2″ U-cutter, 3″ side cutter, 3″ and 4″ saw blades, retrieving tool, and a wrench.

Tube Plugs for Condensers and Heat Exchangers

Plugging leaky tubes in condensers and heat exchangers takes only minutes with these two-piece brass ring and pin sets. Simply insert the ring into your tube and then drive the pin into the ring with a hammer to form the plug. You can remove the plug with a pipe wrench.

To Order: If you do not know the OD or gauge of your tube, measure the ID of your tube and select a ring and pin set with the closest ring OD measurement.

Powered Tube Cleaners

Clearing tough blockages in your tubes can be an easy, one-person operation. To begin, select a ***tube cleaner*** and then attach a ***flexible shaft*** that you have paired with a ***scraper*** or ***brush*** (all sold separately). Water flows around the shaft and flushes out deposits as they are loosened. *Note:* For use in straight (nonspiral) tubes.

Tube Cleaners

Electric-Powered Cleaner with Flexible Shaft (Shaft sold separately)

Electric-Powered Tube Cleaner—Has a variable-speed, reversible motor that operates on 115 VAC, 60 Hz. It includes an on/off foot switch, a water inlet with 3/4" garden hose connection, and a recessed male receptacle for a three-prong NEMA 5-15 connector (power cord is not included).

Air-Powered Tube Cleaner—To operate this cleaner, you'll need air pressure of 60 psi @ 15 cfm as well as water pressure of 25 psi. It includes an on/off foot switch, an adjustable speed/torque control, a 1/4" male quick-disconnect air inlet, and a 1/4" male quick-disconnect water inlet.

	hp	rpm		Each
Electric Powered	1/2	0 to 1,800	3627K13	$1,511.81
Air Powered	1 1/2	500 to 3,000	3627K21	1,797.74

Flexible Shafts

For Tube ID	Thread Size	12-ft. Lengths	Each	25-ft. Lengths	Each
1/4" to 3/8"	8-32 Female	3627K57♣	$185.45	3627K37♣	$229.09
7/16" to 1/2"	1/4"-28 Female	3627K53	201.82	3627K33	256.36
9/16" to 1"	1/4"-28 Female	3627K52	219.64	3627K35	283.64

♣ Not for use with the scrapers shown below; includes an adapter to connect brushes with 8-32 female threads.

Scrapers

Remove light to medium deposits in carbon steel, stainless steel, copper, and brass tubes.

For Tube ID	Scraper Lg.	O'all Lg.	Thread Size		Each
1/2" to 9/16"	2"	6"	1/4"-28 Male	3627K44	$21.87
5/8" to 1"	2 1/4"	6 1/2"	1/4"-28 Male	3627K45	21.87

Brushes

All have 1/4"-28 male threads (except the 1/4" and 5/16" dia. brushes, which have 8-32 female threads and the 3/8" dia. brushes, which have 12-24 female threads). *Note:* Brush diameter should be the same as your tube ID.

Nylon and Brass—Remove soft and light scale deposits in copper, brass, and plastic tubes. *Nylon brushes* are blue.

Type 304 Stainless Steel—Remove soft and light scale deposits in carbon steel and stainless steel tubes.

To Order: For all brushes, please specify brush diameter: 1/4", 5/16", 3/8", 7/16", 1/2", 9/16", 5/8", 11/16", 3/4", 13/16", 7/8", 15/16", or 1".

		Each
Nylon	3627K67	$5.20
Brass	3627K71	7.10
Type 304 Stainless Steel	3627K68	7.48

Tube Expanders

Tube expanders build and maintain heat exchangers, boilers, condensers, and other equipment with tubular openings. They have rollers with gradually tapered noses that ensure uniform tube tightness. They also have a 3/8" square drive for connecting a motorized device, such as a torque-controlled rolling motor.

For Tube Size★ OD	Ga.	Fits Min. Tube ID	Max. Tube Expansion Dia.	Max. Tube Sheet Thick.		Each
1/2"	18	0.392"	0.447"	1 1/2"	3628K13	$328.87
5/8"	16	0.485"	0.550"	1 1/2"	3628K16	328.87
5/8"	18	0.517"	0.572"	1 1/2"	3628K57	328.87
3/4"	15	0.596"	0.661"	1 1/2"	3628K63	332.63
3/4"	17-18	0.619"	0.699"	1 1/2"	3628K64	332.63
7/8"	14	0.685"	0.774"	2 1/4"	3628K65	343.00
1"	14	0.810"	0.909"	2 1/4"	3628K66	343.00

★ Ga. is the tube wall thickness.

Hand-Powered Hydrostatic Test Pumps

A

B

C

D

Simply pump the handle to generate the pressure you need to conduct tests in the field. These economical, easy-to-transport pumps are great for fluid pressure testing other pumps as well as valves, hose, sprinkler lines, plant piping, process piping systems, boilers, condensers, heat exchangers, and pressure vessels.

Note: Perform pressure tests with water, unless noted.

(A) Bench Mount— Have four 29/64″ mounting holes (except for 4229K1, which has two) for bench mounting. Fasteners not included.

(B) Bench Top— The attached baseplate provides improved leverage as well as stability. Furnished with a carrying case.

(C) Channel Mounted— This lightweight pump is mounted on a channel base for improved leverage.

(D) Freestanding— You don't need to connect these test pumps to a water supply—they have a reservoir that stores the water you'll need. You can also use hydraulic oil to perform your pressure tests.

Max. psi Generated	O'all Size, Lg. × Wd. × Ht.	Handle Lg.	Hydraulic Hose Lg.	Water Connection Size (Female) Inlet	Outlet	Stroke Lg.	Body Material

● Stroke length is adjustable.

Electric Hydrostatic Test Pumps

A totally enclosed fan cooled (TEFC) motor provides your hydrostatic testing power. Motor is capacitor start and operates on 115 VAC, 60 Hz. All pumps have an aluminum body and include a pressure gauge, pressure-regulator bypass, ball valve, and unloader valve. They come furnished with an 8-ft. power cord with three-prong plug. *Note:* Perform pressure tests with water.

Style E is light enough to easily carry from job to job.

	Max. psi Generated	O'all Size, Lg. × Wd. × Ht.	hp	Amps	Hose Lg.	Water Connection Size (Female) Inlet	Outlet

F

Air-Powered Hydrostatic Test Pumps

Requiring 100 psi of air pressure to operate, these pumps offer the highest generated pressure ratings of all our hydrostatic test pumps. Just set the air pressure regulator and these pumps automatically shut off at the set pressure and restart when pressure drops. All pumps include pressure gauges and have a Type 303 stainless steel body. Air inlet is ⅜″ NPT female. *Note:* Perform pressure tests with water or hydraulic oil. **To Order:** Please specify max. psi generated: 1,000; 3,000; 6,000; or 10,000.

(G) Bench Top— Pump is attached to a baseplate and has removable roll bars. It has a manifold and one pressure gauge with quick-disconnect fitting.

(H) Portable— Easy-to-carry pump is mounted on a tubular-steel frame. It has a manifold and two pressure gauges with quick-disconnect fittings.

(J) Mobile— With two 5″ dia. polyurethane wheels, you can roll this pump right to the job site. It's mounted on a tubular-steel frame and has two pressure gauges.

		O'all Size, Lg. × Wd. × Ht.	Water Connection Size (Female) Inlet	Outlet		
G	Bench Top	23″ × 12″ × 12″	¾″ GHT	⅜″ NPT	41455K8	$2,135.16

Easy-Twist High-Pressure Test Fittings

Looking for fast, leak-tight connections for testing, filling, flushing, venting, and plugging jobs? Just turn these threaded fittings to tighten—no need for tools, tape, or sealant. Air, gas, or hydraulic pressure in the system presses the seal against the face of the threads. Great for vacuum and pressure testing of hydraulic and air-powered components, assemblies, and systems. Body is stainless steel and main seals are polyurethane, so fittings are compatible with most petroleum-based fluids. Temperature range is –40° to +200° F. Connectors have a back port that allows you to add media.

Note: Not for extended use with water above 180° F, steam, fire-resistant synthetic fluids, or brake fluids.

About Test Plugs

Test plugs make sealing a pipe quick and easy. All are for use at the end of a pipe, unless noted.

Test Plugs— These plugs have a sealing ring that's positioned between two plates. As you tighten the plug, the plates squeeze the ring and force it to expand against the inside of the pipe, creating a seal. *Note:* These plugs may not seal pipes that aren't perfectly round.

Inflatable Test Plugs— Inflate these plugs with air so they will expand and create a seal. They have a high expansion range and can be used to tightly seal out-of-round pipes. *Note:* They can lose air pressure over long periods of time.

Test Plugs with Bypass— There's a tube in the middle of these plugs, which allows you to add media and relieve back pressure in the pipeline.

Pipe Size and Actual Pipe ID Range— Match your pipe to the corresponding pipe size. If you are unsure of the pipe size, use the actual pipe ID range. If your pipe's ID is within the range listed, you've chosen the right size. *Note:* For more information about pipe size, see pages 2-3.

Pipe ID

Maximum Back Pressure— The amount of pressure a plug can withstand without moving. *Air back pressure* is measured in psi. *Water back pressure* is measured in feet of head (height of the water above the plug's centerline) or psi.

Required Inflation Pressure— The amount of air pressure (measured in psi) that's needed to expand inflatable test plugs.

Low-Pressure Test Plugs

Our most economical plugs are great for your low-pressure applications. *Note:* Not recommended for use in pressure tests.

Tin and Steel

For 1½"-4" Pipe Size

For 5"-6" Pipe Size

- Plate: Tin
- Stem: Zinc-plated steel
- Nut: Zinc-plated steel

All-Plastic Test Plugs

Solid Stem

Bypass Stem

- Plate: Nylon
- Stem: Nylon
- Nut: Nylon
- Seal: Natural rubber
- Temperature Range: –40° to +180° F

Economical test plugs for your higher pressure applications.

Plugs with bypass stem have a removable nylon cap. To use the bypass, plugs for ½" to 1¼" pipe sizes require a ³⁄₈" ID hose or tube, and a worm-drive clamp (for clamp, see 5407K57 on page 275). Just slide the hose or tube over the bypass stem, and clamp in place.

★ Maximum air back pressure is 10 psi. Maximum water back pressure is 24 ft. of head.

Quick-Snap Low-Pressure Test Plugs

Sealing pipes is a snap—simply turn the cam handle to expand the sides against the opening and then snap the handle down to seal. No finger tightening required.

Steel
- Plate: Pipe Sizes 3/8″-31/32″: Type 302 stainless steel
  Pipe Sizes 1″-4″: Zinc-plated steel
- Handle: Brass
- Seal: Neoprene
- Temp. Range: –50° to +250° F

Stainless Steel
- Plate: Type 302 stainless steel
- Handle: Type 302 stainless steel

For information about test plugs, see page 2034.

Long-Stem Test Plugs with Bypass

These plugs can be inserted further into your pipe end than standard plugs. Their long stems provide easy access to add media and relieve back pressure. All plugs have a removable cast iron bypass cap, unless noted.

(A) Economical Plugs— Not rated for use with air pressure.

(A) Economical Test Plugs

- Plate: Cast iron
- Stem: Cast iron (unless noted)
- Nut: Cast iron
- Seal: Natural rubber
- Temp. Range: 30° to 150° F

Long-Stem Inside-Pipe Test Plugs with Bypass

- Plate: Zinc-plated steel
- Stem: Zinc-plated steel
- Nut: Zinc-plated steel
- Seal: Neoprene
- Temp. Range: –20° to +225° F

Insert these plugs into your pipe as far as needed. Their long stems provide easy access to add media and relieve back pressure. All fit Schedule 40 pipe and have a bolt-style tightening nut.

For Pipe Size	For Actual Pipe ID Range Min.	Max.	O'all Ht.	Maximum Back Pressure Air, psi	Water, ft. of head	By-pass, NPT Male

Combination Cleanout/Test Plugs

Get the advantages of a cleanout plug and test plug all in one. You can even use these plugs as replacements for cleanouts with damaged threads. Made of rust-resistant ABS thermoplastic, these plugs can be used with plastic, cast iron, and copper pipe. The threaded end has a thick rubber ring that creates a positive seal. Temperature range is 32° to 212° F.

For Pipe Size	For Actual Pipe ID Range Min.	Max.	O'all Ht.	Maximum Back Pressure Air, psi	Water, ft. of head

For information about test plugs, see page 2034.

Air-Inflatable Test Plugs

More flexible than mechanical test plugs, these plugs seal both round and out-of-round pipe. They're easy to inflate, deflate, and remove, making them perfect for temporary seals. *Note:* They can lose air pressure over long periods of time.

All are made of natural rubber. Temp. range is 0° to 125° F. To inflate, we recommend you use a hand pump (not included; see 61505A22 on this page). *Note:* An air compressor may overinflate the plug and create a dangerous situation.

♦ Bypass is NPT male.

Air- and Water-Inflatable Test Plugs

Use air or water to expand these plugs—a built-in pressure relief valve prevents overexpanding. Plugs are made of natural rubber with solid brass fittings. All have a tire thread inflation valve. To inflate with air, we recommend you use a hand pump (not included; see 61505A22 on this page). To inflate with water, remove the air valve to expose the 3/4" garden hose connection. Temp. range is 32° to 95° F.

Standard test plugs from 1 1/4"-4" dia. include a strap and handle for plug retrieval. Plugs from 5"-18" dia. include a retrieval ring. Plugs from 10"-18" dia. also come with an air gauge and 4-ft. extension hose.

Two-stage-deflation test plugs are longer than standard plugs and deflate in two stages. Access pipe stays sealed to prevent back splash as water clears the drain line. A strap, handle, and 4-ft. extension hose are included.

Hand Pump for Air-Inflatable Test Plugs

Count on this pump to inflate and deflate your air-inflatable test plugs. The pump is rated to 160 psi. It includes a 2" dia. pressure gauge, 19" long reinforced-rubber hose, and quick-disconnect coupling that fits Schrader and Presta valves.

Extension hoses attach to the hand pump to inflate and deflate test plugs at a safe distance. All are reinforced rubber (unless noted) and come furnished with a tire thread inflation valve.

Polypropylene hose also has snap hooks for a secure connection to plugs with eyebolts.

Cleanout Plugs

All of these plugs fit NPT threaded cleanout fittings. When selecting a plug, if you do not know your pipe size, you can measure the OD of your existing cleanout plug or the ID of your cleanout fitting. Then, match the measurement with the cleanout plug OD/fitting ID listed.

Also Available: Wrench for installing and removing the recessed square-head plugs shown (except for 2400K62). Please ask for 2400K1.

No-Residue Sensitive Equipment Cleaners

Standard 4-lb. Powder

Ideal for cleaning healthcare, lab, electronic, and pharmaceutical equipment, these water-based cleaners rinse away without leaving a residue. Suitable for manual and ultrasonic cleaning on hard, nonporous surfaces. These products are compliant under all state VOC rules in effect on October 1, 2008.

Low Foaming— Formulated to rinse and drain easily in tank and piping systems, as well as for use in spray cleaning equipment such as PC board washers. Perfect for cleaning printed circuit boards and electronic parts.

Wipes (18/Pkg.)	12	6852T1	$11.05	$9.87

Metal Polish Wadding

Treated cotton wadding cloth is solvent based, nonscratching, and cleans and shines all metals. Twelve 5-oz. cans per package.

63325T42 ..... **Each** Partial Pkg. $6.08 Full Pkg. $5.46

Aluminum Brightener/Cleaner

Quickly brighten and clean dull aluminum finishes with this foaming, water-based product. Good for any acid-resistant surface. Product can be sprayed or mopped and requires no scrubbing. Four 1-gal. containers per package.

7986T1 ..... **Each** Partial Pkg. $22.76 Full Pkg. $20.32

Vinyl, Leather, and Rubber Protectant

This silicone-based protectant prevents UV damage and cracking, repels dirt and grime, restores, and provides long-term protection for vinyl, leather, and rubber. Twelve 32-oz. trigger spray bottles per package.

6531T2 ..... **Each** Partial Pkg. $10.21 Full Pkg. $9.15

Stainless Steel Polishes/Cleaners

Citrus-based polish/cleaner contains d-limonene to preserve the high luster of stainless steel. It forms a finish that resists dirt, oil, and water spots. Water based.

Foaming polish/cleaner clings to vertical surfaces for maximum penetration and is water based.

Polishing wipes clean, polish, and brighten. They also prevent water marks and corrosion. Wipes are solvent based, supplied in a center-pull dispenser, and measure 9¾″×10½″.

Heavy duty cleaners fully restore the corrosion resistance of stainless steel. Powerful, acid-based products remove rust, stains, slag, scale, and tarnish.

Sterile clean room polish/cleaner is for use in Class 100 clean rooms and leaves a residue-free finish. Made with United States Pharmaceutical grade mineral oil.

Automatic Wall-Mount Aerosol Neutralizers for Larger Rooms

A periodic, fine aerosol mist automatically neutralizes odor.

Dispensers are recommended for areas from 600-750 sq. ft. They are 9¼″ Ht.×4″ Wd.×3″ Dp., made of white plastic, and require two C-cell batteries (sold separately). Mounting hardware included.

Nonprogrammable dispenser releases fragrance every 15 minutes. *Programmable dispenser* can be set to release fragrance every 7½, 15, or 30 minutes. Also has start/stop settings and LED low-battery and low-cartridge indicators.

Cartridges last up to 30 days. *Fragrance cartridges* come in four fragrances. **To Order:** Please specify fragrance: cherry, citrus, floral, or mango.

Sponges and Scouring Pads

Choose-a-Color Sponges

Reduce the possibility of cross contamination by designating a different color sponge for specific jobs or locations in your facility. **To Order:** Please specify color: blue, green, pink, or yellow.

Size	Sponges/ Pkg.		Pkg. 1-11	Pkg. 12-Up
3½″×6″×1″	6	7356T1	$10.11	$9.08
4¼″×6″×1½″	6	7356T21	20.91	18.77
4¼″×7″×2″	3	7356T31	15.13	13.73

Mildew-Resistant Sponges

Always soft, pliable, and absorbent, these sponges won't dry out or mildew. Color is yellow.

Size	Sponges/ Pkg.		Pkg. 1-11	Pkg. 12-Up
3½″×6″×1″	6	7309T1	$4.76	$4.25
4¼″×6″×1½″	6	7309T2	7.03	6.31
4¼″×7″×1½″	6	7309T3	9.83	8.84

Lint-Free Sponge

This completely lint-free sponge can hold up to 10 times more liquid than standard sponges. It resists mildew, grease, oil, detergents, and most solvents. Color is white. Each sponge is individually wrapped.

Size		Each 1-5	Each 6-Up
3″×6¾″×1⅜″	7271T32	$5.57	$5.00

Natural Sponges

Nature's original sponge has excellent water absorption. Sponges are sized when wet. Color is tan.

Approx. Dia.		Each 1-11	Each 12-Up
7″	7362T16	$15.14	$13.49
8″	7362T15	20.14	17.95
9″	7362T14	24.05	21.45

Eraser Sponge

No need for special cleaners—just add water and these sponges are ready to remove ground-in dirt from walls, doors, floors, and more. Clean with simple rubbing action. Sponges are reusable; rinse after each use and let air dry. Color is white.

Size	Sponges/ Pkg.		Pkg. 1-6	Pkg. 7-Up
2⅜″×4 11/16″×1″	6	9361T11	$7.32	$6.57

Scratch-Free Scouring Block

Aggressive cleaning without scratching, this scouring block is made of a chemical-resistant foam block with a 10″ long wood handle. Color is yellow.

Size		Each 1-23	Each 24-Up
2″×3″×4″	7278T11	$3.14	$2.86

Mesh Scrubbing and Scouring Sponge

Covered in durable mesh, this foam sponge scrubs and scours without scratching. Mesh is white and sponge is blue.

Size	Sponges/ Pkg.		Pkg. 1-5	Pkg. 6-Up
5½″×3¼″×1″	6	73055T25	$7.71	$6.92

Scouring Sponges

Double Faced

Combine the aggressive cleaning action of a scouring pad with the absorbency of a sponge.

Single-faced sponges consist of a scouring pad on one side and a sponge on the other. *Light-abrasion* sponges have a yellow, nonscratching pad with a beige sponge. *Medium-abrasion* sponges have a white pad with a yellow sponge. *Heavy-abrasion* sponges have a green pad with a yellow sponge.

Double-faced sponge has a yellow foam sponge between a light-abrasive, nonscratching, white scouring pad on one side and a heavy-abrasive, green pad on the other.

Scrub Brushes with Long-Reach Handles

Standard

Also known as deck brushes, these are our most economical long-handled scrub brushes. Brushes have one tapered handle hole and one threaded hole. They are 2⅞″×10″ and include a 60″ tapered wood handle, except 7199T75, which is 2½″×10″ and includes a 60″ threaded wood handle. All have approximately 2″ long bristles. Bristles are stiff. Block is wood.

Durable Natural Bristles	7199T75	$15.45
Chemical- and Temperature-Resistant Natural Bristles	7199T74	14.97
Chemical-Resistant Plastic Bristles	7199T76	14.49

Multi Angle

With Squeegee

The only brush you need to scrub floors and clean under counters and equipment. Bristles remain on the floor whether you're standing or bending. Both come with a plastic block, chemical-resistant plastic bristles, and a 60″ threaded wood handle.

Brush Size	Bristle Lg.	Bristle Firmness		
Without Squeegee				
4½″×10″	2″	Stiff	7242T83	$16.66
With Squeegee				
4″ ×10″	2″	Stiff	7242T85	19.07

Corner

Cone-shaped bristles make this brush ideal for reaching into corners and crevices. It has chemical-resistant plastic bristles and a 60″ wood handle (with threaded metal tip). Length without handle is 12″; block is plastic.

Brush Dia.	Bristle Lg.	Bristle Firmness		
2¼″	1½″	Soft	72215T21	$16.49

Heavy Duty Swivel Block

Tackle any tough cleaning job with this scrub brush. Bristles are highly durable plastic enhanced with abrasive grit for aggressive cleaning. Block is plastic and swivels 360°. Comes with a 60″ threaded wood handle.

Brush Size	Bristle Lg.	Bristle Firmness		
3¾″×8″	¾″	Stiff	7426T59	$45.16

Choose-a-Color with Swivel Head

With a round brush face and 180° swivel head, this brush hugs curved surfaces. It has chemical- and temperature-resistant plastic bristles and a 42″ fiberglass handle. Block material is plastic.

To Order: Please specify bristle color: blue, green, red, white, or yellow.

Brush Size	Bristle Lg.	Bristle Firmness		
7½″ Dia.	2″	Medium	6706T81	$39.56

Floor Drain

Scrub the gunk out of floor drains and mop sinks. Brush has nonabsorbent, chemical-resistant plastic bristles for deep cleaning action. Also has a 36″ plastic handle imprinted with the words "Use for floor drain only."

Brush Size	Bristle Firmness		
4″ Dia.×5¾″ Lg.	Stiff	70375T5	$25.98

Baseboard

Triangular block keeps bristles snug against baseboards for thorough cleaning. The stiff, chemical-resistant, plastic bristles are set in a 3″ Wd.×4½″ Ht. wood block that has two threaded handle holes. Bristle length is 1″. Includes a 54″ threaded wood handle.

74435T21 ..... $36.80

Hygienic Scrub Brushes with Long-Reach Handles

General Purpose

Also known as deck brushes, these brushes are made from FDA-compliant materials and include a 51″ fiberglass handle. Bristles are chemical- and temperature-resistant plastic; block is plastic. Color is white.

Swivel block has angled bristles for easy cleaning in hard-to-reach areas.

Block Style	Brush Size	Bristle Lg.	Bristle Firmness

Specialty Cleaning Brushes

Not like your ordinary brushes, these take on special cleaning tasks. Handle and bristles are made of chemical-resistant plastic; stem is galvanized steel.

Flexible— Slips around pipes and faucets. Bristles are medium firm.

Curved— Fits inside curved-neck tanks, vessels, and bottles. Bristles are medium firm.

Round— Reaches deep into recessed areas such as sliding door and window tracks. Bristles are stiff.

Brush Style	Brush Dia.	Brush Lg.	O'all Lg.		1-11	12-Up

Swabs

Cotton—Offer excellent absorption. *Low-lint* swabs resist tearing. *Sterile with protective cap* allows you to protect collected samples.

Polyurethane Foam—Shred and lint resistant. *Antistatic* swabs dissipate static electricity. *Clean room* swabs are adhesive and lint free and are suitable for Class 1000 clean rooms. They have excellent particle entrapment and the best solvent-holding ability of any swab.

Polyurethane Foam Over Cotton—Combine the strengths of cotton and polyurethane foam. *Chemical-resistant* swabs withstand most cleaning chemicals and solutions.

Polyester—Generate less lint than cotton or foam swabs, making them perfect for sensitive equipment. All are soft, nonscratching, and have excellent chemical resistance. *Clean room* swabs are our cleanest swabs. They are adhesive and lint free and are suitable for use in Class 100 clean rooms.

Microfiber—Offer effective particle entrapment and are chemical resistant.

Rayon—Highly absorbent and lint free.

▲ Each swab wrapped individually.

Paper Towels

Soft and absorbent, these are our most economical wipes. Rolls are perforated every 8¾″. Color is white.

Wall-mount dispenser is made of steel with a white finish.

With Wall-Mount Dispenser

	Size	No. of Sheets	Rolls/ Case		Case
Roll	11″×93′	128	20	4501T24	$42.47
Wall-Mount Dispenser				4501T2 Each	$16.20

Light Duty Wipes

Great for single-use applications.

General Purpose

These paper-based wipes are stronger and more absorbent than paper towels. Color is white, unless noted.

Absorbent—Denser paper material for greater strength and absorption.

Textured—More abrasive than standard wipes for extra cleaning power.

¼ Fold

Roll Dispenser

Easily store and unroll just the amount of wipes you need—works with all the wipe rolls we carry. Dispenser measures 33″ Ht.×16¾″ Wd.×18½″ Dp. and is made of steel. Color is black.

9852T12 ..... $41.96

Roll not Included

Chamois

Dry, polish, and clean without streaking or smearing.

Natural—Made of oil-tanned sheepskin. Sizes are approximate. Color is tan.

Synthetic—This nylon-reinforced cloth outlasts natural chamois, yet absorbs just as well. Color is yellow.

	Size		
Natural	3 sq. ft.	7359T12	$14.00
Natural	4½ sq. ft.	7359T16	21.10
Synthetic	27″×17″	7286T1	10.10

Heavy Duty Wipes

All are low linting.

General Purpose

An economical alternative to cloth, these paper-based wipes are as strong and durable as cloth, plus soft as tissue. They resist solvents and are nonscratching. They can be washed up to five times. Color is blue. *Roll* is perforated.

Clean Room Wipes

Eliminate impurities in pharmaceutical, medical, and clean room areas. All wipes are white and suitable for use in Class 100 clean rooms, unless otherwise indicated.

Wet wipes come in a resealable pouch. All are moistened with a 6% isopropyl alcohol/94% deionized water mixture. These products are compliant under all state VOC rules in effect on October 1, 2009.

Standard

Our most cost-effective clean room wipes combine the strength of polyester with the absorbency of cellulose.

Heavy Duty

Our most durable clean room wipes, they're made of polyester. *Ultra soft dry wipes* are ideal for cleaning sensitive surfaces, such as optical equipment and fiber optics. *Ultra durable dry wipes* are tear resistant. *Ultra clean and durable wet wipes* are our cleanest and strongest wipes. They have a double knitted construction, sealed edges, and are extremely low linting.

Cheesecloth

Cheesecloth

Dispenser

Loosely woven from 100% purified cotton, this silicone-free cloth is low linting and won't scratch.

Sheet rolls are individual sheets rolled together.

Unbleached—Perfect for cleaning up particles, this three-ply, off-white cloth is woven to be softer, less abrasive, and lower linting than bleached cloth.

Bleached—Four-ply weave means there's more cloth for better straining, filtering, and polishing than unbleached cloth. Color is white.

Dispenser—Mount to wall or bench for easy dispensing of sheet rolls. Made of steel with a white finish and is 11⅜″ Wd.×6½″ Dp.×5″ Ht. Has two ⅛″ dia. mounting holes (mounting fasteners not included).

Towel Wringer

Easily squeeze liquid out of towels, rags, and wipes with this zinc-plated steel wringer. Rollers have a rubber coating and adjust to open up to ½″. Mounts on a 25- to 55-gal. drum and includes a drainboard to direct liquid into your container. Overall size (excluding handle and top adjustment pressure screw) is 11¼″ Ht.×14⅜″ Wd. Handle length is 10½″.

7135T16 ..... $154.41

Forklift-Mount Push Brooms

Efficiently sweep large areas such as parking lots and factory floors. Broom has black, chemical-resistant, plastic bristles attached to a plastic base. Frame is red aluminum with black steel mounting brackets. Broom attaches to forklift (mounting hardware included). Fork openings are 5¹⁄₁₆″ Wd.×1½″ Ht. on 18¼″ centers.

About Brooms

Smooth-surface brooms sweep away fine to medium dust and dirt on nonporous surfaces such as tile, wood, linoleum, and smooth concrete.

Semi-smooth-surface brooms handle heavier debris on surfaces such as sidewalks and driveways.

Rough-surface brooms move heavy, wet, and hard-to-move debris on asphalt and rough concrete such as street pavement.

Push Brooms

All brooms include a 60″ long handle. Those 24″ and wider include a clamp-style brace for handle support, unless noted.

Smooth-Surface Push Brooms

Brooms have a threaded handle.

Plastic Bristles—Come in two styles. *Standard* have a wood handle, wood block, and blue bristles. *Chemical-resistant* have a black, plastic-coated steel handle with an aluminum tip, plastic block, and gray bristles.

Horsehair Bristles—All bristles are soft for fine sweeping. They have a wood handle, wood block, and black bristles.

Semi-Smooth-Surface Push Brooms

Brooms have a threaded wood handle, a wood block, and black bristles.

Natural Bristles—Resist solvents and heat.

Blended Bristles—All are made of blended soft horsehair and plastic bristles. The 14″ through 24″ wide brooms also have a natural bristle center to dislodge heavier dirt.

Rough-Surface Push Brooms

All have a wood handle and a wood block.

Natural Bristles—Color is reddish brown.

Plastic Bristles—Resist solvents, acids, and chemicals. Color is black.

Brooms *with standard bristles*, also known as garage brooms, sweep heavy soils and debris. All have a threaded handle.

Brooms *with long bristles* are also known as street brooms. These stand up to the heaviest debris and move large, bulky trash. Handle is tapered.

Broom *with heavy duty long bristles* is the same as the long-bristled brooms above, except it has stiffer and thicker bristles.

Heavy Duty Brooms

Broom

Scraper

Strong and secure—bristles are housed in a steel cap and held with a wire band, making these brooms ideal for sweeping heavy debris. Bristles are plastic and resist most acids, oil, and chemicals. Handle is wood, 39½″ long, and has a protective steel sleeve at its base.

Broom with scraper, also known as a railroad track broom, has a steel scraper on one end for removing snow, ice, and caked-on debris.

Broom with Scraper	9″	8″	55¾″	7147T4	27.09

Steel-Wire Push Broom

Our best broom for dislodging heavy accumulations on rough, irregular surfaces such as concrete, stone, and brick. Broom has a tapered wood handle, a wood block with one handle hole, and flat steel wire bristles.

Broom Wd.	Bristle Lg.	Handle Lg.		
16″	5″	60″	7156T73	$43.48

Angle Brooms

Dual Angle

Extra Wide

Choose-a-Color

Perfect for accessing corners. All handles are threaded.

Dual Angle— Both brooms have two threaded holes in the block that let you select the best sweeping angle for your job. Block is black plastic. All bristles are plastic and resist acids, solvents, and chemicals. *Smooth-surface* bristles are designed for fine sweeping. Handles are black; bristles are blue. *Semi-smooth-surface* handles and bristles are black.

Extra Wide— Our widest angle broom. Handle is red steel. Block is black plastic. Bristles are black chemical-resistant plastic and are designed for fine sweeping. Can also be used on semi-smooth surfaces.

Choose-a-Color with Hygienic Block— Assign specific bristle colors to different tasks and areas. Bristles are fused to the white block, giving contaminants nowhere to hide. Block and bristles are made of chemical-resistant plastic, and they won't absorb liquids or odors. They are also unaffected by detergents and solvents.

Choose an economical wood handle or a white, hygienic, telescoping, fiberglass handle.

To Order: Please specify bristle color: blue, red, or white.

Handles

(C) Wood with Metal Tip— Tip is cast zinc to strengthen threads.

(D) Wood with Abrasive-Coated Metal Tip— Tip is coated with aluminum oxide to lock handle tightly into your broom's block.

(E) Wood with Metal Tip and Foam Grip— Tip is cast zinc to strengthen threads while the foam grip adds comfort.

(F) Wood with Flexible Metal Tip— An adapter between the aluminum tip and handle flexes when an object is struck to prevent handle from breaking.

(G) Fiberglass with Flexible Plastic Tip— Tip is plastic and absorbs shock to extend the life of the handle. Handle is white.

(H) Plastic-Coated Steel— Tip is die cast aluminum. Handle is black.

(J) Steel— This is our strongest handle. Handle is green.

Handle Adapters

Threaded-to-Tapered

Aluminum Threaded

Nylon Threaded

Don't waste your money on a new handle—convert or replace your handle tips.

Threaded-to-Tapered Tip— Convert your threaded handle to a tapered handle by screwing on this tip.

Threaded Tips— Convert tapered handles to threaded handles or replace damaged threads by sawing off the old tip and attaching a converter. Use on any 15/16″ dia. handle. *Aluminum* model clamps tight with screw (included). *Nylon* model has internal ribs that grip the handle.

Adapter Style	Material		1-11	12-Up
Threaded-to-Tapered Tip	Black Plastic	7555T76	$3.56	$3.17
Threaded Tip	Aluminum	7555T77	4.41	3.92
Threaded Tip	White Nylon	7555T78	1.68	1.50

Handle Braces

Clamp Brace

Angle Brace

Strengthen your push broom handles and prevent damage with these braces.

Clamp Brace— Brace is aluminum and locks the handle to the block with the included U-bolt. Works with all blocks.

Angle Brace— Brace is made of steel and has legs that screw onto the block and clamp around the handle for extra stability and durability (mounting hardware included). Center-to-center leg spread is 16 1/4″.

		1-11	12-Up
Clamp Brace	7182T8	$4.10	$3.56
Angle Brace	7182T9	4.16	3.70

Dust Pans

(K) Economy Plastic— Handle has a hole for hanging. Color is black.

(L) Choose-a-Color Hygienic— Avoid cross-contamination by using different colored dust pans for specific areas. Handle has a hole for hanging. **To Order:** Please specify color: blue, red, or white.

(M) Foot Controlled— Step on the convenient foothold to keep this dust pan in place without bending over. For easy storage, pan snaps onto a 7/8″ or 15/16″ dia. broom handle. Color is blue.

(N) Large Capacity— Our largest plastic dust pan scoops up all the dirt you can push its way. Color is black.

(P) Economy Steel— Handle has a hole for hanging. Color is black.

(Q) Wet and Dry— Thin, tapered edge forms a seal to pick up anything from liquids to sawdust. Includes a hoop for hanging and has a painted, corrosion-resistant finish.

(R) Big Grip— Pan is lightweight, corrosion resistant, and has a large looped handle.

(S) No Spill— To prevent spills, enclosed pan snaps into upright position when lifted. Rear wheels won't scratch floors. Color is black.

(T) Stand Up— No need to hold onto this enclosed dust pan when sweeping—it stands on its own. Color is tan.

(U) Self Closing— Lid opens automatically when you place these pans on the floor and shuts when lifted. *Steel* pan has a tan finish.

Tacky-Surface Dust Roller

Pick up fine dust and dirt particles with the tacky surface and then peel it away to expose a clean surface. Handle is threaded for use with an extension handle. Both the roller and the refills are 9″ wide and have 20 peel-away layers. Overall size is 9 1/4″ Wd. × 12 1/2″ Lg.

	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.
Roller with Handle	1	72305T67	—	$39.80
Refill	4	72305T68	$22.96	20.41

Spray Duster

Blast away dirt, dust, and lint with high-pressure bursts of compressed gas. Duster has a reusable valve with a tapered-tip nozzle for precision positioning that screws onto the CO_2 cylinder. Cylinder is steel, disposable, and recyclable. It has a capacity of approximately 725 one-second bursts.

2.6-oz. Duster	8431K13	**1-11**	$63.53	**12-Up**	$54.46
Replacement CO_2 Cylinder	8431K22	**1-23**	$15.44	**24-Up**	$13.11

Dust Brushes

(A) Dust Brushes— Handle and block are black plastic, unless noted.

(B) Choose-a-Color Hygienic Dust Brushes— Reduce the possibility of cross-contamination by designating colors to certain areas of your facility. Handle and block are white plastic. Bristles are fused to the block to seal out dirt and bacteria.

(C&D) Narrow-Width Dust Brushes— Clean tight areas that other dust brushes can't reach. Brushes have a wood handle and block, unless noted.

(E) Combination Dust Brush/Squeegee— This multifunctional tool cleans up dust, dirt, and liquid spills. One side has bristles that are soft for fine sweeping while the other side has a rubber squeegee. Handle and block are gray plastic.

Dust Mops

Keep your floors sparkling with these dust- and dirt-removing mops. Backing is tightly secured to the frame with two or more tie straps, yet still allows for easy mop changes.

Cotton Mop Heads— The industry standard and our most economical. Color is off-white. *Washable refills* are 4-ply cotton with excellent dust retention and will withstand multiple launderings. *Disposable refills* are cotton with a dust mop treatment that stops dust and debris from scattering during shakeout.

Nylon Mop Heads— Act as a dust magnet, picking up and holding dust without using a dust mop treatment. Nylon is extremely durable and won't lint or fray, even after multiple launderings. Color is blue.

Complete Mops— Include a steel frame, a 54″ long swivel wood handle, and a washable mop head. Mops with 48″, 60″, and 72″ wide frames have brace bars for added strength.

Also Available: Replacement mop frames. Please ask for 7305T65 and specify depth (3¼″ or 5″) and width (18″ to 72″ in sizes below).

Microfiber Dust Mop Conversion Kits

Convert your standard dust mop into a highly absorbent microfiber dust mop. Kits work with any standard wire mop frame up to 5″ deep. Simply slide the adapter over your existing mop frame and attach the microfiber mop head with the hook and loop backing. Mop head is blue, holds dust and dirt without a dust mop treatment, and can be washed and reused up to 300 times.

About Wet Mops

Ply—The number of yarn threads twisted together to make a single strand in a mop head. The greater the ply, the more durable the mop.

Weight—Sometimes referred to as a mop's size, this is the actual weight of the dry mop head. The heavier the mop head, the more liquid it can hold.

Headband—Located at the top of the mop head, this strip of fabric holds the mop strands together and is used to attach the mop head to the handle.

Tailband—Located at the bottom of the mop head, this strip of fabric secures the mop head strands to prevent them from tangling and allows the strands to lay flat for wide, even mop coverage.

Wet Mop Heads

The economical choice for wet-mop heads. They can't be laundered; just toss them out when worn.

Cotton Cut-End Mop Heads

Our most popular cut-end mop heads, these are off-white and offer good absorption. Headband is 1¼″ deep. Handle sold separately; see styles A-C on page 2057.

60″ Threaded Wood Handle ..... 7255T4 **Each** $6.16

♦ Prices are approximately 10% lower when you purchase 12 or more.

Washable Wet Mop Heads

All mop heads have a tailband and come with looped ends—no cut ends to fray or unravel. They are lower linting than cut-end mop heads and can be laundered and reused.

Choose-a-Color Cotton-Blend Mop Heads

Assign different colored mops to different areas to eliminate cross contamination. Made of a 4-ply blend of cotton and synthetic material for durability. They have a 5″ deep headband. Handle sold separately; see style D on page 2057. **To Order:** Where necessary, please specify color: blue or green.

Clean Room Polyester Mop Head

You can use this mop head in Class 1 clean rooms. Mop head is white, weighs 16 oz., measures 15¼″ Lg.×7½″ Wd., and has tubular strands. Headband is 3″ deep. Handle sold separately; see style E on page 2057.

63695T71 ..... 1-11 $29.13 12-Up $24.97

Choose-a-Color Microfiber Mop Heads

Assign different-colored mops to different jobs and areas to help eliminate cross contamination. These microfiber mop heads provide excellent liquid and dirt pick-up, dry floors faster, and are washable. Headband is 3½″ deep. Handle sold separately; see style B on page 2057. **To Order:** Please specify color: blue, green, red, or yellow.

Wet-Mop Handles

(A) Spring Head with Clamp— Lift the easy-opening spring latch, insert the mop head, and snap the latch down.

(B) Swing-Away Bar— Loosen the nut, swing the bar away, insert the mop head, swing the bar back into place, and retighten the nut.

(C) Adjustable Bar— Loosen the nut, slide the center bar up, insert mop head between the bar and the handle end, and retighten the nut.

(D) Clamp Jaw— Plastic jaws clamp down on wide headbands for a secure hold. Turn the adjustment sleeve to loosen the jaws, insert the mop's headband between the jaws, and retighten the sleeve.

(E) Snap Bar— Unhook the bar, insert the mop head, then swing the bar back and snap it in place.

Plastic Mop Buckets and Wringers

Bucket/Wringer Combinations and ***Buckets—*** All buckets have a handle, pour spout, measuring graduations, a universal "Caution" warning on the outside wall, and casters with nonmarring wheels. **To Order:** Where necessary, please specify color: blue or yellow.

Easy-empty styles let you drain water from the bottom of the bucket. The 35-qt. bucket has a self-draining spigot and a sediment screen to trap dirt. The 44-qt. bucket has a foot-operated lever.

One-piece bucket/wringer has a molded, one-piece bucket and wringer so the wringer will not move or lift off the bucket when in use. It also has a self-draining spigot and a sediment screen to trap dirt.

Wringers are compatible with all buckets listed. *Sideward-pressure wringer* has a side-mounted handle that moves an inner wringer plate forward against the wet mop. *Downward-pressure wringer* has an off-center-mounted handle that moves two wringer plates downward against the mop to squeeze out more water than the sideward-pressure wringer. **To Order:** Please specify color with capacity: blue (26 or 35 qt.) or yellow (26, 35, or 44 qt.).

35-qt. Standard Bucket/Wringer Combination *44-qt. Easy-Empty Bucket/Wringer Combination* *One-Piece Bucket/Wringer Combination* *Sideward-Pressure Wringer*

Downward-Pressure Wringer

Galvanized Steel and Stainless Steel Mop Buckets and Wringers

The heavy duty favorites. *Galvanized steel* models resist corrosion, while *stainless steel* models provide maximum corrosion resistance.

Buckets— All have a handle, measuring graduations, and casters.

Wringers— *Sideward-pressure wringer* has a side-mounted handle that moves an inner wringer plate forward to wring out the mop. *Downward-pressure wringers* have a center-mounted handle that moves two inner wringer plates downward to wring out more water than sideward-pressure wringers. Use *galvanized steel wringers* with galvanized steel buckets, and use the *stainless steel wringer* with the stainless steel bucket.

Self-Wringing Sponge Mops

Simply pull on the lever handle to squeeze out excess dirt and water from the mop head.

Polyurethane Sponge Mops— Good resistance to cleaning solutions and bacteria buildup. Sponge remains soft whether wet or dry. A single wringer on each side of the mop head forces out water. Mops with stainless steel handles are autoclavable.

PVA (Polyvinyl Alcohol) Sponge Mops— Both are lint free, highly absorbent, and have high chemical resistance. Soft when wet, but hard when dry. Two wringers on each side of the mop head squeeze out more water than polyurethane sponge mops.

Spark-Resistant Floor Squeegees

Straight

Super Curve

Spark-resistant aluminum frames allow you to safely move volatile liquids. Blades are black and resist oil, gasoline, and most chemicals. All come with a 60″ long tapered wood handle.

Squeegees ***with straight blade*** have a single-ply, neoprene blade. Squeegee ***with super-curve blade*** has a rubber blade. Curved blade collects more liquid within the width of the blade, and the handle flips for pushing or pulling.

Blade Wd. × Ht.	Squeegees		Repl. Blade

Combination Sweeper/Squeegee

Made of one-piece molded rubber, this sweeper/squeegee is 18″ wide and has soft 1⅜″ long bristles. Blade and bristles are black. Handle is steel and extends from 33″ to 60″.

Sweeper/Squeegee	8814T2	$17.39
Replacement Handle	8814T4	4.00

Fast-Dry Floor Squeegees

Blades are double foam-rubber, making them ideal for uneven surfaces and for moving more liquid so floors dry quickly. All blades are black, unless otherwise indicated. Neoprene resists oil, grease, and chemicals.

Standard

All have a galvanized steel frame. Choose a 60″ long tapered wood handle or 54″ long aluminum handle.
Rubber with neoprene blade is red.

Blade Material	Blade Wd. × Ht.	with Wood Handle		with Aluminum Handle	
Rubber	30″ × 2″	7482T21	$37.20	7482T24	$45.12

Chemical-Resistant Floor Squeegees

Twin white PVC blades resist oils, greases, and solvents. The second blade doubles the life of the squeegee and acts as a splash guard. All have a fiberglass handle that extends from 37″ to 64¾″ long.

Blade Wd. × Ht.		
18″ × 1″	7505T41	$50.72
24″ × 1″	7505T42	54.35
30″ × 1″	7505T43	59.24
Replacement Handle	7505T13	26.67

Window Squeegees

Use these metal-frame squeegees alone or with tapered handles (sold separately on this page).

Steel Frame— Have double-ply blades (one flexible blade that stays in constant contact with the surface and one cushion blade for support). Frame is zinc-plated steel. Squeegees ***with standard blade*** have two red rubber blades. Squeegees ***with chemical-resistant blade*** resist ink, oils, coolants, and most solvents. The wiping blade is neoprene and is supported by a cushioned vinyl blade. Both blades are white.

Stainless Steel Frame— Blade is single ply and made of flexible black rubber. Frame is corrosion-resistant stainless steel. *Replacement blades* include a stainless steel channel.

Window Washers

All can be used with tapered handles (sold separately on this page). Frame and handle are green plastic, unless noted.

Standard washers have a soft white pad that is 2½″ high.

Standard

With Scrubbing Pad

Washers with scrubbing pad have a soft white pad on one side and a textured, nonabrasive, green strip on the other side for tough cleaning. Pad is 2½″ high.

About Sorbents

As their name implies, sorbents absorb spilled liquids and keep them from spreading. Depending on the type of spill, you can choose from two categories of sorbents: oil only and universal.

Oil-only sorbents absorb oils, fuels, and any other petroleum-based product. They repel water, making them effective on both land and water.

Universal sorbents absorb oils, chemicals, coolants, and water. Recommended for land spills only.

Sorbents come in different shapes for different uses.

Pads— Pads absorb small spills and can be used to wipe off equipment.

Rolls— Rolls allow you to choose the amount you need. Some have perforations, while others can be cut to length. Perfect for large floor spills and leaks around equipment.

Pillows— Thicker than pads, pillows soak up more liquid. Ideal for positioning under drips and in corners.

Socks— A narrow diameter and long length let you wrap them around irregular surfaces, corners, and machines.

Granular— Simply pour or sprinkle sorbent onto the spill, work it into the spill with a broom, and let it it absorb. Then pick up the soaked sorbent.

Polypropylene Sorbents

Regarded as the industry standard, polypropylene sorbents handle all your general absorption needs.

Standard with Perforations— Perforations make it easy to tear off what you need. Pads are perforated up the center and rolls are perforated every 12″ and up the center.

Heavy Duty— Can be washed or wrung hundreds of times.

Recycled Universal Sorbents

Made from recycled newsprint and cellulose, these sorbents are more environmentally friendly and more absorbent than polypropylene sorbents. They are also Class A fire retardant. Color is gray.

Pads and rolls have a reinforced top for durability. Pads are perforated up the center. Rolls are perforated every 15″ and up the center.

Note: Not for use with aggressive liquids, such as hydrochloric acid.

Size	Absorption Cap., gal./pkg.	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.

Sock 3″ Dia. × 48″ Lg.	20	20	6314T64	3.30	2.95

Work Surface Leak-Resistant Universal Sorbent Pads

These pads combine a paper surface with a coated underside to protect work surfaces from stains and harsh chemicals. They measure 19¼″ Wd. × 23⅝″ Lg. Color is white.

High-Capacity Pads— Offer twice the absorbency of standard pads.

Standard Pads Pkg. Qty.	Absorption Cap., gal./pkg.		Pkg.	High-Capacity Pads Absorption Cap., gal./pkg.		Pkg.
10	5/16	41205T25	$19.58	⅝	41205T27	$21.60
50	1½	41205T22	74.50	3	41205T24	85.22

Granular Universal Sorbents

General Purpose

Sorbents are low-dust clay that reduces slipping and won't break down, cake, or mat under heavy traffic. They are nonflammable and absorb oil, grease, and water. Color is reddish-gray. Package quantity is 10.

20-lb. Pail— Specially formulated, smaller granules offer higher absorbency per container.

	Absorption Cap., gal./pkg.		Each Partial Pkg.	Each Full Pkg.
20-lb. Pail	40	7266T1	$13.12	$11.76
50-lb. Bag	40	7266T2	10.84	9.71

Easy-Clean

Made of a blended compound, these reusable sorbents completely encapsulate most liquids for easy cleanup. Color is gray. Not rated for absorption capacity. *Note:* Not for use with hydrofluoric acid.

Sifting screen separates the used, encapsulated sorbent from the unused sorbent so there's no wasted product.

	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.
10-lb. Bucket	10	62895T11	$17.70	$15.80

65-lb. Drum	1	62895T15	____	114.22
Sifting Screen	1	62895T34	____	7.18

Slip-Resistant

This dust-free, powder-like blend of minerals provides traction on slippery surfaces. Sorbents are nonflammable and absorb water, oil, solvents, and most chemicals. Color is gray. *Note:* Not for use with hydrofluoric acid.

	Absorption Cap., gal./pkg.	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.
2½-lb. Carton	4	12	6311T71	$2.10	$1.81
25-lb. Box	3	1	6311T73	____	15.38
40-lb. Box	5	1	6311T78	____	27.86

Highly Absorbent

This corn-cob sorbent quickly absorbs more cutting oils, grease, water, and similar liquids than other granular sorbents. Color is brown. *Note:* Not for use with aggressive liquids, such as hydrochloric acid.

	Absorption Cap., gal./pkg.	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.
40-lb. Bag	85	10	63655T76	$14.99	$12.97

Multipurpose Vermiculite

These lightweight sorbents do more than just absorb and hold water, oil, and solvents. You can also use them as insulation, filling, chemical packaging, or packing material for fragile items. Both resist heat and fire and are supplied in a 4-cu. ft. bag. Color is brown. *Grade #3* is similar in size to a grain of rice; *grade #4* is similar to a grain of sand.

Grade	Texture	Absorption Cap., gal./pkg.	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.
#3	Medium	190	10	63415T64	$25.58	$22.69

Spill-Control Sorbent Kits

11-Gallon Absorption-Capacity Kit

Mercury Kit

Everything you need when a spill occurs, even bags for disposal.

5-Gallon Absorption-Capacity Kit

Packed in a plastic bag. Includes:

- (10) 15″ × 19″ pads
- (1) Pair nitrile gloves
- (2) 3″ × 48″ socks
- (1) Disposal bag

Oil Only	71305T12	$37.33
Universal	71305T15	38.83

11-Gallon Absorption-Capacity Kit

Packed in a 20-gallon plastic drum with a resealable lid. *Note:* Not for use with hydrofluoric acid. Includes:

- (5) 15″ × 19″ pads
- (7) 10″ × 10″ pillows
- (2) 1¾-lb. cartons of granular sorbent
- (6) 4″ × 48″ socks
- (3) Disposable bags

Universal	71305T14	$153.13

38-Gallon Absorption-Capacity Kit

Packed in a 55-gallon plastic drum with a resealable lid. Includes:

- (50) 15″ × 19″ pads
- (1) Pair nitrile gloves
- (1) Emergency response handbook
- (4) 3″ × 144″ socks
- (5) Disposal bags
- (8) 18″ × 18″ pillows
- (1) Pair goggles

Oil Only	71305T13	$363.58
Universal	71305T16	378.13

Mercury Kit

Prevent toxic vapor contamination by properly cleaning up mercury spills. Packed in a corrugated box. Includes:

- (1) 250-ml cleaning solution
- (1) 250-ml vapor-reducing spray
- (1) Pair safety gloves
- (1) Disposal container
- (1) Mercury aspirator
- (1) Pair goggles
- (2) Hazardous waste bags

71435T68 ..... $150.00

Acid and Base Spill Neutralizers

Now cleaning up acids—even battery acids—and bases is safer. Just place these neutralizers on the spill, and they will change color when the neutralization is complete.

Liquid *for acids* is purple; liquid *for bases* is red.

Powder neutralizers are concentrated and neutralize approximately twice as much as liquid neutralizers. Powder *for acids* is white; powder *for bases* is purple.

Pad is pink and should not be exposed to water. *Note:* Not for use with hydrofluoric acid.

	Size	For Acids	Each	For Bases	Each
Liquid	32 oz.	4235T12	$11.27	4235T21	$11.69

			Pkg.		
Pad (10/Pkg.)	11″×12″	4235T16	$22.50	———	———

Sewer Drain Grate Guard

Catch oil, sediment, and other pollutants with this durable polypropylene guard. Simply remove the grate, place guard over the opening, and put grate back in place. Guard has filter strips to absorb incoming pollutants and can hold up to 1⅜ gal. of oil. Overall size is 48″ Lg.×36″ Wd.×18″ Dp. Can be used with grates up to 44″ Lg.×32″ Wd.

8261T25 ..... $75.00

Spill-Control Drain Plugs, Covers, and Dike

Drain Plug

Drain Protective Cover

Dike with Optional Connector

Prevent spills from spreading or going down your drain with these flexible polyurethane spill-control products. They resist oil, water, and most chemicals, and are nonabsorbent, washable, and reusable.

Drain Plugs

All have a zinc-plated steel eyebolt, making it easy to insert and remove the plug. Color is yellow.

For Drain	Plug Ht.	O'all Ht.

36″×36″	4205T94	225.45
48″×48″	4205T95	341.82

Dike

Create a barrier to stop spills from spreading. Dike bends to form almost any shape you need. You can cut it, or use the optional connectors (sold separately below) to create longer lengths. Size is 10′ Lg.×4″ Wd.×2¼″ Ht. Color is orange.

Dike	4287T21	$457.14
Optional Connector	4287T22	33.50

Magnetic Floor Sweepers

Keep shop floors, parking lots, and other surfaces free of metal debris. All have an aluminum housing, unless otherwise indicated.

A ***Hand-Held Sweepers***—Compact sweepers slip into places mobile sweepers can't. To clean, wipe debris off with a rag or gloved hand. Housing is stainless steel. Handle is 40″ long.

B ***Self-Cleaning Hand-Held Sweepers***—Pull release on top to clean sweeper without touching the debris. Handle is 31″ long.

C ***Low-Profile Mobile Sweepers***—These lightweight sweepers are easy to maneuver and have an offset handle to reduce bending and reaching, making them ideal for tight areas under machinery and work stations. Wheels are 2⅝″ dia. and made of rubber. To clean, slide rubber ring (included) along tube. Handle is 46″ long.

D&E ***Self-Cleaning Mobile Sweepers***—Quick-release feature lets you clean sweepers without touching the debris.

Style D has a pull-handle release and 7″ dia. rubber wheels. Handle is 43″ long. *Style E* have a lever release near the handgrip so you don't have to bend and 10″ dia. cushioned rubber wheels. Housing is stainless steel and steel. Handle is 42″ long.

F-J Sweep larger areas by attaching these sweepers to your forklift or vehicle with a chain (chain sold separately on page 1397).

(F) Self-Cleaning Forklift-Mounted Sweeper—To attach, simply slide forks into sweeper's fork pockets and tighten the 1¼″ ID eyebolts. Fork openings are 5″ Wd.×1⅛″ Ht. on 30″ centers. For easy cleaning, lift the top hand lever to release debris.

(G) Self-Cleaning Tow-Behind Sweepers—Attach to vehicles with the 1³⁄₁₆″ ID tow ring at the handle end. Maximum towing speed is 3 to 8 mph. All have 8″ dia. cushioned rubber wheels, a 46″ long removable handle, and 1⅛″ ID eyebolts. To clean, simply lift the top hand lever to release the debris.

(H&J) Vehicle-Mounted Sweepers—Bottom-mounted plastic wear bars protect the sweeper bottom. Also come with 1⅛″ ID eyebolts. Pick up operating speed should not exceed 10 mph. To clean *Style H*, wipe off debris with a rag or gloved hand. To clean *Style J*, press the toe plate to release the debris.

Floor and Baseboard Cleaning Machines

Floor Cleaning Machines

Make your floors look like new again. These machines have triggers on their handles to ensure safe operation—machine stops when the triggers are released. All have nonmarking wrap-around bumpers and 50-ft. power cords with three-prong plugs. Operate on 115 VAC, 60 Hz.

Note: Machines do not include brushes, pads, or pad holders (unless otherwise indicated), which are all sold separately on this page.

General Purpose

General Purpose— Scrub, strip, and buff floors. Great for wet and dry applications on hard floors and carpet. Have an aluminum apron, a steel motor housing, and two 5″ dia. rubber wheels. Handle is steel, 43″ long, and can be adjusted to different angles for comfort. Optional *4-gal. solution tank* is plastic.

High Speed

High-Speed Burnisher— Polishes hard floors to a high-gloss finish. It has an aluminum apron, a steel motor housing, two 4″ dia. rubber transport wheels, and two 5″ dia. rubber operating wheels. Handle is steel and is 43″ long. Also includes a flexible pad holder that conforms to uneven floors.

Note: Burnisher can only be used with pads, not with brushes.

Mini Floor/Baseboard Cleaning Machine

This compact cleaner gets into tight spots, such as corners and behind toilets. It can also be used to clean baseboards and stairs.

Includes a 6″ dia. pad holder with plastic block, a 6″ dia. baseboard brush that has durable plastic bristles coated with an abrasive grit for aggressive cleaning, and a 6″ power cord with three-prong plug. Housing is cast aluminum. Handle is 42″ long and plastic. Motor operates on 115 VAC, 60 Hz.

Optional floor pad is 6½″ dia. **To Order:** Please specify pad style: stripping, buffing, or polishing.

Optional floor brush is 8″ dia. and has soft bristles.

Pads and Pad Holders for Floor Cleaning Machines

Pad

Pad Holder

Pads strip, scrub, and buff floors. They are 1″ thick, and both sides are usable. *Note:* A pad holder is required when using a pad.

General Purpose Pads— For use on hard surfaces and for machines operating at 175-350 rpm.

To Order: Please specify pad color from choices below:

- Black—For aggressive wet stripping of finish and sealer.
- Blue—For moderate wet scrubbing.
- Brown—Use for wet or dry stripping.
- Green—Use wet for heavy duty scrubbing to remove dirt and scuff marks.
- Red—Use wet or dry to buff, restore shine, and remove scuff marks.
- White—Mildly abrasive for polishing clean floors to a high-gloss finish. Use on dry or lightly misted floors.

High-Speed Burnishing Pad— Soft for polishing hard surfaces to a high-gloss finish. For machines operating at 1,000-3,000 rpm. Color is off-white.

Pad Holders— Also called pad drivers, these hold pads in place with ½″ plastic bristles. Holders are plastic and are 1″ thick at the center and taper to ¾″ thick at the outer edge. They have a 1 7/16″ riser block, 5″ center hole, and a clutch plate that attaches to most machines.

Also Available: Pad holders with other clutch plates. Please ask for 7561T999 and specify machine make, model, and base diameter.

♦ Choose a pad holder that is 1″ smaller than your machine base diameter.

Pad Centering Device

This plastic 6⅛″ dia. device has two halves with spikes to sandwich the cleaning pad and keep it from slipping off center. Bottom half has stainless steel clips to keep it in place. Mounts to any pad holder (hardware included).

7022T1 ..... $20.04

Brushes for Floor and Carpet Cleaning Machines

Significantly more durable than pads, brushes are the perfect choice if your floor is uneven or contains grout lines. All have a plastic block, 5″ center hole, and universal clutch plate that attaches to most floor machines. All brushes can be used on hard surfaces.

Steel Wire— For stripping and scrubbing concrete. Bristles are 1 9/16″ long.

Natural Fiber— Perfect for heavy duty scrubbing. Bristles are 1¾″ long.

Plastic— Economical yet durable, this brush is good for general scrubbing. Bristles are 1¾″ long.

Nylon— More flexible and will last longer than plastic. Can also be used on carpet. Bristles are 1¾″ long. Brushes for 15″ dia. machines and larger have holes for use with solution tanks. *Note:* Before using on carpet, break in brush by briefly running machine over a rough, dry surface.

Nylon with Aggressive Grit— This nylon brush is very aggressive and contains silicone carbide. It strips finishes from tile and linoleum and is excellent for heavy buildups. For wet applications only. Bristles are 1½″ long.

Also Available: Brushes with other clutch plates and base diameters and in different materials. Please ask for 7258T999 and specify machine make and model, machine base diameter, and brush material.

Floor Sweeper and Scrubber Brushes

Scrubber Brush

Sweeper Brush

We offer different sweeper and scrubber brushes for your floor-cleaning machine. **To Order:** Please ask for 7114T888 and specify manufacturer (such as Tennant, American Lincoln, Power Boss, etc.), machine or brush model number, type of brush (scrubber or sweeper), and bristle material.

Vacuum Accessories

Use with 1½″ dia. or 2″ dia. vacuum hose or compatible extension wand (sold separately), unless noted. Accessories are plastic or aluminum, unless noted. Plastic accessories are economical and lightweight. Aluminum accessories are more durable and withstand heavier use. For compatible wand, match the number in the "Use with Wand No. Below" column to the wand number listed under "Extension Wands."

♦ Connects to vacuum hose only. ■ Includes a 45″ curved steel extension wand. ▲ Includes a 13½″ steel extension wand.
● Includes a 15″ steel extension wand. ★ Steel.

Extension Wands

Use with the compatible vacuum accessories above. All wands, except for wands with slide-on ends, allow accessories to swivel once they are attached.

Thread-on end has a threaded opening that screws onto the accessory.

Snap-on end has a grooved end to snap on the accessory.

Slide-on end slides onto the tool for a tight friction fit.

Connectors and Reducers

Hose connectors connect two hoses with the same diameter to extend hose. *Swivel* connectors prevent hoses from twisting.

Y connectors connect two hoses to vacuum inlet or hose end.

Hose reducers connect 2″ dia. hose to 1½″ dia. hose so you can use 1½″ dia. accessories. *Swivel* reducer prevents hose from twisting.

Vacuum Accessory Kits

Kits for Hard-to-Reach Areas

Miniature Kit

Low-Profile Expandable Kit

Both kits are for 1¼″ dia. hose. All accessories are plastic.

Miniature kit includes 3-ft. hose, hose adapters, round brush, oval brush, crevice tool, straight extension, and curved extension
70075T34 ..... $8.54

Low-profile expandable kit has a crevice tool that includes a brush. Snap together any of the three expansion pieces to make a 12″ to 40″ extension that fits under equipment. Each piece is only ⅜″ thick.
70075T41 ..... $9.64

Pickup Kits

Standard Dry Pickup Kit

Both kits attach to 1½″ dia. hose. All accessories are plastic, except the handles and wands are chrome-plated steel. Both include square dust brush, crevice tool, carpet/hard floor tool, and upholstery tool.

Standard dry pickup kit also comes with a 19¼″ extension wand and a telescoping wand that adjusts from 24¾″ to 38½″.
4178T21 ..... $46.98

Wet/dry pickup kit also includes a two-piece 52½″ wand and a floor squeegee.
4178T41 ..... $74.56

Magnets for Upright Vacuums

Prevent metal objects from entering your upright vacuum and causing damage. Magnets mount easily to the front of your vacuum (screws included).

Magnet Wd.	Fits Vacuum Wd.		
11½″	12″	**8207T52**	$10.72
13¾″	15″	**8207T54**	16.57
16½″	18″	**8207T55**	19.09

Floor and Carpet Sweeper

This galvanized steel and plastic sweeper has a bumper to protect walls and furniture. Base is 2½″ Ht. × 9¾″ Wd. × 11¼″ Dp.
Includes a 40″ steel handle, brushes for fine to heavy debris, and dual dirt collection pans. Capacity is 36.8 cu. in.
7038T46 ..... $71.63

Central-Vacuum-System Accessories

Use these accessories to hook your 1½″ dia. or 2″ dia. hose to your central vacuum system.

Inlet valves have a 2″ NPT male connection and self-closing cover. Both are made of cast zinc with a zinc-plated steel cover. For more information about NPT pipe size and threads, see pages 2-3.
Note: Hose adapter (sold separately) is required to connect a hose to this valve.

Hose adapters are made of zinc-plated steel.

Hand-Held Cordless Vacuums

Wet/Dry Pickup

Heavy Duty Dry Pickup

The ultimate in mobility, these plastic vacuums have an easy-to-empty dust cup and a 120 VAC, 60 Hz battery charger. UL listed.
Note: Not rated for hp.

Wet/dry pickup vacuum runs for 15 minutes on a 16-hour charge. Battery charger has a 6-ft. power cord with two-prong plug and draws 300 mA. A wall-mount bracket for the battery charger is also included.

Heavy duty dry pickup vacuum has an 8-position pivoting nozzle and a crevice tool. Runs up to 30 minutes on a 24-hour charge. Battery charger has a 5½-ft. power cord with two-prong plug. *Note:* Charger not rated for amps.

Hand-Held Micro Vacuum

Clean small, hard-to-reach areas with this lightweight (8 oz.) plastic vacuum. Vacuum is 9¾″ Ht. × 2″ Wd. × 4″ Dp. and has a 3 cu. in. capacity dust cup. Also comes with two dust brushes, a crevice tool, two filters, and a 6-ft. power cord with two-prong plug. Operates on 115 VAC, 50 Hz at 0.42 amps. UL listed.
Note: Not rated for hp.

Micro Vacuum	**64205T2**	**Each**	$25.48
Replacement Filters (5/Pkg.)	**64205T3**	**Pkg.**	$3.57

Upright Vacuum Cleaners

(A) Light duty vacuum cleans a 12″ wide path. Base is plastic with a vinyl bumper. Handle is chrome-plated steel and 44″ long. Has a reusable plastic dirt collection cup—no replacement bags needed. Also has a 30-ft. power cord with three-prong plug and four wheels. Vacuum operates on 120 VAC, 50/60 Hz. UL listed.

Attachment kit (sold separately) includes: 1¼″ Dia.×6-ft. Lg. vinyl hose with adapter, two 19″ extension wands, round dusting brush, crevice tool, and upholstery tool.

(B) Heavy duty vacuum has an aluminum base with a vinyl bumper and cleans a 14″ wide path. Handle is chrome-plated steel and 37″ long. Includes a 50-ft. power cord with three-prong plug and four wheels. Vacuum operates on 120 VAC, 60 Hz. UL listed.

Attachment kit (sold separately) includes: 1¼″ Dia.×7-ft. Lg. vinyl hose with adapter, two 20″ extension wands, floor brush, round dusting brush, crevice tool, and upholstery tool.

(C) Fine-filtration vacuum has a HEPA filter that is 99.97% efficient at 0.3 microns. Vacuum cleans a 12″ wide path. Housing is plastic. Handle is aluminum with a plastic grip and adjusts from 45″ to 48″. Includes a built-in 1″ Dia.×3-ft. Lg. plastic hose, 25″ wand, crevice tool, upholstery tool, a 40-ft. power cord with three-prong plug, and two wheels. Vacuum operates on 120 VAC, 60 Hz. UL listed.

Air-Powered Hand-Held Vacuums

These hand-held vacuums make it easy to clean workstations, machinery, and much more. Air inlet connection is ¼″ NPT female.

Wet/Dry Vacuum

Switch from dry to wet pickup by replacing the collection bag with the optional discharge hose (sold separately). Vacuum body is aluminum. Comes with utility nozzle, swivel brush, and reusable collection bag with zipper opening for easy emptying.

Note: Vacuum accepts 1¼″ dia. accessories.

Inlet Air, cfm @ psi	Cap., qt.	Lg.×Ht. (without bag)

Replacement Reusable Collection Bag			7276T21	26.08

Vacuum/Blowguns for Dry Pickup

Vacuum/Blowgun with Blowout Tube

Use these units as either a vacuum or a blowgun—just change the airflow direction to switch functions. Ideal for cleaning up dirt, dust, metal chips, glass, and more. Made of plastic, each has a 1¼″ dia. nozzle. Vacuuming requires the use of the reusable collection bag with clamp or the discharge hose (both sold separately).

Vacuum/blowgun with blowout tube simultaneously dislodges and vacuums debris such as metal chips.

Attachment kit comes with a brush nozzle, upholstery nozzle with brush attachment, two 19″ extension tubes, and a crevice tool.

Hand-Held Vacuum/Blowers

Vacuum/blowers include a shoulder strap and are UL listed. Styles D and F include a micro tool kit consisting of an adapter, 6⅜″ flexible extension wand, dust brush, and crevice tool.

(D) Light duty vacuum/blower gets into narrow openings. Made of steel. Includes a 1¼″ Dia.×19″ Lg. plastic hose, mini blower nozzle, round brush, crevice tool, and a 12-ft. power cord with three-prong plug. Operates on 110 VAC, 60 Hz.

(E) Standard duty vacuum/blower tackles larger jobs than Style D. Made of plastic. Includes a 1¼″ Dia.×6-ft. Lg. plastic hose, 20″ extension wand, utility nozzle, reducer to attach accessories directly to unit, round brush, crevice tool, and 35-ft. power cord with three-prong plug. Operates on 120 VAC, 60 Hz.

(F) Fine-filtration vacuum/blower is 99.97% efficient at 0.3 microns and is more powerful than the above units. It is made of steel and can pick up printing toner. Its two-speed motor provides low power for cleaning intricate areas and maximum power for heavy duty cleanups. Comes with a 1¼″ Dia.×6-ft. Lg. plastic hose, two 20″ extension wands, two tapered nozzles, dust brush, crevice tool, utility tool, and 12-ft. power cord with three-prong plug. Also includes a permanent cloth bag. Operates on 115 VAC, 60 Hz.

Optional Nylon Carrying Case for Style F	9848T61	Each	$65.00

Fine-Filtration Canister Vacuum

When you need a vacuum with a greater capacity than hand-held vacuums, choose this canister vacuum that has a HEPA filter that is 99.97% efficient at 0.3 microns. Vacuum is made of plastic. Includes a 1 11/32″ Dia. × 6-ft. Lg. vinyl hose, telescoping wand (23 1/2″ to 39 1/2″), carpet/hard floor nozzle, combination brush nozzle, crevice tool, built-in carrying handle, a 20-ft. power cord with two-prong plug, two rear wheels, and one front swivel caster. Operates on 120 VAC, 60 Hz. UL listed.

Note: Not rated for hp.

Replacement Collection Bags (3/Pkg.)			63115T25	Pkg. $4.09

No-Mess Static-Control Vacuums

A&B

C

No need to worry about touching dirty filters—the filters in these vacuums are self-contained in a canister, eliminating messy changes. Simply pull the canister out and replace with a new one. Vacuums are grounded and ESD- (electrostatic discharge) safe, meaning they can be used around sensitive electronic equipment. All have a 1 1/4″ dia. retractable thermoplastic rubber hose, 16″ wand, crevice tool, crevice tool brush, and a 10-ft. power cord with three-prong plug. Operate on 110 VAC, 50/60 Hz.

(A&B) Hand-Held Vacuums

Both include a retractable hose (stretches from 2 1/2 ft. to 6 ft.) and a molded plastic case.

Style A also comes with a round dust brush and a standard filter that is 99.865% efficient at 5 microns. The optional HEPA filter is 99.97% efficient at 0.3 microns.

Style B has a standard filter that is 99.865% efficient at 0.3 microns. Optional HEPA filter is 99.97% efficient at 0.3 microns. Optional ULPA filter is 99.99% efficient at 0.12 microns. UL listed.

Cap.	Ht. × Wd. × Dp.	hp	Amps		Each

Backpack Vacuums

Vacuum

Fine-Filtration Vacuum

Stop dragging a vacuum around. Get the ultimate in cleaning maneuverability with these lightweight vacuums you wear on your back. All have a plastic housing and padded harness.

Vacuum and Vacuum/Blower

Both include a 1 1/2″ Dia. × 4-ft. Lg. plastic hose, 56″ extension wand, floor nozzle, round dust brush, crevice tool, and a 50-ft. power cord with three-prong plug. Operate on 120 VAC, 60 Hz.

Note: Not rated for hp.

Vacuum also includes an upholstery nozzle. Vacuum/blower easily converts to a blower and provides more power than the vacuum. It includes a blower nozzle.

Wet/Dry Vacuums

6 Gallon with Plastic Tank

The economical choice for larger jobs. Motor housing is plastic, and all vacuums have a liquid overflow shut-off valve. Also have four swivel casters. Operate on 120 VAC, 60 Hz.

Vacuum with Plastic Tank with 1¼″ Dia. Accessories— Has an 8-ft. plastic hose, two 20″ extension wands, combination floor nozzle for wet/dry pickup, crevice tool, collection bag, and a 12-ft. power cord with three-prong plug.

Vacuums with Plastic Tank with 1½″ Dia. Accessories— Vacuums have a 12-ft plastic hose, two 20″ extension wands, a floor nozzle with squeegee and brush, utility nozzle, crevice tool, tool holder, and an 18-ft. power cord with three-prong plug.

Vacuum with Plastic Tank with 2½″ Dia. Accessories— Has an 8-ft. plastic hose, two 20″ extension wands, a floor nozzle with squeegee and brush, crevice tool, tool holder, and a 12-ft. power cord with three-prong plug.

Vacuums with Epoxy-Coated Steel Tank with 1¼″ and 2½″ Dia. Accessories— They include these 1¼″ dia. accessories: 7-ft. plastic hose, two 20″ extension wands, floor nozzle with squeegee and brush, utility nozzle, round brush, and crevice tool. They also include these 2½″ dia. accessories: 6-ft. plastic hose, two 20″ extension wands, and a utility nozzle. Both vacuums have an 18-ft. power cord with three-prong plug.

Whisper Quiet Wet/Dry Vacuums

9 Gallon

Quiet enough for office areas, yet powerful enough for demanding jobs. Tank and motor housing are plastic, and all vacuums have a liquid overflow shut-off valve. Vacuums also have a 1¼″ Dia. × 16-ft. Lg. plastic hose, two 19½″ extension wands, carpet/floor nozzle with squeegee, utility nozzle, round brush, crevice tool, wet vacuum antifoam sleeve, 16-ft. power cord with three-prong plug, and six swivel casters. Operate on 120 VAC, 60 Hz.

A universal neoprene adapter sleeve is also included so you can attach the vacuum hose to a power tool's dust port. Vacuum head has a power outlet that accepts a power tool with a three-prong plug. An automatic on/off switch allows the vacuum to turn on when you turn your power tool on. Use with tools and accessories up to 19 amps.

Vacuums ***with HEPA filter*** come with a HEPA filter that is 99.97% efficient at 0.3 microns.

Wet/Dry Vacuums with Corrosion-Resistant Tank

Tanks are stainless steel and provide superior corrosion resistance. Motor housing is plastic, unless noted. Vacuums have a liquid overflow shut-off valve. Operate on 120 VAC, 60 Hz. UL listed.

Vacuum with 1¼″ Dia. Accessories— Comes with an 8-ft. plastic hose, two 20″ extension wands, a combination floor nozzle for wet/dry pickup, floor/carpet selector nozzle, utility nozzle, round brush, crevice tool, and 18-ft. power cord with three-prong plug. It has four swivel casters.

Vacuums with 1½″ Dia. Accessories— All have two-stage motors to allow easier pickup of heavy and wet debris. Vacuums come with a 12-ft. plastic hose, two 25″ extension wands, floor nozzle (with rug, brush, and squeegee inserts), and a 35-ft. power cord with three-prong plug. All have two rear wheels and two front swivel casters.

The *10-* and *20-gallon vacuums* also have a utility nozzle, round brush, and crevice tool.

Air-Powered Heavy-Suction Wet/Dry Vacuums

15 Gallon

Pick up the heaviest debris with these continuous-duty vacuums—they have the highest suction power of any wet/dry vacuums we offer. All have an aluminum venturi head. They include two 24″ extension wands, floor nozzle, crevice tool, filter, a 20-ft. rubber air supply hose with universal couplings, and a wheeled steel dolly. Tank is steel, unless noted.

Note: Liquid overflow shut-off valve (sold separately below) is recommended for wet pickup.

15-Gallon and ***20-Gallon Capacity***—Both vacuums have a 1½″ Dia.×20-ft. Lg. plastic hose, ½″ ID air supply hose, two rear wheels, and two front swivel casters.

30-Gallon and ***55-Gallon Capacity***—Have a 2″ Dia.×20-ft. Lg. plastic hose (unless noted), ¾″ ID air supply hose, and four swivel casters.

Accessories—The *filter bag* extends filter life. The *HEPA filter* is 99.97% efficient at 0.3 microns. The *extra-silent muffler* reduces vacuum noise without reducing performance.

Wet-Pickup Vacuums with Automatic Pump-Out

No need to manually empty the water from these vacuum tanks—these vacuums pump the water out for you. All have three modes: vacuum only, pump only, and vacuum and pump simultaneously.

Economy Wet/Dry-Pickup Automatic Pump-Out Vacuums

22 Gallon

Vacuums can pick up and pump out liquids at a rate of 6 gpm. Motor housing is plastic. Both vacuums have a tool holder, collection bag, and an 18-ft. power cord with three-prong plug. Also have a liquid overflow shut-off valve, standard ¾″ garden hose thread (GHT) male connection for attaching a drainage hose, and drain for manual emptying. Operate on 120 VAC, 60 Hz. UL listed.

Note: For dry pickup, remove the pump unit.

Both come with 1¼″ dia. accessories: 8-ft. plastic hose, two 20″ extension wands, and combination floor nozzle for wet/dry pickup. They also include 2½″ dia. accessories: 6-ft. plastic hose, two 20″ extension wands, combination floor nozzle for wet/dry pickup, utility nozzle, and crevice tool.

Stainless Steel Tank—Vacuum has two rear wheels and a front caster.

Plastic Tank—Vacuum has four swivel casters.

Large Debris Outdoor Vacuum

Easily clean up littered areas by picking up large debris such as cans, paper, and leaves. Vacuum has a 30″ wide sweeping path. Engine is gasoline powered. Frame, handles, and motor housing are steel. Height adjusts from ¼″ to 3½″ above ground level, so this vacuum goes from flat surfaces to turf. Comes with a 10-ft. plastic vacuum hose, 10-cu. ft. zippered cloth collection bag, and four tires. *Note:* Not recommended for fine dust pickup.

Drum-Top Vacuums

Economy Wet/Dry Vacuum

This economical vacuum attaches to an open-top 55-gallon drum (sold separately on page 1712; minimum 24-ga. drum required). Vacuum has a plastic housing and a liquid overflow shut-off valve. Includes a 1½″ Dia.×12-ft. Lg. plastic hose, claw nozzle, and a 35-ft. power cord with three-prong plug. Operates on 120 VAC, 60 Hz.

Heavy Duty Vacuums

An indicator light tells you when the filters are losing efficiency and should be cleaned or replaced. Vacuums attach to an open-top 55-gallon drum (sold separately on page 1712; minimum 18-ga. drum required). Both have a steel housing. Come with a 1½″ Dia.×10-ft. Lg. plastic hose, 53″ extension wand, crevice tool, and 50-ft. power cord with three-prong plug. Operates on 115/120 VAC, 50/60 Hz.

Also Available: Replacement parts. Please ask for 74805T888 and specify part.

Heavy duty wet/dry vacuum has a squeegee tool and a liquid overflow shut-off valve.

Heavy duty fine-filtration dry-pickup vacuum has a HEPA filter that is 99.97% efficient at 0.3 microns. Includes a round brush, upholstery nozzle, and floor brush.

Air-Powered Drum-Top Vacuums

Mini Wet-Pickup Vacuum

Our smallest drum-top vacuum is great for cleaning up minor liquid spills—just attach it to a 5-gallon pail (sold separately). This continuous-duty vacuum has a steel housing. Also has a liquid overflow shut-off valve. Air inlet connection is ⅜″ NPT female. Comes with a 1¼″ Dia.×6½-ft. Lg. plastic vacuum hose, round suction nozzle, and crevice tool.

Inlet Air, cfm @ psi	Dia.×Ht.

Heavy-Suction Wet/Dry Vacuums

Single Head

These have the most suction power of any drum-top vacuum we offer—great for picking up heavy debris. Attach these continuous-duty vacuums to an open-top 30- or 55-gallon drum (sold separately on page 1712; minimum 22-ga. drum required). Vacuum housing is steel. Air inlet connection is a ¾″ universal coupling. Vacuums come with a 48″ extension wand, nozzle, and crevice tool.

Optional liquid overflow shut-off valve is recommended for wet pickup.

Optional filter bag extends the life of the cartridge filter.

Optional HEPA cartridge filter is 99.97% efficient at 0.3 microns.

Optional extra-silent muffler reduces vacuum noise without reducing vacuum performance.

Dry-Pickup Vacuum for Chips and Powders

Pick up wet or dry chips, powders, and other light particles that create problems in other vacuums. This continuous-duty vacuum attaches to an open-top 55-gallon drum (sold separately on page 1712; minimum 16-ga. drum required). Housing is aluminum. Air inlet connection is ⅜″ NPT female.

Furnished with a 1½″ Dia.×10-ft. Lg. plastic vacuum hose, 24½″ extension wand, two 19″ extension wands, crevice tool, round brush, squeegee nozzle, and utility nozzle. The filter is external and measures 10″ Dia.×22″ Ht.

Wet-Pickup Sump Type Vacuums

Remove coolant, sludge, slurries, and metal chips from sumps and other liquid reservoirs with these wet-pickup continuous-duty vacuums. All have a liquid overflow shut-off valve.

(A) Bung-Hole Wet-Pickup and Pump-Out— Mount in the two openings of a 55-gallon drum with cover (sold separately on page 1712; minimum 16-ga. drum required). Vacuum pumps both in and out at 30 gpm; simply turn the knob to change mode from filling to emptying. Housing is stainless steel. Air inlet connection is ¼″ NPT male. Vacuum comes with a 1½″ Dia.×10-ft. Lg. plastic vacuum hose, 24½″ extension wand, and 90° quick-disconnect elbow.

(B) Standard Wet-Pickup—Mounts to an open-top 55-gallon drum (sold separately on page 1712; minimum 16-ga. drum required). Pumps in at 40 gpm. Housing is steel. Air inlet connection is ½″ NPT male. Comes with a 1½″ Dia.×10-ft. Lg. plastic vacuum hose, utility nozzle, round flexible nozzle, round crevice tool, and a 20-ft. oil-resistant rubber air-supply hose.

Heavy Duty Mobile 55-Gallon Collection Drum for Drum-Top Vacuums

Works with open-top 55-gallon drum-top vacuums that have a minimum diameter of 23½″ (not compatible with 6305T41 or 7789T11 drum-top vacuums sold separately above). Made of 12-ga. steel, drum has a valve for draining liquid, an 8″×10″ bottom door for removing debris, and 7″ Wd.×2½″ Ht. forklift pockets that are 19½″ center-to-center. Four casters (two rigid and two swivel) provide mobility. For more 55-gallon open-top steel drums, see page 1712.

Ht.×Wd.×Dp.		
46″×27″×31″	7119T5	$1,063.60

For information about static pressure (SP), see page 656.

Mobile Single-Stage Dust Collectors

Here's a great combination of simple operation and effective performance in one flexible system designed for wood dust collection. The base has wheels, so you can move the unit around the shop for connection to different systems. All wood dust particles collect in cotton/polyester filter bags (included) that are 95% efficient for wood dust particles 25 microns and larger. Collectors are 15- to 24-ga. steel. Motors are totally-enclosed, fan-cooled (TEFC).

696 cfm collector has a two-bag system and includes a 3-ft. cord with three-prong plug.

1,400 cfm collectors have a two-bag system and include an adapter to connect to multiple runs of duct, allowing you to easily use one collector for several pieces of equipment. 2168K56 includes a 6-ft. cord with three-prong plug. 2168K32 has four 6-ft. wire leads for hardwiring.

2,431 cfm collector has a four-bag system and includes an adapter to connect to multiple runs of duct, allowing you to easily use one collector for several pieces of equipment. Comes with four 3-ft. wire leads for hardwiring.

Also Available: Additional replacement parts. Please ask for 2168K888 and specify the McMaster-Carr part number of the dust collector and the replacement part needed.

★ Filter area is the number of square feet of fabric area of an inflated filter bag.

Drum-Mount Two-Stage Dust Collectors

Often called cyclone dust collectors, these powerful units mount on drums for two-stage dust collection (drums not included; use steel drums sold separately on page 1712). In the first stage, larger particles fall into the drum. In the second stage, smaller particles go into the filter bag. Since the larger particles don't pass through the blower, there is less wear on the blower and filter bag. Blowers have a 14-ga. steel housing and a cast aluminum blower wheel. Inlet hose is 5 feet long. *Note:* Not for use with combustible metal dust, including aluminum, magnesium, and titanium. All motors are totally-enclosed, fan-cooled (TEFC). 115 VAC units have an 8-ft. cord with three-prong plug, unless noted. 230/460 VAC units have nine wire leads.

450 cfm collectors come with a cotton filter bag that is 99% efficient for particles 10 microns and larger. ***700 cfm*** and ***1,100 cfm collectors*** come with a polyester filter bag that is 99% efficient for particles 5 microns and larger. ***1,300 cfm collector*** uses the 2133K16 Large-Capacity Dust Bag Kit (sold separately).

Optional ***wheeled dollies*** (sold separately) provide easy movement from job-to-job.

Also Available: Drum-Mount Two-Stage Dust Collectors with a three-phase hazardous location motor. Operate on 230/460 VAC, 60 Hz. Please ask for 2114K66 and specify horsepower.

■ Operates on 115/230 VAC, 60 Hz and has nine wire leads for hardwiring.

Large-Capacity Filter Bag Kits

These polyester fabric bags are 99% efficient for particles 5 microns and larger. Furnished with a mounting kit that includes 5 feet of 6″ diameter hose to attach the bag to the dust collector outlet. 450 cfm dust collectors require the adapter kit (sold separately).

Drum-mount bag kits attach to a 55-gal. drum (not included). They're supported by a hook at the top of the bag; the bottom of the bag tightens around the top of the drum with a belt and quick-release buckle for easy emptying.

Ceiling-mount bag kit includes a suspension ring and hooks. Bag empties from a zipper at bottom.

Drum-Mount Filter Bag Kit

Ceiling-Mount Filter Bag Kit

High-Volume Two-Stage Dust Collectors

Move large quantities of air, dust, and debris through long runs of pipe at higher static pressures than the Drum-Mount Two-Stage Dust Collectors on this page. Also known as cyclone dust collectors, these powerful units separate most waste material in the airflow and deposit it into a dust storage barrel (sold separately). Because less dust passes through the blower, there is less wear on it. Collectors are made of airtight, welded 16-ga. steel with steel braces and supports. Motors are totally-enclosed, fan-cooled (TEFC) and have nine 6″ wire leads for hardwiring. Motor and fan assemblies are easily detached for maintenance. If you wish to recycle the air, an optional ***filter assembly*** should be used to collect fine particles not separated by the collector. They have an attached drum to eliminate extra handling of waste material. Filter bags are made of polyester and are 99% efficient for particles 5 microns and larger.

cfm @ 5″ SP	hp	VAC, 60 Hz	Ph.	Amps	Inlet Dia.	Filter Area★, sq. ft.	Size♦, Ht.×Wd.×Dp.	dB @ 10 ft.		Each

Collector with Optional Filter Assembly

For information about static pressure (SP), see page 656.

Fine-Filtration Cartridge Dust Collectors

Maximize dust collection. The cartridges in these collectors are 99.99% efficient for particles 0.5 microns and larger—great for picking up fine dust such as graphite and talc. Cartridges are cleaned automatically each time the dust collector shuts off and are enclosed to minimize contamination from particles that pass through the collector. The 550 cfm and 1,243 cfm collectors are made of 16-ga. steel; 3,000 cfm collector is 14-ga. steel. All have a three-phase, totally-enclosed, fan-cooled (TEFC) motor with nine 6″ wire leads for hardwiring. Operate on 208-230/460 VAC, 60 Hz. Units have three inlet adapters for connection to multiple machines.

An automatic shaker mechanism cleans the filter media and drops particles into a drawer for easy collection and disposal. The shaker motor is 1/8-hp, single phase, and operates on 115 VAC, 60 Hz, 3.5 amps.

Dust Collector Duct System

We've got everything you need to put together a system to collect sawdust, chips, shavings, and granular material from wood-working operations. The system shown features our Single-Stage Dust Collector (2168K56 sold separately on page 2073); however, the components of this system are compatible with all of our dust collectors.

All components are sold separately—order the parts you need to create a custom system. For hose clamps, see 5415K on page 274. For maximum safety and to avoid a dangerous buildup of static electricity, you must use the ***grounding kit*** (sold separately).

If you need more information on designing and installing a dust collection system, order our book "Dust Collection Basics" (sold separately).

(E) Quick-Disconnect Duct Fitting— Use in place of a hose clamp. Attach to the end of a 4″ dia. hose and then press on to any dust hood for a quick and easy friction fit.

(G) Universal Duct Reducer— This adapter has seven outside dia. step sizes: 1″, 2″, 2½″, 3″, 4″, 5, and 6″. Cut away unneeded steps with a hacksaw.

(J) Duct Reducer with Mounting Flange— Fits over a 3″ dia. hole and is angled upward for easy connection between the machine and a shop vacuum. Has four ¼″ dia. mounting holes (fasteners not included).

(Q) Adjustable Nozzle with Steel Stand— Position the nozzle exactly where you need it. Ideal for use with table saws, lathes, drill presses, and portable power tools. Nozzle is cast aluminum, rotates 360°, and can be angled 180° in any position between straight up and straight down. Stand adjusts from 24″ to 43½″ high.

(S) Remote Control— Allows you to turn your dust collector on and off from up to 75 feet away. The receiver has a 5-ft. cord with three-prong plug. Includes two transmitters and two 9-volt batteries. For use on 110 VAC dust collectors with a maximum 1½ hp.

"Dust Collection Basics" Book	2221K37	Each	$6.67	

Dust Collector Filter Bags and Cartridges

Band Top Filter Bag

Filter Cartridge, Open on Both Ends

Need to replace your dust collector's bag or cartridge? Just match the specs to one that we have here.

Filter bags are polyester. Choose from unfinished top (also known as a raw top) or a Type 301 stainless steel band top. ***Filter cartridges*** are offered open on both ends, or open on one end and closed on the other. The closed end has a ½″ dia. mounting hole (hardware not included).

Pressure Washers

Turn ordinary garden-hose water into pressurized water to power away dirt and grime. All pressure washers have the following:

- High-pressure wire-reinforced rubber hose
- ¾″ garden hose thread (GHT) connection
- Thermal relief valve to protect pump from overheating
- Adjustable pressure (psi), unless otherwise indicated
- Low-pressure soap injector

Electric Pressure Washers

The choice for indoor use, these pressure washers are quieter than gasoline-powered models. All have a 3-ft. wand with trigger gun. They also have a power cord with three-prong plug and ground fault circuit interrupter (GFCI), unless noted.

(A&B) Carry Style— A built-in handle makes these pressure washers easy to carry. They include a high/low pressure nozzle with 0° to 60° adjustable spray angle. CSA certified.

Style A is light duty. It has a rust-, corrosion-, and impact-resistant plastic housing.

Style B is heavy duty. It has a steel mounting plate with rubber feet.

(C) Cart Style— This self-contained pressure washer is made of rust-, corrosion-, and impact-resistant plastic to protect the pump and motor. Cart has two wheels to provide mobility plus convenient storage areas for hoses and a 1-gal. soap container (not included). Comes with a high/low pressure nozzle with 0° to 60° adjustable spray angle.

(D) Wall-Mount Style— To save valuable floor space and provide a permanent location for cleaning in your plant, mount these stainless steel pressure washers on a wall. They require 30″ Ht.×27″ Wd.×21″ Dp. of space and come with brackets with four 7/16″ dia. mounting holes (fasteners not included). Ideal for food-processing plants.

Both pressure washers include 0°, 15°, 25°, and 40° spray angle high-pressure nozzles and a low-pressure soap nozzle. All nozzles are quick-disconnect.

Also Available: Replacement parts. Please ask for part number listed below and specify nozzle, pressure washer hose, trigger gun, wand, valve repair kit, or seal repair kit.

● Pressure washer has a three-phase motor. Plug sold separately, see pages 784-789.

Gasoline-Powered Pressure Washers

With more cleaning power than our electric washers and no power cord to tie you down, these washers are perfect for heavy duty outdoor jobs. All have a Honda engine with pull-cord starter, 3-ft. wand with trigger gun, low-pressure soap nozzle, heavy duty steel frame, and two pneumatic wheels.

2,500-psi Model— Has fixed pressure and 15° and 25° spray angle high-pressure quick-disconnect nozzles.

2,700-psi Model— Has fixed pressure and 0°, 15°, 25°, and 40° spray angle high-pressure quick-disconnect nozzles.

3,500-psi Model— Has 0°, 15°, 25°, and 40° spray angle high-pressure quick-disconnect nozzles. Also has a steel roll cage for extra protection.

Also Available: Replacement parts. Please ask for part number listed below and specify nozzle, pressure washer hose, trigger gun, wand, valve repair kit, or seal repair kit.

Hot-Water Pressure Washers

Great for sanitizing jobs, all of these washers have a burner system that heats water up to 180°F to blast away your toughest grease, oil, dirt, and grime. The burner system has a corrosion-resistant, plastic fuel tank that uses fuel oil, #2 diesel fuel, or kerosene. An on/off heater switch lets you switch between hot and cold water. Washers come with a 3-ft. wand with trigger gun, one low-pressure soap nozzle, and 0°, 15°, 25°, and 40° spray angle high-pressure quick-disconnect nozzles. All have a heavy duty steel frame. For use in well-ventilated areas.

(E) Electric-Powered/Fuel-Heated— These pressure washers run quieter than gas models. Both include a 36-ft. long power cord with three-prong plug and ground fault circuit interrupter (GFCI), and four pneumatic wheels.

(F) Gasoline-Powered/Fuel-Heated— This pressure washer doesn't require an outlet, so it's easier to move around. A Honda engine with pull-cord starter supplies power to the pump and runs the burner system that heats the water. Includes an adjustable thermostat for applications that require lower-temperature hot water, an hour meter for preventative maintenance, a 1.4-gal. capacity gas tank for the engine, a low-oil shut-off feature, and four pneumatic wheels.

Also Available: Replacement parts. Please ask for part number listed below and specify nozzle, pressure washer hose, trigger gun, wand, or seal repair kit.

Steam Cleaner and Pressure-Washer Cleaner/Degreaser

Cuts quickly through grease, oil, and heavy dirt on hard, nonporous surfaces, then rinses clean without leaving a residue. Cleaner is water based and has built-in corrosion inhibitors.

		Each
5 gal.	3219K21	$51.87
55 gal.	3219K23	399.29

Pressure-Washer Replacement Hose

Hose is made of wire-reinforced rubber and has plated-steel fittings with 3/8″ NPT thread connections (rigid male on one end; swivel male on the other end). Hose diameter is 3/8″.

Standard hose is black. ***Nonmarring*** hose is blue.

Hose Lg.	Max. Pressure	Max. Temp.	*Standard*	Each	*Nonmarring*	Each
30 ft.	3,000 psi	200° F	53115K61	$103.70	53115K81	$92.70

Pressure-Washer Extension Wand

To clean hard-to-reach areas, attach this wand to your pressure washer, extend it to your desired height, and lock it in place. Wand has a 3/8″ female quick-disconnect connection to fit most pressure washers and a 1/4″ female quick-disconnect nozzle connection. It is made of aluminum and has a fiberglass handle with trigger spray gun. Maximum pressure rating is 3,000 psi. For nozzle (not included), see 31905K on page 2086.

Retracted Lg.	Extended Lg.		Each
6 ft.	18 ft.	32075K84	$163.83

Water Broom

Attach this broom to a garden hose to sweep away dirt and dust—its brass water jets turn your hose water into pressurized water for quick, easy cleaning. Also has a brass ball valve with shut-off lever, two swivel casters, and a 3/4″ garden hose thread (GHT) female connection. Broom is 36″ wide with a 48″ handle. Maximum temperature is 100° F. Made of steel.

Max. Flow	Max. Pressure		Each
3 gpm	180 psi	7041T11	$219.76

Steam Cleaning Systems

Drum Not Included

Connect these systems to existing 60- to 125-psi steam lines to remove dirt, grease, and heavy oils from most surfaces in your plant. No electrical connections required—connect to a 3/4″ NPT female steam outlet with a maximum steam temperature of 350° F and siphon detergent from a drum (not included).

Both steam cleaning systems have an 8 1/2″ Ht. × 7″ Wd. × 3 1/2″ Dp. steel control panel with pressure gauge. Use the control panel to regulate the steam/detergent mixture and change the temperature and velocity of the solution being discharged. Discharge capacity is 2 to 3.2 gpm.

Systems come with a steam gun with 45″ steel wand and swivel handle, two spray nozzles, a 1/2″ dia. wire-reinforced rubber steam hose, and a 5-ft. detergent siphon hose. *Note:* The steam gun must be within inches of your surface for effective cleaning.

		Each
Steam Cleaning System with 25-ft. Hose	3157K2	$1,488.18
Steam Cleaning System with 50-ft. Hose	3157K4	1,604.15

Steam Guns for Inline Steam Systems

Standard Pressure

High Pressure

Standard Pressure— Guns have a 3-ft. stainless steel wand with plastic trigger handle, a brass nozzle with 40° flat spray angle, a 1/2″ dia. wire-reinforced rubber steam hose, two hose clamps, and two barbed hose fittings.

High Pressure— The choice for heavy duty cleaning, these guns have a 3-ft. steel wand with zinc-plated steel lever handle, stainless steel valve, a 45° angled nozzle holder (nozzle not included; sold separately), and 1/2″ NPT female inlet connections.

	Max. Pressure	Max. Temp.		Each

Nozzle for High-Pressure Guns			9450T57	Each $88.18

High-Pressure Wash Guns

A-C

With Optional Extension

D&E

Add one of these guns to your pressure washer or high-pressure spray system. All guns have a front trigger, impact-resistant nylon housing, high-pressure 25° angle spray nozzle, and a trigger guard that protects the trigger from damage.

(A-C) Wash Guns with Front Inlet Connection— All guns have a trigger lock that prevents accidental discharge. *Styles A* and *B* have an internal brass valve body. *Style C* has an internal stainless steel valve body for added durability and corrosion resistance.

(D&E) Wash Guns with Rear Inlet Connection— Have an internal brass valve body. *Style E* has a brass swivel inlet connector for easier gun handling and to prevent hose from kinking.

Maintenance Kits— Include replacements for parts prone to wear.

Optional Extensions— Get into those hard-to-reach areas with these 18″ and 36″ long extensions. Extensions are nickel-plated steel and include a 25° angle spray nozzle.

Optional Swivel Inlet Connectors— Provide easier gun handling and prevent hose from kinking. Connectors are brass.

Replacement Spray Nozzles— For use with wash guns. Nozzles will not fit optional extensions.

High-Flow Wash Guns

Use these wash guns for washdown, rinsing, and general cleanup. *Note:* These guns should not be connected to steam lines.

Swivel inlet connector provides easier gun handling and prevents hose from kinking.

Bronze body wash guns are the economical choice. *Aluminum body* wash guns are lightweight and durable. *Stainless steel body* wash guns are corrosion resistant and more durable than bronze and aluminum.

(A) Miniature— Half the weight of Style B models, these smaller guns have a rubber cover that protects you from exposure to high water temperatures and minimizes damage to the gun if dropped. Both have a ¾″ ID barbed hose inlet connection.

(B) Standard— Have the same rubber cover design as the miniature guns. All have a ¾″ ID barbed hose inlet connection, except the *25 gpm bronze* models, which have a ½″ NPT female inlet connection.

(C) Adjustable Flow— Change out the spray cap to switch the water flow. Trigger adjusts the spray from a solid stream to a broad cone. All have a rear trigger and a rubber cover to protect you from exposure to high water temperatures. Guns come with a ¾″ garden hose thread (GHT) female swivel inlet connector with a ring to hold the trigger in place for continuous spraying. If connector is not used, inlet connection is ½″ NPT female.

(D) Insulated with Trigger Guard— Insulated handle keeps your hand cool, even when spraying hot solutions. Guns have a trigger guard to protect trigger from damage. Trigger changes the spray from solid stream to broad cone and can be locked into place. The *15.5 gpm* model has a ⅜″ NPT female connection. The *21 gpm* model has a ½″ NPT female connection and a safety sleeve to cover hot, exposed fittings.

Maintenance Kits— Have replacements for parts that are prone to wear.

Extended Reach Wash Guns with Trigger Guard

Access hard-to-reach areas with the brass extension. Guns have a trigger guard to protect trigger from damage. *Nylon body* wash guns are impact resistant and have a ¼″ NPT female inlet connection. *Aluminum body* wash guns are lightweight and durable. They have a ¼″ National Pipe Straight (NPS) thread male inlet connection.

Maintenance Kits— Have replacements for parts that are prone to wear.

Gun Body Material	Max. Flow	Max. Pressure	Max. Temp.	Trigger Style	Wash Guns	Each	Maintenance Kits	Each

Economy Wash Gun with Trigger Guard

Gun has a trigger lock to prevent accidental discharge, a trigger guard to protect trigger from damage, and a 25° angle spray nozzle. Has a ¼″ NPT female inlet connection and an 11/16″-16 Unified National (UN) pipe thread male outlet connection.

Maintenance Kits— Have replacements for parts that are prone to wear.

Gun Body Material	Max. Flow	Max. Pressure	Max. Temp.	Trigger Style	Wash Gun	Each	Maintenance Kits	Each
Plastic	5 gpm	150 psi	120° F	Front	6835T11	$52.41	6835T12	$16.10

Air- and Water-Powered Wash Guns

The powerful combination of air and water creates a high-velocity, atomized spray. These guns also can be used to siphon. All have a ¼″ NPT female air inlet and ¾″ garden hose thread (GHT) female connections.

Standard— Air and water controls adjust individually. Made of chrome-plated zinc with a rubber pistol grip. *Knob control* lets you set and maintain desired force.

Accessory kit includes 9″ and 17″ nozzle extension tubes, 6-ft. vinyl siphon hose with quick-disconnect couplings, and an adapter that makes a seal-tight connection to any round opening that is ¾″ dia. to 2½″ dia.

Extended Reach— The 12″ stainless steel nozzle gets to hard-to-reach places. Guns have a cast aluminum head assembly, an insulated handle, and a shut-off valve that lets you control water flow.

Standard with Rear Trigger Control **Standard with Knob Control** **Extended Reach**

	Inlet Air, cfm @ psi	Max. Flow	Pressure Range	Max. Temp.	Each

Accessory Kit for Standard Wash Guns					5448K31 34.46

Air-Powered Siphon Wash Guns

Guns can be used to clean as well as apply chemicals and solvents.

Squeeze-Grip Wash Guns

Squeeze the handle to spray. All have a rubber grip, and you can remove the 8-ft. siphon hose to operate in air-only mode. **To Order:** Please specify 1/4″, 3/8″, or 1/2″ NPT female air inlet connection.

Styles A and ***B*** are made of nickel-plated brass with an oil-resistant rubber siphon hose. *Style A* has a straight extension. *Style B* has an angled extension.

Style C delivers more solvent than the other siphon wash guns. It is made of brass and has a heavy duty reinforced rubber siphon hose.

Wash/Foam Guns with Dispenser

Wash Gun

Connect these guns to your garden hose and automatically dispense solution without dragging around a siphon hose. The nozzle has a 3/4″ garden hose thread (GHT) female connection and insulated handle. Use the attachment to adjust the spray pattern from mist to solid stream. Both have a brass mixing head and 1-qt. plastic bottle.

Wash Gun— The rinse lever allows you to instantly change from using the wash solution to rinsing with clean water. Set to mix 2 oz. of cleaner per gallon of water.

Foam Gun— Creates a thick foam. Gun mixes up to 12 oz. of foaming chemicals per gallon of water.

	Max. Flow	Pressure Range	Max. Temp.		Each
Wash Gun	3 gpm	40-90 psi	160° F	**3154K11**	$49.74
Foam Gun	1.5 gpm	40-90 psi	160° F	**3239K12**	65.02

Underwater Vacuum

Easily remove muck, debris, and sediment (even small pebbles and leaves) from underwater surfaces. This vacuum uses water pressure from your garden hose (not included) to create suction for vacuuming. Debris enters through the handle and exits through the discharge hose.

Vacuum has a 3/4″ garden hose thread (GHT) female connection and requires a minimum pressure of 50 psi. Comes with a 1 1/4″ Dia. × 10 ft. Lg. plastic discharge hose, 36″-72″ long aluminum telescoping handle, on/off switch, brush, and hose adapter to connect additional discharge hose.

		Each
Vacuum	**7153T11**	$102.08
Repl. Discharge Hose	**7153T12**	15.00

Garden Hose Nozzles

All nozzles have 3/4″ garden hose thread (GHT) female connections and include washers.

(D&E) Continuous-Flow Nozzles

These nozzles provide a constant, fixed stream of water.

D Full Force— Made of brass. Use if a shut-off valve isn't needed.

Nozzle Lg.	Max. Flow	Max. Pressure	Max. Temp.		Each
2″	4.5 gpm	100 psi	195° F	**7678T1**	$3.19
6″	4.5 gpm	100 psi	195° F	**7678T2**	15.45

E Water Saver— Squeeze the nozzle end to start water flow; release the nozzle to stop flow. Neoprene nozzles are chemical resistant.

Standard-flow nozzles provide full water flow.

Jet-flow nozzles offer a concentrated stream while using less water.

Nozzle Lg.	Max. Flow	Max. Pressure	Max. Temp.	Nozzle Material		Each
Standard Flow						
8 7/8″	6.5 gpm	125 psi	150° F	Rubber	**3880T21**	$28.25
8 7/8″	7 gpm	125 psi	150° F	Neoprene	**3880T24**	36.87
Jet Flow						
8 7/8″	4.5 gpm	80 psi	150° F	Rubber	**3880T22**	29.56
8 7/8″	5 gpm	125 psi	150° F	Neoprene	**3880T25**	40.62

(F-K) Adjustable-Flow Nozzles

Twist the barrel to adjust spray pattern from mist to full stream.

F Mini— Solid brass body with integrated rubber washer.

G Standard— Have a solid brass body that's rugged and reliable.

H Insulated— An insulated thermoplastic rubber cover protects you from high water temperatures. Body is die cast zinc with a brass tip.

J&K With Protective Guard— *Style J* has a plastic body and a protective plastic guard at the nozzle end. *Style K* has a plastic body with a zinc coupling and an insulated rubber handle. It also has a protective rubber guard at the nozzle end.

	Nozzle Lg.	Max. Flow	Max. Pressure	Max. Temp.		Each
F	1 3/4″	5.5 gpm	400 psi	175° F	**7261T12**	$8.81
G	4″	12 gpm	150 psi	200° F	**7484T1**	9.90
G	6″	12 gpm	150 psi	200° F	**7484T5**	18.25
H	6 3/8″	10 gpm	200 psi	100° F	**7484T8**	9.82
J	4 3/4″	8 gpm	100 psi	♣	**7641T34**	10.40
K	5″	10 gpm	60 psi	♣	**7641T44**	11.43

♣ For cold water use. Not temperature rated.

(L-S) Lever-Activated Nozzles

The squeeze lever controls both the flow and the spray pattern, unless otherwise indicated. All have a locking clip to hold nozzle open for continuous spraying.

L Economy— Body is die cast zinc.

M Marine Grade— Specially designed for use around salt water, this nozzle has a shatterproof plastic body and a stainless steel internal spring for corrosion resistance. Has a 3/4″ garden hose thread (GHT) male connection at the spray end for attaching hose-end accessories.

N&P Insulated— Grip is insulated to protect your hands from extreme water temperatures. Body is die cast zinc.

Style N has a plastic molded contour grip.

Style P has a cushioned vinyl molded contour grip and 3/4″ garden hose thread (GHT) male connection at the spray end for attaching hose-end accessories. It includes a protective thread cover. Water flow is controlled by the lever; spray pattern is controlled by the brass nozzle.

Q Insulated with Adjustable Spray Pattern— Simply twist the spray head to adjust the spray pattern. Body is plastic, and tip is zinc. Nozzle has a zinc coupling and an insulated nylon handle.

R&S Dial Select— Turn the dial to select a spray pattern. Both nozzles have a five-position dial with seven spray patterns: shower, jet, cone, mist, stream, full, and flood. Body is die cast zinc.

Style S has a cushioned vinyl grip to protect hands from extreme water temperatures.

	Max. Flow	Max. Pressure	Max. Temp.		Each
L	8.8 gpm	100 psi	140° F	**7445T12**	$4.39
M	8.8 gpm	100 psi	100° F	**7488T16**	3.39
N	8.8 gpm	100 psi	140° F	**7239T11**	7.97
P	6 gpm	120 psi	160° F	**7433T53**	11.09
Q	6.3 gpm	60 psi	♣	**7557T62**	5.88
R	8.8 gpm	100 psi	100° F	**7447T11**	14.03
S	8.8 gpm	100 psi	150° F	**7447T12**	13.37

♣ For cold water use. Not temperature rated.

For faucets with garden hose threads (GHT), see page 462.

Garden Hose

Hose has threaded brass couplings on each end (one male and one female) with washer, unless noted. All have 3/4″ garden hose threads (GHT) except the 1″ ID hose (72195T36), which has National Pipe Straight Hose (NPSH) threads.

Note: Not recommended for high-pressure applications.

Vinyl Hose— This economical hose is lightweight and nonmarring. Color is green.

Duraflex Vinyl/Rubber Hose— Combines the flexibility of vinyl with the durability and abrasion resistance of rubber. Hose is lightweight and nonmarring. Color is green, unless noted.

Heavy Duty Rubber Hose— This extremely durable EPDM rubber hose has excellent weather resistance and good chemical resistance. Color is black.

Continuous-Flow Vinyl Hose— Internal grooves in this hose ensure a continuous flow of water even when the hose is kinked. Hose has brass-coated anodized aluminum couplings on each end. Color is black with a yellow stripe.

Extreme-Duty Polyurethane Hose— An excellent alternative to heavier, bulkier rubber hoses. Extremely lightweight and tough, hose resists cracking and remains flexible in subzero temperatures. Color is light brown.

Hot-Water Rubber Hose— This all-weather reinforced rubber hose handles hot water and resists abrasion. Color is red.

Drinking-Water Vinyl Hose— Made of FDA-compliant materials, these products can be used with drinking (potable) water in all states except California, Maryland, and Vermont as of January 1, 2012, unless noted. Color is white with a blue stripe.

♦ This product is ANSI certified for use with drinking (potable) water in all states as of March 1, 2010.

Self-Retracting Garden Hose

No need for a hose reel—this polyurethane hose retracts on its own. It's nonmarring, resists abrasion, and remains flexible in subzero temperatures. Couplings are nickel-plated brass and have 3/4″ garden hose threads (GHT) on each end (one male and one female). Female end includes a washer. Hose coil is 4 1/8″ dia. Color is yellow.

Note: For full hose retraction, be sure to drain all water from hose.

Hose ID	Extended Hose Lg.	Retracted Hose Lg.	Max. Working Pressure	Max. Temp		Each
3/8″	25 ft.	15″	135 psi	165° F	**7118T4**	$56.58
3/8″	50 ft.	30″	135 psi	165° F	**7118T6**	86.42

Easy-to-Carry Garden Hose with Reel

A top handle makes it easy to move this garden hose with reel from place to place.

Hose is green vinyl. It has a 3/4″ garden hose thread (GHT) male brass coupling on one end and a 54″ faucet-connection hose with a 3/4″ GHT female plastic quick-connect coupling on the other end. Washers are included. For cold water use. Hose is not temperature rated.

Reel is made of light gray plastic and has a hand crank for winding the hose. Comes with three 1/4″ slotted holes for wall mounting (fasteners not included).

Reel Size, Ht. × Wd. × Dp.	Hose ID	Hose Lg.	Max. Working Pressure		Each
18 1/2″ × 16″ × 8 3/4″	1/2″	65 ft.	75 psi	**7671T1**	$61.81

Auto-Rewind Garden Hose with Reel

A quick tug on the garden hose allows it to rewind automatically without the hand winding effort required with other hose reels. When pulled out slowly, hose catches at 3-ft. intervals, so you only unwind the length you need.

Hose is white vinyl and has a 60″ faucet-connection hose with 3/4″ garden hose thread (GHT) connection. Washers included.

Reel is made of UV-stabilized, light gray plastic. It sits level on the ground or can be wall mounted with the included bracket. Bracket has four 9/32″ dia. mounting holes (fasteners not included) and allows reel to swivel 138°.

Reel Size, Ht. × Wd. × Dp.	Hose ID	Hose Lg.	Max. Working Pressure	Max. Temp.		Each
18 1/2″ × 11″ × 19 1/2″	5/8″	50 ft.	140 psi	140° F	**7138T12**	$180.82

For faucets with garden hose threads, see page 462.

Garden Hose Holders and Reels

(A-C) Garden Hose Holders

Drape your hose over these holders to keep it out of your way. Hose capacity is based on 5/8″ ID hose (not included).

(A) Wall-Mount Steel Holder— An economical choice. Has two 1/2″ dia. mounting holes (fasteners not included). Color is green.

(B) Wall-Mount Heavy Duty Stainless Steel Holder— Made of stainless steel for corrosion resistance. Has two 5/16″ dia. mounting holes (fasteners included).

(C) Wall-Mount High-Capacity Stainless Steel Holder— As corrosion resistant as Style B, but this model holds more hose and can tilt and swivel for easier hose removal. Has four 5/16″ dia. mounting holes (fasteners included).

	Ht. × Wd. × Dp.	Hose Cap.		Each
A	8 1/4″ × 9 1/4″ × 8″	100 ft.	**53325K35**	$6.53
B	8 1/2″ × 8″ × 8″	150 ft.	**53325K33**	31.44
C	13″ × 5″ × 5″	200 ft.	**53325K36**	71.46

(D-G) Garden Hose Reels

Wind your garden hose around these reels to keep it neat and organized. Reels include a faucet-connection hose that has a 3/4″ garden hose thread (GHT) connector with a washer to attach directly to your water source. Hose capacity is based on 5/8″ ID hose (not included).

(D) Wall-Mount Plastic Reel— An economical choice, this reel includes a hose guide, top storage tray, mounting fasteners, and a 36″ long, 5/8″ ID vinyl faucet-connection hose. Garden hose is wound perpendicular to the wall. Color is dark beige.

(E) Wall-Mount Heavy Duty Steel Reel— Reel comes with a 60″ long, 5/8″ ID rubber faucet-connection hose. Garden hose is wound perpendicular to the wall. Reel has eight 1/2″ dia. mounting holes (fasteners not included). Color is tan.

(F) Wall-Mount Heavy Duty Stainless Steel Reel— The same as the Wall-Mount Heavy Duty Steel Reel (Style E) but with stainless steel construction for corrosion resistance.

(G) Mobile Steel Reel— Take your garden hose wherever you need it—this reel has four pneumatic tires for mobility. Includes a 72″ long, 5/8″ ID vinyl faucet-connection hose and a washer. Color is green.

	Ht. × Wd. × Dp.	Hose Cap.		Each
D	19″ × 21″ × 19″	225 ft.	**63165T36**	$52.27
E	18″ × 17 1/2″ × 16 1/2″	200 ft.	**7079T18**	109.52
F	18″ × 17 1/2″ × 16 1/2″	200 ft.	**7079T28**	227.27
G	44 1/2″ × 24 1/2″ × 40″	400 ft.	**75225T21**	186.76

Garden Hose/Faucet Fittings

Garden Hose Shut-Off Valves

Save trips to the faucet to shut off the water by attaching these fittings to the end of your garden hose. Valves have 3/4″ garden hose thread (GHT) connections on each end (one male and one female) and include washers.

Material	Max. Pressure	Max. Temp.		Each
Plastic	100 psi	110° F	**7082T24**	$2.47
Zinc	125 psi	♣	**7082T14**	4.50
Brass	120 psi	120° F	**7082T34**	7.17

♣ For cold water use. Not temperature rated.

Garden Hose Multi-Faucet Fittings with Shut-Off Valves

Two-Outlet Brass Fitting

Convert one faucet into two or four convenient outlets. Each outlet has individually operated shut-off valves.

Fittings have 3/4″ garden hose thread (GHT) male and female connections. Washers are included.

Material	Max. Pressure	Max. Temp.		Each
Two Outlets				
Plastic	100 psi	100° F	**6308T12**	$3.17
Zinc	110 psi	110° F	**6308T13**	5.02
Brass	120 psi	120° F	**7459T11**	10.47
Four Outlets				
Brass	120 psi	120° F	**7459T21**	22.04

Garden Hose Savers

Flexible Connector

Gooseneck Swivel

Connect these fittings between your hose and faucet to extend the life of your garden hose and eliminate kinks. Connections are 3/4″ garden hose thread (GHT) on each end (one male and one female). Washers are included.

Flexible Connector— Has a reinforced-vinyl connector hose, brass ends with a female plastic coupling, and a flexible steel outer liner.

Gooseneck Swivel— Has a solid brass fitting that swivels 360° to prevent the hose from kinking at the faucet. Fitting has a shut-off valve.

	Lg.		Each
Flexible Connector	6 1/4″	**6221T11**	$6.36
Gooseneck Swivel	3″	**73935T74**	6.06

Quick-Disconnect Garden Hose Fittings

Plastic

Brass

Fittings have 3/4″ garden hose thread (GHT) connections, one male plug, and one female socket with washer. Choose fittings with a shut-off valve to stop water at the hose end.

Plastic with shut-off valve comes with an extra male plug.

Brass with shut-off valve has an internal shut-off valve. To stop water at the hose end, disengage the male plug from the female socket.

Material		Per Set
Plastic with Shut-Off Valve	**7470T25**	$5.09
Brass without Shut-Off Valve	**71095T9**	9.79
Brass with Shut-Off Valve	**71095T11**	9.83

Garden Hose End Caps

End Cap

End Cap with Chain

These caps have 3/4″ garden hose thread (GHT) female connections. Both caps include a washer.

End cap is made of brass.

End cap with chain prevents cap from being misplaced. Cap is die cast zinc and includes a 12″ brass chain with one 1/4″ dia. mounting hole (fastener not included).

End Cap (2/Pkg.)	**63745T92**	**Per Pkg.**	$4.02
End Cap with Chain	**63745T94**	**Each**	$4.10

Garden Hose Washers

Washer w/Screen

Washers are rubber and fit any 1/2″, 5/8″, or 3/4″ ID garden hose that has 3/4″ garden hose threads (GHT).

	OD × ID × Thick.	Pkg. Qty.		Per Pkg.
Washer	1″ × 5/8″ × 1/8″	10	**62215T78**	$1.34
Washer with Screen	1″ × 9/16″ × 1/8″	3	**62215T88**	1.75

For faucets with garden hose threads, see page 462.

Garden Hose Couplings

To replace a damaged or worn hose coupling, simply cut off the current coupling and secure a new, compatible coupling to the hose. Couplings have ¾″ garden hose threads (GHT). All except the barbed couplings include washers.

Clamp-Down Couplings

Clamp these impact-resistant couplings to your hose and tighten with the included stainless steel screws.

Male *Female*

	For ½″ ID Hose	Each	For ⅝″-¾″ ID Hose	Each
Nylon				
Male	6222T23	$1.74	6222T13	$1.74
Female	6222T24	1.94	6222T14	1.94
Zinc				
Male	—	—	6222T33	6.35
Female	—	—	6222T34	7.14

Barbed Couplings

Barbed shanks grip the hose while hose clamps (required and sold separately) secure the hose to the coupling. Made of brass. The male/female set includes one male and one female coupling.

Male *Female*

Hose clamps are worm-drive style and made of stainless steel with a stainless steel screw.

	For ½″ ID Hose	Each	For ⅝″ ID Hose	Each	For ¾″ ID Hose	Each
Male	7461T54	$4.04	7461T55	$3.96	7461T56	$3.40

Hose Clamps for ½″ ID Hose	10	5416K11	$9.27
Hose Clamps for ⅝″ and ¾″ ID Hose	10	5416K33	9.27

Gripper Couplings

Crimp the steel gripping tabs to your hose with pliers. Each set includes one male and one female coupling. Made of brass.

Male *Female*

For Hose ID		Per Set
½″	7462T11	$7.64
⅝″	7462T12	7.64
¾″	7462T13	6.68

Garden Hose Menders

Clamp Down

Gripper

Barbed

Clamp

It's easy to economically repair damaged garden hose. Cut out the damaged section of hose and join the two remaining pieces by securing them to each end of the mender.

Clamp-Down Menders— Clamp these impact-resistant menders to each hose end and tighten with the included stainless steel screws.

Gripper Menders— Crimp the steel gripping tabs to your hose with pliers.

Barbed Menders— Barbed shanks grip the hose while hose clamps (required and sold separately) secure the hose to the coupling. ***Hose clamps*** are worm-drive style and made of stainless steel.

Material	For Hose ID	Pkg. Qty.		Each

Garden Hose Fittings and Adapters

All have ¾″ garden hose threads (GHT). Female hose ends include rubber washers.

Garden Hose-to-Garden Hose Fittings

Male connections are rigid; female are swivel. Made of brass. The male/female set includes one male and one female coupling.

Male *Female*

GHT (on both ends)	Max. Pressure	Max. Temp.	Pkg. Qty.		Per Pkg.

Spray Nozzles

Please Read Before Ordering: Pipe size is the accepted industry designation, not the actual size. To determine pipe size, measure the inside diameter (ID) or outside diameter (OD), as shown at left. Then, round up to the closest fitting ID or OD listed in the chart and select the corresponding pipe size. For example, if your fitting ID or OD measures 1 3/16″, the next highest ID or OD in the chart is 1 3/8″, and its corresponding pipe size is 1″.

Fitting ID or OD	3/8″	1/2″	5/8″	3/4″	1″	1 3/8″	1 5/8″	1 7/8″	2 3/8″
Pipe Size	1/8″	1/4″	3/8″	1/2″	3/4″	1″	1 1/4″	1 1/2″	2″

About Spray Nozzles

Spray nozzles are used for jobs such as cleaning, cooling, rinsing, controlling dust, applying coatings, humidification, pressure washing, and air drying. Use the chart at the top of the page to determine the proper pipe size.

Brass offers good corrosion resistance. ***Copper-nickel*** is more corrosion and rust resistant than brass. ***Stainless steel*** has better corrosion, abrasion, and chemical resistance than brass. It also has good internal abrasion resistance. ***PVC*** offers very good corrosion and chemical resistance. ***PVDF*** offers excellent chemical and corrosion resistance. ***PFA*** and ***PTFE*** are chemical resistant and the most corrosion-resistant materials we offer.

Spray Patterns

Flat *Full Cone* *Hollow Cone* *Square* *Solid Stream*

Spray Angles

Flat Spray Nozzles

All nozzles produce a flat, thin spray pattern. Good for washing parts and jobs that involve products moving on a conveyor.

Flat Spray Nozzles

Flat

Great for general cleaning, washing asphalt and concrete, air drying, etching, foam control, and applying coatings. Maximum pressure is 1,000 psi. All have an NPT male connection.

Brass nozzles have a maximum temperature of 450° F. ***Type 303 stainless steel nozzles*** have a maximum temperature of 800° F.

To Order: For all nozzles, please specify spray angle: 30°, 50°, 65°, 80°, or 120°.

Wide-Angle Deflected Flat Spray Nozzles

Flat

An extra-wide spray angle is deflected 75°, producing a low-impact spray for maximum coverage. The angle makes these nozzles a good choice for rinsing and cooling jobs as well as for foam control and applying coatings. Maximum pressure is 60 psi. All have an NPT male connection.

Brass nozzles have a maximum temperature of 800° F. ***Type 303 stainless steel nozzles*** have a maximum temperature of 1400° F.

(Continued on following page)

For information about spray nozzles and pipe size, see page 2082.

Flat Spray Nozzles *(Continued from previous page)*

High-Impact Deflected Flat Spray Nozzles

Spray is deflected off the face of the nozzle at a narrow angle to create the highest impact of all our flat spray nozzles. Use them for foam control and for washing vehicles, gravel, asphalt, and concrete. Spray angle is 50°. Maximum pressure is 500 psi. All have an NPT male connection.

Brass nozzles have a maximum temperature of 450° F. ***Type 303 stainless steel nozzles*** have a maximum temperature of 800° F.

Food-Grade Chemical- and Corrosion-Resistant Plastic Flat Spray Nozzles

Not only do these nozzles offer excellent abrasion, chemical, and corrosion resistance, they are also made of FDA-compliant PVDF for use in many food and pharmaceutical applications. All nozzles are good for washing asphalt and concrete as well as for foam control and applying coatings. Spray angle is 80°. Maximum pressure is 150 psi. Maximum temperature is 200° F. All nozzles have an NPT male connection.

Maximum Chemical- and Corrosion-Resistant Plastic Flat Spray Nozzles

Caustics, organic solvents, acids, and ultrapure liquids (such as deionized water) are no problem for these nozzles. They are clog resistant and are good for washing asphalt and concrete as well as for applying coatings. Choose one that projects spray from the side or straight out. Made of PFA. Maximum pressure is 40 psi. Maximum temperature is 75° F. All nozzles have an NPT male connection.

Quick-Change No-Drip Brass Flat Spray Nozzles

These multipiece nozzles make it quick and easy to remove and replace spray tips. Good for washing asphalt and concrete as well as for foam control and applying coatings.

Each nozzle consists of a nozzle body, cap, ball check valve, and spray tip. Simply unscrew the cap to clean or replace the spray tip. The ball check valve eliminates dripping when nozzle has been turned off and has a filter with a strainer (100×100 mesh strainer for 1/8" pipe size; 50×50 mesh strainer for 1/4" pipe size). Maximum pressure is 500 psi. Maximum temperature is 500° F. All nozzles have an NPT male connection. **To Order:** Please specify spray angle: 40°, 80°, or 110°.

Quick-Mount Swivel Flat Spray Nozzles

Just drill a 9/16" hole anywhere along a pipe and snap on these nozzles. They make it quick and easy to remove and replace spray tips. Made of reinforced plastic, all have a 300 Series stainless steel clamp that grips the pipe and an EPDM rubber gasket that prevents leaks. All nozzles are good for foam control. Nozzles swivel 52° for directional spraying. Spray angle is 65°, unless noted. Maximum pressure is 100 psi. Maximum temperature is 175° F.

With Quick-Change Tips— These nozzles have replaceable tips (simply give them a 1/4 turn to remove) that maintain spray pattern alignment. All tips have two O-rings to prevent leaks.

For information about spray nozzles and pipe size, see page 2082.

Full Cone, Hollow Cone, and Square-Pattern Spray Nozzles

An excellent choice for cooling as well as dust- and foam-control applications. ***Full cone*** and ***square-pattern spray nozzles*** provide a uniform distribution of droplets. ***Hollow cone spray nozzles*** produce a fine, more atomized droplet.

Full Cone Spray Nozzles

Full Cone

Male

Female

The full cone spray pattern and low flow rates of these nozzles make them good for distributing fluids, cooling, washing, and rinsing. Maximum pressure is 400 psi. ***Brass nozzles*** have a maximum temperature of 450° F. ***Type 303 stainless steel nozzles*** have a maximum temperature of 800° F.

To Order: For all nozzles, please specify spray angle (60°, 90°, or 120°) and NPT connection (male or female).

High-Volume Clog-Resistant Full Cone and Hollow Cone Spray Nozzles

Full Cone

Hollow Cone

With a unique spiral design, these nozzles produce higher flow rates and have a fine, atomized spray. They're great for dust control, cooling, and humidification applications. Connection is NPT male. ***Brass nozzles*** have a maximum pressure of 400 psi. Maximum temperature is 450° F. ***Type 316 stainless steel nozzles*** have a maximum pressure of 400 psi. Maximum temperature is 800° F. ***PTFE nozzles*** have a maximum pressure of 60 psi. Maximum temperature is 300° F.

To Order: Please specify spray angle: 60°, 90°, or 120° for full cone; 50° or 120° for hollow cone.

For information about spray nozzles and pipe size, see page 2082.

Right-Angle Full Cone and Hollow Cone Spray Nozzles

Made of brass, these nozzles project their spray at a right angle from their threaded connection. Excellent for cooling as well as dust- and foam-control applications. Maximum pressure is 100 psi. Maximum temperature is 450° F. Connection is NPT male.

Full cone provide a uniform distribution of droplets. Spray angle is 90°. ***Hollow cone*** produce a fine atomized droplet. Spray angle is 70°.

Quick-Mount Swivel Full Cone Spray Nozzles with Quick-Change Tips

Just drill a 9/16" hole anywhere along a pipe and snap on these nozzles. They make it quick and easy to remove and replace spray tips while maintaining spray pattern alignment. Made of reinforced plastic, all have a Series 300 stainless steel clamp that grips the pipe and an EPDM rubber gasket that prevents leaks. Nozzles swivel 52° for directional spraying and have replaceable tips (simply give them a 1/4 turn to remove). The tips also have two O-rings to prevent leaks. Excellent for cooling as well as dust- and foam-control applications, these nozzles provide a uniform distribution of droplets. Maximum pressure is 100 psi. Maximum temperature is 175° F.

Full Cone

Solid Stream Spray Nozzles

The precise, concentrated, high-velocity spray pattern of these nozzles reaches longer distances than our other spray patterns. Use them to handle tough cleaning and paper trimming applications. Spray angle is 0°. Maximum pressure is 100 psi. Maximum temperature is 200° F. Connection is NPT male.

Type 303 stainless steel nozzles offer better corrosion, abrasion, and chemical resistance than brass.

Swivel Fittings for Spray Nozzles

Want your spray nozzle to swivel 360° and tilt on a 45° range? Simply attach it to one of these swivel fittings. All fittings have an NPT female outlet for connecting your nozzle and an NPT male inlet for attaching to your piping system. Both the inlet and outlet are the same size. Maximum pressure is 300 psi.

Brass nozzles have a maximum temperature of 800° F.

Type 303 stainless steel nozzles have a maximum temperature of 1400° F.

Pipe Size	O'all Wd. (Hex Size)	O'all Lg.	Brass	Each ♦	Stainless Steel	Each ♦

♦ Prices are 10% lower when you buy in quantities of 10 or more.

Quick-Mount Fittings for Spray Nozzles

No need for threaded pipe connections—just drill a 9/32" hole in your pipe, connect one of these fittings, and then thread your nozzle into the fitting. Made of Type 303 stainless steel with zinc-plated steel clamps and bolts. Also has a Buna-N gasket for a leakproof seal. Maximum pressure is 250 psi. Maximum temperature is 180° F.

Stainless Steel Spray Manifolds

24" Spray Manifold with Two Nozzle Positions

Build your spray system by adding your own nozzles to these nozzle-ready spray manifolds. They accept stainless steel or brass nozzles. Maximum pressure is 2,500 psi. Maximum temperature is 200°F.

Manifolds for 1/8" NPT male nozzles are made of 1/2" OD Type 316 stainless steel tubing. Use 1/2" OD Type 316 stainless steel compression tube fittings to connect an inlet pipe to the manifold tubing and to cap the ends (fittings not included, see 5182K on page 175).

Manifolds for 1/4" NPT male nozzles are made of 5/8" OD Type 316 stainless steel tubing. Use 5/8" OD Type 316 stainless steel compression tube fittings to connect an inlet pipe to the manifold tubing and to cap the ends (fittings not included, see 5182K on page 175).

For information about spray nozzles and pipe size, see page 2082.

Misting and Fogging Nozzles

Providing the smallest atomized spray droplets of all of our spray nozzles, these nozzles are recommended for cooling, moistening, and humidifying applications. They're also a good choice for applying coatings and controlling dust.

Standard and No-Drip Misting Nozzles

Full Cone — Hollow Cone

These economical misting nozzles have a strainer. Maximum pressure is 500 psi. Maximum temperature is 180° F.

Standard— All nozzles are easy to clean. Strainer has a brass body with stainless steel 120 × 120 mesh. Spray angle is 80° for full cone spray nozzles; 160° for hollow cone spray nozzles. Connection is NPT male.

No-Drip— A built-in check valve closes at 70 psi and eliminates dripping once nozzle is turned off. Spray angle is 70°. Base is brass and includes a 31-40 micron bronze filter. Connection is NPT female.

Standard

Full Cone — No Drip

♦ Prices are 10% lower when you buy in quantities of 10 or more. ● Minimum of 160 psi is required.

High-Volume Clog-Resistant Misting Nozzles

Hollow Cone

With a unique spiral tip, these nozzles produce higher flow rates than our other misting nozzles, making them ideal for washing applications. All nozzles are made of brass and produce a hollow cone spray pattern. Spray angle is 90°. Maximum pressure is 100 psi. Maximum temperature is 450° F. Connection is NPT male.

Fogging Nozzles

Full Cone

You'll get the smallest, most atomized spray droplets with these nozzles. All are made of brass and produce a full cone spray pattern. Spray angle is 90°. Maximum pressure is 3,000 psi. Maximum temperature is 450° F. Connection is NPT male.

Ultra-Fine Air-Powered Misting and Fogging Nozzles

Hollow Cone

Full Cone

To create an ultra-fine spray, these nozzles mix compressed air from 70 to 100 psi and pressurized liquids up to 20 psi. All nozzles are made of brass and have a knob to control the flow rate. They have a 5-micron air filter and a bronze 40 × 40 mesh liquid strainer. Maximum temperature is 200° F. Both air and liquid connections are 1/4″ NPT female.

Humidifying— Great for mist coating, evaporative cooling, moisturizing, and spray drying.

Fogging— For moisturizing, coating, evaporative cooling, and dust suppression.

Atomizing— For washing and applying lubricants.

Nozzle Style	Spray Pattern	Flow Rate, gph	Spray Angle	Orifice Dia.	O'all Wd.	O'all Lg.		Each

Quick-Disconnect High-Pressure Spray Nozzles

Solid Stream — Flat

To quickly change spray angles, remove the nozzle and snap on a new one. All have a 1/4″ connection and are for use primarily with pressure washers. The 0° spray angle produces a solid stream spray pattern; all other angles produce a flat spray pattern. Not rated for maximum temperature.

Liquid Nozzles— Made of Type 416 stainless steel with color-coded nylon guards for easy identification. Maximum pressure is 4,000 psi. **To Order:** Please specify spray angle: 0° (red), 15° (yellow), 25° (green), or 40° (white).

Soap Nozzle— Made of brass with a black nylon cover. Maximum pressure is 500 psi. **To Order:** Please specify spray angle: 25° or 65°.

For information about spray nozzles and pipe size, see page 2082.

High-Pressure Spray Nozzles

Use primarily with your pressure washers. A 0° spray angle produces a solid stream spray pattern; all other angles produce a flat spray pattern.

Standard High-Pressure Spray Nozzles

Good for cleaning parts as well as for washing vehicles. Made of Type 416 stainless steel. Maximum pressure is 4,000 psi. Maximum temperature is 1250° F. Connection is NPT male.

All nozzles with a 1/8″ pipe size have an overall width (hex size) of 1/2″, except those with a 0° spray angle, which have an overall width (hex size) of 9/16″.

All nozzles with a 1/4″ pipe size have an overall width (hex size) of 9/16″.

To Order: Please specify spray angle: 0°, 15°, 25°, 40°, or 65° (unless noted). Where applicable, please specify pipe size: 1/8″ or 1/4″.

A&B Stationary Nozzles—Multiple spray streams provide cost-effective rinsing and cleaning.

Style A—Use with bottles and drums. Maximum pressure is 400 psi. Maximum temperature is 450° F. Connection is NPT male.

Style B—These ball-shaped nozzles provide a wider spray angle for better coverage. Use with drums. Maximum pressure is 150 psi. Maximum temperature is 400° F. Connection is NPT female.

C-F Rotating Nozzles—Multiple spray streams combine with rotating spray action for superior cleaning power.

Style C—Use with bottles and drums. Maximum pressure is 70 psi. Maximum temperature is 250° F. Connection is NPT male.

Style D—Made of FDA-compliant PVDF for food and pharmaceutical applications. Use with drums. Maximum pressure is 70 psi. Maximum temperature is 190° F. Connection is female BSPP (British Standard Pipe Parallel).

Style E—Maximum corrosion resistance with minimum weight. Made of PTFE. Use with large-diameter tanks. Maximum pressure is 90 psi. Max. temperature is 200° F. Connection is NPT female.

Style F—Use with tanks. Maximum pressure is 80 psi. Maximum temperature is 250° F. Connection is NPT female.

Floor Sweeper

Sweep dust and dirt from your facility with this push-type floor sweeper. Rotary side brush sweeps dirt and dust from walls and corners into the path of the wide main brush. (Sweeping width is 26″.) Main brush then deposits the dirt into the sweeper's 9-gal. plastic hopper.

Base is 15⅜″ Ht. × 31″ Wd. × 40½″ Dp. Frame is steel and brushes are nylon. Sweeper includes two side wheels, one center swivel caster, and height-adjustment knobs. Handle is steel, 36″ long, and folds for easy storage.

7425T15 ..... $628.78

Washer and Dryer

Washer

Dryer

Washer—This top-loading washer has eight cycle selections and a two-speed motor. The tub is porcelain for rust and corrosion resistance. Self-leveling rear legs and a drain are included. Cabinet is galvanized steel with a white finish. Cord is 6 feet long with a three-prong plug. UL listed and CSA certified.

Electric Dryer—This front-loading dryer has three cycle selections (high, medium, and low heat), an overload protector, and a steel drum. Cabinet is steel with a white finish. Cord is 4 feet long with a three-prong plug. UL listed.

Catch Basin Cleaner

Remove sludge and debris from your basins and sewers. Made of 18-ga. steel, cleaner has holes on all sides to drain liquid. It also has a ¾″ NPT female connection for attaching an iron pipe handle (not included).

Cleaner—6″ Ht. × 6″ Wd. × 8⅜″ Dp. **2585K3** $24.80

Tree- and Lumber-Marking Spray Paint

Solvent-based aerosol paint provides bright visual identification at a distance, yet will not soak into wood. One can covers 56 sq. ft. at 1 mil thick. Application temp. is 30° to 100° F. Furnished in a 12-oz. net wt. can. **To Order:** Please specify color: nonfluorescent light blue, orange, or yellow; fluorescent pink or red.

Paint (12/Pkg.)	**58495T71**	$4.45	$3.97

Ground Probing Rods

Before you dig, use these rods to locate sewer and water mains, drain tile, and other underground installations.

Steel rods have a ⅜″ diameter shaft with replaceable ½″ pointed stainless steel tip. Handles are 10½″ long and have vinyl ribs. *3-ft. extension* includes a coupling nut and threads directly onto the steel rod.

Fiberglass rods are excellent for areas where electrical components are buried. They have a ⅝″ diameter shaft with a nonreplaceable 1⅝″ pointed steel tip. Handles are 13¼″ long and have polyethylene end caps.

Metal Detectors

Compact

This hand-held detector finds metallic objects through most nonmetallic construction materials (including concrete) up to 6″ deep. An LCD display and audible signal pinpoint both the location and the depth of your target. Made of water-resistant polystyrene, detector is only 9″ Lg. × 4″ Wd. × 2″ Ht. Uses one 9V battery (sold separately).

Detector	**1379T62**	$156.39
9V Battery	**71455K56**	2.75

Deep Reach

Speaker sound and needle movement alert you when buried ferrous and nonferrous metal objects are present in soil, asphalt, and concrete. Detector has a submersible, 8″ dia., ABS plastic search coil that resists false readings from wet foliage, wet pavement, and mineralized soil. It can locate a manhole cover buried approximately 3 feet deep. Handle adjusts from 38″ to 50″ long. Battery check system and two 9-volt batteries are included.

Stereo headphones screen noisy distractions.

Hard-shell carrying case provides protection during storage and transport.

Detector	**1166T1**	$629.23
Stereo Headphones	**1166T2**	83.64
Hard-Shell Carrying Case	**1166T4**	156.92

Magnetic Stud Finders

Economy Magnetic Finder

Standard Electronic Finder

Locate studs before starting your project. For use on most surfaces including drywall, plywood, paneling, and concrete.

Economy Magnetic Finder—Emits a click when metal fasteners in studs are sensed. No batteries required.

Electronic Finders—Measure changes in wall density to locate studs. An audible signal sounds when a stud is located. Both use one 9V battery (sold separately).

Standard model has four LEDs that also signal stud location. *Multipurpose model* has an LCD scanner that also locates metal pipes, conduit, rebar, and unshielded "hot" wires. It can also locate ½″ dia. rebar in concrete up to 3″ deep.

Scraping Mats

Polypropylene Loop

Vinyl Loop

Small plastic loops create an excellent scraping surface and keep dirt and mud away from your shoes. Mats have black edging on all four sides and are easy to clean. For indoor and outdoor use.

Polypropylene Loop Mats— Polypropylene loops provide a better scraping surface than vinyl loops. Backing is vinyl. Color is dark gray.

Vinyl Loop Mats— Offering better wear resistance than polypropylene loop mats, these rugged mats have vinyl-coated nylon loops. Backing is vinyl. Color is light gray.

High-Traffic Scraping Mats

These durable mats withstand heavy indoor and outdoor use.

Rubber Mats— Elevated edges on all four sides hold dirt and moisture away from shoes and keep floors clean. The edges are tapered to prevent tripping. Mats are slip resistant and flexible, even in cold and wet weather. Color is black.

Finger mats have flat-topped rubber bristles to scrape and brush dirt away. *Raised-surface mats* have oblong, molded rubber projections to scrape dirt away.

Nylon Mats— A nylon fiber surface scrapes dirt and moisture from shoes while the rubber backing provides durability. Mats have edging on all four sides. Color is black.

Scraping and Drying Mats

Keep your floors clean and dry. The surface of these mats scrapes your shoes and absorbs moisture. Mats have a vinyl backing and black edging on all four sides. For indoor use.

Ribbed and Multidirection Ribbed Mats— The ribbed polypropylene surface aggressively scrapes shoes and absorbs moisture, while the channels trap dust, moisture, and dirt. Mats are quick drying and easy to clean. **To Order:** Please specify blue, brown, or dark gray.

Ribbed mats have a straight rib design that runs from one end of the mat to the other. *Multidirection ribbed mats* have a zig-zag rib design for scraping in multiple directions.

Dual-Surface Mats— A two-in-one surface cleans and dries shoes. Mats have polypropylene loop for scraping and olefin for quick-drying. **To Order:** Please specify blue or dark gray.

Drying Mats

Olefin

Nylon

Polypropylene

Topped with carpet, these mats provide excellent moisture absorption while reducing the amount of dirt being tracked into your facility. They work well in conjunction with scraping mats. All have a vinyl backing and black edging on all four sides. For indoor use. **To Order:** Please specify brown, dark gray, or red/black (more red than black).

Quick-Drying Olefin Mats—Compared to nylon, olefin mats dry faster.

Wear-Resistant Nylon Mats—Resist crushing for better wear resistance than olefin mats as well as better water absorption.

High-Performance Polypropylene Mats—Combine the quick drying of olefin with the wear resistance and absorption of nylon.

Sample Packs—Include small swatches of each color available.

Complete Kit	68005T43	Each	$50.99

Sticky-Surface Mats

Dirt, dust, and other contaminants from shoes and wheels stick to the tacky surface instead of getting tracked into your facility. Ideal for contamination control.

Peel-Off Disposable Sticky-Surface Frameless Mats

Always have a clean mat. When the top sheet gets dirty, pull the numbered corner tab to remove it and expose the next clean sheet. Made up of layers of adhesive-coated polyethylene sheets with an adhesive backing. Plus, mats have a nonleeching, nontoxic, FDA-compliant antimicrobial agent to inhibit the growth of bacteria, mold, and mildew. Apply to any clean, dry surface. For indoor use. **To Order:** Please specify blue, light gray, or white.

● **To Order:** Please specify mat color: white or light gray.

Reusable Sticky-Surface Mats

Never run out of clean mats. When these sticky mats get dirty use the cleaner (sold below) to restore the surface's original dirt- and dust-grabbing characteristics. Made of cut- and scratch-resistant cushioned vinyl, mats are not affected by heat, cold, or humidity. They have an adhesive backing to keep them in place. For indoor use. Color is blue.

Round- and Flat-Rib Antislip Traction Mats

Vinyl Round Rib

Rubber Flat Rib

Round- and flat-rib mats are easier to clean than V-rib mats, yet still give you sure footing while scraping dirt off your shoes. Ribs run lengthwise. For indoor and outdoor use. Color is black.

Vinyl Round-Rib Mats—Resist grease and chemicals.

Rubber Flat-Rib Mats—More durable with greater slip and abrasion resistance than the vinyl mats. They absorb shock, resist impact, and remain flexible at low temperatures.

Standard Size Mats

High-Traffic Traction Mats

Smooth

Flat Rib

Nylon reinforcement gives these rubber mats exceptional strength and durability. Plus, they remain flexible at low temperatures. For indoor use. Color is black.

Smooth Mats—Resist damage from spikes, cleats, and even fork-lift traffic. They're easier to clean than flat-rib mats. Use where high traction is not essential.

Flat-Rib Mats—Get abrasion and slip resistance. Mats resist punctures and impact and absorb shock. Ribs run lengthwise.

Raised-Disc Antislip Traction Mats and Floor Tiles

The raised-disc surface provides traction and is easy to clean. For indoor use. **To Order:** Please specify black or light gray.

Vinyl Mats— Resist grease and chemicals.

Rubber Floor Tile— More durable with greater slip and abrasion resistance than vinyl mats. Plus, tile remains flexible at low temperatures. Install with the adhesive sold separately. *Adhesive* is a two-part solvent-free epoxy. Application time, after mixing, is 40 to 50 minutes. Fully dry in 72 hours. One gallon covers approximately 125-150 sq. ft.

Temporary Carpet and Floor Protectors

Film with Optional Applicator

Cover your carpets and floors during painting and remodeling work. Protectors withstand high traffic. For indoor use.

Adhesive-Backed Polyethylene Film

Made of tear-resistant polyethylene film, these protectors have a pressure-sensitive adhesive backing. The adhesive keeps the protectors in place, but does not permanently bond to the floor. You can leave them in place for up to 30 days without harming floors or carpets. *Optional applicators* (sold separately below) reduce installation time; applicators only work with 200-ft. and 500-ft. long protectors.

Protectors for Carpets— Not for use on wool or other natural fiber carpets. Color is clear.

Protectors for Floors— Great for linoleum and ceramic tile. Not for use on hardwood floors. Color is a green tint.

Antifatigue Sponge Mats

Thousands of tiny air bubbles embedded inside the mats create a soft, comfortable cushion. Mats are vinyl and resist grease, oil, and chemicals, but should be cleaned immediately after spills. They have tapered edges on all four sides, except 1/4″ thick custom length mats, which have tapered edges on the two length sides. Color is black. For indoor use.

Smooth Mats—Have an easy-to-clean surface. Use where high traction is not essential.

Ribbed Mats—For scraping and moderate traction.

Textured Mats—Have good traction. **To Order:** Please specify with or without yellow borders on the two length sides.

Diamond-Tread Mats—Have a multidirectional surface pattern for the best traction. **To Order:** Please specify with or without yellow borders on the two length sides.

Super-Soft Antifatigue Sponge Mats

Thicker than other antifatigue sponge mats for extra cushioning and comfort. Thousands of tiny air bubbles embedded in mats create a soft cushion. Mats are vinyl and resist grease, oil, and chemicals, but should be cleaned immediately after spills. They have tapered edges on all four sides. For indoor use. **To Order:** Please specify black or light gray.

Wear-Resistant Antifatigue Sponge Mats

Durable and cushioned, mats are made of nitrile rubber, which doesn't absorb liquids so they're ideal in wet environments. They have a textured surface for traction and tapered edges on all four sides. For indoor use.

Standard Mats

Without Borders

A cushioned sponge is sealed between hard top and bottom layers of nitrile rubber for cushioned comfort and wear resistance. Resist oil, grease, and chemicals. Color is black.

Mats with borders have yellow and black striped borders on the two length sides for safety and visibility.

Ribbed Wear-Resistant Antifatigue Sponge Mats

V-Rib

Round Rib

The ribbed top gives you traction and a durable surface for scraping while the sponge backing provides soft cushioning. Made of vinyl, mats resist chemicals. They have tapered edges on all four sides, and the ribs run lengthwise. Color is black. For indoor use.

⅞″ thick mats have more cushioning and comfort.

V-Rib Mats— For aggressive dirt scraping and slip resistance.

Round Rib Mats— Easier to clean than the V-rib mats, but don't provide as much scraping and slip resistance.

Diamond-Tread Wear-Resistant Antifatigue Sponge Mats

Uncoated with Solid Borders

Uncoated with Striped Borders

Grit Coated without Borders

The comfort of an antifatigue sponge mat is combined with a durable top layer of vinyl that protects the sponge from wear. Mats also have a diamond-tread surface pattern for excellent traction. Resist grease, oil, and chemicals. Mats have tapered edges on all four sides. Color is black. For indoor use.

Mats with borders have borders on the two length sides for safety and visibility. **To Order:** Please specify border color: solid yellow or yellow and black striped.

Grit-Coated Mats— An abrasive coating is added to the surface for even better traction and durability.

Smooth Wear-Resistant Antifatigue Sponge Mats

The wear-resistant vinyl or rubber tops create a durable and easy-to-clean surface while the inner sponge reduces fatigue. Use where high traction is not essential. Mats have tapered edges on all four sides. For indoor use.

***Vinyl Mats*—**Resist grease, oil, and chemicals. **To Order:** Please specify black or dark gray.

***Marbled Rubber and Marbled Vinyl Mats*—**The mat surface has a marbled pattern. *Rubber mats* are more durable and abrasion resistant than vinyl. *Vinyl mats* are thicker for extra cushioning and comfort; and they resist grease, oil, and chemicals. **To Order:** Please specify pattern color. For rubber choose black or light gray. For vinyl choose black, dark gray, or light gray.

***Reinforced-Rubber Mats*—**For exceptional strength and durability, the mat surface is reinforced with nylon. Mats resist damage from spikes, cleats, and blades—they even withstand forklift traffic. Excellent for use in high traffic areas. Color is black.

Dome-Top Antifatigue Mats

Soft, yet durable rubber domes form a cushioned surface to prevent fatigue. Mats are for indoor use.

Solid-Dome-Top Mats

Both sides of the mats have firm, yet cushioned solid domes for long-lasting comfort and durability. Mat edges are tapered on all four sides, unless noted. Color is black.

Wd. × Lg.	Thick.

♠ Tapered edges on three sides.

Hollow-Dome-Top Mats

Hollow domes cushion your feet with air for excellent fatigue relief. Durable and resilient, the domes compress as you step on them and then return to their original position when you step off. All mats have finished edges on all four sides.

Carpeted mats with rubber backing have a polypropylene carpet surface. **To Order:** Please specify black or dark gray.

All-rubber mats have superior grease and oil resistance. Color is black.

Extended-Life Antifatigue Mats

Designed to endure years of continuous use, these polyurethane mats are the ultimate in durability and comfort. Plus, unlike rubber and vinyl, polyurethane mats won't lose their elasticity. They resist chemicals and have tapered edges on all four sides. For indoor use.

***Sponge Mats*—**A cushioning sponge is sealed between top and bottom layers of durable polyurethane. Plus, a textured surface provides slip resistance. Color is black.

***Solid Mats*—**Made from solid polyurethane with firm, yet cushioned domes. Color is dark gray. Rated for use in Class 100 clean rooms.

Textured Antifatigue Mats

Interlocking End

Interlocking Center

Individual

A waffle-shaped backing cushions your feet and absorbs shock while a textured surface provides traction. Color is black. For indoor and outdoor use. *Grease- and chemical-resistant mats* resist oil, grease, chemicals, and acids.

Interlocking Mats— Have integrated connectors to link multiple mats together. Connect two end sections or combine end sections with one or more center sections to create the length you need. All exposed edges are tapered.

Individual Mats— All edges are tapered. *Note:* Not compatible with interlocking mats.

Wd.×Lg.	Thick.	Interlocking End Mats	Interlocking Center Mats	Individual Mats

Interlocking Drainage Floor Tiles

Create a custom floor layout by interlocking tiles in any direction. Arrange them to fit around corners and machinery—just trim to size with a utility knife. Tiles are cushioned vinyl for comfort and have an open-grid design to drain liquids. They resist grease, oil, and chemicals. For indoor and outdoor use. *Optional tapered edging* prevents tripping.

Flexible Tiles

Flexible tiles easily roll up and out of the way for cleaning the floor underneath. Drainage openings are ⅜″×⅜″.

Optional tapered edging has male tabs and female slots for installation along any side of the tile. Cut off tabs on the edging when installing on the male edge of the tile.

To Order: For tiles and edging, please specify black, blue, dark gray, or yellow.

Size	Thick.	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.
Tiles 12″×12″	9/16″	50	6813T1	$5.39	$4.58

	Size		Each
Optional Tapered Edging	12″×2″	6813T2★	$2.89
Optional Tapered Corner	2″×2″	6813T3	1.11

★ Fits both the male and female edges of the tile.

Rigid Tiles

Rigid tile is more durable than flexible tile, withstanding heavy loads and rough use. Tiles have 7/16″×7/16″×9/16″ triangular drainage openings. Color is black. *Grit-coated tile* has an abrasive coating for additional traction.

Tiles have two sides with male tabs and two sides with female slots. *Optional male tapered edging* fits in the female slots. *Optional female tapered edging* fits on the male tabs.

Diamond-Tread Interlocking Antifatigue Mats

Create the mat size you need. Mats have integrated connectors to join them in any direction. Cut connectors off for a finished look. Both are rubber with a diamond-tread surface for exceptional traction. Color is black. For indoor and outdoor use.

General Purpose Mat— For dry areas.

Grease-Resistant Mat— Stands up to occasional contact with grease and chemicals.

	Size	Thick.		
General Purpose Mat	36″×36″	½″	8018T13	$66.33
Grease-Resistant Mat	36″×36″	½″	8018T14	94.63

High-Traffic Interlocking Antifatigue Tiles

Get a custom floor layout that withstands heavy use and cart traffic. Tiles interlock with each other in any direction—simply add or remove tiles as needed. They're cushioned for comfort and have a textured surface for good traction. Plus, these vinyl tiles resist grease, oil, and chemicals. Color is black. For indoor use.

Grit-coated tile has an abrasive coating for increased traction and durability.

Optional Tapered Edging— Prevents tripping and has four ¾″ dia. mounting holes (fasteners not included) for permanent installation. Color is yellow.

Size	Thick.	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.

Modular Rigid Drainage Mats

With Tapered Edging

Design a custom floor layout. Rigid and lightweight, these corrosion-resistant polyethylene mats also resist acids, salt, gasoline, solvents, and chemicals. Drainage openings are 2½″×1¾″ to let liquid, dirt, and small debris pass through. Cut to size with a circular saw or handsaw. Color is black.

Optional tapered edging minimizes tripping. Attaches with connectors (sold separately) and can be cut to size with a handsaw. The *60″ wide tapered edging* includes tapered corners.

Connectors join flooring and edging. Use at least two for 24″ and 48″ edges; four for 96″ edges.

Rubber feet keep flooring in place. Use 15 rubber feet with 6273T41; 25 with 6273T21.

Cushioned Drainage Mats

Air-Cushioned

Antislip Cushioned

A cushioned surface comfortably supports your feet while ¼″×1″ drainage openings keep them dry. Made of vinyl, these mats resist grease, oil, and chemicals. For indoor and outdoor use.

Air-Cushioned Mats—Hollow tubes form a flexible, cushioned surface. Bottom tubes are black. **To Order:** Please specify surface tube color: black or light gray.

Antislip Cushioned Mats—Have solid tubes with a grooved surface for sure footing. Bottom tubes are black. **To Order:** Please specify surface tube color: black, blue, or red.

Flexible Grease-Resistant and Greaseproof Drainage Mats

A&B

C

D

E

Get the benefits of a drainage mat combined with a comfortable, cushioned surface. Mats are flexible rubber so they roll up for access to clean the floor underneath. Color is black. Use *grease-resistant mats* for occasional contact with grease;use *greaseproof mats* where grease and oil are constantly present.

(A) Grease-Resistant Mats— Have 1″ dia. drainage holes and tapered edges. For indoor and outdoor use.

(B) Heavy Duty Grease-Resistant Mats— Thicker than our other grease-resistant mats for added durability. All have 7/8″ dia. drainage holes. For indoor and outdoor use. *Optional connector* lets you join two or more mats. Use two for 18″ wide sides, three for 24″ wide sides, and four for 36″ wide sides. *Optional tapered edging* prevents tripping; it's 2″ wide and can be cut to size.

(C) Heavy Duty Grease-Resistant Mats with Colored Border— Have 1 1/8″ dia. drainage holes. For indoor use. *Mats with three-sided border* have a tapered border along three edges. Fourth edge is not tapered so it can fit flush against machinery. *Mats with four-sided border* have a tapered border on all four edges. **To Order:** Please specify border color: orange or yellow.

(D) Grease-Resistant and Greaseproof Interlocking Mats— Have built-in connectors to link multiple mats together in any direction. Connectors can easily be cut off for a finished look. Mats have 7/8″ dia. drainage holes. For indoor and outdoor use.

(E) Nitrile Rubber Greaseproof Mats— They're antimicrobial to prevent odors. They also resist oil and cutting fluid and are safe for welding applications. All have 3/4″ dia. drainage holes and tapered edges. For indoor and outdoor use.

(A) Grease-Resistant Mats

Clear Chair Mats

Chair Mat with Lip

Chair Mat without Lip

Protect your carpets and floors from the wear of constant foot traffic and chair casters. Mats are vinyl with a slip-resistant textured surface. Color is clear. For indoor use.

Mats for Carpets— Have a gripper backing to keep them firmly in place. *Antistatic mats* dissipate static electricity.

Mats for Hard Floors— Have a smooth backing.

Foot-Warming Mats

Rubber Mat

Keep feet warm in cold, drafty rooms. Mats can be used on any dry surface, even carpet. All have a 6-ft. power cord with two-prong plug. For indoor use.

Rubber Mats— Made of flexible, corrugated rubber and thermostatically controlled to maintain a constant temperature. Color is black.

Carpet Mat— Made of polyester with a carpet top and a felt-padded bottom. Mat includes a high/low heat switch with 8-ft. cord. Color is light gray. UL and C-UL listed.

About Static Control Mats

Static electricity discharge (also known as electrostatic discharge or ESD) is one of the most common causes of electrical equipment damage and malfunction. Walking on a static control mat drains the electrical charge from you before it causes problems. Some static control mats require ground cords for best performance (see individual presentations).

For additional static control products, see page 929.

Effectiveness in Draining a Static Charge

The three types of static control mats are classified by their surface resistivity range (see chart). Expressed in ohms, surface resistivity measures how much a mat resists draining a static charge. The lower the surface resistivity (the lower the resistance), the faster and more effectively the mats drain the electrical charge.

Type of Mat	Draining Rate	Surface Resistivity
Antistatic	Slowest	10^9-10^{11} ohms
Static Draining	↓	10^6-10^9 ohms
Conductive	Fastest	10^3-10^6 ohms

Antistatic Antifatigue Sponge Mats

Get static control and comfort. Mats have a surface resistivity of 10^9 ohms for draining static electricity without a ground cord. Plus they're made of cushioned vinyl sponge to reduce fatigue. A textured surface provides traction. Mats resist stains and chemicals, but should be cleaned immediately after spills. Have tapered edges on all four sides. For indoor use.

To Order: Please specify black, brown, or light gray.

48″	3/8″	60 ft.	6930T52	22.21

Conductive Antifatigue Mats

With surface resistivity of 10^6 ohms, these mats offer the fastest, most effective draining of static electricity. All require a ground cord (sold separately) that plugs directly into the grounding snap located on one corner of each mat. Color is black. For indoor use.

Wear-Resistant Antifatigue Sponge Mats

Mats have a hard layer of diamond-tread vinyl to provide excellent traction and durability, along with a vinyl sponge backing to reduce fatigue. They have tapered edges on all four sides.

Static-Draining Mats

V-Rib

Carpet Top

Wear-Resistant Antifatigue Sponge

***V-Rib Mats*—**Have a surface resistivity of 10^8-10^9 ohms for good static draining without a ground cord. Plus, the V-ribs provide more traction than the carpet-top and wear-resistant mats. Mats are vinyl and resist grease, oil, and chemicals. Color is light gray. For indoor and outdoor use.

***Carpet-Top Mats*—**With a surface resistivity of 10^7-10^8 ohms, they provide better static control than the V-rib mats and still don't need a ground cord. They have a nylon carpet top that removes dirt and moisture from your shoes and a rubber backing that keeps mats in place. Mats also have tapered edges on all four sides. Color is black. For indoor use.

***Wear-Resistant Antifatigue Sponge Mats*—**Have a surface resistivity of 10^7 ohms and require a ground cord (sold separately). Cord plugs directly into the grounding snap located on one corner of each mat. The top and bottom of these mats are smooth, hard vinyl for durability, with a vinyl sponge center for cushioning. They have tapered edges on all four sides. Color is dark gray. For indoor use.

Switchboard Mats

Tested to withstand the stated dielectric test voltage, mats protect workers from electrical shock when working around high-voltage equipment.

Mil. Spec. Vinyl Switchboard Mats

Diamond Tread

Mats meet Mil. Spec. DTL-15562G. Made of vinyl, they're UV resistant and also resist grease, oil, and chemicals. Mats have a textured backing to prevent skidding. For indoor and outdoor use.

Smooth, Type II mat is easy to clean. It's for use where high traction is not crucial. Color is black.

Diamond tread, Type III mat has a diamond-tread surface for excellent traction. Color is light gray.

Antislip Tape

Abrasive Antislip Tape

Roll

Disc

Strip with Conformable Backing

Tape has an adhesive back. For indoor and outdoor use.

Abrasive Antislip— Tape has a high-traction surface. You can walk on it immediately after installation. *Strips, squares, and discs* are sold in packages of 10, unless noted. **To Order:** For Choose-a-Color, please specify clear, light gray, red, or yellow.

Extreme-Traction Abrasive Antislip— Has an extra-coarse surface for excellent traction. Great for muddy and greasy areas and also for occasional contact with water. You can walk on tape immediately after installation. Color is black.

Abrasive Antislip with Conformable Backing— An aluminum backing conforms to corners and uneven surfaces, making tape perfect for ladder rungs and diamond tread plates. After installation, wait one hour before walking on this tape. Color is black.

Primer and End Sealer

Primer— Improves tape adhesion on porous surfaces. Comes in a 1-qt. can to cover 35 sq. ft. Color is tan. Primer is compliant under all state VOC rules in effect on September 1, 2011.

6969T55 ..... **Each** $37.71

End Sealer— Protects tape edges from exposure to moisture. Comes in a 5-oz. tube to seal 75 to 100 ft. of tape. Color is clear.

6969T45 ..... **Each** $14.17

Antislip Floor Coatings

Antislip coatings contain grit and also are designed to last longer than antislip tape. These coatings meet OSHA standards and ASTM requirements for durability, slip resistance, and impact resistance. Also, they help comply with ADA when properly applied. Use indoors and outdoors on concrete, wood, and metal.

Ready-to-Use Antislip Floor Coatings

Aerosol Epoxy— Can also be used on fiberglass. Good for areas with pedestrian traffic. Not tested for compliance with OSHA and ASTM standards. This epoxy is compliant under all state VOC rules in effect on September 1, 2011.

One-Part Epoxy— Offers greater durability and slip resistance than aerosol epoxy. It requires no mixing and is good for areas with pedestrian traffic. Apply over a primer, using the phenolic roller cover (sold separately). This epoxy is compliant under all state VOC rules in effect on September 1, 2011.

Water-Based Acrylic— Has low VOCs and quick and easy cleanup. Great for pedestrian traffic. Apply over a primer, using the nylon-bristle roller cover (sold separately). This acrylic is compliant under all state VOC rules in effect on September 1, 2011.

High-Traction Two-Part Antislip Floor Coatings

Heavy Duty Epoxy— Perfect for heavy vehicular traffic areas. They must be mixed before use. Apply with a roller. Epoxy is compliant under all state VOC rules in effect on September 1, 2011, except in the Los Angeles area.

Low-Odor Chemical-Resistant Epoxy— Has zero VOCs and a low-odor formula yet can withstand pedestrian, cart, and hand-truck traffic. Apply with a roller. Primer is not required. This epoxy is compliant under all state VOC rules in effect on September 1, 2011.

Extreme-Traction Two-Part Antislip Floor Coatings

Provide the highest traction and impact resistance. Apply with a roller over a primer. Not tested for compliance with OSHA, ASTM, and ADA standards. Epoxy is compliant under all state VOC rules in effect on September 1, 2011, except in the Los Angeles area.

Mil. Spec. Standard Epoxy— Meets MIL-PRF 24667C Types 2 and 4, Composition G.

Mil. Spec Heavy Duty Epoxy— Provides even more wear and impact resistance. Meets MIL-PRF 24667C Types 1 and 2, Composition G.

Two-Part Epoxy Primers

These do not contain grit. They must be mixed before use. Epoxies are compliant under all state VOC rules in effect on September 1, 2011, except in the Los Angeles area.

Antislip Floor Plates and Drainage Floor Plates

Add slip resistance to floors, ramps, stairs, and dock areas.

(A-D) Antislip Floor Plates

(A) Adhesive-Backed Diamond-Tread Aluminum Plates— Quick and easy to install; peel off the backing and stick plates on smooth, clean surfaces. They have a raised diamond-tread pattern for slip resistance that's easy on your hands, knees, and shoes.

(B) Diamond-Tread Aluminum Plates— Have a raised diamond-tread pattern for slip resistance that's easy on your hands, knees, and shoes.

(C) Abrasive Steel Plates— A unique grit-like metal coating provides a long-lasting, aggressive slip-resistant surface. Color is black.

(D) Abrasive Plastic Plates— Virtually maintenance free, these corrosion- and UV-resistant plates have an embedded abrasive-grit coating on both sides for slip resistance. They can be cut to size using a circular saw with carbide-tipped blade. Color is black.

(E-G) Antislip Drainage Floor Plates

(E) Galvanized Steel Plates— Excellent traction at an economical price. Drainage holes are 5/16″ dia. Plates have 1/8″ dia. mounting holes (fasteners not included).

(F) Carbon Steel Plates— Have 1/8″ dia. drainage buttonholes for traction without rough edges.

(G) Ultra-Antislip Serrated Galvanized Steel Plates— Serrated diamond-shaped openings provide superior traction while allowing liquids to drain and debris to pass through. Openings are 1 7/8″ × 11/16″.

Metal Plank Grating

Ideal for platforms, stair treads, ramps, and decks. For indoor and outdoor use.
To Order: Please specify length from those listed.

Antislip Plank Grating

Raised projections provide traction, while 1⅜″ dia. drainage holes let light and liquid pass through and prevent debris buildup. The surface is not serrated so it's easier on your hands, knees, and shoes. Cut to size with a band saw, hack saw, circular saw, or shears.

Ultra-Antislip Serrated Walkway Plank Grating

ⓘ For information about load ratings and deflection, go to mcmaster.com and search for **6286TAC.**

Diamond-shaped openings provide excellent traction while edge guards prevent tools and parts from falling over the side. Grating is galvanized steel and can be cut with a cutting torch, circular saw, or reciprocating saw. The diamond-shaped openings are 1⅞″ × 11/16″ for *24″ wide* grating, 3⅞″ × 1¼″ for *30″* and *36″ wide* grating. All meet OSHA requirement 1910.23 for elevated walkways. For indoor and outdoor use.
To Order: Please specify length from those listed.

Wd.	Ht.	Gauge	2-, 3-, 4-, 5-, 6-, 8-ft. Lengths Per Ft.	10-, 12-ft. Lengths Per Ft.

Plank Grating Fasteners

A

B

Secure plank grating to your support structure. Installation requires a hole in your support structure, as well as a square-neck carriage screw (sold separately, see pages 3020-3021).

(A) Antislip Plank Grating Anchor— Made of galvanized steel, this fits into the 1⅜″ dia. drainage holes of our Antislip Plank Grating. Requires a ½″ dia. screw.

(B) Ultra-Antislip Serrated Plank Grating Anchor— Designed to fit our Ultra-Antislip Serrated Plank Grating. 7012T5 is galvanized steel and fits grating with an 1⅞″ × 11/16″ diamond-shaped opening. Requires a 5/16″ dia. screw. 7012T6 is Type 304 stainless steel and fits grating with a 3⅞″ × 1¼″ diamond-shaped opening. Requires a ⅜″ dia. screw.

	Grating Height	Pkg. Qty.	Pkg.
A	Any	10	7012T23 $7.69
B	Any	20	7012T5 13.75
B	5″	1	7012T6 4.33

For load ratings and deflection for the bar grating on this page, go to mcmaster.com and search for **6849TAC**.

Metal Bar Grating

Able to support heavier loads than plank grating, bar grating is good for trenches, mezzanines, walkways, work platforms, and floors. This grating has an open design that allows air, light, and debris to flow through. Cross bars hold the bearing bars in place; they are spaced 40 apart center-to-center. Bearing bars provide uniform weight distribution. Fasteners are required for installation (not included, see page 2105).

Grating *with narrow openings* provides a higher load bearing surface and reduces the chance of something falling through. *Serrated* grating provides better traction.

Black-Finish Steel Bar Grating— Great for dry, noncorrosive areas. For indoor use only.

Galvanzied Steel Bar Grating— Corrosion resistant. For indoor and outdoor use.

Stainless Steel Bar Grating— Better corrosion resistance than galvanized steel. Has a matte finish. For indoor and outdoor use.

Aluminum Bar Grating— Lightweight and rustproof, it's also nonmagnetic and nosparking. For indoor and outdoor use.

To Order: Please specify length from those listed.

To Order: For custom sizes, please specify width and length. Steel and stainless steel bar grating has a max. width of 3 ft. and a max. length of 24 ft. Aluminum bar grating has a max. width of 4 ft. and a max. length of 20 ft. *Note:* Grating less than 17″ long is reinforced with banding.

Grit-Top Corrosion-Resistant Fiberglass Grating

A&B

C

D

E

In addition to corrosion resistance, get better traction than our Steel, Stainless Steel, and Aluminum Bar Grating. This fiberglass grating has an abrasive grit surface and is lightweight, nonconductive, and nonmagnetic. Use it on trenches, walkways, catwalks, work platforms, ramps, and floors in washdown areas. To cut, use a circular saw with diamond-tipped blade. Cut ends need to be sealed with a resin sealer (sold separately). For fasteners, see page 2105. For indoor and outdoor use.

(A&B) Maximum Corrosion-Resistant Grating

Layers of resin and fiberglass strands are molded to form this grating—this construction provides maximum corrosion resistance and excellent impact resistance. It has an abrasive grit surface for added traction.

(A) Standard grating is green.

(B) Antimicrobial grating is formulated to inhibit the growth of bacteria, fungus, and mildew. Color is light gray. USDA accepted.

Also Available: Custom sizes; please ask for 6919T888 (Style A) or 7075T888 (Style B) and specify height, opening size, width, and length.

(C-E) High Load Bearing Bar Grating

Grating is made from a higher percentage of fiberglass strands to handle heavy loads while spanning greater distances than the Maximum Corrosion-Resistant Grating. Bearing bars provide uniform weight distribution. Cross bars hold the bearing bars in place. **To Order:** Please specify length from those listed.

(C) Standard grating has a one-piece molded design. Color is light gray.

(D) High-strength grating has exceptional strength. It has bearing bars that are held in place with cross bars every 6″ to form a bonded interlocking assembly. Color is yellow.

(E) Narrow-opening grating has a smaller gap between bearing bars to prevent items from falling through, as well as to make it easier for carts to roll across. It has bearing bars that are held in place with cross bars every 6″ to form a bonded interlocking assembly. Grating, except 66035T57, T58, and T59, helps comply with ADA when properly installed. Color is dark gray, except 66035T57, T58, and T59 are yellow.

Also Available: Custom lengths; please ask for 6780T888 (Style C), 6228T888 (Style D), or 66035T888 (Style E) and specify bearing bar height, grating length, and grating width.

Solid Surface Grit-Top Corrosion-Resistant Fiberglass Grating

When open-surface grating won't do, choose this solid-surface grating—it is ideal for areas with wheel traffic and anywhere you would not want small items and debris to fall through. Grating has a grit-embedded top surface that provides good traction. It is nonconductive and nonmagnetic. To cut, use a circular saw with a diamond-tipped blade; cut ends need to be sealed with resin sealer (sold separately). Color is green. For indoor and outdoor use.

Installation requires drilling through the grating as well as your structural support; fasteners are included.

Also Available: Custom sizes; please ask for 4638T888 and specify height, width, and length.

Bar Grating Fasteners

1

2

3

4

5

Secure bar grating, such as our Steel, Stainless Steel, and Aluminum Bar Grating on page 2103, to your support structure.

(1) Swivel-Lock Fasteners— Just tighten the bolt and the fastener swivels into place for easy installation, adjustment, and removal. Bottom flange is cast iron.

(2) Flat-Head J-Bolt Fasteners— A J-bolt wraps around the bearing bar and a plate secures the bearing bar to the support structure.

(3) Saddle Clip Fasteners— Bridge two bearing bars. Fasteners require a hole in the support structure as well as a threaded stud and hex nut (see pages 3164-3178 and pages 3184-3193). Overall height of the saddle plate is 1/2″. Mounting slot is 3/8″×9/32″.

(4) C-Clip Fasteners— These fasteners hook onto the support structure and are connected by a bolt to the plate on top of the grating. They tighten from above the grating for easy installation.

(5) Grating Connector— Use a connector to tie two sheets of bar grating together. It lessens trip hazards by holding edges of sheets together as you walk on them.

To Order: For Styles 4 and 5, please specify bearing bar height in 1/4″ increments from 1″ to 2″.

	Material	Fits Bearing Bar Ht.	Fits Bearing Bar Wd.	Fits Bearing Bar Spacing, Ctr.-to-Ctr.	Fits Support Structure Thick.	Bolt Included	Pkg. Qty.		Pkg.

3	Galvanized Steel	Any	Up to 5/16″	1 3/16″	Any	No	25	6268T26	9.45
3	Type 304 Stainless Steel	Any	Up to 5/16″	1 3/16″	Any	No	10	6268T41	10.43
4	Galvanized Steel	1″-2″	Up to 1/4″	1 3/16″	1/4″-3/4″	Yes	1	6268T55	3.07
4	Type 316 Stainless Steel	1″-2″	Up to 1/4″	1 3/16″	1/4″-3/4″	Yes	1	6268T56	6.52
5	Galvanized Steel	1″-2″	Up to 1/4″	1 3/16″	_____	Yes	1	6268T61	9.37

■ To calculate the maximum thickness, take the J-bolt length (2 1/2″ for 6268T31; 3 1/2″ for 6268T35) and then subtract the bearing bar height. You must also subtract 1/4″ for the nut clearance.

Fiberglass Grating Fasteners

6

7

8

9

10

11

12

Made of Type 316 stainless steel, these fasteners are specifically designed for use with the Grit-Top Corrosion-Resistant Fiberglass Grating and the Solid Surface Grit-Top Corrosion-Resistant Fiberglass Grating on page 2104.

(6) Standard Fastener— Requires a hole in the support structure and secures to the structure with a 1/4″-20 hex head cap screw (not included, see page 3146).

(7) Saddle Clip Fasteners— Bridge two bearing bars and require a hole in the support structure. Overall height of the saddle plate is 1/2″.

(8-11) Fasteners with C-Clip and Bolt— Hook onto the support structure and are connected by a bolt to the plate on top of the grating. They tighten from above the grating for easy installation.

To Order: For Styles 8-11, please specify grating height, except for 7010T52.

(12) Solid-Surface Grating Fastener— Requires a hole in the support structure as well as in the grating top (mounting hardware included).

Elevated Steel Flooring

Create an elevated floor system. The floor panels lift out for easy access to wiring, telephone lines, and piping—great for computer rooms. Measuring 24″×24″×1″ Thick., floor panels have a wooden core encased in galvanized steel with a marbled gray and white laminated surface. Uniform load rating is 300 lbs. per sq. ft. (Uniform load rating is the maximum evenly distributed load the floor can support.) Clean with a broom, vacuum, or damp mop only (do not use cleaning agents or wet mopping).

Pedestals adjust 3/4″ up or down to accommodate uneven floors. They have a 4″ square base plate with steel lugs to provide stability and support a corner of up to four panels. Secure pedestal to floors with the two 1/4″ dia. mounting holes (mounting hardware not included).

Floor Panel with 1/16″ Laminate	68025T61	$40.05

Pedestal (For 12″ Floor Ht.)	68025T65	9.42

Stair Treads

Plank-Grating Style

Antislip

Ultra-Antislip Serrated

Mounting Dimensions

Made of galvanized steel for corrosion resistance, these are the most economical stair treads we offer. Treads have two mounting holes on each depth side; one 7/16″ round and one 7/16″ × 1 3/4″ slotted. For indoor and outdoor use.

Antislip Surface—Small projections are combined with large, 1 3/8″ dia. drainage holes for a high-traction surface.

Ultra-Antislip Serrated Surface—Serrated openings provide superior traction while allowing drainage.

Heavy Duty Bar-Grating Style

Smooth-Surface High-Strength Steel

Ultra-Antislip-Surface Lightweight Aluminum

Corrosion-Resistant Stainless Steel

Mounting Dimensions

Choose these stair treads for durability. The *ultra-antislip surface* is serrated to provide superior traction.

High-Strength Steel—An open bar-grid pattern prevents debris from accumulating and a diamond-tread nosing provides traction. *Black-finish treads* have two mounting holes on each depth side; one 7/16″ round and one 7/16″ × 1 7/16″ slotted. They are for indoor use in dry, noncorrosive areas. *Galvanized treads* have two mounting holes on each depth side; one 7/16″ round and one 7/16″ × 7/8″ slotted. They offer better corrosion resistance than black-finish treads and are for indoor and outdoor use.

Lightweight Aluminum—Have better corrosion resistance than the galvanized steel treads. Plus, they're nonsparking and nonmagnetic. All have a ribbed nosing for traction. Treads have two mounting holes on each depth side; one 7/16″ round and one 7/16″ × 1 15/16″ slotted. For indoor and outdoor use.

Corrosion-Resistant Stainless Steel—Made of Type 304 stainless steel, these treads have better corrosion resistance than the steel or aluminum treads. They have a matte finish and a gritted nose for traction. Treads have two mounting holes on each depth side; one 7/16″ round and one 7/16″ × 1 7/16″ slotted. For indoor and outdoor use.

Lightweight Corrosion-Resistant Bar-Grating Style

These lightweight fiberglass treads are corrosion resistant, nonconductive, and nonmagnetic. They're yellow with gray nosing and have a grit-impregnated surface for traction. They do not have mounting holes. Cut treads with a circular saw using a diamond-grit blade and seal the cut end with a resin sealer (sold separately). For indoor and outdoor use.

About Stair Tread Covers and Nosing

Stair tread covers and nosing not only protect worn stairs, they also provide a slip-resistant surface.

Covers protect the entire stair surface. On worn stairs, they provide a new stair surface. ***Nosing*** protects the front portion of the stair.

Stair Tread Covers

H

(A&B) Oil- and Chemical-Resistant Vinyl Covers— Fit square-nose concrete and wood stairs. To install, use stair tread adhesive sold separately. For indoor use.

(C-F) High-Traffic Rubber Covers— Fit square-nose concrete and wood stairs. To install, use stair tread adhesive sold separately. *Style F* comes with two 1″ wide abrasive strips for added traction. For indoor use.

(G) Corrosion-Resistant Aluminum Covers with Grit— A grit top gives these covers excellent traction in high-traffic areas. The color in the table below refers to grit. Covers have 1/4″ dia. countersunk mounting holes. To install, use construction adhesive sold separately on page 3420, or screw in place; see pg. 3317 for concrete screws or see 90031A on page 3017 for #10 wood screws. For indoor and outdoor use.

(H) Corrosion-Resistant Plastic Covers with Grit— Made of fiberglass reinforced plastic (FRP) for superior corrosion resistance in harsh environments. Cover has a yellow glow-in-the-dark nose for high visibility. To install use construction adhesive sold separately on page 3420, or drill and screw in place; see pages 3025 and 3054 for stainless steel truss-head screws. For indoor and outdoor use.

Stair tread adhesive for Styles A-F covers 125-150 sq. ft./gal. Color is white. For indoor use.

To Order: For all stair tread covers, please specify color and length from the available choices listed in the table.

Stair Tread Nosing

J

K

L

M

N

(J&K) Aluminum Nosing— An etched and anodized finish provides a slip-resistant surface. Simple to install, just screw nosing into place. For wood stairs, use #4 wood screws (see 90031A on page 3016). For indoor and outdoor use.

Style J has a ribbed surface. *Style K* has two abrasive strips for added traction.

(L&M) Aluminum Nosing with Grit— Five channels embedded with grit provide excellent traction and slip resistance. For indoor and outdoor use.

Style L can be installed in fresh concrete as well as on existing stairs. It has 1/4″ dia. countersunk holes for concrete screws (see page 3317). *Style M* has an integral anchor for installation in fresh concrete; no fasteners required.

(N) Cast Aluminum and Cast Iron Nosing with Grit— Embedded with abrasive grit for traction, this durable nosing can handle heavy traffic and rough environments. Ideal for concrete-filled, steel framed stairs. Mounting hardware included.

Cast aluminum is for indoor and outdoor use. *Cast iron* is for indoor use.

Nosing epoxy compound is for use between nosing and front edge of a stair to prevent cracks. Covers 75 lin. ft./qt. For indoor and outdoor use.

To Order: Please specify length.

About Shovels, Spades, and Scoops

Open-back blades have a hollow handle socket where the handle attaches to the blade. This design provides strength with less weight.

Closed-back blades have a solid handle socket that is formed into the blade. In addition to providing strength, this design prevents mud and debris from collecting on the back of the blade.

Shovels and Spades

Style B— The choice for digging narrow openings such as trenches. They're also good for clearing mud and debris off of construction equipment.

Style F— In addition to being nonsparking, the polypropylene blade is lighter in weight than steel and aluminum blades. The blade is green; handle is black.

Styles G&J— Made entirely of corrosion-resistant Type 304 stainless steel, the shovel and spade meet USDA standards for use in food-processing, meat-packing, and dairy plants.

For information about scoops, see page 2108.

Scoops

Compared to squared shovels, these scoops boast larger blades to move material quickly and efficiently. All scoops have an open-back blade, unless noted.

Smooth-blade scoops (also known as Eastern-pattern scoops) have smooth, flat bottoms. *Ribbed-blade scoops* (also known as Western-pattern scoops) have a ribbed bottom and are stronger than smooth-blade scoops.

Shallow-Blade Scoops— Have low sides, which allow you to disperse materials over wide areas.

Deep-Blade Scoops— Have high bowl-shaped sides to contain more material.

Hygienic Deep-Blade Scoops— These food-grade scoops meet USDA standards for use in food-processing, meat-packing, and dairy plants. All have a closed-back blade.

Model with smooth stainless steel blade is made of corrosion-resistant Type 304 stainless steel.

Models with smooth polypropylene blade are made of one-piece molded polypropylene. They're lightweight, nonsparking, and resistant to chemicals and corrosion. Use the *color-coded models* to avoid cross-contamination in specific areas. Use the *ergonomic models* with their angled-handle design to reduce back strain when lifting.

Sifting Scoop— This lightweight scoop has 1/2″ wide mesh openings that cause unsifted material to roll to the center for easy removal or disposal. Blade is made of galvanized steel to increase tool life.

Hole-Digging Equipment

Narrow Shovels

With their long, narrow blades, these shovels are sized just right for digging trenches, drains, and post holes. Both shovels have a steel blade with foot step.

Model 6220A15 has a closed-back blade that is 4 3/4″ Wd. × 16″ Ht. ***Model*** 6277A43 has an open-back blade that is 4 3/4″ Wd. × 16 1/4″ Ht.

Handle Style	Handle Material	Handle Lg.	Handle Dia.		
D	Wood	29″	1 1/2″	**6220A15**	$40.82
Straight	Fiberglass	48″	1 1/4″	**6277A43**	42.01

Long-Handle Shovels and Scoops

To make it easier to dig and clear deep holes, these shovels and scoops have a straight, extra-long wood handle. The handle measures 1 7/8″ in diameter and has marks up to 5 ft. to indicate hole depth. Blade is steel with a closed back.

Digging shovels loosen soil. Blade is 9 1/4″ Wd. × 12 1/4″ Ht.

Small scoops remove hard, clay-like soil. Blade is 9 3/4″ Wd. × 8 3/4″ Ht.

Large scoops remove light, sandier soil. Blade is 9 1/2″ Wd. × 10 1/2″ Ht.

	8-ft. Handle		10-ft. Handle		12-ft. Handle	
Digging Shovel	**6219A2**	$117.87	**6219A4**	$131.30	**6219A6**	$145.83

Post-Hole Diggers

Need to dig a post hole? Simply push blades into the soil, spread the handles apart to grab the soil, and then lift the blades out to bring the soil to the surface. All of these post-hole diggers have straight handles and are for use on hard, rocky, and clay-filled soils.

Easy-Dig Powered Auger

Powered by a four-cycle gasoline engine, this auger makes it quicker and easier to dig holes. For a complete unit, you need to order one power head and one auger.

Power head is designed to be operated by one person. The handle is PVC-coated alloy steel. A throttle lets you control speed without releasing your grip.

Augers work in a wide variety of soils. All are made of alloy steel.

An ***auger extension*** increases your digging depth. It does not have spirals. Only one can be used at a time.

A ***screw bit*** is found on the tip of an auger. It is replaceable.

Snow Shovels and Pushers

A&B Snow Shovels—For light to heavy snow falls, these shovels are designed to lift and move snow out of the way.

Style A—All have a wood handle. *Polypropylene blade* is lightweight and black. *Steel blade* is durable and has a nonstick coating. *Aluminum blade* is lightweight with a steel wear strip to extend blade life.

Style B—Has an ergonomic steel handle to reduce back strain. Blade is lightweight aluminum with a steel wear strip to extend blade life.

C-E Snow Pushers—For light snow falls, these tools have wider, deeper blades than snow shovels and push snow out of the way.

Style C—Both are lightweight, ribbed for added strength, and have a steel wear strip to extend blade life. *Polyethylene blade* is black and has a yellow fiberglass handle. *Aluminum blade* has a nonstick coating and a wood handle.

Style D—The widest pusher we offer. Blade is lightweight black polyethylene; handle is fiberglass. Braces ensure blade stability.

Style E—Durable steel blade flexes to maintain its shape. Blade has a nonstick coating and braces to ensure blade stability. Handle is wood.

F Combination Snow Shovel/Pusher—Two tools in one, the blade is sized just right for lifting snow and deep enough to act as a snow pusher. Blade is lightweight, black polyethylene with a galvanized steel wear strip to extend blade life. Handle is fiberglass.

Ice and Snow Melters

Remove snow and ice from walkways and parking lots. *Note:* Not for use on concrete less than one year old, exposed aggregate, or brick.

Rock Salt—Made from sodium chloride, this melter is effective in temperatures above 20° F.

De-Icer—Made from calcium, magnesium, potassium, and sodium chlorides, this melter is effective in temperatures as low as –12° F. It inhibits refreezing and is nontoxic to humans, grass, plants, and trees.

Rock Salt (50-lb. Bag)	**6235A65**	**1-9**	$9.95	**10-Up**	$8.92
De-Icer (50-lb. Box)	**6320A12**	**1-5**	18.89	**6-Up**	17.00
De-Icer (100-lb. Box)	**6320A14**	**1-4**	36.40	**5-Up**	32.65

Glass and Window De-Icer

Spray this de-icer on your glass and windows to melt frost, ice, and snow on contact. It keeps ice from forming. It also releases frozen doors, handles, and locks. Twelve 12-oz. net wt. aerosol cans per case.

6189A11 ..... **Each** Partial Case $5.62 Full Case $5.11

Roof Snow Rake

Remove snow from your rooftop with your feet planted safely on the ground. This lightweight aluminum snow rake has a blade that is attached and braced to a three-piece, quick-connect handle. The section of the handle closest to the blade is angled to provide easy access to rooftops. Blade is 22″ Wd.×4⅝″ Ht. Handle is 1⅛″ in diameter and measures 16 feet long when assembled.

Rake	**6293A4**	$49.74
Opt. 4-ft. Extension Handle	**6293A21**	15.12

Broadcast Spreaders

Easily spread ice-melting products, fertilizer, and more (unless noted). *Note:* Only *Style L* can be used with rock salt.

G Hand-Held Spreader—Hand-crank design has a spread pattern of 6 to 12 feet.

H-L Push Spreaders—All models have a steel frame and fingertip controls on the handle.

Style H has a spread pattern of 4 to 12 feet. It also has a corrosion-resistant, Type 304 stainless steel hopper and 10″ dia. pneumatic tires.

Style J has a spread pattern of 10 to 12 feet. It also has 10″ dia. solid rubber wheels.

Style K has a spread pattern of 5 to 12 feet. It also has 10″ dia. pneumatic tires.

Style L is the only spreader we offer that can be used with rock salt. You can't, however, use it for fertilizer. Spreader has a 5 to 12 feet spread pattern and 13″ dia. pneumatic tires.

Optional hopper cover for Styles K and L is clear vinyl and keeps contents dry.

Optional three-sided deflector kits for Styles K and L attach to the bottom of the hopper and limit the spread pattern to 22″—excellent for narrow spots and walkways. Mounting hardware is included.

Rakes

F Lawn/Leaf Rakes—Flexible steel tines make it easy to collect light-weight materials such as leaves and lawn clippings.

G Bow Rake—This traditional garden rake has curved tines.

H Straight Rake—In addition to the slightly curved tines, this rake has a straight top grading edge for spreading and leveling materials.

J Landscape Rakes—These sturdy, lightweight rakes have an angled grading edge on one side and rounded tines on the other for smooth raking action.

K Asphalt Rake with Steel Tines—To protect the wood handle from hot tar, this asphalt rake has an 18″ long steel shank that connects the blade to the handle.

L Asphalt Rake with Aluminum Tines—Also known as a lute rake, this rake has one serrated edge and one smooth edge for leveling and finishing asphalt.

M Concrete Rake—With its solid blade, this rake is designed for spreading and leveling freshly poured concrete.

Landscape Edging

Keep stones, mulch, and other landscaping materials in place with this black polyethylene barrier. Edging is 4¾″ high with a 1″ dia. round top. Each 20-ft. length comes with four 9″×1″ steel anchoring stakes and one plug that connects lengths.

63495T81 ..... $17.12

Erosion Control Fence

Specially designed fence prevents sediment, top soil, and other debris from washing away while allowing water to flow through. The black polypropylene fabric is attached to 48″ high wood posts at 8-ft. intervals. Overall size is 3′ Ht.×100′ Lg.

66955T45 ..... $35.35

Ground-Marking Spray Paint

Wand with Paint

Nonpermanent, water-based aerosol paint sprays upside-down. One can covers up to 664 linear ft. at 1″ wide. Application temp. is 50° to 90° F. Furnished in a 17-oz. net wt. can. **To Order:** Please specify color: nonfluorescent white or yellow; fluorescent blue, green, orange, pink, red, or red/orange.

Applicator wand (sold separately) makes 1″-1½″ wide marks and is made of polyethylene with a steel shaft. Wheel size is 3″ Dia.×½″ Wd. Overall size is 34″ long.

		Each Partial Pkg.	Full Pkg.
Paint (12/Pkg.)	1584T1	$4.73	$4.22
Applicator Wand	1584T2	**Each**	$24.46

Spray Heads for Underground Sprinkler Systems

Once connected to the riser of your sprinkler system, these heads are ready to water.

Styles A&B— Provide a continuous, uninterrupted stream of water.

Style A heads stay flush with the ground and are made of plastic.

Style B heads rise when water flow starts and retract when the water flow stops. They are made of plastic.

Style C— Heads have an arm that strikes the outgoing water stream to create a pulsating spray of water. The heads remain above ground at all times, are typically mounted to a riser pipe, and are made of brass.

Sprinkler Timers

Garden Hose Timers

To install, simply attach one end of a timer to your water spigot and the other end to your garden hose. Furnished with one male and one female threaded fitting with ¾″ garden hose connections (GHT), unless noted.

Economy— Turn the dial to the amount of water (gallons or liters) you want to dispense. Timer automatically shuts off when that amount of water is delivered. Time markings let you estimate how long it will take. This timer also has a constant-on setting. Housing is polypropylene.

Programmable— Program up to 4 cycles per day (from 1 minute to 6 hours per cycle). Includes two male ¾″ GHT fittings, one for programmed and one for manual use. LCD display shows current time. Housing is ABS plastic. Requires two 9-volt batteries (sold below).

Economy

Multizone Timer for Sprinkler Systems

Designed for use with all 24-VAC automatic sprinkler valves, you can program this timer to water up to six different zones (from 1 minute to 12 hours) four times a day or use the custom manual-control option. An LCD panel displays precise start times. Housing is ABS plastic. Size is 9½″ Wd. × 3⅜″ Dp. × 8″ Ht.

Mount indoors and outdoors. Operates on 110-120 VAC, 50/60 Hz, 0.8 amps and has an output voltage of 24 VAC. Includes a 6-ft. power cord with three-prong plug, screw terminal connection, and a 1″ dia. unthreaded conduit entry connection on the bottom. UL listed.

76675T34 ..... $97.36

Sprinklers

These metal sprinklers have an adjustable spray pattern. Furnished with standard ¾″ female garden hose thread (GHT) inlets.

Flexible Downspout Extensions

Keep water away from buildings. These polyethylene extensions adjust from 25″ to 55″ long; fit 3″ and 4″ wide downspouts. Connect them for longer runs.

Brown	**68125T23**	$12.69
White	**68125T21**	12.69

Gutters

Aluminum— Gutters and components are lightweight aluminum with a white painted finish (unless noted). *Gutters* are 6″ wide and are for use with 4″ components. *Downspouts* are rectangular. *Polypropylene supports* keep the polypropylene gutter guard in place (for aluminum gutters only). Use one package per 20-ft. roll of gutter guard.

Galvanized Steel— Gutters and components are rust-resistant, unpainted galvanized steel. *Gutters* are 5″ wide half-round and are for use with 3″ or 4″ components. *Downspouts* are round.

★ Unpainted, with rubber middle piece. Also serves as an expansion joint.

Roof-Repair Patches

Plastic Roof-Repair Patch

This reinforced, petroleum-asphalt-based patch repairs holes and gaps in roofing, joints, and gutters. It also provides a water-repellent seal. Patch can be applied on wet (unless noted) and dry surfaces. One gallon covers 12 sq. ft. at 1/8″ thick. Apply with a trowel between 40° and 122° F. Meets ASTM D4586. Color is black. *Note:* Not for use on tar roofs.

Size		
11-oz. Cartridge	7746T1■	$4.68
1-gal. Can	7746T3	16.12
5-gal. Can	7746T4	76.27

■ Do not apply on wet surfaces.

Heavy Duty Flexible Rubberized Roof-Repair Patch

Significantly more flexible than the Plastic Roof-Repair Patch above, this high-performance neoprene rubber patch seals cracks, holes, and tears in roofing. Patch can be applied on wet surfaces; the *10-oz. cartridge* can be applied in standing water. It remains flexible and watertight for many years.

One gallon covers 6 sq. ft. at 1/4″ thick. Apply with a trowel between 40° and 120° F. Color is black.

Size		
10-oz. Cartridge	7568T51	$6.38
1-gal. Can	7568T53	36.51

Reflective Roof-Repair Patch

This elastic, water-based patch repairs and seals cracks, holes, and tears on metal, aluminum, concrete, and foam roofs. It's white to reflect the sun's rays. One gallon covers 25 sq. ft. at 1/16″ thick. Apply with a trowel, brush, or roller on dry surfaces at a minimum temperature of 50° F.

Size		
0.9-gal. Can	76405T16	$37.66
5-gal. Can	76405T21	147.77

Roof-Repair Mesh Fabric

Repair most roofing materials with this flexible fabric. You can use it with both hot- and cold-applied asphalt patches and coatings. When used with patches and coatings, it acts as a reinforcement.

Asphalt-Coated Glass Fabric—Meets ASTM D1668-86, Type 1.

	Color	Roll Size		
Polyester Fabric	White	4″× 50 ft.	76405T28	$9.22
Asphalt-Coated Glass Fabric	Black	6″×150 ft.	7574T1	13.69
Asphalt-Coated Glass Fabric	Black	36″×150 ft.	7574T4	78.88

Roof Coatings

Bring new life to your old roof with these coatings. They not only make your roof look like new, but also act like new by restoring properties to protect your roof from the elements.

Reinforced Roof Coatings

These petroleum-asphalt-based coatings are reinforced with fiber for strength. Use them on metal, composition, built-up, and other roof materials. Apply on dry surfaces with a sprayer or brush at 40° to 104° F.

Black coating can also be used to dampproof foundation walls. One gallon covers 25 sq. ft. at 1/16″ thick. Meets ASTM D4479. These items are compliant under all state VOC rules in effect on June 1, 2011, except in California. ***Reflective-aluminum coating*** cuts cooling costs by reflecting the sun's rays. One gallon covers 50 sq. ft. at 1/32″ thick. Meets ASTM D2824, Type 3. These items are compliant under all state VOC rules in effect on June 1, 2011, except in the Los Angeles area.

	Black		*Reflective Aluminum*

4.7-gal. Can	7747T31	68.03	7747T32	114.09

Heavy Duty Flexible Roof Coating and Primer

Our flexible, water-based coating and primer provide long-lasting protection. Use them on metal, concrete, and foam roofs. One gallon covers 80 sq. ft. Apply with a brush or roller on dry surfaces only at a minimum temperature of 50° F.

Coating—Color is blue (dries white).

Primer—To extend coating life, use this light gray primer.

	0.9-gal. Cans		*4.75-gal. Cans*	
Coating	7687T75	$39.24	7687T85	$144.03
Primer	7687T3	42.38	7687T4	164.44

Temporary Roof-Leak Sealant

In just minutes you can make a temporary patch to quickly seal roof leaks. It works in standing water and rain—simply pour it on.

Sealant is a powder that expands into a gel on contact with water to repair cracks up to 1″ wide in any flat roof. It lasts as long as the patch is kept wet and can be used in any temperature where liquid is present. One 25-lb. pail covers 50 sq. ft. at 1/2″ thick. Color is gray.

25-lb. Pail 7635T15 $36.86

All-In-One Adhesive-Backed Roof-Repair Rolls

Peel off the backing and then stick in place to quickly and easily repair leaky roofs, gutters, and more. No additional coatings are required. All rolls have a rubberized, asphalt adhesive back. Choose from models with a laminated, reflective aluminum surface or a laminated, white-coated aluminum surface.

Rolls are lightweight; puncture, abrasion, and leak resistant; and reflect heat. They conform to a variety of clean, smooth, dry surfaces such as wood, metal, masonry, and existing asphalt roofs.

Rolls are 33 1/2 ft. Lg.×3/64″ Thick. and can be easily cut to size. Apply in temperatures above 60° F.

Width	*Reflective Aluminum Surface*	Roll	*White-Coated Aluminum Surface*	Roll
4″	9640T1	$14.81	9640T4	$16.03
6″	9640T2	22.23	9640T5	24.05
36″	9640T3	121.08	9640T6	131.37

Roof Flashing for Pipes

To prevent roof leaks before they start, this flashing allows pipes that penetrate your roof to expand, contract, and vibrate without disturbing the watertight seal.

1-3 For Single-Ply, Built-Up, and Corrugated-Metal Roofs—Use this flashing for air conditioning, heating, and exhaust-system pipes. All styles have a rubber cap and an aluminum base. The rubber portion can be cut to fit each pipe OD size listed below. Each includes one stainless steel clamp (unless noted). Temperature range is –60° to +270° F.

(1&2) Flashing for single-ply and built-up roofs has a black EPDM rubber cap with a double-groove connection that mates to the round aluminum base.

(3) Flashing for corrugated-metal roofs is made of one-piece EPDM molded gray rubber with a 1″ wide aluminum flanged base that bends to any contour.

4 For Shingle Roofs—Use this flashing for plumbing vent pipes as well as two-walled, air-insulated vent pipes (also known as Type B roof vents). It has a black elastomeric collar that easily slides over pipes and a 24-gauge, galvanized steel base. This flashing fits 40° pitched roofs and is rated for 180° F continuous heat.

★ Includes four clamps.

Roof-Coating Brush

Applying roof-repair patches and coatings is not a problem for this heavy duty brush. It has 3 1/4″ long tampico fiber bristles securely attached to a 6 1/4″×1 3/4″ hardwood block and a 1 1/8″ dia., 54″ long, tapered wood handle.

7233T3 ..... $14.98

Roof-Shingle Remover

Made of steel, the blade is notched and has a heavy duty pivoting point welded on the back for excellent shingle-lifting leverage. The blade measures 6 7/8″ Wd.×12″ Ht. and has a 1 1/2″ dia., 48″ long, straight wood handle.

6321A12 ..... $36.28

Flat-Roof Drains

Unthreaded PVC Drains— These lightweight drains have a UV-stabilized PVC body, a rustproof cast-aluminum dome, and an EPDM connector to attach the drain to a drainage pipe. They include an installation kit with an underdeck clamping ring; 6″ long, unthreaded, Schedule 40 pipe extension; rubber expansion coupling; and two stainless steel clamps.

Threaded Cast Iron Drains— Our heavy duty cast iron drains have a flanged collar to hold flashing and roofing material without puncturing. Body and dome are painted gray. Connections are NPT female.

Cast Iron

Standard w/ Threaded Connection
Standard w/ Unthreaded Connection
Hinged w/ Inside-Caulk Connection

Standard Style— All have a two-piece design that clamps together with included screws. Capacity is 5,000 lbs., unless noted.

Models with threaded connection have NPT female threads that connect drains to drainage pipe. Grate surface is 2″ above flange. Grate dia. is 8⅛″.

Models with unthreaded connection (also known as a no-hub connection) use a pipe coupling (not included, see page 104) to secure drains to drainage pipe. Choose pipe-joining clamp 6820K23 for 3″ pipe size; 6820K24 for 4″ pipe size. Both drains have an adjustable-height, threaded drain grate—for positioning, screw the grate up or down from a min. of ¾″ to a max. of 2⅛″ above flange. Grate dia. is 5″.

Models with inside-caulk connection allow drains to fit over drainage pipe and attach with lead caulk (see 9031K on page 3631). Grate surface is 2″ above flange. Grate dia. is 8⅛″.

Hinged Style— Drains lift open for cleaning. Capacity is 750 lbs. All have inside-caulk connections that allow drains to fit over drainage pipe and attach with lead caulk (see 9031K on pg. 3631). Grate dia. is 7½″.

Floor Drain Backflow Preventers

Put an end to water damage from backed-up sewers. All have a rubber collar, rubber float, and aluminum (2495K12) or galvanized steel (2495K13 and K14) metal parts. To install, place a preventer into your floor drain and tighten the screws (included)—the rubber collar will expand for proper fit. When water backs up, the rubber float will rise to seal off the drain. When water recedes, the float will drop for normal drainage.

Fits Drain ID

Insect Control

Crawling Insect Glue Trap and Ant Bait Station

Both traps are designed for indoor use.
Crawling Insect Glue Trap— Baited, non-toxic, and ready to use—just peel off the protective paper to expose the glue. When insects crawl into this tent-shaped cardboard trap, they'll stick to the glue.
Ant Bait Station— Wipe out colonies of ants when a few take bait back to the rest. EPA registered.

	O'all Size, Ht.×Wd.×Dp.	Pkg. Qty.		Pkg.
Crawling Insect Glue Trap	2¼″×4″ ×3″	4	98285T35	$2.74
Ant Bait Station	½″×2½″×2½″	6	67705T49	4.42

Fly Swatter

Measuring 21″ long, this fly swatter has a wire handle and 5″×5″ plastic blade. 12 per case.

1359T83 ..... **Each** 1-11 $1.23 12-Up $1.01

Sticky Fly Paper

Catch flying insects with sticky, nontoxic, environmentally safe traps.
Ribbons— Suspend these ribbons from the ceiling or ledge. They are sticky on both sides.
Sheets— Apply these clear sheets to windows and other flat surfaces. They are sticky on one side with an adhesive strip on the other side.

	O'all Size, Lg.×Wd.	Pkg. Qty.	Pkgs./ Case		Pkg. Partial Case	Pkg. Full Case
Ribbons	36″×1¾″	4	12	9239T33	$1.95	$1.73
Sheets	8″×2½″	4	24	7912T57	3.75	3.28

Yellow Jacket Trap

Insecticide-free trap includes bait to lure and contain yellow jackets. When it gets full, simply throw it away. Trap is plastic, can be hung using the 3/16″ dia. eyelet, or set on a flat surface. Overall size is 3¾″ Dia.×9¼″ Ht. 12 per case.

9683T14 ..... **Each** 1-11 $5.89 12-Up $5.29

Insecticide Sprays

In addition to killing insects on the spot, these sprays leave a residual coating to exterminate returning insects. EPA registered.
Crawling and ***Flying Insects—*** Spray is water based. Not rated for application temperature.
Wasps and Hornets— Hit your target from up to 20 feet away with this solvent-based spray. Not rated for application temperature.

For Insects	Net Wt.	Cans/ Case		Each Partial Case	Each Full Case
Crawling Insects	17.5 oz.	12	9826T28	$7.86	$7.14
Flying Insects	19 oz.	6	9826T27	13.17	11.80
Wasps and Hornets	12 oz.	12	9825T32	6.36	5.77

Insect Foggers

Great for treating large areas. EPA registered.
Indoor aerosol fogger is effective up to 625 square feet and leaves a residual coating that continues to kill insects for weeks. Spray to apply—separate fogging equipment not required. Leaves no wet, messy residue. Twelve packs of three, 1.5-oz. net weight aerosol cans per case.

9788T12 ..... **Pkg.** 1-11 $11.90 12-Up $10.66

Outdoor aerosol fogger is effective over a 20-ft.×25-ft. space and leaves a residual coating that continues to kill mosquitoes for 8 hours. Twelve 16-oz. net weight aerosol cans per case.

9788T13 ..... **Each** 1-11 $4.78 12-Up $4.28

Propane Fogger with Propane Fuel Cylinder

Propane fogger has a 40-oz. tank. It is made of ABS plastic and is for outdoor use only. A ***propane fuel cylinder*** (sold separately below) is required for operation.

Bug Zappers

Aluminum and Steel Indoor Wall Mount

Aluminum Indoor Hook Mount

Stainless Steel Indoor Hook Mount

Polycarbonate Outdoor Hook Mount

Stainless Steel Outdoor Hook Mount

Lured by 40-watt UV light bulbs, flying insects and bugs are killed when they come in contact with the zappers' electrified metal grid. All of these bug zappers operate on 110-120 VAC, 60 Hz and are furnished with a power cord with three-prong plug. USDA accepted (except for the economy polycarbonate models) and UL listed.

Indoor bug zappers come furnished with a bug collection tray.

Mouse and Rat Control

Mouse and Rat Bait Stations

Mice and rats have easy access to the block of poison bait in these stations. Both are for indoor and outdoor use and have a window to check the poison. Poisons are EPA registered.

Refillable mouse bait station is made of nylon. It holds one 1-oz. poison block that can be replaced as needed. Each station includes eight 1-oz. poison blocks.

Disposable mouse and rat bait station is made of plastic. It includes one 4-oz. poison block that is sealed inside the station. Once the poison is gone, dispose of the station.

Multicatch Mouse Trap

Bait these traps once and you'll be able to catch up to 30 mice. The mice crawl in but can't escape. Trap is galvanized steel with a hinged lid so it's easy to dispose or release mice elsewhere. For indoor use.

O'all Size, Ht.×Wd.×Dp.		
1 13/16″×6⅛″×10⅜″	9836T1	$16.71

Rat Trap

A spring-loaded door allows a rat to crawl in, but not leave until you release it. Trap is made of heavy, galvanized steel wire mesh with a galvanized steel handle. Mesh size is 1″×1″. For indoor and outdoor use.

O'all Size, Ht.×Wd.×Dp.		
7″×7″×17″	7128T16	$32.27

Mouse and Rat Zappers

When mice and rats go for your bait, these zappers will electrocute them instantly and cleanly. When you dispose of the rodents, you'll never have to touch them. Zappers operate on four AA alkaline batteries (sold separately). All are for indoor use and require bait.

Rat Zapper

Mouse Zapper—Provides up to 50 kills per set of batteries. Made of polystyrene.

Rat Zapper—Provides up to 30 kills per set of batteries. Made of ABS plastic.

Optional Remote Monitor for Rat Zapper—An LED signals when a rodent is captured. Monitor plugs into zapper and has a 12-ft. long cord.

	O'all Size, Ht.×Wd.×Dp.		Each

Rodent Repellent

Ward off mice, rats, squirrels, voles, shrews, and chipmunks with granules made from predator urine. Shake lightly over areas in need of protection, and pests will instinctively avoid the perceived threat. Not for indoor use.

28½-oz. Container 9541T1 $15.00

Bird Control

Bird Roosting Prevention Paste

All-weather, nonpoisonous repellent discourages pigeons, starlings, and English sparrows from roosting. It adheres to many surfaces including roof lines, window sills, gutters, and ledges. Color is clear.

The ***10-oz. cartridge*** is for use with a standard caulking gun (not included). 1 oz. will produce a ¼″ line that measures 1 ft. long.

	Pkg. Qty.		Each Partial Pkg.	Full Pkg.
10-oz. Cartridge	12	7127T2	$9.05	$8.04
4½-lb. Pail	4	7127T4	46.48	41.31

Bird Roosting Preventers

Strips—No messy pastes, just nail, screw, or glue these flexible strips on straight or curved surfaces.

Economical *polycarbonate strips* have snap-off notches every 5″ or can be cut with a knife. They also have ten ¼″ dia. mounting holes. Color is clear. Each box includes two 2-ft. strips.

Durable *Type 316 stainless steel strips* have a polycarbonate base and can be cut with a hack saw. They also have thirty-two ¼″ dia. mounting holes. Each box includes four 2-ft. strips.

(A)	(B)	(C)	Strip Lg.		Box 1-3	4-Up

Bird Control Netting

Keep birds out of your facility with this black polypropylene netting. Simply attach it to existing structures with staples, adhesives, or the fastening clips sold below. Netting is strong, lightweight, UV stabilized, and can be cut to size with scissors.

Standard Netting—17 ft. wide; ⅝″×¾″ mesh size.

Heavy Duty Netting—Stronger than standard netting. 14 ft. wide; ½″×½″ mesh size.

Fastening Clips for Netting—Use nails or screws to attach these black polypropylene clips to netting. To attach netting to suspended wire, snap the clips over the wire. We recommend you use one clip every 1 to 3 feet. Mounting hole dia. is ¼″.

Netting with Fastening Clips

Indoor Fiberglass-Laminate Wall Panel

Cover wallboard, masonry, and studs with this durable, washable, mildew-resistant panel. Measuring 0.090″ thick with a pebbled texture, it can be cut with a fine-tooth carbide-tipped power saw. To install, use a trowelable construction-grade adhesive, nylon drive rivets, or a combination of the two (sold separately). Temp. range of panel is –65° to +135° F. Panel meets USDA regulations for incidental food contact and is Class C fire rated.

Connectors and ***finishing strip*** are 8 ft. long and made of polypropylene.

To Order: For panel, connectors, finishing strip, and nylon drive rivets, please specify color: almond or white, unless noted.

★ Also available in gray. ♦ This product is compliant under all state VOC rules in effect on April 1, 2010.

Steel Stud and Base

Use a stud with a base to create nonload-bearing interior partitions and wall framing. Both are made of 25-gauge, corrosion-resistant, galvanized steel.

Stud has knockouts approximately 12″ from each end to accommodate conduit and pipe. ***Base*** aligns and anchors stud to floors and ceilings.

	Wd.×Lg.	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.
Stud	3⅝″×10 ft.	10	77095T42	$9.37	$7.96
Base	3⅝″×10 ft.	10	77095T43	9.04	7.68

Indoor/Outdoor Polycarbonate Wall and Roof Panels

Virtually unbreakable, these polycarbonate panels are impact, heat, chemical, and weather resistant. To cut panels to size, use a circular saw with a fine-tooth blade. ***Closure strips*** keep the top and bottom ends clear of dirt and dust. ***Connectors*** join two panels side by side.

Noncorrugated Panels— These ¼″ thick panels consist of two polycarbonate layers (one of which has a UV stabilizer) separated by stiffening ribs. Roofing applications require a minimum 5° slope. Temp. range is –40° to +250° F. Color is clear. Panels meet UL-723 for flammability and have an ASTM flame spread rating of 5.

Closure strips and *connectors* are made of polycarbonate.

Corrugated Panels— These 1/16″ thick panels have 3″ Wd.×1¼″ Ht. corrugations. Temp. range is –30° to +260° F. Color is white. Panels have an FM flame spread rating of 6.

Closure strips are polyethylene foam. **To Order:** Please specify top or bottom end. *Connectors* are a Type 304 stainless steel screw with grommet, nut, and neoprene washer. Use one connector for every foot of panel length.

Suspended Ceiling Tiles and Framing

Create a new drop ceiling that allows access to piping and wiring, expand your existing drop ceiling, or just replace old ceiling tiles. All tiles and framing are for indoor use. Color is white, unless noted.

Suspended Ceiling Tiles

To install, simply lay tiles directly on framing (sold below). Unless noted, these tiles fit flush with the framing and can be trimmed with a utility knife. All have a Class A fire rating. They meet ASTM E84 surface burning characteristics with a flame spread rating of 25 or less.

(A-C) Medium Duty Tiles— All offer good sound absorption. UL classified.

(B) Tiles with additional fire resistance are specially constructed for use in various UL fire-rated ceiling assemblies.

(C) Recessed-edge tiles have indented edges on all four sides so the face of the tile extends below the framing when installed.

(D) Heavy Duty Tiles with Additional Sound Absorption— In addition to being thicker and more durable than our Medium Duty tiles, these tiles provide excellent sound absorption and are treated for good humidity resistance. UL classified.

(E) Specialty Tiles for Superior Sound Absorption— These tiles offer more sound absorption than *Style D* tiles above. They're also laminated with fleece to prevent degradation. Color is white on one side and black on the other.

(F) Specialty Tiles for Food Processing Areas— These tiles are washable and have a greater tolerance for humidity than our Medium and Heavy Duty tiles. UL classified.

(G) Specialty Tiles for Clean Rooms— For use in clean rooms up to Class 100, these tiles also offer additional fire resistance and good humidity resistance. They are specially constructed for use in various UL fire-rated ceiling assemblies. UL classified.

(H) Specialty Tiles for High-Humidity and Food Processing Areas— Made of fiberglass-reinforced plastic, these washable tiles have a greater tolerance for humidity than our other tiles. They won't rot, stain, or dent. Trim with sheet metal shears or a circular carbide-tipped blade.

Framing for Suspended Ceiling Tiles

Use these components to design your own frame to support ceiling tiles (sold above). For indoor use. Color is white.

Main and ***cross tees*** snap together. ***Wall molding*** secures the frame you've made to the wall. ***Hanger rods*** are made of 12-gauge steel, measure 12 ft. long, and are used to suspend and secure your frame from the ceiling.

Steel— The main and cross tees are approved for use in various UL fire-rated ceiling assemblies. The wall molding and hanger rod aren't required to be fire rated and won't reduce the overall fire protection of the ceiling system.

Corrosion-Resistant Aluminum— These components withstand higher humidity than our steel components, but are not fire rated. They can be used in food processing areas.

	Wd.	Steel Lg.		Each	Corrosion-Resistant Aluminum Lg.		Each
Main Tee	15/16″	12 ft.	62765T31	$9.30	12 ft.	8014T51	$22.26
Cross Tee	15/16″	4 ft.	62765T32	3.09	4 ft.	8014T52	7.42
Cross Tee	15/16″	2 ft.	62765T33	1.55	2 ft.	8014T53	3.70
Wall Molding	7/8″	12 ft.	62765T34	5.89	10 ft.	8014T54	10.46

Hanger Rods (10/Pkg.) ..... 62765T65 **Pkg.** $11.04

Ceiling Tile Spray Paint

Why buy new tiles if you don't have to? Restore existing water- and smoke-stained ceiling tiles to their original appearance with this easy-to-apply spray paint. It will not warp or sag tiles. Choose from "new white" for a bright, new-tile look and "old white" when you need to match older, aged white tiles.

Furnished in an aerosol can, this paint is water based. Application temp. is 70° to 90° F. Maximum temp. is 250° F. Coverage is 15 sq. ft. per can. For indoor use only. Finish is flat.

Color	Dry to Touch	Fully Dry	Net Wt., oz.	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.
New White	15 min.	1 hr.	16	12	9556T11	$11.76	$10.50
Old White	15 min.	1 hr.	16	12	9556T12	11.76	10.50

Suspended Ceiling Drainage Tiles

Stop struggling with unsightly, makeshift solutions for leaky ceilings. These white polystyrene drainage tiles temporarily replace existing 2 ft.×2 ft. or 2 ft.×4 ft. suspended ceiling tiles to trap and divert 1 quart of water per minute at ambient temperatures. Measuring 1/16″ thick, tiles have grooves that direct the water to a center drain which has a barbed fitting. To drain the water, attach the included 25-ft. long drain tube and route it to a collection receptacle. Furnished with six ceiling-grid clips to attach tile to ceiling tee framing and nine adjustable tube hangers to route drain tube.

2 ft.×2 ft. Tile ..... 7575T4 ..... $139.09
2 ft.×4 ft. Tile ..... 7575T6 ..... 156.52

Suspended Ceiling Hangers

No hammering or special tools required—just slide these hangers on to your ceiling tile framing to hang signs, plants, and more. All hangers can be used again and again.

Style J— Designed for mounting items flush with the wall. Just lift a ceiling tile, press the hanger on to the frame wall molding, and let the ceiling tile fall back into place. Universal size fits all framing.

Style K— This hanger is made up of two pieces that slide together to form a closed or open hook (see illustration). It fits 15/16″ wide main and cross framing tees.

Style L— The hook on this hanger swivels 360° for versatility. To install, just flex the base slightly and clip it on to the ceiling frame. It fits 15/16″ wide main and cross framing tees.

Style M— For secure installation, simply twist and lock this hanger on to your ceiling frame. It fits 15/16″ wide main and cross framing tees.

	Material	Finish	Lg.	Dia.	Pkg. Qty.		Pkg.

Breathable Canvas Tarps

Standard Tarp with Reinforced Corner

To prevent condensation buildup, these breathable, water- and mildew-resistant tarps are made of canvas. They stay flexible in low temperatures. For strength, all four sides have double-stitched seams. Each side also has 3/8″ ID brass grommets (unless noted) spaced 2 feet apart. **To Order:** For custom sizes, please specify size.

Standard Tarps with Reinforced Corners—A triangular canvas patch is sewn on to each corner of these tarps. The patches provide four additional layers of canvas fabric for increased corner strength. Grommets are 1/2″ ID.

Flame-Resistant Tarps—These tarps will not support combustion. They meet California Fire Marshal requirements.

General Purpose Polyethylene Tarps

Reflective Silver/Black Tarp with Reinforced Corner

With the security of rope-reinforced hems and heat-sealed seams (unless noted), these economical tarps are water, rot, tear, and UV resistant.

Color-Coded Tarps—Each side has 1/2″ ID aluminum grommets that are spaced 3 feet apart.

Reflective Silver/Black Tarps with Reinforced Corners—Offer a higher tear strength than the color-coded tarps. Molded-plastic corners add even more strength. Tarps are black on one side for better UV resistance and silver on the other for reflectivity. Each side has 1/2″ ID aluminum grommets that are spaced 2 feet apart.

Flame-Resistant Tarps—These tarps will not support combustion; meet California Fire Marshal requirements. Polyethylene patches on the corners add strength. Each side has 1/2″ ID aluminum grommets that are spaced 2 feet apart.

Heavy Duty Reflective Silver/Black Tarps—These heavy duty tarps are black on one side for better UV resistance and silver on the other for reflectivity. Each side has 3/8″ ID brass grommets that are spaced 2 feet apart. **To Order:** For custom sizes, please specify size.

Heavy Duty Clear Tarps—Clear and seamless, these tarps keep covered items visible. All have 3/8″ ID brass grommets that are spaced 2 feet apart. **To Order:** For custom sizes, please specify size.

Color-Coded Vinyl-Laminated and Vinyl-Coated Nylon Tarps

These durable tarps provide water, UV, and tear resistance as well as remain flexible in extremely low temperatures. **To Order:** Please specify color: black, blue, green, or tan (unless noted). For custom sizes, please specify size.

Flame-Resistant Vinyl-Laminated Nylon Tarps— These tarps will not support combustion, meet MIL-C-43006B, and are California Fire Marshal approved. Each side has 3/8″ ID brass grommets that are spaced approximately 2 feet apart.

Heavy Duty Vinyl-Coated Nylon Tarps— Here are our most abrasion-, tear-, and puncture-resistant tarps. Great for outdoor and mobile (truck) applications. Each side has 1/2″ ID brass grommets that are spaced approximately 2 feet apart.

18 oz./sq. yd. tarps meet MIL-C-20696.

22 oz./sq. yd. tarps (listed sizes as well as custom sizes) are not available in tan.

Heavy Duty Vinyl-Coated Nylon Tarps with D-Rings

If you need a high degree of tensioning combined with superior protection, then look no further. These extra-durable tarps have one row of equally spaced, 1 1/4″ Ht.×1 1/4″ Wd. steel D-rings that are sewn into the two length sides.

These tarps are abrasion, tear, puncture, water, and UV resistant. They remain flexible in extremely low temperatures. Each side has 3/8″ ID brass grommets that are spaced approximately 2 feet apart. Color is black. Meet MIL-C-20696.

To Order: For custom sizes, please specify size.

Chemical-Resistant Neoprene-Coated Nylon Tarps

Chemicals such as gasoline, methanol, sodium chloride, ammonium sulfate, lubricating oils, and petroleum oils are no problem for these tarps. They also offer mildew, UV, and grease resistance. Each side has 3/8″ ID brass grommets that are spaced approximately 2 feet apart.

Choose from tarps that are black on both sides and tarps that are black on one side and silver on the other for reflectivity.

Five-Sided Snug-Fitting Tarps

Designed to fit over machinery and other objects, these tarps provide snug-fitting protection. On the corners and center bottom edges there are 3/8″ ID brass grommets. **To Order:** For custom sizes, please specify size.

Polyethylene— These tarps are water, rot, tear, and UV resistant. They are black on one side for UV resistance and silver on the other for reflectivity.

Vinyl-Coated Nylon— These extra-durable tarps offer high tear strength, good abrasion resistance, and are waterproof. They remain flexible in extremely low temperatures. **To Order:** Please specify color: black, blue, green, or yellow.

Ventilating Mesh Tarps

When maximum airflow is a concern, but water resistance is not, these are the tarps to choose. They're UV resistant and can be used as truck/flatbed covers, shade covers, cargo netting, and wind screens. For durability, all have a 2″ wide, web-reinforced hem that's made of black polypropylene.

Polyethylene— Tarps are black with a mesh opening size of 1/16″×1/16″. Each side has 5/8″ ID brass grommets that are spaced approximately 2 feet apart. Shade rating is 60%.

Polyester— Stronger and more heat and UV resistant than polyethylene. Tarps are white with a mesh opening size of 1/4″×1/4″. Each side has 3/8″ ID brass grommets that are spaced approximately 2 feet apart. Shade rating is 40%.

Drainage Tarps

Flame-Resistant Vinyl-Coated Nylon

Protect your work areas and equipment from overhead leaks with these rot- and mildew-resistant tarps. Hang tarps by the welded, nickel-plated steel D-rings that are sewn into each corner. D-rings measure 1″ across and 7/8″ high. To drain, connect the threaded drain spout to any 3/4″ female garden hose (GHT) fitting.

Polyethylene—One side is silver and the other side is black. When installed, the black side is shown.

Flame-Resistant Vinyl-Coated Nylon—These tarps will not support combustion and meet California Fire Marshal requirements. They remain flexible in extremely low temperatures. Color is translucent white.

Tarp Accessories

For bungee cords, see pages 1512. For rope, see pages 1410-1414. For metal grommets, see pages 3774 and 3775.

Tarp Fasteners

A

A Grommets—In addition to replacing broken grommets, these grommets can be added to your canvas and synthetic tarps to create a custom fit. Simply place tarp between grommet halves and tap on with a hammer for permanent installation. Grommets are made from recycled polymers. Opening size is 1/2″ ID. Color is black.

78905T91 (4/Pkg.) ..... **Pkg.** $3.38

B

B Light Duty Tie Down Buttons—Secure lightweight synthetic tarps with these reusable, nonpiercing polyethylene fittings. The opening size is 11/16″ ID. Color is white.

9565T7 (10/Pkg.) ..... **Pkg.** $4.76

C

C Heavy Duty Tie Down Buttons—The choice for securing heavier canvas and synthetic tarps. Made from copolymers, they're reusable, nonpiercing, and can even be used to join tarps. Maximum opening size is 3″. Color is white.

9565T4 (2/Pkg.) ..... **Pkg.** $7.02

Tarp Protectors

Don't tear your tarps on sharp corners—protect them with these reusable polypropylene corner covers. Place protectors on sharp corners and then cover them with your tarp to hold them in place. Protectors are 8″ long on each side. Color is yellow.

7830T76 (4/Pkg.) ..... **Pkg.** $13.44

Digital Moisture Detector

With 3 1/4″ Insulated Pins

Check the moisture content of wood and other moisture-absorbing building materials. Detector uses two 5/16″ noninsulated integral electrode pins that are mounted directly to the meter (two replacement pins are also included). For deeper penetration, two 3 1/4″ insulated electrode pins attach to the meter with a 3-ft. cord (pins and cord included).

Detector has three scales. The wood scale measures moisture from 6% to 40% in lumber, studs, and flooring. A comparative reference scale reads from 0 to 100 and is used in nonwood materials such as concrete, insulation, and roofing. The gypsum scale measures moisture from 0.2% to 50% in sheetrock (drywall). Detector also accumulates up to 100 readings and gives you an average. An alarm alerts you when a selected moisture content is detected. Furnished with a plastic carrying case and one 9V battery.

Detector—8″ Lg.×3″ Wd.×2″ Ht.	1094T19	Each	$630.83
Repl. 3 1/4″ Insulated Pin	1094T16	Each	$17.16
Repl. 5/16″ Noninsulated Pins (4/pkg.)	1094T15	Pkg.	$6.83

Tarp Repair Tape and Kits

Quickly and easily fix rips and tears as well as reinforce stress points in your tarps.

Polyethylene-Tarp Repair Tape

This polyethylene tape is waterproof and UV resistant—perfect for outdoor jobs. It can even be used to join tarps. Tape is supplied on a 1 1/2″ diameter core. **To Order:** Please specify color: black, blue, brown, clear, green, silver, or white.

Lg.	Wd.	Thick.		Roll
35′	2″	9.5 mils	77485A31	$5.21

Vinyl-Laminated and Vinyl-Coated Tarp Repair Kits

You'll get a 2′7″×2′7″ tarp patch along with an 8-oz. can of adhesive for easy tarp repairs. The adhesive can is furnished with a brush top. Simply brush adhesive onto the tarp patch and position it on your tarp.

To Order: Please specify tarp patch color: black (only for vinyl-coated patches), blue, green, red, white, or yellow.

Vinyl Coated (18 oz./sq. yd.)	3661T4	24.38
Vinyl Coated (22 oz./sq. yd.)	3661T6	25.78

Water-Repellent Restorer

Apply this solvent-based refinishing compound to all types of fabric to restore or create waterproofing. Prevents water damage and fading colors, while keeping fabric soft and pliable. Apply with a sprayer. Begins to dry in 4 hours; reaches full strength in 72 hours. One quart covers 375 sq. ft. One gallon covers 1,500 sq. ft.

1 quart with Trigger Sprayer	78915T34	$27.42
1 gallon	78915T38	75.32

Ground Anchors

When used with ropes or wires, these anchors provide secure gripping and holding power to stabilize tarps, tents, trees, and more. Made of black-painted steel, simply screw them into the ground and secure your ropes or wires to the anchor eye.

Telescoping Temporary Wall-Support Pole

To create a sturdy, temporary wall to control dust and debris, use these poles with tarps, drop cloths, and plastic sheeting up to 8 mils thick. Pole is heavy duty aluminum with a rubber foot and spring-loaded, 7″ Lg.×4″ Wd. polycarbonate head plate. The foot keeps the pole snug to the floor, while the head plate (which contacts your ceiling) has a non-skid pad to protect your ceiling.

Pole is reusable and adjusts from 5 ft. to 12 ft. long. Extend pole to desired length and twist clockwise to lock; twist counterclockwise to unlock.

Optional Dust Seal—For added dust control, attach this accessory to a support pole (sold separately) to provide a tight seal on ceilings without the need for tape. Just snap the head plate off of the support pole and snap on the dust seal (connector included). Dust seal is aluminum with a polyurethane foam edge. It measures 5 feet long.

Support Pole with Head Plate	7926T11	$81.15
Optional Dust Seal	7926T35	19.84

Concrete Curing Vibrator

For faster cure rates, count on this lightweight, portable vibrator. It has a flexible shaft, heavy duty tubular steel frame, and 18″ long power cord with three-prong plug. Operates on 115 VAC/VDC, 25-60 cycles, 1-phase at approximately 10,000 to 12,000 vpm (vibrations per minute) with a load. UL listed and CSA certified.

Shaft Lg.	Head Size	Motor hp	Amps		
7 ft.	1″ Square	2	12	**7693T18**	$948.27

Crack-Filler Applicator

The 3″ Wd. × 9½″ Dp. U-shaped cavity makes it easy to hold and distribute crack fillers into cracks up to 2″ wide. Applicator has a durable steel frame with 2¼″ Ht. × 5/16″ Thick. neoprene rubber blade. It comes furnished with a 1⅛″ Dia. × 60″ Lg. wood handle.

Applicator	**8032T4**	$75.10
Replacement Blade	**8032T5**	31.51

Sealant- and Floor-Coating Applicators

(R&S) Sealant-Coating Applicators

Specially designed tools make it easy to apply concrete and asphalt sealants as well as floor coatings. Both include a squeegee.

Style R is a roller applicator. The roller has a polypropylene frame.

Style S is a brush applicator. It has polypropylene bristles secured to a hardwood frame. Applicator can be used to apply roof coatings.

Stake Puller—For ¾″ and ⅞″ dia. stakes. Made of steel.
9415T51 ..... $85.55

Wood Touch-Up and Repair

Wood Touch-Up Marker

No need for messy stains, simply use this felt-tip marker to touch-up nicks and scratches on wood. It has a 3/16″ stroke width, 45° to 105° F application temp., and dries in seconds. For indoor use. **To Order:** Please specify color: dark walnut, dark maple, light oak, or red mahogany.
2022T6 ..... $3.58

Wood Repair Fillers

Filling cracks and holes up to ⅛″ thick is easy. Press these fillers in place with a putty knife or gloved fingers; let dry for two hours; and then sand, saw, drill, paint, stain, or varnish. Color is natural wood.

Epoxy-based filler is nontoxic. Twist or cut off from the roll and knead by hand to activate. Application time, after kneading, is 15-25 minutes.

Size	Application Temp.

Epoxy Based—*For indoor and outdoor use.*			
⅞″ Dia. × 7″ Lg. Roll	40° to 110° F	**70835T7**	7.89

Epoxy Wood Restorer

Fix damaged wood as well as build up and replace missing wood. This 12-oz., two-part, nonshrinking, putty-like restorer fills any size hole. Designed for indoor and outdoor use, it can be sawed, planed, drilled, sanded, and painted. Just mix and apply with a knife, trowel, or by hand.

Restorer resists chemicals and can also be used on concrete, metal, fiberglass, and glass. Application temp. is 60° to 100° F. Application time, after mixing, is 50 minutes; fully dry in 24 hours. Color is tan.
6257T3 ..... $26.25

Concrete Surface Preparers

Concrete Cleaner and Surface Prep

In just one step, you can prepare concrete floors for coatings and patching compounds. Simply pour this solution on your floor and scrub with a stiff-bristle brush or broom. Solution removes dirt and leaves a rough etched finish for strong coating adhesion. Application temp. is 32° to 100° F. Coverage is 400 sq. ft. per gallon. For indoor and outdoor use. Color is pink.

1-gal. Jug ..... **94315T6** ... $30.66

Concrete Bonding Epoxy

Bond new concrete to existing concrete with this two-part epoxy compound. First, apply epoxy with a brush, roller, or sprayer. Then, pour new concrete over the wet epoxy to ensure absorption and a strong bond. Application temp. is 50° to 100° F. Application time, after mixing, is 30 to 45 minutes. Fully hardened in 8 to 12 hours. Coverage is 100 sq. ft. per ¾ gallon. For indoor and outdoor use. Color is amber.

¾-gal. Can ..... **9432T57** ... $60.89

Concrete and Cement Mixes

To use these mixes, just add water and mix. All are for indoor and outdoor use. Color is gray.

Sand, Concrete, and Mortar Mixes

Application temp. is 50° to 90° F. Mixes are ready for foot traffic in 24 hours, unless noted. Furnished in 60-lb. bags, unless noted.

Sand mix consists of cement and sand. Use this mix when thickness will be less than 2″.

Concrete mix and ***fast-set concrete mix*** consist of cement, sand, and gravel. Use when thickness will be more than 2″. *Fast-set* is ready for foot traffic in 8 hours.

Mortar mix consists of fine sand and masonry cement. Use for brick, block, and stone laying as well as for repairing existing masonry.

	Coverage per Bag		
Sand Mix	2.3 sq. ft. × 1″ Dp.	**76805T92**	$6.43
Concrete Mix	1.7 sq. ft. × 2″ Dp.	**76805T91**	5.55
Fast-Set Concrete Mix	1.5 sq. ft. × 2″ Dp.■	**76805T93**	10.07
Mortar Mix	Lays 45 Bricks●	**76805T94**	6.43

■ 50-lb. bag. ● Based on a ⅜″ mortar joint.

Leak-Stopping Hydraulic Cement Mix

Stop leaks even as water is running through. After adding water, just mix this cement into a stiff putty and apply to holes and cracks with a trowel. It begins to harden in 5 minutes; fully hardens in 2 hours. Application temp. is 40° to 95° F. You can fill 2½ ft. of a ¾″ Wd. × ¾″ Dp. crack with 1 lb. of mix.

12-lb. Pail ..... **7685T42** .. $20.27

Anchoring and Patching Cement Mix

Able to bond firmly to surrounding concrete, this nonshrinking cement is perfect for anchoring bolts, railings, and posts as well as for patching floors, stairs, and walls. After mixing, just pour or trowel in place. This cement begins to harden in 15 minutes; fully hardens in 1 hour. Application temp. is 26° to 90° F. A 50-lb. pail yields approx. ½ cu. ft. of cement. *Note:* When used outdoors, apply a sealer or exterior paint for best results.

Concrete Hardener and Sealer

Reduce maintenance and cleaning costs by protecting concrete from stains, mild chemicals, salts, soaps and detergents with this water-based coating. It's ready to use—just apply with a brush, roller, or sprayer. For indoor and outdoor use. Color is clear. These products are compliant under all state VOC rules in effect on September 1, 2011.

1-gal. Can— Use on concrete that's at least 30 days old. Application temperature is 50° to 90° F. Dries to the touch in 1 hour; fully dries in 3 days. Coverage is 150 to 500 sq. ft. per gallon.

5-gal. Pail— Can be used on freshly finished concrete. Application temperature is 40° to 90° F. Dries to the touch in 2 to 3 hours; fully dries in 12 hours. Coverage is 300 sq. ft. per gallon.

Size		
1-gal. Can	**7572T71**	$29.97
5-gal. Pail	**7572T49**	136.27

Heavy Duty Epoxy Concrete Sealer

Protect concrete as well as wood surfaces from heavy traffic with this abrasion- and chemical-resistant sealer. It's a two-component, 100% solids, epoxy sealer that provides an easy-to-clean, high-gloss finish. Apply with a brush, roller, or squeegee. Application time, after mixing, is 30 to 40 minutes. Application temp. is 50° to 100° F. Sealer dries to the touch in 4 hours; fully dries in 4 days. Coverage is 180 sq. ft. per gallon at 10 mils thick. For indoor and outdoor use. Color is clear.

Size		
¾-gal. Can	**7551T11**	$61.19
3-gal. Can	**7551T12**	211.86

Concrete Crack Repair

What you need to fill and seal those unwanted cracks in your concrete. All are for indoor and outdoor use. Color is gray, unless noted.

Ready-to-Use Pourable Crack Filler

So simple to use, just pour this filler into cracks up to ½″ Wd. × ¼″ Dp. Application temp. is 50° to 90° F. Filler fully hardens in 24 to 48 hours. A 1-qt. bottle fills 35 ft. of a ½″ Wd. × ¼″ Dp. crack.

1-qt. Bottle ..... **75855T45** ... $10.39

Flexible Polyurethane Crack Filler

Our most flexible crack filler will flex as concrete expands and contracts with temperature changes. Use a standard caulking gun (not included) to apply filler into cracks up to 1″ Wd. × ½″ Dp. Application temp. is 40° to 110° F. Filler fully hardens in 24 hours. A 10-oz. cartridge fills 15 ft. of a ½″ Wd. × ½″ Dp. crack.

10-oz. Cartridge ..... **1589T2** $8.42

Epoxy Deep-Crack-Repair Cartridges

Vertical- and Overhead-Crack Repair Kit with Sealer and Ports

Floor and Sidewalk Repair Cartridges— A neat and easy way to repair 4″ to 6″ deep cracks in concrete floors, sidewalks, foundations, and stoops. They can even be used on wood, fiberglass, and metal surfaces. Cartridges contain 10 oz. of two-part epoxy that is fully mixed and ready to use. Epoxy contains no solvents and is shrink, impact, and chemical resistant. Apply with a standard caulking gun (not included). Application temp. is 40° to 90° F. Application time, after mixing, is 20 minutes at 77° F. Epoxy fully hardens in 24 hours. Color is light amber.

Vertical- and Overhead-Crack Repair Kit— For repairing vertical and overhead cracks up to 10″ deep in concrete. Kit includes two 10-oz. epoxy cartridges for cracks up to ⅛″ wide (epoxy described above), two 17-oz. containers of epoxy crack sealer, and seven injection ports. To use, simply use crack sealer to secure ports to a crack. Then, spread sealer over crack. Finally, inject epoxy from the 10-oz. cartridges into the ports. Application temp. for sealer is 50° to 95° F. Application time for sealer, after mixing, is 20 minutes. Sealer fully hardens in 12 hours. One kit fills an 8′ Lg. × 1/16″ Wd. × 10″ Dp. crack.

Concrete Epoxy Repair Putty and Paste

Quickly repair indoor and outdoor concrete surfaces. Color is gray.

Putty

Hand-kneadable epoxy begins to harden in 10 minutes and then fully hardens in 1 hour to quickly patch virtually any size crack or hole in concrete floors, stairs, and walls. It can also be used to anchor bolts. Apply with a putty knife or press in place with your fingers. It can be drilled, tapped, sanded, or painted. Application temp. is 40° to 110° F. Application time, after kneading, is 4 minutes. Coverage is 4 cu. in. per roll.

⅞″ Dia. × 7″ Lg. Roll **75895T1** $8.19

Paste

Perfect for horizontal, vertical, and overhead surfaces, this nonsagging easy-to-spread paste bonds to concrete as well as metal, wood, brick, and fiberglass surfaces. It resists oil, grease, water, alkalies, and chemicals. Apply this two-part epoxy with a putty knife or trowel. Application temp. is 50° to 100° F. Application time, after mixing, is 1 hour. Paste begins to harden in 1 to 6 hours at room temp.; fully hardens in 24 hours. Coverage is 231 cu. in. per gallon.

Size		
½-gal. Jar	**6230T1**	$69.62
2-gal. Jar	**6230T2**	185.48

Concrete Epoxy Joint Sealant

This sealant not only reinforces joints in concrete, but also protects joint and sawcut edges from chipping. It's a two-component, self-leveling, elastic sealant that is made from a shrink- and corrosion-resistant epoxy. To use, just mix, pour into joint, and allow sealant to settle. Application time, after mixing, is 1 hour. Sealant begins to harden in 6 to 8 hours; fully hardens in 24 hours. Coverage is 200 linear ft. per gallon for a ⅛″ Wd. × ¾″ Dp. joint. For indoor and outdoor use. Color is gray.

Standard Sealant— Application temp. is 50° to 100° F.

Low-Temperature Sealant— Application temp. is 34° to 100° F.

Concrete Repair Patch

Patch holes and build up worn/uneven spots in concrete. All are for indoor and outdoor use. Apply with a trowel.

Epoxy Concrete Repair Patch

You can use this three-part epoxy patch in federally inspected food processing plants. It resists oil, gas, water, chemicals, and impact.

When mixed, the *10-lb. pails* produce 1 gallon of patch and cover 4.5 sq. ft. at 1/4″ thick; *50-lb. pails* produce 4 gallons of patch and cover 20 sq. ft. at 1/4″ thick. All fully harden in 12 to 24 hours. **To Order:** Please specify color: beige, gray, or red.

Standard Patch— Application temp. is 50° to 100° F. Application time, after mixing, is 30 to 45 minutes. Ready for foot traffic in 8 hours.

Low-Temperature Patch— Application temp. is 34° to 90° F. Application time, after mixing, is 30 minutes at temperatures below 50°; 15 minutes at temperatures above 75°. Ready for foot traffic in 5 hours.

	10-lb. Pails		50-lb. Pails	
Standard Patch	7579T12	$47.65	7579T13	$91.75
Low-Temperature Patch	7579T34	52.72	7579T45	97.98

Quick-Set Epoxy Concrete Repair Patch

Ready for heavy traffic (including forklifts) in just two hours, this tough three-part epoxy patch resists chemicals, impact, and steel wheels.

Standard Patch— Application temp. is 50° to 80° F (*Note:* Hardening time is longer when applied below 70° F). Application time, after mixing, is 15 minutes. **To Order:** Please specify color: beige, black, gray, or red.

Freezer Patch— Excellent for use on freezer floors and indoor cold storage areas. It can also be used in federally inspected meat and poultry plants. Application temp. is –20° to +20° F. Application time, after mixing, is 10 to 20 minutes. Color is beige.

	Size	Coverage @ 1/8″ Thick		
Standard Patch	2-gal. Pail	10 sq. ft.	7689T49	$68.00
Standard Patch	5-gal. Pail	30 sq. ft.	7689T51	130.20
Freezer Patch	2-gal. Pail	15 sq. ft.	75795T3	107.35

Super-Fast-Set Polyurethane Concrete Repair Patch

At 70° F, it only takes 10 minutes for this two-part epoxy patch to fully harden. At –20° F, fully hardened time is up to 12 hours. This patch withstands heavy traffic (including forklifts) and steel wheels. You can use it in federally inspected meat and poultry plants.

Application temp. is –20° to +100° F. Application time, after mixing, is 10 minutes. Coverage is 200 lin. ft. of 1/2″ Wd. × 1/2″ Dp. cracks. Color is gray.

2-gal. Pail 7570T11 $244.90

Concrete Floor Resurfacers

Give new life to damaged and worn concrete floors as well as fill minor depressions and cracks. For indoor and outdoor use.

Latex— Just add water, mix, and spread using a trowel. This resurfacer can be used in federally inspected meat and poultry plants. Application temp. is 45° to 85° F. Ready for foot traffic in 2 hours. Fully hardens in 4 hours. Color is gray.

Epoxy— The choice for heavier traffic applications. Apply this three-part epoxy with a notched applicator or squeegee. Application temp. is 50° to 80° F. Application time, after mixing, is 20 to 30 minutes. Ready for foot traffic in 8 hours. Fully hardens in 24 hours. **To Order:** Please specify color: gray or red.

Heavy Duty Epoxy— Able to stand up to severe abrasion, wear, and impact, this resurfacer withstands heavy steel-wheel traffic as well as heavy blows without cracking. It can be used in federally inspected meat and poultry plants. Apply this three-part epoxy with a trowel. Application temp. is 50° to 100° F. Application time, after mixing, is 30 minutes. Ready for foot traffic in 8 hours. Fully hardens in 12 to 24 hours. **To Order:** Please specify color: gray or red.

Acid- and Chemical-Resistant Epoxy— Acid and chemical spills won't harm this resurfacer—choose it for corrosive environments. It even withstands steel-wheel traffic and heavy impact. Apply this three-part epoxy with a trowel. Application temp. is a minimum of 50° F. Application time, after mixing, is 25 to 30 minutes at 70° F. Ready for foot traffic in 8 hours. Fully hardens in 12 to 24 hours at 70° F. **To Order:** Please specify color: gray or red.

Concrete Floor Coatings

These stain-resistant, high-gloss finishes not only look good, but also protect your floors from moisture, chemicals, foot traffic, hand carts, and forklifts. Application temp. is 60° to 100° F, unless noted. For indoor and outdoor use, unless noted. These products are compliant under all state VOC rules in effect on September 1, 2010, unless noted. *Note:* Repair cracks and holes prior to application. **To Order:** Please specify color: clear, gray, or red (unless noted).

Ready-to-Use Acrylic— This low-odor, water-based coating requires no mixing and is for use in pedestrian-traffic areas. Apply with a brush or roller. It's ready for foot traffic in 8 hours; fully hardened in 18 hours.

Water-Based Epoxy— This low-odor, two-part epoxy is more durable than our Ready-to-Use Acrylic coating above. Apply with a brush, roller, or sprayer. Application time, after mixing, is 6 to 8 hours. It's ready for foot traffic in 16 hours; fully hardened in 72 hours. For indoor use only.

Heavy Duty Epoxy— Even more durable than our Water-Based Epoxy, this two-part epoxy goes on thick and contains no solvents. Apply with a brush, roller, or sprayer. Application time, after mixing, is 20 to 30 minutes. It's ready for foot traffic in 24 hours; fully hardened in 72 to 96 hours.

High-Performance Polyurea— Our best coating succeeds where others have failed. It's a two-part coating that offers fast dry times; excellent heat, chemical, abrasion, and UV resistance; and low hardening temps. Apply with a roller, sprayer, or squeegee. Application temp. is –20° to +100° F. Application time, after mixing, is 1 hour. It's ready for foot traffic in 6 hours; fully hardened in 48 hours.

Asphalt Repair

All are ready to use—no mixing required. Color is black.

Asphalt Crack Fillers

Liquid Filler— Furnished in an easy-to-pour 1-gal. dispenser for filling cracks up to 1/2″ wide. Application temp. is 50° to 90° F. Ready for traffic in 2 to 5 days.

Flexible Rope Filler— Measuring 1/2″ Dia. × 75 ft. Lg., this rope filler is furnished in a 1-gal. pail. Cut the length you need, pack it in the crack, and heat with a propane torch (not included; see pages 3390-3391). It's self-leveling and fills cracks from 1/4″ to 1″ wide. Application temp. is a minimum of 40° F. Ready for traffic in 20 minutes.

	Coverage, lin. ft.		
Liquid	160 (1/4″ Wd. × 1/2″ Dp. Cracks)	7686T32	$10.84

Tile Grout Repair

Grout Float

Tile Grout— Suitable for floor and wall tiles, both indoors and out. Simply mix with water and apply with a rubber grout float (sold separately). This grout dries in 3 to 5 hours. Coverage is 144 (12″ × 12″) tiles per lb. Color is white.

Grout Float— Use this tool to smooth and spread grout between tiles. Float has a 5/8″ thick rubber pad with aluminum backing and polypropylene handle.

Grout Sealer— Spray this water-based sealer on grout to form a barrier against dirt, water, mildew, and discoloration.

Grout Whitener— Restore discolored grout with this water-based coating. It also seals and waterproofs. Apply with a sponge.

	Size		
Tile Grout	5-lb. Tub	77105T64	$11.40
Grout Float	9″ Lg. × 4″ Wd.	9067T35	10.35
Grout Sealer	22-oz. Trigger Spray	7219T22	5.23
Grout Whitener	8-oz. Bottle	7134T12	6.91

About Paint and Coatings

Water-Based Paint— Often called latex paint, this low-odor paint dries quickly and cleans up with soap and water.

Solvent-Based Paint— Includes both alkyd- and oil-based paint. This paint has a longer drying time than water-based paint, and requires mineral spirits or turpentine for cleanup.

Epoxy Coatings— Have good chemical resistance and excellent resistance to heavy abrasion and severe moisture.

Polyurethane Coatings— Have excellent abrasion, weather, and chemical resistance. Retain color and gloss in sunlight.

Finish— The sheen of fully dried paint and coatings. Generally, the higher the shine, the more washable it is.

Flat—This finish is nonreflective and less durable than gloss.

Satin—Also known as eggshell, this finish is not as shiny or as durable as a semi-gloss.

Semi-Gloss—Less shiny and slightly less durable than gloss.

Gloss—This shiny, reflective finish is the most durable. Gloss colors black, blue, green, orange, purple, red, white, and yellow are sometimes referred to as safety colors and can be used to identify workplace hazards and safety devices.

Volatile Organic Compounds (VOCs)— Emit vapor/gas into the atmosphere under normal circumstances; when the container is opened they begin to vaporize. VOCs are regulated at the federal, state, and local level. VOCs lead to poor air quality and are most strictly regulated in areas of poor air quality like Los Angeles, CA. The VOC information we have provided for each item is current as of October 1, 2008.

Aerosol Paint

All paint and primer is solvent based (unless noted) and is compliant under all state VOC rules in effect on October 1, 2008. For use indoors and out (unless otherwise stated). Full package quantity is 6. ***Primer*** should be used for best long-term results. **To Order:** Please specify finish and color from the table.

Standard Paint

General Purpose— Use on metal, wood, concrete, and masonry.

Any Angle— Can be applied at any angle, even upside down, without clogging. Use on iron, steel, wood, and masonry.

Low Odor— Perfect for use in enclosed spaces. Use on metal, wood, masonry, and plaster.

Rust-Stopper Paint

Hard Shell— Stops rust from starting and prevents existing rust from spreading. Use on metal, wood, concrete, and masonry.

Self-Priming— Apply directly to firm, rusty surfaces, except galvanized steel and aluminum, which must be primed—see 77025T65 (1-qt. can of water-based primer) below. Paint forms a barrier, which seals out moisture to prevent future rust from starting. Use on steel and most metal.

Flaw Hiding— Similar to Self-Priming Rust-Stopper Paint, but with a textured look to hide surface flaws; paint is smooth to the touch.

Specialty Paint

Plastic Surface— Use on plastic surfaces (including PVC, hard vinyl, and fiberglass) without sanding or priming.

Chalkboard— Creates a washable surface that can be used as a chalkboard. Use on glass, metal, plastic, and wood.

Textured Finish— Creates a textured finish to hide surface blemishes. Use on metal, wood, and concrete.

Fluorescent— Use on steel, wood, and concrete.

Reflective— Reflects flashlight and headlight beams, making items visible under emergency lighting and in the dark. Excellent for signs and emergency equipment. It's clear so it won't obscure the color of your item. Use on metal, wood, and plastic.

Glow-in-the-Dark— Illuminate emergency exit routes, ramps, and doors in case of power outages. Requires minimum 2-hour exposure to a light source. Both colors of the paint glow luminescent green.

Metallic Finish— With its bright finish, this paint highlights parts on machinery, piping systems, and equipment. It can be used on metal, wood, and masonry. Outdoor exposure can result in accelerated weathering.

Equipment— Matches manufacturers' equipment colors.

Engine— Matches manufacturers' engine colors.

General Purpose	1 qt.	7741T51	$6.77
General Purpose	1 gal.	7741T61	15.93

Aerosol-Can Trigger Adapter

Quickly and easily turn your spray can into a spray gun for better paint control with less finger fatigue. Made of plastic, this reusable adapter quickly and easily snaps onto most aerosol cans.

7699T11 ..... **Each** 1-11 $2.54 12-Up $2.27

Paint

Apply with a brush, roller, or sprayer (unless otherwise stated). These products are compliant under all state VOC rules in effect on October 1, 2008, unless otherwise stated. For use both indoors and out (unless otherwise stated). For best long-term results use the ***primer***. **To Order:** Please specify finish and color from the table.

Low-Odor General Purpose— This water-based paint is perfect for use in enclosed spaces. Resists weather and mild chemicals. Use on concrete, masonry, steel, and wood. Paint and primers are compliant under all state VOC rules in effect on October 1, 2008, except in the Los Angeles area.

Rust Stopper— Stop rust from starting and prevent existing rust from spreading. This low-odor water-based paint also resists mild chemicals. Use on aluminum, concrete, masonry, steel, galvanized steel, and wood. Apply directly to metal surfaces, except for abrasive-blasted steel and aluminum, which require a primer. Paint and primer are compliant under all state VOC rules in effect on October 1, 2008, except in the Los Angeles area.

Fast-Dry Corrosion Resistant— Prevent corrosion and cut downtime with this low-odor water-based paint. Use on aluminum, concrete, steel, galvanized steel, iron, and wood.

Environmentally Friendly— This water-based paint emits no odor and no VOCs. Use on concrete, masonry, metal, tile, and wood (use the white primer for metal; gray primer for all other surfaces).

Indoor Drywall— For indoor use only, this durable water-based paint hides surface flaws on ceilings and walls. Use on new or previously painted drywall, masonry, and plaster. Also use on primed metal or wood.

Thermal Insulating— Reflecting up to 90% of heat from the sun and other radiant sources, this low-odor water-based paint acts as a thermal barrier. It also waterproofs your surfaces and provides insulating properties equal to 4″ to 6″ of polyurethane foam. Use on aluminum, brick, cinder block, concrete, fiberglass, galvanized steel, roof shingles, tile, and wood. Two coats are recommended. *Note:* Not compatible with any surfaces containing silicone.

Magnetic Undercoat— This water-based undercoat creates a magnetic surface; simply apply and cover with any water-based paint. Use on any surface.

Magnetic Chalkboard— This water-based paint creates a magnetic surface that can be used as a chalkboard. Use on any surface.

Magnetic Chalkboard Paint

EMI/RFI Shielding— Protect your electronic equipment from electromagnetic interference (EMI) and radio frequency interference (RFI) with this nontoxic, low-odor water-based paint. It contains silver for excellent conductivity and adheres to almost every plastic found in electronic enclosures. *Note:* Paint can only be applied with a sprayer.

Conductive and Static Dissipative— Prevent electrostatic discharge (ESD). This low-odor water-based paint is durable enough to be used as a floor coating in high-traffic areas and resists most chemicals and solvents. Use on cement, ceramic, metal, tile, and wood. *Conductive paint* has a surface resistivity of 10^5 to 10^6 ohms sq. It's a two-part paint that must be mixed before use. Application time after mixing is 5 days. Comes with a 2″ dia. mixing tool that attaches to a drill. *Static-dissipative paint* has a surface resistivity of 10^7 to 10^9 ohms sq.

Fluorescent— Vibrant color makes this water-based paint easy to see. Use on concrete, metal, and wood. Primer enhances the brightness of the paint.

For information about paint and coatings, see page 2126.

High-Temperature Paint

High-Temperature Paint and ***Primer***—Stop corrosion from forming on carbon steel and stainless steel exposed to high temperatures. This heat-resistant, solvent-based silicone-resin paint can be used on firm rusty surfaces and is great for smokestacks, incinerators, heaters, and heat exchangers. Use indoors or out. Paint and primer are compliant under all state VOC rules in effect on October 1, 2008. **To Order:** Please specify color from the table.

Aerosol Paint—Allow to air dry; then raise temperature to 450°-650° F two to three times, allowing surface to cool between firings. Primer is not required; areas exposed to rust should be scraped clean.

Paint—Apply with a brush, roller, or sprayer and allow to air dry. Use the primer for best results with all colors except the aluminum, which cannot be used with the primer.

Primer—Can be applied to surfaces with tightly adhered rust to prevent further corrosion. It's also great for preventing corrosion under insulation. Apply with a brush, roller, or sprayer and allow to air dry.

Ultra-High-Temperature Paint—Withstanding temperatures up to 2500° F, this water-based, ceramic-filled paint can be used on ceramic and other nonmetallic heat-resistant surfaces in heaters, furnaces, and ovens; not for use on metal. Apply paint with a brush or sprayer. For best results, let air dry. For indoor use. These products are compliant under all state VOC rules in effect on October 1, 2008.

	Size, net wt.	Dry Time: To the Touch	Dry Time: Overall	Coverage, sq. ft @ Thickness	Max. Temp.	Application Temp. Range	Available Colors		Each

♣ Aluminum color dries to the touch in 30 minutes. ▲ Aluminum and black colors have a maximum temperature of 1200° F.

Epoxy Coatings

Compared with standard paint, these two-part epoxy coatings provide better moisture, chemical, and abrasion resistance. All except the aerosol and porcelain-finish epoxy coatings must be mixed and can be used both indoors and out; when used outdoors in sunlight, however, surface may form a powdery residue (chalk). All coatings are solvent based and can be applied with a brush, roller, or sprayer (unless otherwise stated). These products are compliant under all state VOC rules in effect on October 1, 2009, unless noted. **To Order:** Please specify color from the table.

Aerosol—No mixing required. Simply spray on a hard, durable finish that resists cracking, chipping, peeling, staining, and chemicals. Use on drywall, metal, plaster, and sealed wood. For indoor use.

General Purpose—Provides outstanding durability, as well as excellent chemical, wear, and weather resistance. Application time after mixing is 2 hours. Use on concrete, metal (except for aluminum), and wood. *Primer* is 61% zinc for extra corrosion resistance. Application time after mixing is 2 hours. Recommended for metal.

Self-Priming—Apply directly to metal surfaces—even those with firm rust. It provides excellent corrosion and chemical resistance for metal, concrete, and masonry. Application time after mixing is 2½ to 3 hours. Thinner is compliant under all state VOC rules in effect on June 1, 2011. Coating is compliant under all state VOC rules in effect on October 1, 2009, except in the Los Angeles area.

Severe Environment—Also known as coal tar epoxy, it's the most rugged coating we offer. Withstands severe abrasion, strong chemicals, and immersion into salt water and fresh water (do not immerse in drinking water). Application time after mixing is 3 hours. Use on concrete and steel. Thinner is compliant under all state VOC rules in effect on June 1, 2011. Coating is compliant under all state VOC rules in effect on October 1, 2009, except in the Los Angeles area.

Low Temperature—Below-freezing environments are no problem for this coating; apply in temperatures as low as 20° F. Resists corrosion and withstands immersion into salt water and fresh water (do not immerse in drinking water). Application time after mixing is 1 hour. Use on aluminum, concrete, galvanized steel, steel, and iron.

Low Odor—Water based, this corrosion-inhibiting coating emits very low odor and easily cleans up with soap and water. Application time after mixing is 6 to 8 hours. Works well on aluminum, concrete, steel, and previously painted surfaces. USDA accepted for indirect contact with dry food. Use *primer* on rusted metal or where long-term protection in harsh environments is required. Application time after mixing is 8 hours. Coating and primer are compliant under all state VOC rules in effect on October 1, 2009, except in the Los Angeles area.

Underwater—Not only can you use this coating under water, but you can even apply it under water. Bonds to damp or submerged steel and concrete. Use in salt water and fresh water (do not immerse in drinking water). In addition to long-term protection from corrosion, this thick, solvent-free coating contains Kevlar for impact, abrasion, and wear resistance. Application time after mixing is 40 minutes. Apply with a brush, mitt, or spatula.

Low-Friction Ceramic—Reinforced with ceramic, this 100% polymer coating creates a very smooth, low-friction surface that protects against abrasion. Recommended for repairing heat exchangers, condensers, valves, and pumps. Use on aluminum, carbon steel, iron, and stainless steel. Application time after mixing is 30 minutes. Apply only with a brush.

Porcelain Finish—No need to mix. Just brush on to renew and refinish your porcelain tubs, tile, and vitreous china. It even produces a high-gloss, porcelain-like finish on laminates and primed wood. Apply with a brush, this coating goes on smooth—will not show brush marks. For indoor use.

	Size, net wt.★	Mix Ratio	Dry Time: To the Touch	Dry Time: Overall	Coverage, sq. ft. @ Thickness	Max. Temp.	Application Temp. Range		Each

For information about paint and coatings, see page 2126.

Polyurethane Coatings

With better UV-resistance than epoxy coatings, polyurethane coatings are ideal for outdoor use. These solvent-based coatings provide excellent color retention and can be used indoors and out (unless otherwise stated). Apply with a brush, roller, or sprayer (unless otherwise stated). These products are compliant under all state VOC rules in effect on October 1, 2009, unless noted. **To Order:** Please specify color from table.

General Purpose Polyurethane Coating— This rust-inhibiting coating resists mars, chips, and weather, making it good for marine applications and on frequently cleaned surfaces. For use on metal. Coating is compliant under all state VOC rules in effect on October 1, 2009, except in California. Primer is compliant under all state VOC rules in effect on March 1, 2011, except in the Los Angeles area.

Self-Priming Polyurethane Coating— Apply this coating directly to metal surfaces; it provides excellent corrosion, abrasion, and impact resistance on metal and concrete. It comes in two parts; mix ratio is 4:1. Application time after mixing is 2½ hours.

Thinner is compliant under all state VOC rules in effect on January 1, 2011, except in California.

High-Performance Polyurethane Coatings— Using moisture in the air as a drying agent, these coatings are perfect in high-humidity situations. Resist impact, abrasion, corrosion, and weather. Use on aluminum, concrete, galvanized steel, and steel.

Colored and clear coatings have excellent color retention on primed concrete and metal. Resist chemicals, yellowing, and chalking (forming a powdery residue). Use the clear coating over the colored coating for maximum gloss and color retention.

Black tar coating offers superior resistance to corrosion and extreme environments. Use on concrete and steel in immersion, underground, and waste-water treatment applications; can be immersed one hour after application. Grit blast surfaces before applying. For best performance on steel, use the green zinc-filled primer below.

Aluminum-colored penetrating primer reaches deep into rusted steel surfaces that have been lightly cleaned.

Green zinc-filled primer provides the corrosion resistance of galvanizing; designed for use on grit-blasted or power tool-cleaned surfaces. Not recommended for concrete.

Thinner is compliant under all state VOC rules in effect on January 1, 2011, except in California.

Super Abrasion-Resistant Polyurethane Coating— Guard against severe abrasion, impact, and wear with this ultra-thick two-part coating; in just one application it forms a protective layer that's 50 mils thick. Use on concrete, fiberglass, metal, rubber, and wood; excellent for hoppers, chutes, and pumps. Mix ratio is 4:1; application time after mixing is 45 minutes. Apply with a brush. Use primer for best adhesion. Not recommended for outdoor use.

Stainless Steel Coatings

With Type 316L stainless steel flakes for durability, these coatings provide superior corrosion and chemical resistance. Apply with a brush, roller, or sprayer. All coatings and primers are compliant under all state VOC rules in effect on October 1, 2008, unless noted. For best long-term results use ***primer***.

Stainless Steel Coating— This nontoxic, solvent-based coating also resists solvents. It comes in two parts; mix ratio is 1:1. Application time after mixing is 6 hours. Use indoors on metals and other nonporous surfaces.

Fast-Dry Low-Odor Stainless Steel Coating— Keep downtime to a minimum with this water-based coating. It has excellent UV resistance and is for use indoors and out. Use on concrete, masonry, metal, and wood (only indoors).

Heavy Duty Stainless Steel Polyurethane Coatings— Withstanding high-pressure washdowns, these rugged, solvent-based coatings provide excellent abrasion and weather resistance. For use indoors and out. Use on metal and nonporous surfaces.

High-Temperature Stainless Steel Coatings— Use these solvent-based coatings for boilers, stacks, piping, and similar indoor applications. After the coating has completely dried, the surface requires heating at 400° F for 30 minutes to fully protect. Self priming. *Aerosol* is compliant under all state VOC rules in effect on February 1, 2011.

Tool-Blackening Kits

Also known as tool black, these kits are a fast, economical alternative to black oxide. They put a dull, black, protective finish on metal. Blackener is water based, dries quickly, and is for indoor use. Simply dip or swab tool at room temperature. Once applied maximum temperature is 350° F. These products are compliant under all state VOC rules in effect on October 1, 2008.

Kit for Ferrous Metals— For steel and iron. Includes 1 qt. of tool blackener (covers 50 to 75 sq. ft.), 1 qt. of cleaner/degreaser, and 11 oz. (net wt.) of aerosol sealer.

Kit for Nonferrous Metals— For aluminum, copper, and brass. Includes 1 qt. of tool blackener (covers 30 to 40 sq. ft.) and 1 qt. of sealer.

	For Ferrous Metals	Each	For Nonferrous Metals	Each
Complete Kit	3435K11	$89.71	3435K12	$99.74

Sealer	3435K95	16.84	3435K82	52.14

For information about paint and coatings, see page 2126.

Galvanizing Coatings For Rust Prevention

Get the protection of hot-dip galvanizing with these zinc-rich solvent-based coatings; they keep iron and steel free of rust and corrosion. Use outdoors and in well-ventilated indoor areas. Apply with a brush, roller, or sprayer; or dip parts. These products are compliant under all state VOC rules in effect on October 1, 2008, unless noted.

Cold Galvanizing— Contain 93% of pure zinc. Meet MIL-P-21035.

High-Temperature Cold Galvanizing— Withstand temperatures up to 750° F and contain 99% of pure zinc. Meet MIL-P-21035.

Bright Galvanizing— Protect and restore the shiny gray finish of hot-dip galvanizing or use as a topcoat for the cold-galvanizing coatings. Contain 65% of pure zinc.

Chrome Galvanizing— Use to protect and restore the shiny gray finish of hot-dip galvanizing with a chrome finish or as a topcoat for the cold-galvanizing coatings. Contains 10% of pure zinc.

Heavy Duty Acid-Resistant Coatings

Don't let splashed or spilled acids, alkalies, and water damage your surfaces—protect them with one of these heavy duty solvent-based coatings. Use indoors and out on concrete, metal, and wood. Apply with a brush, roller, or sprayer. **To Order:** Please specify color from the table.

Phenolic— Ideal for applications involving inorganic salts. Coating is compliant under all state VOC rules in effect on October 1, 2009, except in California. Thinner is compliant under all state VOC rules in effect on January 1, 2011, except in California.

Extra-Thick Polyester— This two-part coating withstands immersion into salt water and fresh water (do not immerse in drinking water). Mix ratio is 98½:1; application time after mixing is 2 hours. For best results use the primer. Coating and primer are compliant under all state VOC rules in effect on October 1, 2009. Thinner is compliant under all state VOC rules in effect on January 1, 2011, except in California.

Rubber Coatings

Multi-Purpose

Seal out moisture and protect your surfaces with these flexible coatings. Use indoors and out. These products are compliant under all state VOC rules in effect on October 1, 2009, unless noted.

To Order: Please specify color from table.

Multipurpose Slip-Resistant— Great for insulating, providing a nonslip grip, and color coding, these solvent-based coatings resist acids, detergents, and salts. They won't chip, crack, or peel. Dip, brush, or spray on fabric, metal, paper, plastic, rope, wire, and wood; clear primer is required for use on metal.

Multipurpose Low-Odor— Similar to the coatings above, except this water-based coating emits very low odor and cleans up with soap and water. Use on metal, plastic, and wood.

Rubberized Sealant and Undercoating— This petroleum-asphalt based coating seals leaks, deadens sound, and won't sag in undercoating applications. Resists rust, salts, and acids. Spray on metal and wood.

Chemical-Resistant Extreme Temperature— This solvent-based coating resists oils, fuels, chemicals, solvents, acids, and UV light in temperatures from –40° to +400° F; intermittent to 500° F. Spray on ceramic, fabric, metal, rubber, and wood.

Water Repellent— Superior at repelling water, this petroleum-based coating also resists chemicals and UV light and can encapsulate lead paint. Withstands temperatures from –30° to +320° F. Brush, roll, or spray on fiberglass, metal, and wood.

Clear Protective Aerosol Coatings

Add a tough, long-lasting protective coating to your surfaces. All coatings are solvent based. Apply between 60° and 80° F. These products are compliant under all state VOC rules in effect on October 1, 2009.

General Purpose Acrylic Coatings—Protect surfaces from rust and corrosion. Use on metal, paper, and wood. For use indoors and out.

General Purpose Acrylic Coating with UV Inhibitors—Similar to the coatings above, but with inhibitors for protection from ultraviolet light. For use indoors and out.

Heavy Duty Waterproof Polyurethane Coating—More durable, it protects against rust and corrosion and weatherproofs and waterproofs. Use on metal, paper, and wood. For use indoors and out.

Low-Odor Latex-Based Coating—Perfect for use in enclosed spaces. It seals porous surfaces. Use on masonry, metal, plaster, and wood. For use indoors and out.

Multipurpose Shellac—Designed for indoor use only, this alcohol-based shellac seals, primes, finishes, and protects brass, ceramic, copper, glass, metal, tile, and wood.

Lacquers for Metals—Protect your nonferrous metal surfaces such as brass, bronze, copper, and silver from moisture, chemicals, oxidation, and abrasion. *Interior lacquer* resists damage caused by handling. *Exterior lacquer* provides UV protection.

Lacquers for Wood—Protect wood surfaces from wear. Lacquers are scuff, water, and oil resistant. For use indoors.

Dow Corning Protective Coatings

Metal Protective Aerosol Coating—This wax-based coating forms a thin, wax-like film for corrosion protection. Color is clear. This product is compliant under all state VOC rules in effect on October 1, 2008, except in California.

236 Dispersion Coating—Prevent surfaces from sticking to each other with this silicone-rubber coating. It also protects from corrosion and weathering. Dip, brush, roll, or spray coating onto surfaces. Color is white. This product is compliant under all state VOC rules in effect on October 1, 2008.

1890 Protective Coating—This silicone-rubber coating provides excellent moisture resistance as well as electrical-insulating properties. Dip, brush, roll, or spray coating onto surfaces. Color is gray. FDA compliant for food contact. This product is compliant under all state VOC rules in effect on October 1, 2008, except in the Los Angeles area.

Dow Corning Product	Size, net wt.		Each
Metal Protective Aerosol Coating	10 oz.	1350K15	$16.81
236 Dispersion Coating	1 pt.	1350K42	38.21
1890 Protective Coating	1 gal.	1350K26	170.59

Glare-Reducing Aerosol Coating

Put a temporary dull finish on plastic, glass, and other glossy surfaces to remove unwanted glare or reflection. Coating is solvent based. Maximum temperature is 120° F; apply between 55° and 90° F. For use indoors. This product is compliant under all state VOC rules in effect on October 1, 2008.

Finish	Size, net wt.	Dry Time: To the Touch	Dry Time: Overall	Pkg. Qty.		Each: Partial Pkg.	Each: Full Pkg.
Flat	11 oz.	15 min.	24 hrs.	6	7972T7	$7.15	$6.39

Hot-Melt Reusable Peel-Away Protective Coatings

Heat these coatings to the temperature listed below and dip metal objects for a tough, transparent coating that dries in just 1 to 2 minutes. Coatings can be remelted and reused again many times. Use for temporary and long-term protection from rust (unless noted), abrasion, and moisture. For indoor use only, except Styles E and F, which can be used indoors and out. These products are compliant under all state VOC rules in effect on October 1, 2008.

To Order Please specify 1-, 5-, or 10-lb. blocks.

(A&B) General Purpose—These mineral oil-based coatings leave an oily film for superior corrosion protection. *Style A* is transparent amber. *Style B* is clear and resists darkening over time.

(C) Heavy Duty—This oil-based coating is our most durable hot-melt coating, providing maximum abrasion protection with a fast drying time. Emits a strong odor. Finish is clear.

(D) Flexible—Soft and flexible, this oil- and rubber-based coating absorbs shock. Does not provide long-term rust protection. Finish is clear.

(E&F) Long-Term Storage—These resin-based coatings won't dry out so they're ideal when you need to store over a long time. Do not contain oils or solvents. Finish is clear. *Style E* adheres well and meets MIL-P-23242B. *Style F* is soft, pliable, and odorless.

	Dipping Temp.	Coverage for 1 lb., sq. in @ Thick.		1 lb. Each	5 lbs. Each	10 lbs. Each

Underwater Surface Coating

Also known as boat bottom or antifouling paint, this solvent-based coating prevents the build-up of barnacles, mussels, algae, and other marine growth on underwater surfaces. Use in both fresh- and saltwater applications. For fiberglass, metal (not for use on aluminum), and wood. These products are compliant under all state VOC rules in effect on October 1, 2008.

Dries to the touch in 1-2 hours; overall in 24 hours. Max. temperature is 125° F; apply at 40° to 90° F. Covers 85 sq. ft. at 2 mils thick.

Size, net wt.	Finish: Color		Each
1 qt.	*Flat:* Black	8027T111	$48.76
1 qt.	*Flat:* Dark Blue	8027T112	48.76

Peel-Away Protective Coatings

Perfect for safeguarding tools and parts while they're being shipped or stored, our easy-to-remove coatings can be used for temporary and long-term protection from rust, abrasion, and moisture.

Aerosol Peel-Away Coating—Simply spray this solvent-based coating onto nonporous surfaces such as anodized aluminum, castings, dies, glass, mirrors, and unpainted metal. Max. temperature is 150° F; apply between 60° and 80° F. For indoor use. Has an aluminum-colored finish. This product is compliant under all state VOC rules in effect on October 1, 2008, except in California.

Low-Odor Peel-Away Coating—This water-based coating has almost no smell and cleans up with water. Brush, roll, or spray it onto aluminum, ceramic, glass, hard plastic, and steel. Maximum temperature is 150° F; apply between 50° and 100° F. Use indoors and out, but not in direct sunlight. Finish is clear. This product is compliant under all state VOC rules in effect on October 1, 2008.

Rust- and Corrosion-Inhibiting Coatings

Unlike paints and coatings, these inhibitors can be dipped, brushed, or sprayed onto surfaces for long-lasting protection, and then removed. These products are compliant under all state VOC rules in effect on October 1, 2008, unless noted.

Aerosol Rust and Corrosion Inhibitor— Solvent based, this inhibitor forms a greasy, elastic film that won't harden or crack—perfect for tool and die storage. Protects for 12 to 24 months indoors; 6 to 12 months outdoors. Maximum temperature is 110° F. Color is light amber. Remove with mineral spirits or a solvent-based cleaner.

General Purpose Rust and Corrosion Inhibitors— Get up to 2 years protection with these petroleum-based inhibitors.

Indoor inhibitor forms a very thin, nondrying film. It's USDA H2 approved as a lubricant with no food contact. Maximum temperature is 250° F. Color is amber. To remove, use a degreaser.

Indoor/outdoor inhibitor forms a waxy film that resists heat, humidity, and severely corrosive environments. Maximum temp. is 175° F. Color is dark amber. Remove with mineral spirits. Meets MIL-C-16173, Grade 4.

LPS #3 Heavy Duty Rust Inhibitor— Oil based, this inhibitor produces a self-healing waxy film that dries slightly tacky and protects for 2 years indoors; 3-6 months outdoors. Maximum temperature is 175° F. Color is amber. Remove with mineral spirits or a cleaner/degreaser. Meets MIL-C-16173D, Grade 2.

Heavy Duty Rust and Corrosion Inhibitor— Producing a hard, transparent film, this oil-based inhibitor protects for over 3 years indoors; can be used outdoors, but is not rated. Resists acid; rated for 1,500 hours of salt-spray resistance. Maximum temp. is 175° F. Color is dark brown. Remove with a solvent or stripping agent. Meets Boeing BMS-3-29.

Low-Odor Rust and Corrosion Inhibitor— Odorless, this water-based inhibitor forms a waxy film that's compatible with lube oil, so it doesn't need to be removed from parts before assembly. Protects for up to 2 years indoors; 1 year outdoors. Maximum temperature is 160° F. Color is translucent brown. To remove, use an alkaline cleaner.

Heavy Duty Low-Odor Rust and Corrosion Inhibitor— Odorless, this water-based inhibitor forms a hard, dry waxy film and withstands temperatures up to 185° F. Protects for up to 2 years indoors; 1 year outdoors. Color is translucent brown. Meets MIL-C-16173, Grade 1.

Food-Grade Rust and Corrosion Inhibitor— This petroleum-based, white mineral oil inhibitor is USDA H1 approved for incidental food contact. It forms a nondrying, tacky film that protects for up to 1 year indoors; 3 months outdoors. Max. temp. is 180° F. To remove, use an alkaline cleaner.

Small Enclosed-Area Corrosion Inhibitors and Corrosive-Gas Absorber

Foam

Plastic Cup

Keep metal components in electrical enclosures, tool boxes, and cabinets free from corrosion for up to 2 years. All have an adhesive back. These products are compliant under all state VOC rules in effect on October 1, 2008.

Corrosion Inhibitors— Emit a vapor that coats metal components and absorb airborne moisture.

Foam fits into very tight spots. Maximum temperature is 180° F. Meets MIL-PRF-81705D.

The *plastic cup* includes a membrane that slowly releases the inhibitor. It won't break apart, as can happen with the foam. Max. temperature is 185° F. Meets MIL-I-22110C.

Corrosive-Gas Absorber— This plastic cup absorbs corrosive gases such as hydrogen sulfide and changes color to indicate when it's time to be replaced. Maximum temperature is 140° F.

Style	Size	Area Protected		Each
Corrosion Inhibitors				
Foam	3″ Lg.×1¼″ Wd.×¼″ Ht.	1 cu. ft.	78125T24	$3.35

Plastic Cup	2¼″ Dia.×1¼″ Ht.	10 cu. ft.	78125T31	13.43

Rust Removers

Get rid of rust. Use all removers indoors and out. These products are compliant under all state VOC rules in effect on October 1, 2008.

Naval Jelly Rust Remover— This acid-based jelly removes rust from iron, steel, and other metals; not for use on aluminum, chrome, or marble. Apply with a brush or sprayer, leave it on for 10 to 15 minutes (longer for heavily rusted surfaces), and then rinse it off with water. Color is pink. *Note:* Remover does not prevent rust from returning.

Environmentally Friendly Liquid Rust Remover— This nontoxic, noncorrosive liquid quickly removes rust. Dip steel and other metals (not for aluminum, brass, or copper); items must be immersed in liquid. Remove from liquid and rinse; submerge again, remove, and let dry to use as a temporary rust inhibitor. Color is light green.

Liquid Rust Remover and Inhibitor— This nonflammable, water-based coating dissolves rust and prevents it from returning. Dip, brush, or spray coating onto aluminum, chrome, iron, and steel. Then wipe off excess and let dry. Color is translucent green.

Rust Converter and Inhibitors— Apply directly over rusty surfaces to convert old rust into a layer of protection to prevent new rust from starting. Act as a primer and can be painted over if desired.

Aerosol—Solvent based. Sprays on clear and turns black. Use on metal.

Liquid—Water based. Brush, roll, or spray onto steel, aluminum, cast iron, and galvanized metal. Color is red.

Paint and Coating Removers

Remove paint and coatings from brick, concrete, glass, metal, and wood (unless noted). Use indoors and out. These products are compliant under all state VOC rules in effect on October 1, 2008.

Aerosol Paint Remover— Spray on to remove paint, varnish, shellac, lacquer, and urethane. Solvent based.

Liquid Paint and Coating Removers— Take off several layers of paint, varnish, urethane, and epoxy coatings with one application. Cling to vertical surfaces for maximum surface penetration.

Standard is solvent based and nonflammable. Also takes off marine coatings. Apply with a brush or roller. *Note:* May stain wood.

Environmentally friendly is an all-natural soybean-based remover with low odor. Apply this gel-like remover with a brush, roller, or sprayer. *Note:* Do not use on plastic, rubber, or drywall.

Heavy Duty Paint and Coating Removal Kits— Remove several layers of paint and coatings with just one application. Kits include paste and a cloth. Apply paste and then cover with the cloth; the paste dissolves the paint or coating and the cloth absorbs it. Peel the cloth from your surface and dispose.

Paint-removal kit removes 32 layers of paint at once. Water based with low odor, it's good for oil-based paint. Apply with a trowel (included) or sprayer. Apply the neutralizer (included) afterwards so future paint will not be affected. *Note:* Will not remove epoxy, polyurethane, or baked coatings. Do not use on aluminum or wood.

Coating-removal kit removes 10 layers of paint, epoxy, polyurethane, or marine coatings at once. Solvent based. Apply with a brush, roller, or sprayer. A neutralizer is not required.

Primers

Make your topcoat look better and last longer. Use primers with both solvent- and water-based topcoats (unless noted). All have a flat finish (unless noted). These products are compliant under all state VOC rules in effect on October 1, 2008. **To Order:** Please specify color from table.

Aerosol Primers

Stain Blocker and Sealer/Primer— Cover smoke, water, fire, and ink stains and prevent them from bleeding through. Use on concrete, drywall, tile, and wood. Solvent based. For use indoors and out.

Rough-Surface Primer/Filler— This primer provides a smooth, rust-resistant basecoat that fills surface cracks and is sandable. Use on fiberglass, metal, and wood. Solvent based. For use indoors and out. Use the gray primer for light-color topcoats, the red for medium-color topcoats, or the black for dark-color topcoats.

Plastic-Surface Primer— Solvent based. For use indoors and out.

Liquid Primers

Stain Blocker and Sealer/Primer— Cover smoke, water, fire, ink, and grease stains; prevent bleed through; and seal out odors. Use on aluminum, brick, concrete, drywall, PVC, tile, and wood. Apply with a brush, roller, or sprayer. Solvent based. For use indoors only.

Bare-Steel Primer— Also known as shopcoat primer, it provides long-term corrosion protection on bare steel. Apply with a brush or sprayer. Water based. For use indoors and out. Use the gray primer for light- to medium-color topcoats or the red for dark-color topcoats.

Porous-Surface Primer/Filler— Also known as block filler, it fills in cracks and smoothes out irregularities on surfaces. Use on cinder block, concrete block, and masonry. Apply with a brush, roller, or sprayer. Water based. For use indoors and out.

★ Allow for a longer drying time when applying a lacquer aerosol paint as a topcoat. ♣ Gloss finish. For use with water-based paint only.

About Paint Brushes

Natural-Bristle Brushes— Bristles are animal hair (typically hog). They're the best choice for applying oil-based and solvent-based paints and coatings, but can also be used to apply water-based paints and coatings.

Synthetic-Bristle Brushes— Bristles are nylon, polyester, a nylon/polyester blend, or polyolefin. They're the best choice for applying water-based paints and coatings, but can also be used to apply oil-based and solvent-based paints and coatings.

Chip/Touch-Up Brushes

Brush away wood and metal chips and handle light touch-up jobs.

Natural-bristle brushes have a tin-plated steel bristle holder. The *plastic handle* brushes have black bristles; the *wood handle* brushes have beige.

Synthetic-bristle brushes have black bristles and a tin-plated steel bristle holder.

Painting Mitt

Slip this mitt onto your hand to easily paint poles, railings, pipes, and fences. Made of washable, 7/8″ thick polyester. Comes with two plastic liners. Package quantity is 12.

♦ Price is 10% less when you order full package quantity.

Mitt ..... 9525T14 Each ♦ $5.23
Liners (100/Box) ..... 9737T253 Per Box 1.76

Paint Brush and Roller-Cover Cleaner

Attach your paint brush or roller cover to this stainless steel cleaner and then pump the handle—paint spins right off. Holds brushes with handles up to 6″ wide and 1/2″ thick and roller covers up to 18″ long. It's 14 1/2″ long.

9065T11 ..... Each $21.54

Paint Roller Covers and Frames

Pair a roller cover with a frame to get your paint job rolling.

Roller Covers

Textured Finish (Carpet Fabric)

Textured Finish (Plastic Loop)

Covers have 1 1/2″ diameter, solvent-resistant cores.

General Purpose— All have a polypropylene core.

Lint Proof— Excellent for high-quality finishes. All have a polypropylene core. *Foam nap covers* are not for use with shellacs or lacquers. *PTFE-coated nap covers* are nonstick so they apply more paint faster and clean up easily.

Textured— Create a textured finish. *Carpet-fabric nap covers* have a phenolic core. *Plastic-loop nap covers* are good for applying anti-slip floor coatings and have a polypropylene core.

Epoxy/Adhesive— Thick coatings go on textured with this cover. It has a very short nap and a polypropylene core.

For paint stirrers, see page 509.

Miniature Paint Rollers

Trayless

Long Reach

Adjustable

Paint in tight spots that standard size rollers could never get into. All rollers have a single steel-rod frame (unless otherwise stated) and a plastic handle with a 3/4″ Acme female threaded hole for an extension (not included).

Trayless— No need for a paint tray, this roller fits into a 1-gal. paint can. Cover is 4″ long with a 3/8″ long polyester nap and a 1/4″ dia. plastic core. Use on smooth and semismooth surfaces. Handle is 16″ long. Package quantity is 10.

Long Reach— A long handle lets you get into hard-to-reach spots. Cover is 6 1/2″ long with a 1/2″ long polyester nap and a 1/4″ dia. polypropylene core. Use on semismooth surfaces. Frame is chrome-plated steel. Handle is 25 5/8″ long. Package quantity is 6.

Adjustable— To get into and around odd-shaped spaces, this roller easily adjusts position. Cover is 6″ long with a 3/8″ long nylon nap and a 17/64″ dia. PVC core. Use on smooth and semismooth surfaces. Handle is 14″ long (10 1/2″ to pivot point). Package quantity is 12.

Prices are 10% less when you order full package quantities.

★ Spring-steel reinforced rims.

Telescoping Extension Handles

Twist Lock *Push-Button Lock*

Roller too short? Add length with one of these extension handles. All have 3/4″ Acme male threaded ends, a fiberglass outer handle with a ribbed grip, and an adjustable aluminum inner extension pole.

Standard— Have a twist-lock handle. Outer handle is 1 1/16″ dia. and inner pole is 7/8″ dia. (unless noted).

Heavy Duty— Have sturdier construction for excellent stability when extended. Outer handle is 1 1/4″ dia. and inner pole is 1″ dia. (unless noted). ***Push-button lock*** handles are faster to adjust; inner pole adjusts in 6″ increments (3″ for 77305T62) with the push of a button.

Approx. Lg., ft.	Standard Twist Lock	Each	Heavy Duty Twist Lock	Each	Heavy Duty Push Button	Each

Air Brushes

Air-Brush Kits

These siphon-feed kits require 0.259 cfm of air at 30 psi to operate; paint and air mix inside the nozzle. **Also Available:** Replacement parts not listed below. Please ask for 9546T88 and specify part required.

Dual-Control Kit—Separate controls adjust air and paint. Includes an air brush (makes 1/32″ to 2 1/2″ wide paint lines), a 7-oz. (net wt.) aerosol air can as the air source, an aerosol air-can regulator, a 4-ft. long vinyl air hose, a 3/4-oz. glass siphon jar, two 3/4-oz. plastic siphon jars. To use sprayer with an air compressor, instead of the aerosol air can, you need an ***air compressor adapter*** (sold separately) with a 1/4″ NPSM female connection.

Easy-Control Kit—One control adjusts air and paint. Includes an air brush (makes 1/32″ to 2 1/2″ wide paint lines), an additional spray head (makes 1/16″ to 3″ wide paint lines), a 5-ft. long braided air hose, a 1/4-oz. nickel-plated-brass siphon jar, a 3/4-oz. glass siphon jar, a 2-oz. glass siphon jar, a 1/4″ NPSM female fitting for connection to an air compressor, a wrench, and a storage case. As an alternative to an air compressor, you can hook an ***aerosol air can*** to the air brush with an ***aerosol air-can adapter*** (both sold separately).

Replacement spray heads come in the following spray patterns: pencil line to 2″ wide line and 1/16″ to 3″ wide line (for Easy-Control Kit); 1/32″ to 2 1/2″ wide line (for both kits). **To Order:** Please specify spray pattern. ***Replacement jar set*** includes 3/4-oz. and 2-oz. glass siphon jars with covers and two siphon tubes. The ***aerosol air-can adapter*** includes an air regulator and 8-ft. long vinyl air hose.

Dual-Control Kit	9546T13	**Each**	$75.51
Air Compressor Adapter for Dual-Control Kit	9546T52	**Each**	$4.61
Easy-Control Kit	9546T11	**Each**	$114.47
Replacement Spray Heads	9546T15	**Each**	$23.99
Replacement Jar Set	9546T17	**Per Set**	$7.21
Aerosol Air Can (13 oz. net wt.)	9546T73	**Each**	$14.66
Aerosol Air-Can Adapter	9546T12	**Each**	$19.15

Easy-Control Kit

Combination Kit

Combination Air-Brush Kit

Includes three air brushes (one for thin lines, one for medium lines, and one for thick), one 3-oz. plastic siphon jar, and one 6-ft. long braided air hose with 1/4″ NPS female fittings.

Thin-line air brush, also known as gravity-feed, is nickel-plated brass and makes a 1/32″ wide paint line. Includes a 1 1/2-oz. aluminum cup.

Medium-line air brush, also known as siphon feed, is nickel-plated brass and makes a 1/32″ to 1 1/4″ wide paint line. Requires 0.5 cfm of air at 20 psi to operate. Paint and air mix outside nozzle. You can adjust paint flow while painting.

Thick-line air brush, also known as siphon feed, is plastic and makes a 1″ to 3 1/2″ wide paint line. Requires 1 cfm of air at 20 psi to operate. Paint and air mix inside nozzle.

Combination Kit	7856T79	**Each**	$115.64
3-oz. Glass Siphon Jar and Cover	7856T75	**Each**	$5.52

Water-Based Air-Brush Paint

Comes in 1-oz. plastic bottles. Package quantity is 6. **To Order:** Please specify color: black, blue, green, red, yellow, or white.

7867T5 ..... **Each** Partial Pkg. $4.46 Full Pkg. $3.79

Electric Paint Sprayers

Also known as airless paint sprayers, these sprayers atomize paint and apply a thin, even coat. Include a fluid hose (unless noted), suction tube to draw paint from a container, and paint sprayer with tip.

Carry-style sprayers have a handle; ***cart-style sprayers*** have a hose holder and wheels for easy mobility. ***Maintenance kits*** include paint-sprayer parts that are prone to wear.

Replacement Tips—Choose small tips for thin coatings; large tips for thicker coatings and faster spray speeds. **To Order:** Please specify tip size: 0.023″ or 0.039″ for *Style 1*; 0.011″, 0.013″, 0.015″, or 0.017″ for *Style 2*; and 0.011″, 0.013″, 0.015″, 0.017″, 0.019″, 0.021″, or 0.023″ for *Style 3*.

(1) Economy—Includes a 1 1/2-qt. plastic cup, a 1-gal. backpack container (9 5/8″ Ht.×9 5/8″ Wd.×5 1/8″ Dp.) with disposable plastic liner, and a piston pump with two speeds. For occasional use with thin and thick coatings. Operates on 110 VAC, 60 Hz. Includes 16″ cord with three-prong plug.

(2) Medium Duty—Both have a diaphragm pump for constant pressure, an adjustable control spray and working pressure, a tubular-steel frame, and a 2-ft. cord with three-prong plug. Operate on 110/115 VAC, 60 Hz. For continuous use with thin and thick coatings. *Cart style* can spray very thick coatings and includes 10″ dia. polyurethane and rubber wheels. **Also Available:** Replacement parts not listed below. Please ask for 78505T21 and specify part required.

(3) Heavy Duty—Both have a piston pump, a tubular-steel frame, and a tip guard. For continuous use with thin to very thick coatings. Motor shuts off and turns on with changes in pressure. Operate on 120 VAC, 60 Hz. *Carry style* has an 8-ft. cord with three-prong plug. *Cart style* has two 10″ dia. rubber wheels and a 15-ft. cord with three-prong plug. **Also Available:** Replacement parts not listed below. Please ask for 74485T24 and specify part required.

(4) High Volume/Low Pressure (HVLP)—Reduce overspray and provide superior control by consuming higher volumes of air at lower pressures. Use with thin coatings. Operate on 120 VAC, 60 Hz. Include a 6-ft. cord with three-prong plug. 7180T64 includes a 1 1/2-qt. plastic cup attached directly to the sprayer; 7180T65 includes a 1-qt. metal cup.

Air-Powered Paint Sprayers

1&2 3 4&5 6 7

Compared to brushing and rolling, these paint sprayers save time and produce superior finishes. As you pull the trigger, air passes through the sprayers to atomize your paint or coatings into a fine spray for easy, even application. The trigger controls air flow, and air flow controls paint flow. Sprayers mix air and paint externally from the nozzle (making them great for fast-drying coatings) and have an adjustable spray pattern. Spray guns have a 1/4″ NPS male air inlet connection and a 3/8″ NPS male fluid inlet connection (unless noted). See page 240 for hose.

Not for use with pesticides, insecticides, gasoline, ethanol, acetone, alcohol, harsh chemicals, or caustic solutions.

Maintenance kits include various O-rings, seals, washers, gaskets, valves, and packing and installation tools.

(1-3) Conventional

These sprayers provide the best finish, but create a significant amount of overspray. Include a 32-oz. aluminum cup.

(1) General Purpose— Also known as siphon feed. It has a die cast aluminum spray gun body with a black painted finish.

(2) For Latex— Also known as siphon/pressure feed. Designed to spray latex paint as well as other thick coatings without thinning. Spray-gun body is die cast zinc with a black painted finish.

(3) Adjustable— Also known as siphon/pressure feed. Air flow can either be continuous or activated by the trigger and the air and coatings can either be mixed internally or externally from the nozzle. Spray-gun body is die cast aluminum with a black painted finish.

(4&5) Heavy Duty

Made of drop-forged aluminum with an anodized finish, these sprayers are built to last. Not for use with thick road-marking paint, adhesives, wrinkle paints, or concrete curing compounds.

Also Available: Replacement parts. Please ask for 7841T88 and specify part required.

(4) General Purpose— Also known as siphon/pressure feed. Includes a 32-oz. cup. Has a silver finish.

(5) Corrosion Resistant— Also known as siphon or pressure feed. All fluid passages are stainless steel for water-based as well as solvent-based coatings. Does not include a cup. Finish is black.

(6&7) Low-Overspray HVLP (High Volume, Low Pressure)

Spray-gun bodies are drop-forged aluminum with a nickel-plated finish. Not for use with thick fluids. **Also Available:** Replacement parts. Please ask for 77745T66 for siphon-feed sprayer parts and 77745T77 for gravity-feed sprayer parts.

(6) General Purpose— Also known as siphon feed. Includes a 32-oz. aluminum cup.

(7) High Output— Also known as gravity feed. Better, more efficient coating atomization for faster application than siphon feed. Includes a 23-oz. aluminum cup.

♦ Has 1/4″ NPT male air and fluid inlet connections. ■ The fluid inlet connection is 5/8″-11 UNC female.

Pressurized Paint Tanks for Air-Powered Paint Sprayers

8 9&11 10&12 13 14

5 gal.

Attach a tank to your paint sprayer to quickly and easily apply thick coatings on large projects. Operate up to a maximum pressure of 50 psi (unless noted). Include a pressure regulator with a gauge, a safety relief valve, and a gasketed cover; a PVC air hose with 1/4″ NPS female connection (unless noted); and a PVC fluid hose with 3/8″ NPS female connection (unless noted). Carrying handle doubles as a ladder/scaffold hanger. See page 240 for replacement hose.

Also Available: Replacement parts. Please ask for 7853T5 for aluminum and coated-steel tank parts or 9590T5 for stainless steel and zinc-plated steel tank parts.

Tank liners are polypropylene (unless noted) and minimize cleanup.

(8) Aluminum Tank— Lightweight for easier portability.

(9&10) Stainless Steel Tanks— Made of Type 304 stainless steel for superior corrosion resistance. *Style 10* is ASME certified.

(11&12) Zinc-Plated Steel Tanks— Tank is zinc plated inside and out for corrosion resistance. *Style 12* is ASME certified.

(13&14) Coated-Steel Tanks— Coated with black PTFE, inside and out, for corrosion resistance and easy cleaning. *Style 14* has a 3/4-hp air motor with stainless steel propeller to keep thick and textured coatings mixed while being applied.

Hose Set for Tank Styles 10 and 12

25-ft. Rubber Air Hose w/ 1/4″ NPS Female Connection; 25-ft. Rubber Fluid Hose w/ 3/8″ NPS Female Connection .... 7819T14 **Each** $151.62

♠ Air hose has 1/4″ NPT female connection; fluid hose has 3/8″ NPT female connection. NPT threads are compatible with NPS threads.

▲ Fluid hose is rubber. ♣ Liner is polyethylene.

● Operates up to a maximum pressure of 110 psi and does not include air and fluid hoses; hose set sold separately.

■ Operates up to a maximum pressure of 80 psi and does not include air and fluid hoses; hose set sold separately.

Paint Sprayer Air Filter/Dryer/Regulator

Regulate air pressure and keep the air supplied to your paint sprayer dry and dust free. Includes a gauge, bracket, 5½-ft. air hose, filter/dryer that changes color when it needs to be replaced, and belt clip. Maximum pressure is 125 psi. Inlet connection is ¼″ NPT female; air hose outlet is ¼″ NPT male. Size is 1 11/16″ Dia. × 3¾″ Lg.

Replacement filter/dryers come in packages of 2.

Air Filter/Dryer/Regulator	77035T65	Each	$61.56
Repl. Filter/Dryers	77035T66	Per Pkg.	$17.58

Spray-Booth Filters

Collect paint overspray inside spray booths to prevent paint buildup on fans, fan motors, and vent stacks. UL listed Class 2 (unless otherwise stated).

***Fiberglass Filters*—**The most economical, these provide moderate filter density/efficiency. The density of the filter fibers increases from the front to the back. *20″ wide filters* are 2″ thick; *24″, 48″, and 60″ wide filters* are 2½″ thick.

***Fiberglass Filters with Backing*—**Similar to the filters above, but with a polyester backing for superior filter density/efficiency. All are 3″ thick.

***Expanded-Paper Filters*—**More efficient than fiberglass filters, these are made of layers of paper joined by thread. All are ½″ thick. Not UL listed.

***Polyester Filters*—**Have the highest filter density/efficiency. All are moisture resistant and ⅝″ thick.

Bench-Top Spray Booth

Small enough to fit on bench and table tops, this spray booth is perfect for containing paint overspray on small jobs. Fumes are discharged through the 4″ dryer duct connection.

Collector is 20-ga. galvanized steel and has two 8″ × 17″ filters (one polyester; one carbon), an exhaust motor, and a 6-ft. long power cord with three-prong plug. Size is 18½″ Ht. × 22″ Wd. × 20″ Dp. Exhaust motor is 0.43 amps, 115 VAC, 60 Hz and provides 270 cfm of air flow.

See page 240 for flexible duct; page 625 for rigid duct.

Replacement Paint-Sprayer Cups

Siphon *Gravity*

***For Siphon-Feed Sprayers*—**This polished aluminum cup has ⅜″ NPSM female fluid inlet threads and a locking cap with gasket. Capacity is 32 oz. Size is 4¼″ Dia. × 8¾″ Ht.

Cup	7911T14	Each	$55.45
Repl. Gasket (1/Pkg.)	7911T24	Per Pkg.	$3.43

***For Gravity-Feed Sprayers*—**This aluminum cup has a ⅜″ NPSM male fluid outlet and a gasket-free lid. Capacity is 23 oz. Size is 3½″ Dia. × 6¼″ Ht.

Cup	77745T811	Each	$55.23

Spray-Booth Peel-Away Coatings

Just brush, roll, or spray on and then peel off when covered with paint. These water-based coatings have very low odor and dry in an hour. For indoor use only. Apply between 65° and 70° F. Meet OSHA requirements. These products are compliant under all state VOC rules in effect on October 1, 2008.

One gallon of clear covers 275-300 sq. ft. at 2 mils thick; one gallon of white covers 250-275 sq. ft. at 2 mils thick.

Size	Clear	Each	White	Each
1 gal.	7874T67	$31.00	7874T65	$31.00
5 gal.	7874T68	153.88	7874T66	153.88

Spray-Booth Masking Paper

Keep floors in spray booths free of paint overspray and spills. Paper is flame retardant, absorbent, and 9.5 mils thick. Color is white. Meets OSHA requirements.

Roll Width	100-ft. Lengths	Each	300-ft. Lengths	Each
36″	95005T44	$48.25	95005T64	$92.07

60″	95005T46	64.72	95005T66	144.95

Spray Booths

Contain paint overspray on large projects with these three-sided, 18-ga. galvanized steel spray booths. All include 20″ × 20″ UL listed Class 2 filters, galvanized steel filter frames, a gauge that indicates when filters need to be changed, interchangeable top or rear exhaust discharge connections, and a motor that must be hardwired. All except 7866T83 and 7866T85 include light fixtures. Light fixtures are vapor resistant and ETL listed (U.S. and Canada) Class 1, Division 2, Groups A, B, C, and D. Each fixture accepts four 32-watt, 48″ long bi-pin fluorescent bulbs (included).

Motors are 3-phase (208/230/460 VAC), 60 Hz and UL listed. They provide 125 fpm (feet per minute) of air flow for exhausting when used with up to 25 ft. of straight exhaust duct (not included). *Standard motor* is totally enclosed fan cooled (TEFC). *Hazardous-location motor* is for UL listed Class 1, Group D, and UL listed Class 2, Groups F and G environments.

Spray booths are shipped unassembled (hardware included). Conform to OSHA and NFPA (National Fire Protection Association) regulations.

See page 240 for flexible duct; page 625 for rigid duct.

Step Stools

1

2

3

4

5

6 80135T46

7

8

9

Get a secure and stable step up. All stools have nonskid rubber feet and slip-resistant tops.

Style 1 has a 10¾″ Ht. × 16″ Lg. storage space, a removable 1 7/16″ Ht. × 16″ Lg. three-compartment tray, an extension cord holder, and a recessed handle that folds flat when not in use. Top surface has a diamond pattern. Color is gray.

Style 2 is stackable. Top surface is urethane and vinyl. Color is yellow.

Style 3 has an abrasive top surface.

Style 4 has a serrated top surface. Meets OSHA requirements.

Style 5 has three spring-loaded swivel casters. Top surface is grooved. Meets OSHA requirements.

Style 6 have cross bracing. 80135T46 has a perforated top surface; *T48* has a vinyl top surface. Both meet OSHA requirements.

Style 7 moves on spring-loaded swivel casters. Top surface is ribbed vinyl. Some assembly is required. **To Order:** Please specify color: beige, black, blue, gray, or red.

Style 8 has cross bracing and a handrail for extra stability. Overall height with handrail is 36″. Top surface is rubber. Some assembly required.

Style 9 are corrosion resistant. They have a reinforced platform. Top surface is vinyl.

Step Stands

10

11&12

13

14&16

15

17

18

Stands have nonskid rubber or vinyl feet. *Styles 11-17* meet OSHA requirements.

Style 10 are durable, yellow polyethylene with a nonskid base. *Two-step stand* has urethane-coated steps and a 20″ Wd. × 5″ Dp. lower step. *Three-step stand* has abrasive strips on the steps and a 18″ Wd. × 8½″ Dp. middle step and a 19″ Wd. × 8½″ Dp. lower step.

Styles 11 and ***12*** have 3″ deep ribbed aluminum lower steps and molded plastic top steps. *Style 11* is orange and meets ANSI A14.5 Type 1A. *Style 12* meets ANSI A14.2 Type 1A.

Style 13 has four spring-loaded swivel casters. Steps have a grooved surface. Lower step is 16″ Wd. × 7½″ Dp. Includes an optional outrigger for added stability (assembly required).

Style 14 have serrated steps. Lower steps are 9½″ deep. *8255T16* requires some assembly.

Style 15 has a hinged top step so it can be folded down to create a 12″ Ht. × 19″ Wd. × 32¾″ Dp. one-step stand. Steps are serrated. Color is yellow.

Styles 16 and ***17*** have serrated steps. Lower steps are 9½″ deep. *8126T5* and *T2* require some assembly. *Style 17* has four spring-loaded swivel casters.

Style 18 is corrosion-resistant stainless steel with vinyl steps. Lower step is 18″ Wd. × 11½″ Dp. Does not meet OSHA requirements.

Note: Number of steps listed in table includes top step.

Step Stands with Handrails

Handrails give these step stands extra stability. They also have slip-resistant tops and rubber feet.

Steel-Frame Step Stands— Have polypropylene steps. Lower steps are 15″ Wd.×8″ Dp. Fold for storage. Meet OSHA requirements.

Deep-Step Steel-Frame Step Stand— Has rubber covered steps. Lower step is 17¼″ Wd.×12¼″ Dp. Some assembly required.

Steel-Frame Step Stands with Casters— Two rigid casters on the front provide easy mobility. Stands have perforated steps. Lower steps are 16″ Wd.×7″ Dp. Fold for storage. Meet OSHA requirements; 9754T77 does not meet CAL-OSHA requirements and is not available in California.

Aluminum-Frame Step Stands with Casters— Two tilt-to-roll casters on the back allow you to roll stands anywhere. Stands have rubber treads on the steps and plastic feet. Lower steps are 14″ Wd.×9″ Dp. Fold for storage. *Three-* and *four-step stands* have a tool tray mounted on the handrail. Meet OSHA requirements.

Note: Number of steps listed in table includes top step.

Two-Side Access Step Stands

Climb up either side of these nonfolding aluminum step stands. All have slip-resistant tops and rubber feet.

Step Stands— Have ribbed steps. Lower steps are 3″ deep.

Step Stand with Retractable Casters— Moves on three spring-loaded swivel casters. Steps have a grooved surface. Lower step is 15″ deep.

Step Stands with Handrail and Retractable Casters— A handrail provides extra stability while four spring-loaded swivel casters let you roll the stand. Overall height with handrail is 50″. Lower step is 11⅛″ deep.

Note: Number of steps listed in table includes top step.

Rolling Stairs with Handrails

Rugged enough for a warehouse, yet light enough to easily roll where needed. Stairs are polyethylene with 30½″ high fiberglass handrails and two rigid tilt-to-roll casters on the back. Steps have nonskid abrasive strips. The lowest step is 22″ Wd.×8¾″ Dp.; middle steps are 19¾″ Wd.×8¾″ Dp. and 18½″ Wd.×8¾″ Dp. Color is yellow.

Deep-Step Low-Height Step Ladders

These step ladders have ribbed aluminum lower steps that are about twice the depth of other step ladders so they're more comfortable for prolonged standing. Top step is molded plastic with a slip-resistant diamond tread. Fold for storage. Meet OSHA requirements. *Step ladders with handrail and casters* have a handrail and two tilt-to-roll casters on the rear legs to easily move the ladder. ***Fiberglass ladders*** have orange nonconductive fiberglass rails. ***Aluminum ladders*** have aluminum rails.

Note: Number of steps listed in table includes top step.

Fiberglass Step Ladders

Standard Ladder with Shelf

Big Foot Ladder without Shelf

Rails are nonconductive fiberglass. Ladders fold for storage and have slots in the top to hold your tools. Meet OSHA requirements. ***Big foot ladders*** provide firmer footing than standard ladders on open flooring such as grating.

300-lb. Capacity Step Ladders— Rails are orange. Steps are ribbed aluminum; top is molded plastic.

375-lb. Capacity Step Ladders— Rails are yellow. Steps and top are ribbed aluminum.

500-lb. Capacity Step Ladders— Rails are yellow. Steps and top are aluminum.

Optional Black Pail Shelf— Attaches to all 300- and 375-lb. capacity ladders without a shelf. Hardware is included.

Ladder Levelers and Stabilizers

Ladder Levelers

Keep your ladder level even when the surface isn't. Levelers adjusts one or both sides of most fiberglass and aluminum straight and extension ladders by up to 15″. Levelers are steel with a safety guard to protect against accidental release. They have swivel ladder shoes with slip-resistant rubber pads.

7948T75 ..... **Pair** $80.57

Rolling Roof Hooks

Roll your ladder to a roof's peak. Then flip the ladder over and the steel hooks hold it in place. Use with straight and extension ladders with round and D-rungs.

8204T73 ..... **Pair** $58.48

Ladder Cable Hooks

Attach these hooks to keep your ladder stable on cable and wire rope. Hooks are aluminum and work with extension and straight ladders.

For Aluminum Ladders... **80205T75** **Pair** $59.42
For Fiberglass Ladders... **80205T77** **Pair** 42.55

Ladder Safety Tie-Off

Secure your ladder to any diameter pole to keep it stable. Made of nylon, tie-off is 23 ft. long and has buckles to tighten it securely to the pole and your ladder. Use with straight and extension ladders up to 40 ft. high.

2209T71 ..... **Each** $74.31

Ladder Accessories

Ladder Standoffs

Secure straight and extension ladders at a comfortable distance from the supporting surface. Made of aluminum, standoffs have protective tips to prevent scuffs and scrapes.

Fixed and ***adjustable*** standoffs are for use on flat surfaces. *Adjustable standoff* adjusts in 2″ increments.

Corner standoff is for corner, angled, and rounded surfaces.

	Standoff Distance (A)	Span (B)		Each
Fixed Standoff	12″	48″	7970T63	$32.83
Adjustable Standoff	13″ to 25″	48″	7970T64	59.05
Corner Standoff	18″	29″	78455T11	35.62

Ladder Rail Caps

Protect supporting surfaces from damage with these PVC caps. Use with straight and extension ladders. Fit rail ends approximately 3″ to 3¼″ × 1″ to 1¼″.

80195T6 ..... **Pair** $11.19

Ladder Dolly

Easily roll ladders anywhere. Dolly secures temporarily through a rung of most aluminum and fiberglass extension ladders up to 40 ft. Can be used on rugged terrain. Wheels are polypropylene.

7740T59 ..... **Each** $85.61

Sectional Fiberglass Ladders

Add or remove sections to make a ladder up to 18 ft. high. Each ladder section is 6 ft. high and you can join up to three sections. Insert the bottom rails into the top rails and secure them with the included tension clamps. Quick assembly and disassembly makes the ladders easier to transport and store than other straight ladders. Rungs are round, ribbed aluminum; rails are yellow nonconductive fiberglass. Meet OSHA requirements.

Note: Two top caps and two shoes are required to complete each ladder.

Narrow-Width Ladders

Fiberglass

Aluminum

Ideal for getting in and out of tight, narrow places, these ladders are also known as manhole ladders. Rungs are round, ribbed aluminum. Meet OSHA requirements.

Fiberglass Ladders— Ladders have 3-ft. long plastic rail sleeves at the top to prevent damage to rails. They also have plastic hoop ends to easily pull ladder up. Rails are yellow nonconductive fiberglass.

Aluminum Ladders— Have aluminum rails.

Fiberglass Extension Ladders

Adjust these ladders to the height you need. They have two equal-length, movable sections and spring-loaded locks to keep the raised section securely in place after adjustment. Ladders have yellow nonconductive fiberglass rails, except the 300-lb. capacity ladders with aluminum rungs which are orange. Meet OSHA requirements.

Fiberglass rungs are yellow, round, and ribbed.
Aluminum rungs are flat and ribbed.

Aluminum Extension Ladders

Lighter in weight than fiberglass extension ladders, aluminum ladders are easier to carry. Ladders have two equal-length, movable sections that adjust to create the ladder height you need. Spring-loaded locks keep the raised section securely in place after adjustment. All have flat, ribbed rungs. Meet OSHA requirements.

Telescoping Extension Ladders

Get multiple heights in one ladder. Ladders extend and lock in 1-ft. increments to give you the exact height you need. To close the ladder, pull rings on the second rung to release the locking mechanism and then slide each section down one by one. When closed, these aluminum ladders are smaller and easier to carry and store than ordinary extension ladders.

Rungs are grooved and have a stainless steel spring-loaded pin that automatically locks ladder in place. Nonskid feet and top bumpers protect against scratches.

Steel Hook-Top Sectional Ladders

Ladders consist of multiple 3-ft. sections that slide apart for use. Pull the cord and slide sections back together for easy carrying and storage. Ladders must be fully extended for use.

All are tubular steel with a gray finish. They have flat, perforated rungs. Ladders hang from two 6¾″ deep hooks at the top. Standoffs on each section provide 3⅜″ of toe room. Capacity is 250 lbs.

Extended Height	No. of Sections	Base Wd.		
6′	2	14¾″	8192T61■	$343.10
9′	3	14¾″	8192T62	497.44
12′	4	14¾″	8192T63	668.97
15′	5	14¾″	8192T64	813.33

■ Due to shorter length, ladder does not have a retrieval cord.

Steel Hook-Top Ladders

Shown with Optional Safety Shoes

Double side rails give these hanging ladders stability and 3⅜″ of toe room. Ladders are tubular steel with a gray finish. A 5¼″ deep hook along the top holds ladders in place. Rungs are flat and perforated. Capacity is 300 lbs. Meet OSHA requirements.

Optional swivel safety shoes are recommended when using ladders on floors. Mounting hardware is included.

Nylon Rope Ladders with Wood Rungs

Ladder with Loop Ends *Ladder with Snap Hooks*

Attach one of these ladders to a fixed object and drop it into a tank, manhole, pit, or temporary work area. They're lightweight so you can easily carry them anywhere.

Ladders consist of ⅝″ diameter nylon rope connected to 15″ wide hardwood oval rungs. The ladder top has either two 3″ ID loop ends or two 1″ ID×5¾″ Ht. locking snap hooks. Overall width is 15″. Capacity is 300 lbs.

Emergency Escape Permanent-Mount Chain Ladders

In case of emergency, have your escape ladder ready. Ladders bolt to the floor near a window and store inside the included 13″ Wd.×7″ Dp.×12″ Ht. metal box. They are made of steel with galvanized double-loop chain, standoffs, and round rungs. Standoffs provide 4⅜″ of toe room. Overall width is 14″. Mounting hardware is included. Capacity is 250 lbs.

Note: For emergency use only.

Unassembled Fiberglass Rolling Platform Ladders

Mobility is combined with the nonconductive, noncorrosive benefits of fiberglass. Ladders have a yellow fiberglass platform and side rails, 1″ OD steel handrails and bracing bars, ribbed aluminum steps, and a steel base. Platform has a nonskid coating and a 4″ high toeboard on three sides. Handrails are coated with a nonconductive plastic.

Ladder with six steps has two locking swivel casters in front and two rigid casters in back; all other ladders have two locking swivel casters in front, two rigid casters in the center, and two rigid casters in back. Assembly required. Capacity is 300 lbs. Meet ANSI A14.7 and OSHA requirements; those sold in California meet CAL-OSHA requirements.

Steel Rolling Platform Ladders with Perforated Steps

Perforated

Platform and steps are perforated for good slip resistance. Ladders have a gray finish. Ladders *with spring-loaded retractable casters* include four swivel casters; *step-lock* ladders include two swivel and two rigid casters. Capacity is 450 lbs. Meet ANSI A14.7 and OSHA requirements; those sold in California meet CAL-OSHA requirements, unless noted.

To Order: For replacement retractable casters, please specify platform width and number of steps.

Tight-Turning Steel Rolling Platform Ladders

Serrated

Two rigid casters in the center allow these ladders to easily turn in narrow aisles and tight spaces. Ladders also have two swivel casters and two rigid casters. All ladders lock in place.

Ladders have a gray finish. Platform and steps are serrated for maximum slip resistance. Shipped unassembled. Capacity is 450 lbs. Meet ANSI A14.7 and OSHA requirements; those sold in California meet CAL-OSHA requirements.

Steel Rolling Platform Ladders with Shelves

Serrated

Picking and putting away material just got easier. Ladders have three 20″×24″ shelves with raised edges that each hold 70 lbs. All lock in place and have two swivel and two rigid casters.

Ladders have a gray finish. Platform and steps are serrated for maximum slip resistance. Shipped assembled. Capacity is 450 lbs. Meet ANSI A14.7 and OSHA requirements; those sold in California meet CAL-OSHA requirements.

Extra-Rugged Steel Rolling Platform Ladders

Serrated

Heavy duty tubing and extra bracing in the base and back make these ladders tough enough to handle harsh environments. Platform and steps are serrated for maximum slip resistance. Ladders have a gray finish. All lock in place and have two swivel and two rigid casters. Capacity is 450 lbs. Meet ANSI A14.7 and OSHA requirements; those sold in California meet CAL-OSHA requirements.

80055T21 has a 4″ high toeboard on three sides of the platform.

Folding Steel Rolling Platform Ladders

Serrated

Fold these ladders for easy transport and compact storage. When ready to use, unfold and secure with two bolts and hex nuts (ladders with 13 or more steps have four bolts and hex nuts). They have large rugged wheels on the rear for rolling. Ladders with five to nine steps are tilt-to-roll; those with ten or more steps lock in place and have two swivel and two rigid casters. All have a gray finish. Platform and steps are serrated for maximum slip resistance. Capacity is 300 lbs. Meet ANSI A14.7 and OSHA requirements; those sold in California meet CAL-OSHA requirements. Shipped assembled except the handrails require assembly.

Unassembled Steel Rolling Platform Ladders

Serrated

Ten Step with Toeboard

Ladders are shipped unassembled to save on freight costs. Platform and steps are serrated for maximum slip resistance. Ladders have a gray finish. All lock in place and have two swivel and two rigid casters. Capacity is 450 lbs. Meet ANSI A14.7 and OSHA requirements; those sold in California meet CAL-OSHA requirements.

Platforms with toeboard have a 4″ high toeboard on three sides.

Gradual-Incline Steel Rolling Platform Ladders

Serrated

Six Step

A gradual 50° incline makes these ladders easier to climb than standard ladders and allows for a forward descent. All ladders have a gray finish. Platform and steps are serrated for maximum slip resistance. Capacity is 450 lbs. Meet ANSI A14.7 and OSHA requirements; those sold in California meet CAL-OSHA requirements.

Ladders *with spring-loaded retractable casters* have four swivel casters. *Step-lock ladders* have two swivel and two rigid casters.

Steel Rolling Ladders with Extra-Large Platform

Serrated

Three Step

With an oversized platform two people can easily work side by side. Plus, ladders have a high load capacity to handle extra boxes and tools. They also have a 50° incline for an easy forward descent.

Ladders have a gray finish. Platform and steps are serrated for maximum slip resistance. All lock in place and have two swivel and two rigid casters. Shipped assembled. Capacity is 800 lbs. Meet ANSI A14.7 and OSHA requirements; those sold in California meet CAL-OSHA requirements.

Two-Side Access Steel Rolling Platform Ladders

Climb on either side; two people can use the oversized platform simultaneously. Finish is gray. Platform and steps are serrated for maximum slip resistance. All lock in place and have four swivel casters. Shipped assembled except the handrails require assembly. Capacity is 800 lbs. Meet ANSI A14.7 and OSHA requirements; those sold in California meet CAL-OSHA requirements.

Tilt-to-Roll Platform Ladders

Expanded Metal

Serrated

Tilt and roll these ladders to where you need them. When tilted, ladders roll on two wheels. When stationary, four rubber pads keep ladders in place. Shipped assembled. Meet ANSI A14.7 and OSHA requirements; those sold in California meet CAL-OSHA requirements.

Expanded metal steps provide good slip resistance and are more comfortable than serrated steps. *Serrated steps* are more slip resistant than expanded metal.

Steel Ladders— Capacity is 450 lbs. **To Order:** Please specify color: gray or safety yellow.

Aluminum Ladders— Lighter weight than steel or stainless steel. Capacity is 350 lbs.

Stainless Steel Ladders— Made of corrosion-resistant Type 304 stainless steel with a matte finish. Capacity is 450 lbs.

Straddle Base Tilt-to-Roll Steel Platform Ladders

Expanded Metal

Get close to your work even when pipes or other objects are in the way. With no horizontal braces, these ladders can straddle obstructions. Tilt ladders to roll on two wheels. When stationary, four rubber pads keep ladders in place.

Ladders have a gray finish. Platform and steps are expanded metal for good slip resistance. Shipped assembled. Capacity is 350 lbs. Meet ANSI A14.7 and OSHA requirements; those sold in California meet CAL-OSHA requirements.

All-Stainless Steel Rolling Platform Ladders

Serrated

Made entirely of corrosion-resistant Type 304 stainless steel, these ladders withstand repeated washdowns, making them perfect for use in food-service and pharmaceutical applications. Ladders have a matte finish. Platform and steps are serrated for maximum slip resistance. Ladders lock in place and have two swivel and two rigid casters. Capacity is 450 lbs. Meet ANSI A14.7 and OSHA requirements; those sold in California meet CAL-OSHA requirements.

Steel Rolling Platform Ladders with Cup Shoes

Four Step with Handrail on Left

Four Step with Double Handrails

Vinyl Covered

Three Step without Handrails

Cup shoes rest on the floor for stability; four spring-loaded retractable swivel casters let you roll ladders anywhere. Ladders have a gray finish. Platform and steps are vinyl covered for good slip resistance and comfort. Shipped assembled except the handrails require assembly. Capacity is 450 lbs. Meet ANSI A14.7 and OSHA requirements; those sold in California meet CAL-OSHA requirements, unless noted.

Also Available: Replacement casters, please specify 8181T7 and the McMaster-Carr part number of your ladder.

Heavy Duty Aluminum Rolling Platform Ladders

Ribbed

Get the light weight of aluminum with a high load capacity. Platform has a nonskid surface and steps are ribbed for slip resistance. Ladders lock in place and have one swivel caster in front and two rigid casters in back. Shipped unassembled.

Capacity is 500 lbs. Meet ANSI A14.7 and OSHA requirements; those sold in California meet CAL-OSHA requirements.

Accessories and Replacement Parts for Rolling Platform Ladders

Slip-Resistant Handrail Tape— Sticks to ladder handrails for a solid grip. Made of self-adhesive textured vinyl blend. Roll is 2″ Wd.×8′ Lg.

5484T79 ..... $13.94

Replacement Rubber Pad— Provides slip resistance. Pad is 2½″ dia. and has a ⅜″ Dia.×1″ Lg. mounting bolt that threads into a ladder's front legs.

79975T88 ..... $7.46

Replacement Rubber Tips— A washer in these tips extends wear. Fit 1″ OD tubing.

79975T99 (Pkg. of 4) $5.95

Steel Fold-Away Mobile Work Platforms

Folded

Height adjusts in 12″ increments for multiple uses. Lock work platform in place by tightening the back brace's bolts. Then fold it up for convenient and portable storage. Work platform has a yellow finish and comes with two 10″ wide steel planks that have a non-slip surface. Has four locking swivel casters. Capacity is 400 lbs.

Note: Before erecting work platform, check federal, state, and local codes.

Platform Ht. Min.	Platform Ht. Max.	O'all Extended Lg.	O'all Extended Wd.	O'all Extended Ht.	O'all Folded Lg.	O'all Folded Wd.	O'all Folded Ht.

Steel Telescoping Mobile Work Platforms

Work at the height you need. Use the winch to manually adjust the platform height in 6″ increments. Spring-loaded pins lock it in place. Tools are not needed for assembly.

The frame is steel with a yellow finish and has built-in outriggers that extend the base from 31½″ wide to 72″ wide. Work platform is 6′4½″ long overall and rolls on four locking swivel casters. Plank is 5′8″ Lg.×19″ Wd. and has a perforated surface with 4″ high toeboards. Guardrails are 43″ high with midrails and safety chains. Capacity is 550 lbs. Meet ANSI and OSHA requirements.

Optional Add-On Height Section— Adjusts in 6″ increments to increase the platform height from 12′6″ to 17′6″.

Note: Before erecting work platforms, check federal, state, and local codes.

Platform Height (A) Min.	Platform Height (A) Max.	O'all Height (B) Min.	O'all Height (B) Max.

Optional Add-On Height Section				8004T12	728.47

Ladder Scaffolding Supports

Also known as ladder jacks, these supports convert two extension or straight ladders into a scaffold. Use on ladders with round or D-rungs. Supports attach to three rungs and accept planks up to 18″ wide. Eight adjustment notches let you choose the angle. Capacity is 500 lbs. per pair.

Note: Ladders and planks must have a minimum 250-lb. capacity.

8162T24 ..... **Pair** $164.80

Aluminum Extension Planks

Plank Shown Partially Extended

Ideal for use with ladder jacks, trestle ladders, and walkways, adjust the length of these planks in 12″ increments. Made of aluminum with a ribbed surface for slip resistance. They have a spring-set lock to secure plank when extended. Automatic stops prevent overextending, and end flanges maintain rigidity. Capacity is 250 lbs.

Min. Lg.	Max. Lg.	Ht.	Wd.		
6′	9′	2″	14″	7947T41	$217.15

10′	17′	2″	14″	7947T43	357.74

Steel Adjustable End-Frame Scaffolds

Base Section with Guardrail and Toeboard Kit

Even if your surface isn't level, your scaffold can be. The end frames adjust independently so each side can be a different height. Scaffolds are steel with a yellow finish and have spring-loaded pins to change the height in 4″ increments. Meet ANSI A10.8 and OSHA requirements.

Base Sections— Base sections include a 28½″ wide plywood plank. Positioning guides hold the plank within the frame. Maximum plank height is 6′4″. Sections roll on four locking swivel casters; install base plates (sold separately) when used on stairs. Capacity is 1,000 lbs.; add-on height sections decrease capacity.

Add-On Height Sections— One add-on plus a base section has a capacity of 850 lbs.; two add-ons plus a base section has a capacity of 700 lbs. Do not stack more than two add-ons per base section. ***Guardrail/toeboard kits*** are required by OSHA when add-on height sections are used. Kits include 40″ high guardrails and 4″ high toeboards. ***Outriggers*** are required by OSHA when add-on height sections are used. They extend the base by 20″ per side. Come with four additional locking swivel casters.

Base Plate— When scaffold is used on stairs, casters should be replaced with 4⅝″×4⅝″ base plates (sold individually).

Note: Before erecting scaffolds, check federal, state, and local codes.

Planks for Steel Scaffolds

Hooks with a 2″ opening at each end secure planks to end frames. Rungs on the underside are for use as hand grips. Capacity is 75 lbs. per sq. ft. of plank area. Meet ANSI A10.8 and OSHA requirements.

Aluminum planks have a perforated surface for slip resistance and to reduce debris buildup. End hooks are offset to allow for continuous planking on large scaffolds.

Plywood planks have a 1/2″ thick plywood deck with an aluminum frame.

Aluminum Scaffolds

Reach the height you need with these lightweight, corrosion-resistant scaffolds. All hardware is included. Each plank is rated at 25 lbs. per sq. ft.; the maximum scaffold capacity is 500 lbs. Meet ANSI A10.8 and OSHA requirements.

Base Sections— Consist of two end frames with threaded adjustable legs, horizontal and diagonal braces, and one plywood plank with aluminum I-beam side rails. Sections fold for storage and roll on four locking swivel casters.

Add-On Height Sections— Stack on base sections for additional height. They do not fold. You can stack up to two add-on sections on each base section. *Guardrails, toeboards,* and *outriggers* are required by OSHA when add-on sections are used. ***Guardrail kits*** include a 42″ high guardrail with midrail. ***Toeboard kits*** provide a 4″ high toeboard on all four sides. ***Adjustable outrigger*** fits both scaffold base sections listed. Legs have swivel shoes and adjust from 12″ to 66″ to extend the overall base width for stability.

Note: Before erecting scaffolds or adding additional sections, check federal, state, and local codes.

Aluminum Stages, Guardrails, and Toeboards

Create catwalks, bridges, gangways, and mezzanines by combining these stages, guardrails, and toeboards. They also work well between trestles, ladder jacks, and ladder scaffolding supports. All hardware is included. Meet ANSI A10.8 and OSHA requirements.

Stages— Have heavy duty aluminum construction and a slip-resistant surface for sure footing. Vinyl caps on the ends eliminate sharp edges and act as hand grips when moving the stages.

Guardrails and ***Toeboards—*** Mount to either side of the stage. Guardrails are made of aluminum tubing and come with midrails and vertical posts. You can mount them so the upper rails are 38″ to 42″ above the stage surface. Toeboards are 3½″ high and clamp to guardrail posts.

Note: Before erecting stages and guardrails, check federal, state, and local codes.

Forklift Cages

Transform your forklift into an elevated work platform. A chain secures the cage to the mast of your forklift and a backguard protects you from moving parts. Meet ANSI B56.1.

(A) Plastic Cage with Chain Gate— Made of nonconductive polyethylene, so it's perfect for electrical tasks. Cage has two chains on the front that form the gate, a nonskid platform, 42″ high solid plastic walls, and a molded-in tool tray. Color is yellow. Cage also has an 84″ high backguard to meet CAL-OSHA requirements. Fasteners included.

(B) Steel Cage with Chain Gate and Casters— Has two chains on the front that form the gate and four swivel casters for mobility. Cage has an 84″ high backguard to meet CAL-OSHA requirements and a platform with antiskid strips for slip resistance. Includes 42″ high steel tubing guardrails with midrails, 4″ high toeboards, and a tool tray. Cage has a yellow finish. Shipped unassembled (fasteners included).

(C) Steel Cages with Swing Gate— Gate opens inward and outward. Platforms have a diamond plate surface for slip resistance. Cages have a 66″ high backguard; those sold in California have an 84″ high backguard to meet CAL-OSHA requirements. Include 42″ high steel tubing guardrails with midrails, 4″ high toeboards, and a fork lock to secure cage. They also have two attachment points for fall restraints. Cages have a gray finish. Shipped assembled. *Optional swivel casters* (sold individually) can be added for mobility.

Antislip Step Bars

Ideal for use as ladder rungs, these step bars have a serrated surface for slip resistance. Cut bars to size with a metal-cutting saw; maximum cut length is 24″.

Bars up to 18″ long have a 540-lb. capacity; bars 18″ to 24″ have a 250-lb. capacity. All step bar lengths must be welded at each end with welds able to support the rated capacity.

Telescoping Ladder Support Posts

Add safety and convenience to your wall and tank ladders. Posts are 1½″ square, extend 42″ above the ladder top, and lock in place to guide you and provide stability. A release lever lets you lower the post when it's not in use. Posts fit ¾″ to 1¼″ diameter rungs on ladders with up to 14″ center-to-center rung spacing. They mount to the top two rungs (hardware included).

Wall-Mount Walk-Through Steel Dock Ladders

Our highest capacity dock ladders—they're made of steel pipe with a yellow finish. Walk-through is 18″ wide, and the handrails have 4½″ long vinyl handgrips. Rungs have a smooth surface. Ladders are offset 8″ for toe clearance.

They mount to the wall with brackets. Brackets have one 3/8″ dia. mounting hole (fasteners not included). Ladders with 2′2″ to 4′2″ top rung height have four mounting brackets; 5′2″ to 8′2″ height to top rung have six mounting brackets; and 9′2″ height to top rung have eight mounting brackets. Capacity is 500 lbs. Meet OSHA requirements.

Wall-Mount Side-Step Steel Dock Ladders

Ladders have serrated rungs for slip resistance and four smooth rungs at the top for hand grips. Ladders are offset 6″ for toe clearance. They mount to the wall with welded-on brackets. Brackets have one 3/8″ dia. mounting hole (fasteners not included). Ladders with a maximum climbing height of 1′5″ to 4′5″ have four mounting brackets; all others have six brackets. Color is gray. Capacity is 300 lbs. Meet OSHA requirements.

Dock-Mount Walk-Through Ladders

(1) Steel Ladders— Have serrated rungs for maximum slip resistance and are offset 6″ for toe clearance. Walk-through is 19″ wide. Ladders have welded-on mounting brackets; the two at the top have two 3/8″ dia. mounting holes and the two at the bottom have one 3/8″ dia. mounting hole (fasteners not included). Capacity is 300 lbs. Meet OSHA requirements. Optional safety chain stretches across ladder to deter access.

(2) Aluminum Ladders— Have serrated rungs for maximum slip resistance and are offset 7″ for toe clearance. Walk-through is 18″ wide. All have welded-on mounting brackets with two 9/16″ dia. mounting holes (fasteners not included). Ladders up to 5′6″ height to top rung have four mounting brackets; all others have six mounting brackets. Capacity is 300 lbs. Meet OSHA requirements.

(3) Flip-Up Aluminum Ladders— Flip up or down in seconds and easily secure with a retainer pin (included). They have ribbed rungs for slip resistance. Walk-through is 15 1/4″ wide. Ladders have two mounting brackets each with two 1/2″ dia. mounting holes (fasteners not included). Capacity is 400 lbs.

Offset-Rung Wall-Mount Steel Ladders

Rungs are offset and when used with the included mounting brackets you get 7″ of toe clearance to meet OSHA requirements. Made of galvanized steel, these ladders have dimpled rungs for slip resistance.

Mounting brackets have one 13/32″ × 3/4″ slotted hole (fasteners not included). The 4-ft. ladder has four mounting brackets; all others have six mounting brackets. Ladders have built-in connectors so they can be connected to each other to create the ladder height you need. Capacity is 250 lbs.

Note: The first rung of the ladder cannot be more than 12″ from the floor.

Versatile-Mount Steel Ladders

Ladder with Mounting Bracket

Mount these galvanized steel ladders to walls, tanks, and pipes or connect multiple ladders for more height. They have knurled rungs for slip resistance. Ladders can be mounted or connected to another ladder with a mounting bracket (sold separately). Capacity is 300 lbs. Meet ANSI A14.3.

Mounting bracket provides 7″ for toe clearance to meet OSHA requirements. It must be drilled to the desired bolt hole size for mounting to a surface (fasteners not included) so you can adapt it to your needs. For instance, use U-bolts (not included) to connect ladder to pipes. Hardware is included to mount the bracket to the ladder. Bracket is galvanized steel. Each ladder requires two brackets (one for the top and one for the bottom). If connecting multiple ladders, one mounting bracket is required for each additional ladder section.

Wall-Mount Ladders

With Walk-Through Extension

Metal ladders have welded construction; fiberglass are constructed of high-strength fiberglass. All have wall-mounting brackets that offset the ladder 7″ for toe clearance and two floor-mounting brackets. Mounting brackets have one 7/16″ dia. hole (fasteners not included). The first rung is 9″ off the floor. Meet OSHA requirements.

Steel and ***Type 304 Stainless Steel Ladders—*** Have serrated rungs for slip resistance. The 8- and 10-ft. ladders come with two wall-mounting brackets; all others come with four. Steel ladders have a gray finish. Capacity is 350 lbs. *Ladders with walk-through extension* have a 21″ wide walk-through with handrails that extend 42″.

Aluminum Ladders— Have serrated rungs for slip resistance. The 8-ft. ladder comes with two wall-mounting brackets; the 10- and 12-ft. come with four; and the 14- and 16-ft. come with six. Capacity is 350 lbs. *Ladders with walk-through extension* have a 21″ wide walk-through with handrails that extend 42″.

Fiberglass Ladders— Have rungs embedded with grit for slip resistance. The 8-, 10-, and 12-ft. ladders come with four wall-mounting brackets; all others come with six. Color is yellow. Capacity is 500 lbs. *Ladders with walk-through extension* have an 18″ wide walk-through with handrails that extend 42″.

Steel Ladders with Welded-On Cage

A cage is already welded to these ladders for quick assembly. Plus, ladders come in sections no longer than 7 feet for easy handling. Bolt ladder sections together end-to-end (fasteners included). Cages start 7 feet above the bottom of the ladder and extend beyond the top rung by 42″. Walk-through is 24″ wide and has a 42″ high handrail. Inside dimensions of the cage are 30″ Wd.×27″ Dp.; the flared bottom is 36½″ Wd.×30″ Dp.

Ladders have ribbed rungs and a gray finish. They also include welded-on mounting brackets with one 9/16″ dia. hole (fasteners not included). Mounting brackets offset the ladder 7″ for toe clearance. Capacity is 300 lbs. Meet ANSI A14.3 and OSHA requirements.

Optional security cover prevents unauthorized access to ladders. Can be welded or bolted on (holes must be drilled) to open from either side (fasteners not included). Cover is made of steel with a gray finish and is 6′ Ht.×19½″ Wd.×6½″ Dp. The hasp accepts a padlock (not included) with a 3/8″ or smaller shackle diameter.

With Optional Security Cover

Steel Modular Cages

Create the cage you need. OSHA requires a ladder cage when ladder heights are greater than 20 feet from the floor to the top rung. Meet ANSI A14.3 and OSHA requirements.

Each section is fully welded and mounts to the side rails of stationary ladders (not to walls or other cages) that have an overall width of 16″ to 20″. Inside dimensions for the top section and mid/top sections are 30″ Wd.×30″ Dp.; the flared bottom section is 38″×34″ with a 38″ Wd.×38″ Dp. base. All sections have a gray finish and attach with included clamps that accommodate side rails 2″ wide or less. OSHA requires cages to start between 7 and 8 feet from the ground.

Top section is required for walk-through applications and should extend 42″ above the top rung. ***Mid/top sections*** extend the length of the cage, or can act as a top section for hatch opening use. ***Bottom section*** flares out for entry and exit.

Note: At least one top or mid/top section and one flared bottom section are required for a complete assembly.

5′ Top Section for Walk-Through	8271T11	$248.20
2′ Mid/Top Section	8271T14	191.44

Fold-and-Carry Work Platforms

Take your platform anywhere. Folding legs and a carrying handle make this lightweight platform easy to transport. Legs fold up and under the platform and lock in place with safety clips. Frame is aluminum; deck is plywood with a slip-resistant coating. One 2⅛″ Dp. step at each end lets you climb up from either side. Shipped assembled.

Steel Ladders

Ladders with Cage

Made of galvanized steel, these ladders include a cage for added safety. Cage is unassembled (assembly hardware, connecting kit, and mounting brackets are included) for flexibility in mounting and lower freight costs.

Cages start between 7 and 8 feet from the ground and extend beyond the highest rung by 42″ with a walk-through exit. Inside dimensions of cage are 27″ Wd.×28½″ Dp.; flared bottom is 35″ Wd.×32½″ Dp. Ladders resist corrosion and weather. They have knurled rungs. Capacity is 300 lbs. Meet ANSI A14.3 and OSHA requirements. OSHA requires a cage when the distance from the floor to the top rung is more than 20 feet.

Optional security cover prevents unauthorized access. It covers five rungs and is secured by two hooks at the top and a U-clamp at the bottom. It is galvanized steel and is 5′6″ Ht.×19½″ Wd.×2″ Dp. Hasp accepts a padlock (not included) with a 3/8″ or smaller shackle diameter.

Ladders without Cage

Connect different sized ladders for the perfect height. Use the connecting kit (sold separately) to connect ladders with no drilling required. Mount to the wall with the mounting bracket kit (sold separately). Ladders are galvanized steel to resist corrosion and weathering. They have knurled rungs. Capacity is 300 lbs. Meet ANSI A14.3 and OSHA requirements. OSHA requires a cage when the distance from the floor to the top rung is more than 20 feet.

Connecting kit includes splice plates and fasteners. Order one connecting kit for each additional ladder section.

Mounting bracket kit comes with wall-mounting brackets that offset the ladder 7″ for toe clearance (fasteners for mounting the brackets to the ladder are included). The brackets have two 13/32″×¾″ slots for mounting to the wall (fasteners not included). Two kits are recommended for 4- to 8-ft. ladders; three kits are recommended for the 10-ft. ladder.

Optional walk-through extension is 24″ wide with handrails that extend 42″.

Adjustable-Height Steel Work Platforms

1

2

3

4

Adjustable leg screws raise and lower platform height.

(1) One-Step Platforms with Serrated Surface— Legs have 2½″ dia. rubber pads and are on the outside of the platform. Have a gray finish. Capacity is 800 lbs. Meet OSHA requirements.

(2) One-Step Platforms with Matting Surface— A vinyl sponge matting covers the solid surface of the platform to provide comfort and reduce fatigue. Legs have rubber tips. All have a safety-yellow finish and blue matting. Capacity is 500 lbs.

(3&4) Two-Step Platforms with Serrated Surface— Gain more height with these two-step platforms.

Style 3 has a bottom step that adjusts from 6″ to 10½″ when the overall height is adjusted, making the space between the floor and the first step greater than the space between the two steps. Steps are 12″ deep. Legs have rubber tips. Platforms have a safety yellow finish. Capacity is 500 lbs.

Style 4 allows you to maintain equal rise between steps when overall height is adjusted. Therefore, the distance between the floor and the first step is always the same as the distance between the first step and the second step to meet OSHA requirements. Bottom step is 19″ deep; top step is 12″ deep. Platforms have a gray finish. Capacity is 800 lbs.

Style 9

Get easy access to elevated areas. Plus, a large platform allows plenty of space for working. Platform and steps are serrated for maximum slip resistance and to allow dirt and debris to fall through. Steps are 33⅛″ Wd.×9½″ Dp. and adjust for equal vertical spacing. Legs and handrails are made of 1¼″ dia. tubing. Platforms have a gray finish. Shipped unassembled. Capacity is 500 lbs. Meet OSHA requirements.

Styles 3, 4, 6, and *7* have side handrails that mount on either side.

Also Available: Other platform sizes. Please ask for 8031T999 and specify style number, platform size, and platform height.

Modular Stackable Work Platforms

Stack platforms vertically and connect them horizontally to create various sizes and configurations. No tools required. Made of chemical-resistant, high-density black polyethylene. Platforms and antifatigue mats have an open-grid design that allows liquids to drain and debris to fall through.

Base platforms are 2⅞″ high and have rubber feet to keep them stable. To connect multiple platforms side-by-side or end-to-end, use two horizontal connectors (sold separately) on each joining side.

Additional height platforms are 2⅝″ high. You can stack up to five additional height platforms on top of a base platform for a total height of 16″. Additional height platforms come with vertical connectors—four for the 3- and 5½-ft. long platforms; eight for the 8-ft. long platforms.

Antifatigue mats enhance comfort and safety. Made of rubber, they fit snugly on top of the platform and stay in place with the included lock plugs. *Black mats* are ½″ thick. *Black mats with yellow border* are ⅞″ thick and comply with OSHA 29 CFR.

Build-Your-Own Work Platforms

Configure the work platform you need. All work platforms should be secured to a supporting surface. Meet OSHA requirements.

First, determine how high your work platform needs to be and choose the stairs that accommodate that height. Then, choose a platform based on the desired length. Next, choose platform supports that correspond to the height of your stairs—each end of the platform must be supported by one end support (or stairs for aluminum). Finally, choose handrails for the stairs and platform.

Aluminum— Lightweight and corrosion resistant, they're made of aluminum and assemble with included stainless steel fasteners. Capacity is 50 lbs. per sq. ft. ***Stairs*** are 28½″ wide and have a 45° climbing angle. Steps are 27″ Wd.×9½″ Dp. and are serrated for slip resistance. All units have one 9⁄16″ dia. hole on each side for securing to the floor (fasteners not included). ***Stair handrails*** are 32″ high. ***Platforms*** are drilled for assembly and perforated for slip resistance. ***Platform handrails*** are 42″ high and have 5″ high built-in toeboards. ***Platform supports*** are required to support each end of a platform when not using stairs. They have one 9⁄16″ dia. hole in each leg for securing to the floor (fasteners not included). ***T- and L-adapter*** attaches one platform to the side of another platform to create a "T" or "L" shape. ***Stair adapter*** connects the stairs to the platform when using a handrail on only one side of the stairs.

Fiberglass— Nonconductive with better corrosion resistance than aluminum, they're made of fiberglass and assemble with included stainless steel fasteners. Capacity is 60 lbs. per sq. ft. ***Stairs*** are 30″ wide and have a 45° climbing angle. Steps are 25¾″ Wd.×10½″ Dp. and have a grit surface for slip resistance. All units have one 9⁄16″ dia. hole on each side for securing to the floor (fasteners not included). ***Stair handrails*** are 32″ high. ***Platforms*** are drilled for assembly and perforated for slip resistance. ***Platform handrails*** are 42″ high and have 4″ high built-in toeboards. ***Platform supports*** are required to support each end of a platform. They have one 9⁄16″ dia. hole in each leg for securing to the floor (fasteners not included).

Note: Before erecting platforms, check federal, state, and local codes.

Crossover Bridges

Standard *Space Saver*

Easily walk over conveyors, machines, and pipes. Bridges have 24″ wide steps and 42″ high handrails. Platforms have a 5″ high toeboard on each side. Legs each have one 5/8″ dia. hole for floor mounting (fasteners not included). Shipped unassembled. Capacity is 500 lbs. Meet OSHA requirements. To calculate the platform height add 1″ to the clearance height (B).

Steel bridges are gray.

Standard Crossover Bridges— Have a 50° climbing angle and 7 3/8″ deep steps.

Space-Saver Crossover Bridges— Have a steeper stairway than standard crossover bridges, so they don't extend as far. Climbing angle is 70° and steps are 4″ deep.

Note: Before erecting crossover bridges, check federal, state, and local codes.

To Order: Please specify serrated or diamond plate steps and platforms. *Serrated* offer excellent slip resistance and an open-grid design that allows dirt and liquids to fall through. *Diamond-plate* also provide slip resistance, but do not allow anything to fall through.

Steel Adjustable-Height Stairways

Adjustable mounting brackets allow these stairways to accommodate slight differences in landing heights. Mount from 36° to 42°.

Stairways are galvanized steel with 33 1/2″ high steel handrails. Handrails have a safety-yellow finish. Steps are 8 3/4″ deep and perforated for slip resistance. Stairways include two floor mounting brackets, each with two 1/2″ dia. holes. They also include two landing mounting brackets, each with four 11/32″ dia. holes, two 11/32″ × 3/4″ slots, and two 11/32″ × 1/2″ slots (fasteners not included).

Shipped unassembled. Meet OSHA requirements for fixed stairways.

Note: Before erecting stairways, check federal, state, and local codes.

Offset-Step Space-Saver Stairways

Taking up only as much space as a ladder, these stairways have a 68° climbing angle and offset steps for a comfortable forward descent.

Stairways are steel with a safety-yellow finish. Steps are 9″ Wd. × 10 1/2″ Dp. and are perforated for slip resistance. Handrails are 42″ high. Stairways have one floor mounting plate and one landing mounting plate; each has one 9/16″ dia. hole and one 9/16″ × 1″ slot (fasteners not included). Shipped assembled, except handrails (fasteners included). Meet OSHA requirement 1910.25 for offset steps.

Note: Before erecting stairways, check federal, state, and local codes.

Also Available: Landing heights (dimension A) up to 20 feet. Please ask for 7946T9 and specify height.

Steel Space-Saver Stairways

Get access to pits, trenches, wells, and other tight spaces. Also known as ship's ladders, these galvanized steel stairways have a 75° climbing angle to fit in spaces others won't. Steps are perforated for slip resistance. The top step is 24″ Wd. × 11 7/8″ Dp.; lower steps are 24″ Wd. × 7 1/4″ Dp. Handrails are steel with a safety-yellow finish and extend 42″ beyond the top landing for a walk-through exit. Stairways have two floor mounting brackets, each with one 5/8″ dia. hole; also have two landing mounting brackets, each with four 13/32″ × 3/4″ slots (fasteners not included). Shipped unassembled. Meet OSHA requirements for fixed ladders.

Note: Before erecting stairways, check federal, state, and local codes.

About Lubricants, Grease, and Oil

	Features/Applications	Pages
Multipurpose Lubricants	Easy to apply, these lubricants penetrate tight spots that grease and oil can't reach. Use them to free and lubricate moving parts and equipment.	2164-2166
Coating Lubricants	Select Petroleum Jelly to protect metal parts and equipment surfaces, O-Ring Lubricants to reduce friction between mating parts, and Mold-Release Lubricants to protect and free molded parts.	2167-2168
Antiseize Lubricants	A combination of solid lubricants, grease, and anticorrosion additives, these lubricants prevent the sticking or jamming as well as corrosion that can occur in metal-to-metal contact.	2168-2170
Grease	Compared to penetrating lubricants and oil, grease adheres better and lasts longer so you don't have to apply it as often. Additives such as PTFE and molybdenum disulfide improve performance.	2170-2175
Oil	Oil is typically used where it can be circulated through a piece of equipment or machinery. Choose oil when spraying or splashing are contained, as in a gearbox or engine compartment.	2174-2180

Lubricants

These products are compliant under all state VOC rules in effect on October 1, 2010.

LPS, CRC 3-36, 3-in-1, Sprayon Rust Breaker Penetrant, and ***Starrett M1*** are NSF registered H2 for applications with no possibility of food contact. ***Aerosols*** have a male stem except for Dow Corning Molykote and Loctite Silicone, which have a female stem.

Biodegradable Lubricants

Environmentally nontoxic, these lubricants boast a natural lubricity that outperforms petroleum-based oils. Use them anywhere you need a thin, protective film. Temperature range is –22° to +295°F. The aerosol has a female stem.

These products are compliant under all state VOC rules in effect on October 1, 2010.

Size	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.
11-oz. Aerosol	12	1475K41	$15.71	$14.04

5-gal. Container	1	1475K45	——	184.34

Graphite Lubricants

Made with graphite, these lubricants are capable of conducting heat and electricity. ***Dry film*** quickly evaporates, leaving a dry coating that won't attract dirt. These products are compliant under all state VOC rules in effect on October 1, 2010.

Dry Film— Aerosol has a male stem.

High-Temperature Dry Film— NSF registered H2 for applications with no possibility of food contact. Aerosol stem is female.

Brush-On Dry Film— This extremely durable lubricant resists moisture. Apply with a brush.

Sprayable Dry Film— Thin enough to be applied with a spray gun, this lubricant can cover a large area quickly. For HVLP spray guns, see 77745T and 9383T on page 2138.

No-Drip Stick— No drips or spills. Just apply to a hot surface and let it melt. Size is 2" Dia. x 10" Lg.

Powdered— Small particles fit into hard-to-reach spots. Use 1291K51 dry. Use 1285K11, 1285K25, and 1285K13 dry or mixed with oil or grease.

Flaked— Large particles conduct more heat and electricity than powders. Use dry or mixed with oil or grease.

Food-Grade Lubricants

Choose these lubricants for food-processing and food-handling applications. They're NSF registered H1 (except for 3M, which complies with FDA specification 21 CFR 178.3570) for applications with incidental food contact. The aerosols have a male stem except for 4328T58, 1155K24, and 8740T11, which have a female stem. These products are compliant under all state VOC rules in effect on October 1, 2010.

Silicone Lubricants— These lubricants retain their consistency and thickness to reduce friction as they lubricate. ***3M*** is also moisture resistant and can be used as an effective mold release.

Lubricants with PTFE— The PTFE nonstick coating reduces friction as it lubricates. ***Dry film*** quickly evaporates, leaving a dry coating that won't attract dirt.

Equipment Wipe-Down Lubricants— Great for lubricating equipment between processes, these lubricants resist rust and corrosion without solvent odors. Temperature range is 10° to 150°F for 8740T11; 0° to 370°F for 8740T33.

Biodegradable Lubricants— Environmentally nontoxic, these lubricants boast a natural lubricity that outperforms petroleum-based oils.

Moisture-Free Lanolin Lubricant

Pure Grade AAA lanolin, this clean, odorless, moisture-free lubricant stops rust. Use it to coat gauges and heat-treated parts, which are prone to rusting. It's also good for lubricating while tapping metals and plastics, and can even be used as an antiseize. Furnished in a 2-oz. tube. Package quantity is 12.

This product is compliant under all state VOC rules in effect on October 1, 2010. *Note:* Not rated for temperature.

10135K11 ..... **Each** Partial Pkg. $7.55 Full Pkg. $6.84

For information about lubricants, grease, and oil, see page 2164.

Extreme-Pressure Moly Lubricants

Containing moly (molybdenum disulfide), these lubricants are formulated to handle your high pressure applications. These products are compliant under all state VOC rules in effect on October 1, 2010.

Dri Slide— A combination of moly and graphite, these lubricants dry to a gray film that resists rust and corrosion. They repel dirt and dust, and won't harm steel, paint, or plastic. Aerosols have a male stem.

Dow Corning Molykote 321— This moly and graphite lubricant dries to a dark gray film that won't attract dirt. Use on tools, gears, taps, drills, and splines. Aerosol stem is female.

Dow Corning Molykote Z Moly-Powder— Rub this dry lubricant on metal surfaces to prevent corrosion, galling, and seizing. Color is black. Meets MIL-M-7866.

Dry Film— Quickly evaporates, leaving a dark gray coating that won't attract dirt. Use it on slides and hinges, and as a thread lubricant. Aerosol stem is female.

Marine Grade— Reduce the effects of water and salt spray with these water-resistant lubricants. They form a black shield that prevents corrosion, galling, and heat freeze on open gears, open spur gears, marine transmission gears, and other exposed metal parts. Aerosol has a male stem.

Extreme-Temperature Ceramic Lubricants

In applications where graphite and molybdenum disulfide can't take the heat, choose these ceramic lubricants, which withstand a maximum temperature of 1562° F in oxidizing environments and 3272° F in vacuum environments. Made of white, high-purity boron nitride crystals, they also form an electrical insulating barrier and are effective as a mold release agent. Aerosol has a male stem. 1-gal. container is water based. These products are compliant under all state VOC rules in effect on October 1, 2010.

Size	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.
13-oz. Aerosol	4	**10515K35**	$34.94	$31.86
1-gal. Container	1	**10515K68**	____	111.72

Nonstaining Powder Lubricant

This mica lubricant leaves behind a thin, stain-free white coating that is barely visible compared to other lubricants such as graphite and molybdenum disulfide. Use it on metal, plastic, rubber, and wood surfaces. Temperature range is –75° to +700° F. This product is compliant under all state VOC rules in effect on October 1, 2010.

Size	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.
1/8-oz. Tube	12	**1667K12**	$2.92	$2.60

Open Gear, Wire Rope, and Cable Lubricant

Guard against rust and displace moisture with this black molybdenum disulfide lubricant. It penetrates the pores of metal surfaces and adheres under high speeds. Stem is female. Temp. range is 14° to 240° F. This product is compliant under all state VOC rules in effect on October 1, 2010.

Size	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.
12-oz. Aerosol	12	**1073K74**	$9.85	$8.89

Chain Lubricants

Protect your chains and moving metal parts, such as assembly lines, to avoid costly downtime. Aerosols have a male stem, unless noted. These products are compliant under all state VOC rules in effect on October 1, 2010.

Dow Corning Molykote C-40— Lubricates in high-temperature applications, including oven chains. This low-viscosity fluid evaporates to leave a dry, black graphite film. Apply at temperatures up to 250° F. NSF registered H2 for applications with no possibility of food contact.

DuPont Teflon® Lubricant with Moly— Goes on wet to penetrate, then dries to a white fluoropolymer wax film. It contains molybdenum disulfide, provides rust and corrosion protection, repels dirt, and is safe for use with O-rings.

Standard— This amber-colored, oil-like film repels dirt.

With Moly— Reduce stress of startups with this lubricant, that contains molybdenum disulfide. It also provides protection against corrosion. Color is dark gray.

Water Resistant— Highly viscous, these lubricants cling to wet surfaces and displace water for excellent rust and corrosion protection. Color is amber. NSF registered H2 for applications with no possibility of food contact.

For Ovens— Formulated with heat-resistant graphite, these lubricants protect oven-chain pins and bushings from baking heat. Use in kilns, bakery ovens, and industrial ovens. Color is gray/black. NSF registered H2 for applications with no possibility of food contact. *Oil Based—* Apply at temperatures up to 140° F. *Water Based—* No need to cool down the oven, this lubricant contains no combustible oils so it can be applied at temperatures up to 450° F.

Food Grade— These lubricants contain additives that resist oxidation. NSF registered H1 for applications with incidental food contact. 6159K75 and K77 are amber; 2923K27 and K29 are white.

Water-Resistant Food Grade— Highly viscous, this lubricant clings to wet surfaces and displaces water for excellent rust and corrosion protection. Color is amber. NSF registered H1 and FDA compliant with specification 21 CFR 178.3570 for applications with incidental food contact.

Direct-Contact Food Grade— NSF registered H3 for direct food-contact applications. Color is clear.

Extra-Thick Food Grade— Formulated extra thick to stay on the chain longer even as it moves, this amber-colored lubricant contains additives that resist oxidation. NSF registered H1 for applications with incidental food contact.

For information about lubricants, grease, and oil, see page 2164.

Control Cable Lubricating Kit

Lubricate your 3/16″ to 3/8″ dia. shrouded control cables without removing them. This kit includes 6.25-oz. of lubricant and a unique tool that displaces moisture to clean and lubricate in seconds.

To use, attach tool to either end of your cable and then tighten it around the cable. Insert the aerosol extension tube into the tool and spray. Temperature range is –20° to +250°F. This product is compliant under all state VOC rules in effect on October 1, 2010.

Lubricating Kit	1437K1	$22.20
Replacement 6.25-oz. Aerosol	1437K3	7.33

Woodworking Lubricants

The absence of silicone ensures that these lubricants won't stain or affect the paint or finishes you apply to wood. Both are 10.75-oz. aerosol with a female stem. These products are compliant under all state VOC rules in effect on October 1, 2010.

Blade and Bit Lubricant— Reduces cutting friction and resin buildup on saw blades, drill bits, and knives. Temperature range is –67° to +475°F.

Table- and Tool-Surface Lubricant— Reduces sliding friction on metal, laminate, and plastic surfaces. Temperature range is –40° to +135°F.

	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.
Blade and Bit	12	11615K44	$17.65	$14.96
Table and Tool Surface	12	11615K66	17.28	14.64

O-Ring Lubricants

Apply directly to O-rings to prevent drying and cracking, which will extend O-ring service life. These products are compliant under all state VOC rules in effect on October 1, 2010.

Dow Corning Molykote 55— For use on most rubbers. Not recommended for use on silicone rubber, polycarbonate, or ABS thermoplastic.

Food Grade— Compatible with most O-rings and seals. NSF registered H1 for applications with incidental food contact.

Barium Based— Use with silicone rubber O-rings and seals in open systems.

Silicone— Use with virtually any rubber polymer including Buna-N and neoprene.

Size	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.
Dow Corning Molykote 55 *(–85° to +350°F)*				
5.3-oz. Tube	12	1325K54	$24.97	$22.66

Barium Based *(0° to +300°F)*				
4-oz. Tube	24	9463K23	15.71	13.75
Silicone *(–65° to +400°F)*				
2-oz. Tube	12	9463K33	20.52	17.96

Dow Corning Molykote Assembly Lubricants

Choose these lubricants to reduce torque on metal parts, such as threaded fasteners, during assembly work. They also reduce friction while breaking in new or rebuilt equipment, such as gears and bearings. These products are compliant under all state VOC rules in effect on October 1, 2010.

Dow Corning Molykote G-n— Mineral oil and molybdenum disulfide are blended with white solid lubricants. Color is dark gray. Aerosol has a female stem.

Dow Corning Molykote D— Mineral oil is blended with white solid lubricants. Color is white, which provides a clean appearance where thin-film applications are not possible.

Size	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.
Dow Corning Molykote G-n *(0° to +750°F)*				
2.8-oz. Tube	12	1204K33	$9.95	$9.03

Wire and Cable Pulling Lubricants

Get a smooth, consistent pull while decreasing the chance of damage to your insulation. These products are compliant under all state VOC rules in effect on October 1, 2010. They are also UL listed.

Standard— Good for most surfaces except composite rubber, these lubricants are easy to clean up. They're specially formulated to reduce tension in high-stress electrical and communications applications.

With PTFE— The superior lubricity of PTFE handles the most difficult pull.

Size	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.
Standard *(28° to 180°F)*				
32-oz. Squeeze Bottle	12	7431K36	$8.29	$7.37

Leather Lubricant and Conditioners

These products are compliant under all state VOC rules in effect on October 1, 2010.

Lubricant— Also known as castor oil, this nondrying oil lubricates and preserves leather.

Conditioners— Also known as neatsfoot oil, these oils recondition, waterproof, and preserve leather.

Size	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.
Lubricant *(0° to 200°F)*				
1-gal. Container	6	1025K11	$36.28	$32.50
Conditioners *(Not rated for temperature)*

Mold Maintenance Products

These products are compliant under all state VOC rules in effect on October 1, 2010.

Cleaner— Spray this cleaner on all types of metal molds to eliminate moisture, dirt, oils, and release agents. Stem is male.

Corrosion Inhibitor— Apply a thin coat for protection against rust and corrosion. Stem is female.

Silicone Remover— Simply mix with water to clear all traces of silicone from molded parts.

Polish— Removes oxidation, stains, and residual materials, leaving a high luster on tooling surfaces.

Size	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.
Cleaner *(0° to 400°F)*				
16-oz. Aerosol	12	3311K15	$5.84	$5.26

5-lb. Container	4	15535K23	87.12	79.20

For information about lubricants, grease, and oil, see page 2164.

Mold-Release Lubricants

Apply these lubricants prior to molding to facilitate removal. Aerosols have a male stem, unless noted. These products are compliant under all state VOC rules in effect on October 1, 2010.

Dow Corning Molykote 316— Suitable for use on metal food and beverage equipment, this lubricant is NSF registered H1 for applications with incidental food contact. Stem is female.

Dow Corning Molykote 7— An excellent release agent for plastic and metal surfaces, these lubricants also work well as a mold break-in treatment. NSF Standard 51 certified for use in food processing equipment and Standard 61 for use in drinking (potable) water applications. FDA compliant with specification 21 CFR 175.300 for applications with incidental food contact.

Multipurpose— Use these water-based lubricants on acrylic, cellulose, ABS resin, polystyrene, rubber, melamine, and metal.

For Urethane and Styrene— This lubricant protects ultra-sensitive materials such as urethane and styrene from chemicals.

For Rubber— This hydrocarbon-based lubricant forms a semipermanent bond with molds so you can apply it less frequently. It's suitable for all types of elastomers (synthetic rubbers) including EPDM, nitrile, and neoprene. Stem is female.

Dry Film with Moly— Containing moly (molybdenum disulfide), this lubricant provides excellent rust protection. It quickly evaporates, leaving a dry coating that won't attract dirt.

Food Grade— For all plastic molding operations, including injection and compression molding. FDA compliant with specification 21 CFR 121.101 for applications with incidental food contact.

Size	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.
Dow Corning Molykote 316 *(–40° to +390°F)*

Paintable Mold-Release Lubricants

Post-finishing painting is possible when you use these lubricants. Apply prior to molding to facilitate removal and protect mold surface. Aerosols have a male stem, unless noted. These products are compliant under all state VOC rules in effect on October 1, 2010.

Honey Wax— This carnauba wax compound lets you release a mold several times before it needs to be reapplied. To apply, spread an even layer on the surface using the included sponge applicator or a clean cloth. Commonly used in the fiberglass industry.

For Epoxy— Synthetic and wax-based, this lubricant works well for epoxy, polyester, and phenolic molds.

For Thermosets— Release thermoset parts quickly and easily with this wax-based lubricant. Stem is female.

Dry Powder Zinc Stearate— Resists dust, making it good for thermoplastic parts.

Dry Film with PTFE— This PTFE lubricant won't transfer to finished parts and gives multiple releases per application. Suitable for most resins, elastomers (synthetic rubbers), urethane, and styrene.

Silicone— This nonstick lubricant is compatible with plastic, rubber, wax, moldable resins, and elastomers (synthetic rubbers).

Soybean Fluid— Also known as lecithin, this clear soybean fluid quickly and cleanly releases thermoplastic parts. NSF registered H2 for applications with no possibility of food contact.

Food Grade— These hydrocarbon-based lubricants comply with FDA specification 21 CFR 184.1400 (c) for incidental food contact. *With Lubricant for Ejector Pin* acts as a mold release agent and reduces friction in ejector pins and other moving parts. Complies with FDA specification 21 CFR 178.357 for incidental food contact.

Size	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.

Aerosol Spray Extensions

Extend the reach of your aerosol can by popping off the spray button and snapping on this extension. Both consist of a 16″ long steel probe with brass tip attached to a 24″ long nylon recoil hose. Compatible with all of the aerosol lubricants we offer.

For Aerosols with Male Stem	**1428K1**	$10.23
For Aerosols with Female Stem	**1428K2**	10.23

Antiseize Lubricants

Made of copper, graphite, and other additives, pick these lubricants for your general-purpose antiseize applications. These products are compliant under all state VOC rules in effect on October 1, 2010.

Bostik Never-Seez— Protects parts in high-pressure and corrosive environments. Meet MIL-A-907.

Dow Corning Molykote 1000— Resists corrosion and won't dry out.

Standard— Meet MIL-A-907E. *Aerosol* has a female stem. *Stick* allows no-mess application and measures 1⅜″ Dia. × 4¾″ Lg.

Marine Grade— Prevent corrosion in harsh marine environments. Meet MIL-PRF-907E.

Water-Resistant Antiseize Lubricants

High-moisture environments are no problem for these mineral oil-based antiseize lubricants, which also provide corrosion protection. These products are compliant under all state VOC rules in effect on October 1, 2010.

Food Grade— NSF registered H1 for applications with incidental food contact. Meets MIL-A-907E.

Aircraft Grade— Formulated to meet aircraft-grade military specification CID-A-A-59313, these lubricants are especially effective on aluminum.

Size	Color	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.
Food Grade *(–10° to +2300°F)*

1-lb. Container	Gray	6	**10105K43**	22.09	19.79

For information about lubricants, grease, and oil, see page 2164.

Corrosion-Resistant Antiseize Lubricants

These products are compliant under all state VOC rules in effect on October 1, 2010.

Aluminum lubricants contain aluminum and graphite for good corrosion resistance.

Loctite— Meet MIL-PRF-907E. Aerosol has a female stem.

Standard— Also contain copper. Meet MIL-A-907E. NSF registered H2 for applications with no possibility of food contact.

Stainless steel lubricants contain stainless steel, graphite, and aluminum for use in extremely corrosive environments.

Bostik Never-Seez— Meet MIL-A-907E.

Bostik Never-Seez Nuclear Grade— Specially formulated to meet the purity and performance requirements of the nuclear industry. Meets MIL-A-907.

High-Temperature Antiseize Lubricants

Able to withstand temperatures from –350° to +2987°F, these are the highest temperature antiseize lubricants we offer. All are made of a pure metallic lead powder combined with a petroleum lubricant. Great for sealing as well as high-pressure applications. These products are compliant under all state VOC rules in effect on October 1, 2010.

Size	Color	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.

Extreme-Pressure Moly Antiseize Lubricants

Formulated to take on your extreme-pressure applications, these lubricants contain moly (molybdenum disulfide). These products are compliant under all state VOC rules in effect on October 1, 2010.

Bostik Never-Seez Blue Moly— Also contain corrosion inhibitors to handle harsh environments.

Standard— Also contain graphite. Meet MIL-M-7866C.

Aircraft Grade— Great for stainless steel. Meets MIL-PRF-83483.

Marine Grade— Prevent corrosion in wet environments—even under water.

Size	Color	Pkg. Qty.		Each Partial Pkg.	Each Full Pkg.

Copper-Free Antiseize Lubricants

Copper can act as a catalyst in some chemical reactions—that's why we offer copper-free lubricants, which contain nickel, aluminum, and graphite. The presence of nickel makes these lubricants excellent for applications where dissimilar metals such as brass and steel are used together. These products are compliant under all state VOC rules in effect on October 1, 2010.

Standard— NSF registered H2 for applications with no possibility of food contact. Aerosol has a female stem. Meet MIL-A-907E.

Bostik Never-Seez Pure Nickel— Meet MIL-A-907.

Premium— Exceptionally smooth and easy to spread, this lubricant has finer nickel particles to fill and protect even the smallest imperfections in your metals. Meet MIL-A-907E.

Bostik Never-Seez Nuclear Grade— Specially formulated to meet the purity and performance requirements of the nuclear industry. Furnished with certified test reports. Meet MIL-A-907.

Nuclear Grade— Specially formulated to meet the purity and performance requirements of the nuclear industry. Furnished with certified test reports. NSF registered H2 for applications with no possibility of food contact. Meet MIL-PRF-907E.
